## Acknowledgements

---

Welcome to the CAPER Annual Census of Post-M.D. Trainees. This census is being published while the world continues to grapple with the COVID-19 pandemic. The global pandemic has and continues to affect all aspects of our personal and professional lives. The collection of data from our key stakeholders, preparation of data, and release of this census are no exception. Given the strains placed on the healthcare and medical education systems timely and accurate information on the students' who will soon serve our communities during these times is key. The CAPER Annual Census report is Canada's definitive source of information on the numbers and types of physicians being trained to meet our societal needs.

The Annual Census report is made possible through a longstanding partnership between governments, faculties of medicine and professional medical organizations. Guidance and financial support are provided by the Association of Faculties of Medicine of Canada, Canadian Medical Association, College of Family Physicians of Canada, Medical Council of Canada, Resident Doctors of Canada, the Royal College of Physicians and Surgeons of Canada and federal/provincial/territorial governments. CAPER is sincerely grateful for the stewardship and financial support of its contributing members.

A sincere thank you is extended to CAPER data providers within the faculties of medicine. Associate Deans, Managers and other staff in Canada's postgraduate medical education offices submit and verify data files for use by CAPER. The Ontario Physician Human Resources Data Centre performs this work for all Ontario faculties of medicine. The time and effort given by data providers forms the cornerstone of the CAPER database.

A special thank you goes to CAPER Senior Data Analyst, Mr. Leslie Forward, for working to a very high standard preparing the Annual Census report and its supplementary reports. Further thanks are extended to all CAPER staff, for their work on quickly and accurately producing all the tables and figures in this report.

On behalf of CAPER, it is a pleasure working for our participating members and clients in managing this unique national resource.

Geoff Barnum,  
Manager, CAPER

## Background

---

CAPER (the Canadian Post-M.D. Education Registry) was established in 1986 through the co-operation of national medical organizations with an interest in the post-M.D. clinical education of physicians in Canada. The Association of Faculties of Medicine of Canada, Resident Doctors of Canada, the Canadian Medical Association, the College of Family Physicians of Canada, the Royal College of Physicians and Surgeons of Canada, the Medical Council of Canada, Health Canada, and the provincial and territorial ministries of Health have provided both expertise and financial support for the development and operation of CAPER.

CAPER is an initiative within the Association of Faculties of Medicine of Canada with the mandate to provide accurate information which may be used for physician resource planning on a national basis. To accomplish this task, a longitudinal file is maintained containing socio-demographic information and details of the current and past training programs of each resident or fellow under the supervision of the Canadian Faculties of Medicine on November 1 of each year as submitted by the office of Postgraduate Medical Education at each of the Canadian Faculties of Medicine.

## CAPER Committee (2021-2022)

---

### Chair

**Dr. Alan Chaput**

The Association of Faculties of Medicine of Canada

### Members

**Ms. Stephanie Akers**, Provincial and Territorial Representative (Ontario, Ministry of Health and Long-Term Care)

**Ms. Tracey Jones-Cameron**, Health Canada

**Ms. Lisa Feeney**, Canadian Medical Association

**Mr. Steve Slade**, College of Family Physicians of Canada

**Dr. Glen Bandiera**, Royal College of Physicians and Surgeons of Canada

**Dr. Maureen Topps**, Medical Council of Canada

**Dr. Soma Dalai**, Resident Doctors of Canada

### Ex-officio Member

**Mr. Geoff Barnum**

Manager, CAPER

### Previous Chair of CAPER

1986 – 87	Dr. Robert H. Sheppard	2004 – 07	Dr. Jill Nation
1987 – 88	Dr. Jean-Pierre Desgroseilliers	2007 – 09	Dr. Kristin Sivertz
1988 – 95	Dr. George Goldsand	2009 – 14	Dr. Sal Spadafora
1995 – 97	Dr. Lucinda Whitman	2014 – 20	Dr. Mark Walton
1997 – 04	Dr. William Wrixon		

## The Reporting Process

---

The individual records of all trainees under the supervision of each Canadian faculty of medicine are provided to CAPER by the postgraduate medical education office of the respective faculty. All post-M.D. trainees (residents and fellows) in training positions on November 1 of the current academic year are reported to CAPER. The following information is included in the yearly report.

- The faculty of medicine supervising post-M.D. training
- Socio-demographic information
- Previous medical education and certification; and
- Field of current post-M.D. training

This information is collected by all faculties at the time of registration for post-M.D. training each year and is sent to CAPER, in coded form. Information sent to CAPER is checked for missing or incorrect items. Reports are then sent back to the appropriate postgraduate medical education office of the Canadian faculties of medicine for further verification of the information of their trainees.

**Note:** CAPER typically requests that faculties exclude post-M.D. trainees who are on a leave of six or more months from their data submission. For the last several years the University of British Columbia has included these trainees in their data submission. For the last two years the faculty has excluded these trainees from their data submission to align with other medical faculties. Therefore, there is a small decrease in the total number of post-M.D. trainees reported at the University of British Columbia this year compared to previous years.

**IMPORTANT DATA NOTE:** Occasionally a small number of trainees come to the attention of CAPER that were missed during the data collection process. Therefore, there may be minor discrepancies across years. For the most recent data use the current census or contact us directly for a custom data request.

### DATA PRIVACY

At the Canadian Post-M.D. Education Registry (CAPER), we take physician privacy very seriously. It is a long-established policy of CAPER and the Association of Faculties of Medicine of Canada (AFMC), of which CAPER is a component division, to deal with all physician information in a sensitive manner, in order to ensure that our collections, uses, disclosures, retention and disposal of physician information are carried out in accordance with best privacy practices.

The full CAPER Privacy Policy is on the website: [caper.ca](http://caper.ca).

## How to Access the CAPER Data Tables

---

All CAPER knowledge products are available on the CAPER website <https://caper.ca/>. In addition, the CAPER Annual Census of Post-M.D. Trainees the following knowledge products are also available on the CAPER website.

Individual CAPER Census Tables	<a href="https://caper.ca/postgraduate-medical-education/census-data-tables">https://caper.ca/postgraduate-medical-education/census-data-tables</a>
CAPER Provincial and Faculty Reports	<a href="https://caper.ca/postgraduate-medical-education/provincial-and-faculty-reports">https://caper.ca/postgraduate-medical-education/provincial-and-faculty-reports</a>
CAPER Individual Specialty Tables	<a href="https://caper.ca/postgraduate-medical-education/individual-specialty-reports">https://caper.ca/postgraduate-medical-education/individual-specialty-reports</a>

The CAPER database has been designed to serve as an information resource for physician workforce planning on a national and provincial or regional basis in Canada. Information is held in an individual longitudinal format to permit the study of the flow of trainees through the post-M.D. training system. Although information permitting the identification of individuals is not released from CAPER, group data tabulations and statistics will be prepared in response to requests.

Data requests made to CAPER are welcome. Request forms can be found at: <https://caper.ca/about-us/using-requesting-data>

## Definitions

The data provided to CAPER by all the Canadian Faculties of medicine contain the information on each trainee in accordance with the definitions below:

### **Faculty of Medicine Providing Post-M.D. Training**

The faculty of medicine supervising the post-M.D. trainee on November 1 of the report year.

### **Field of Post-M.D. Training**

The type of non-specialized training, family medicine training, or the specialty field in which a trainee is enrolled on November 1 of the report year. Several subspecialties have multiple entry points. For example, anaesthesiology, emergency medicine, internal medicine, pediatrics and general surgery all have critical care subspecialties. As individuals transition from primary to subspecialty training, CAPER counts them within the subspecialty field that is consistent with their prior training.

### **Clinician Investigator Program**

This is a training program accredited by the Royal College for the purpose of providing additional research skills for physicians who are registered in one of the specialty or subspecialty training programs. Physicians reported in the A-5 table have already been included within their specialty training field in all other tables.

### **Rank**

All new M.D. graduates now enter directly into either a family medicine or a specialty training program at the PGY-1 level.

Two years of training are required for certification in family medicine. The PGY-3 level training in family medicine is used for the accredited family medicine training programs such as care of the elderly and emergency medicine. To meet the training requirements of the Royal College a minimum of four to six years of training is required, depending on the specific specialty in which certification is sought.

A trainee progresses through the rank levels from PGY-1 to PGY-7 as appropriate for their specialty.

### **Fellows**

CAPER uses the following definition of the term “fellow”: a post-M.D. trainee who is registered with the Postgraduate Medical Education Office of a university faculty of medicine and who, regardless of the source of funding, is pursuing clinical or research training which will NOT be evaluated by the supervising faculty for the purpose of Canadian licensure, or certification by the College of Family Physicians of Canada, the Collège des médecins du Québec or the Royal College of Physicians and Surgeons of Canada. (Trainees with appropriate prerequisite training registered in Royal College “accreditation without certification” programs are considered as residents, not fellows.)

### **Location of M.D. Degree**

A trainee is classified as either a graduate of a Canadian medical school or as an international medical graduate if they completed their M.D. degree outside Canada (this includes U.S.A.).

### **Source of Funding**

The source of funding is the organization or government agency providing the funding for the position occupied by the trainee. Two main categories are used: “Regular Ministry Funds” and “Other Funds”. “Regular Ministry Funds” refers to funds provided by the appropriate provincial government ministry responsible for the training of residents within that province. All other funding sources are grouped as “Other Funds” which includes such sources as ministry funds provided for complementary training by the Quebec Ministry of Health and Social Services, funds for residency training transferred from one province to another and government-funded foundations such as the Alberta Heritage Foundation. It also includes funding from federal government, foreign countries, clinical training sites, etc.

### **Age**

Age is calculated as the age of the trainee on July 1 of the report year.

## Legal Status

Two categories are used:

### Canadian Citizen / Permanent Resident

Trainee is a citizen of Canada or has been accepted as a landed immigrant and has the right to live and work in Canada.

### Visa

Trainee holds a visa permitting employment in Canada temporarily as a post-M.D. trainee.

### First Year Trainees

Only first-time trainees in their first year of post-M.D. training in Canada at the PGY-1 level are designated as “first year trainees” and are included in Section G of the book. Other trainees at the PGY-1 level who are re-entering training, repeating the first year, or changing specialties requiring a second year at the PGY-1 level are NOT included in Section G on first year trainees.

Trainees included in the first year trainee category according to CAPER are:

1. Graduates of Canadian medical schools at the PGY-1 training level who have not been previously reported to CAPER.
2. International medical graduates who are entering training at the PGY-1 level in Canada for the first time (visa trainees beginning a program at the PGY-1 level are, therefore, included in this group).

### Exiting Trainees

Postgraduate trainees exiting programs are categorized within the CAPER report in the following ways:

1. Trainees who have completed their training at a level consistent with certification by CFPC, Royal College or Collège des médecins du Québec and have not completed a training program in Canada before. This group is meant to represent physicians who will enter practice in Canada for the first time and is called the **estimated practice entry cohort**. This cohort

contains graduates of Canadian medical schools and international medical graduates who are Canadian citizens or permanent residents.

2. Trainees who have exited training before reaching a level consistent with certification.
3. International medical graduate trainees who held a temporary employment visa while in their last year of post-M.D. training. It is assumed most of these physicians will not enter practice in Canada.
4. Trainees who have re-entered training at some point and are exiting again.

### Sex

Visa trainees have not been included in the data pertaining to sex. This was done to give a more realistic picture of the sex mix of the cohorts of physicians who will be entering practice in Canada. The tables which have been affected are A-3, G-6 and I-3.

### Completion of Training

This term is used in Section J to indicate that the group exited training at a level appropriate for completion of training (e.g. PGY-2 or higher for Family medicine, PGY-4 or higher for most Royal College specialties and PGY-5 or higher for subspecialties and surgical specialties).

### Palliative Medicine

Palliative medicine is a unique specialty in that it is accredited jointly by the Royal College of Physicians and Surgeons of Canada and by the College of Family Physicians of Canada.

For the tables based on the November 2018 census, palliative medicine will appear in both the Family Medicine and Medical Specialties sections.

For the tables in Section I which are based on earlier years, FM palliative medicine is included within “Enhanced Skills”. If required, breakdowns of these enhanced skills can be provided through a special request.

## 1. Quick Facts: CANADIAN CITIZENS & PERMANENT RESIDENTS

This section presents summary statistics for post-M.D. trainees who are likely to be among Canada's future physician workforce. Included in the results are graduates of Canadian faculties of medicine as well as international medical graduates (IMGs) who are Canadian citizens or permanent residents. Therefore, this section excludes all visa trainees.

- A. **First year trainees:** From 2012-13 to 2014-15, the number of first year trainees increased by 6%. Since then it has levelled out to about 3,200. (Figures 1 and 4)
- B. **International Medical Graduates:** The proportion of first year trainees who are IMGs peaked in 2013-14 at 16% and has remained steady at 13% since 2015-16. (Figure 3)
- C. **Gender:** For the last decade the proportion of female first year trainees has increased since 2016-17 from 54% to 58%. In 2021-22, 47% of physicians exiting surgical programs were women. (Figures 2, 10 and 11)
- D. **Specialty mix:** In 2021-22, 1,431 (45%) of the first-year trainees were in family medicine programs and 1,773 (55%) were in medical, surgical and laboratory programs. Among exiting trainees in 2020, 43% were completing family medicine programs and 57% were completing medical, surgical and laboratory programs. (Figures 1 and 7)

**1. FIRST YEAR TRAINEES in Family Medicine and Medical/Surgical/Laboratory training programs, Canadian citizens & permanent residents**

The total number of Canadian citizens/permanent residents entering training dropped slightly from a peak in 2020-21 of 3,270 trainees to 3,204 trainees in 2021-22.

## 2. FIRST YEAR TRAINEES by Gender, Canadian citizens & permanent residents

For the past decade, the proportion of females entering training has gradually increased from 2016-17 to 2021-22.

## 3. FIRST YEAR TRAINEES by Place of M.D. Graduation, Canadian citizens & permanent residents

The proportion of Canadian Medical Graduates and International Medical Graduates has remained relatively stable over the last ten years.

#### 4. FIRST YEAR TRAINEES and NON-FIRST YEAR TRAINEES, Canadian citizens & permanent residents

The total number of Canadian citizens/permanent residents enrolled in post-M.D. training has increased by 10% since 2012-13. First year trainees continue to comprise about 22% of all post-M.D. trainees.

#### 5. ALL RESIDENTS & FELLOWS, Canadian citizens & permanent residents

Fellows comprise about 7% of post-M.D. trainees in Canada and the proportion has remained stable for the last four years.

## 6. LOCATION OF POSTGRADUATE TRAINING for Canadian Medical Graduates

The proportion of Canadian graduates who do their post-M.D. training in the province where they earned their M.D. degree remains steady at about 72%. This proportion has not changed substantially in over a decade.

## 7. EXITING POST-M.D. TRAINEES - Family Medicine vs. Medical, Surgical Laboratory Programs, Canadian citizens & permanent residents

The number of Canadian citizens/permanent residents exiting post-M.D. training peaked in 2018-19. Since then the number of exits has varied only marginally after a substantial increase starting early in the decade.

### 8. EXITING POST-M.D. TRAINEES by Place of M.D. Graduation, Canadian citizens & permanent residents

The proportion of Canadian medical graduates in the exit group has remained at approximately 80% of all exits over the last ten years with IMGs representing 20%.

### 9. EXITING POST-M.D. TRAINEES by Gender, Canadian citizens & permanent residents

In the last ten years, the proportion of female and male exiting trainees has varied by less than 3%.

### 10. EXITING POST-M.D. FAMILY MEDICINE TRAINEES, Canadian citizens & permanent residents

There continues to be more females than males exiting family medicine training programs. The gap has fluctuated over the last ten years ranging from a maximum of 28% to a minimum of 18%.

### 11. EXITING POST-M.D. SURGICAL TRAINEES by Gender, Canadian citizens & permanent residents

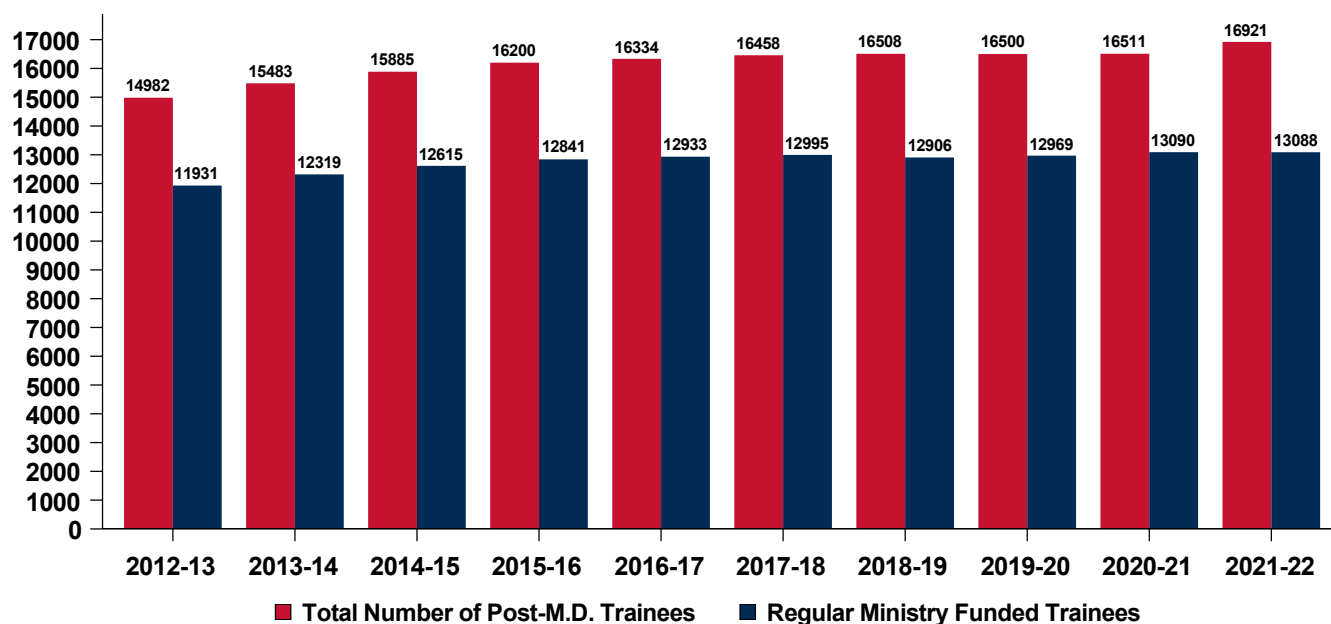

The number of physicians exiting surgical training has dropped slightly since a peak of 504 in 2018-19. Looking at the ten-year trend there has been a 24% increase from 2012-12 to 2018-19 in exits from surgical training. The proportion of females exiting training over the last ten years has fluctuated between 41% and 49%.

## 2. Quick Facts: POST M.D. TRAINEES IN REGULAR MINISTRY FUNDED POSITIONS

This section presents summary statistics for post-M.D. trainees whose positions were regular ministry funded.

- A. The total number of regular ministry funded trainees increased from 2012-13, plateaued in 2017-19 and has increased again in 2021-22. The total number of post-M.D. trainees (ministry and non-ministry funded) has also remained relatively stable over the last three years with a total of 16,497 trainees in 2020-21. (Figure 1)
- B. Over the ten year period 2012-13 to 2021-22, the number of regular ministry funded Canadian medical graduates (CMGs) steadily increased from 10,069 to 11,453, a 14% increase. The number of regular ministry funded international medical graduates (IMGs) has decreased since 2013-14 and is now at the lowest level in the last decade. (Figure 2)
- C. The number of current year CMGs in post-M.D. training appears to have plateaued in 2020-21 with 2,760 trainees dropping slightly for 2021-22. (Figure 3)
- D. Throughout the period 2012-13 to 2021-22, the number of physicians re-entering post-M.D. training remained small. (Figure 4)
- E. PGY-3 family medicine enrolment increased from 258 in 2012-13 to a high of 340 in 2021-22. The number of medical, surgical and laboratory trainees pursuing subspecialty training essentially didn't change year-over-year. (Figures 5 and 6)

**1. TOTAL AND REGULAR MINISTRY FUNDED TRAINEES**

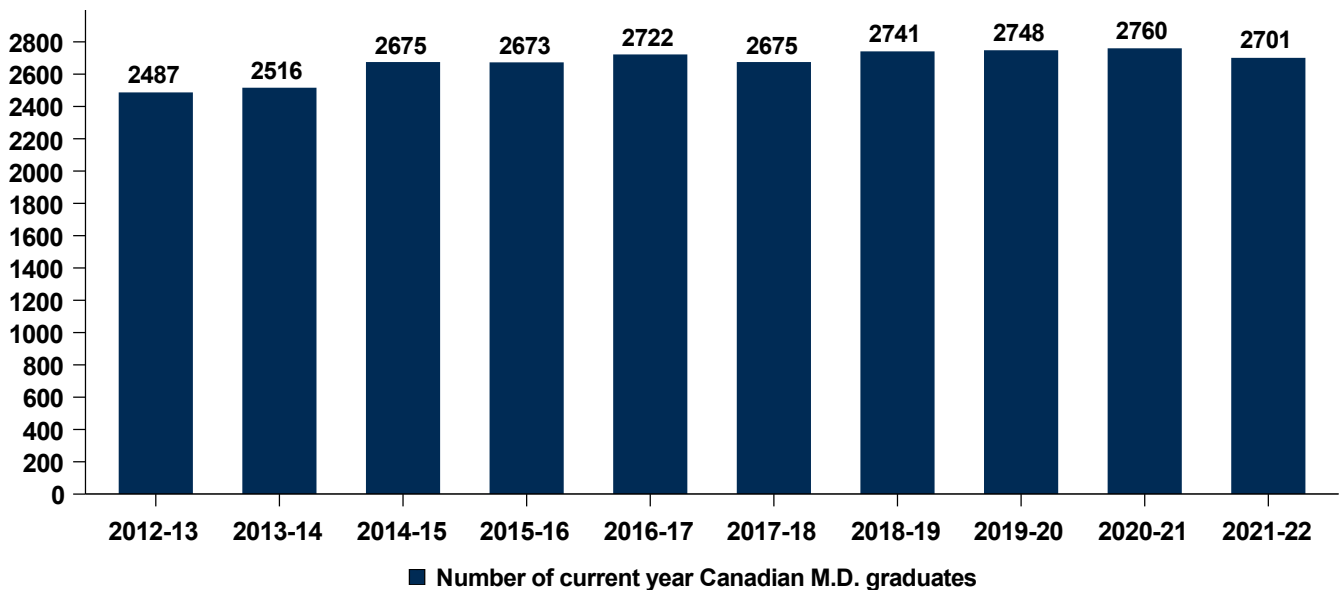

The total number of post-M.D. trainees increased by 13% since 2012-13. Regular ministry funded trainees have also increased over the same time period but by 10%.

## 2. REGULAR MINISTRY FUNDED TRAINEES by location of MD degree

The number of regular ministry funded IMGs has decreased since 2013-14 and is now at the lowest number in the past ten years.

## 3. REGULAR MINISTRY FUNDED TRAINEES: Number of current year graduates of Canadian medical schools in post-M.D. training

There has been an 9% increase in the number of current year Canadian M.D. graduates entering training in ministry funded positions since 2012-13. There was a decrease in the number of current year Canadian M.D. graduates entering training in ministry funded positions from the previous year.

#### 4. REGULAR MINISTRY FUNDED TRAINEES: Number of new entry and re-entry residents

The number of Ministry funded re-entry trainees has consistently remained very low over the last decade.

#### 5. REGULAR MINISTRY FUNDED TRAINEES: Number of PGY-3 Level Trainees in Family Medicine

PGY-3 family medicine enrolment increased from 258 in 2012-13 to a high of 340 in 2021-22.

**6. REGULAR MINISTRY FUNDED TRAINEES: Number of PGY-4 Medical, Surgical and Laboratory residents in primary specialties and subspecialties**

In 2021-22, PGY-4 level trainees in subspecialty training represented 30% of all ministry funded PGY-4 trainees compared to 26% in 2012-13.

### 3. Quick Facts: NON-MINISTRY FUNDED POST-M.D. TRAINEES - Includes both visa trainees and Canadian citizens/permanent residents

This section presents summary statistics for post-M.D. trainees whose positions were non-ministry funded.

- A. The number of non-ministry funded post-M.D. trainees totaled 3,833 in 2021-22, a substantial increase (+421) from the previous year. This increase was entirely almost entirely driven by an increase in the number of visa trainees (+376). (Figure 1)
- B. Fellows continue to comprise the largest portion of non-ministry funded trainees representing 75% of all trainees in 2021-22. The increase in trainees was completely driven by a substantial increase in fellows. (Figure 2)
- C. Most non-ministry funded residents are international medical graduates (IMGs). In 2021-22, there were 740 non-ministry funded IMGs and 200 non-ministry funded Canadian medical graduates (CMGs). These figures do not include post-M.D. fellows. (Figure 3)
- D. In 2021-22, there were 200 non-ministry funded CMG residents and 578 non-ministry funded CMG fellows. Fellows typically outnumber residents among non-ministry funded CMGs. (Figure 4)
- E. The number of non-ministry funded CMG re-entry trainees dropped by 46% from 2020-21 to 2021-22. (Figure 5)

**1. NON-MINISTRY FUNDED TRAINEES: Canadian citizens & permanent residents vs visa trainees**

The total number of non-ministry funded trainees increased substantially year-over-year from 3,421 in 2020-21 to 3,833 in 2021-22. This is a 12% increase in the number of trainees in a single year.

## 2. NON-MINISTRY FUNDED TRAINEES: Residents vs Fellows

The number of non-ministry funded trainees increased from 3,051 in 2012-13 and peaked in 2018-19 at 3,602. The total number non-ministry funded trainees increased substantially relative to 2020-21. This increase was almost completely driven by an increase in the number of fellows as opposed to residents.

## 3. NON-MINISTRY FUNDED TRAINEES (excluding fellows) by place of MD graduation

Between 2012-13 and 2015-16 there was a steady decline in non-ministry funded graduates of Canadian medical schools that has recently reversed and stabilized. Non-ministry funded IMG residents declined from 2012-13 to 2013-14, increased to a high in 2018-19, and stabilized after a drop last year.

#### 4. NON-MINISTRY FUNDED TRAINEES - Canadian M.D. graduates only: Residents vs Fellows

The number of non-ministry funded CMG residents hit a low of 165 in 2015-16 then steadily increased until 2018-19 where it appears to have stabilized. In contrast, non-ministry funded CMG fellows increased steadily since 2011-12 and plateaued in 2017-18.

#### 5. NON-MINISTRY FUNDED TRAINEES - Canadian M.D. graduates only: Number of re-entry residents

The number of non-ministry funded CMG re-entry trainees remains small and declined substantially from 2020-21 to 2021-22.

These data include new entry and re-entry trainees who exited at the completion of training between Nov 1, 2015 and Nov 1, 2016.

\* Based on CMA Masterfile and MD Select

## Section K: Supplementary Tables

<b>Table K - 1</b>
SUPPLEMENTARY TABLES
Trainee switches by training field category

1. Changes between Family Medicine and Specialty training fields

	<b>A. Changes From: Family Medicine To: Any Specialty</b>	<b>B. Changes From: Any Specialty To: Family Medicine</b>
<b>2016-2017</b>	29	39
<b>2017-2018</b>	30	44
<b>2018-2019</b>	44	51
<b>2019-2020</b>	39	36
<b>2020-2021</b>	51	45

2. Changes between Specialty fields

	<b>A. Changes From: Medical Specialties To: Surgical Specialties</b>	<b>B. Changes From: Surgical Specialties To: Medical Specialties</b>
<b>2016-2017</b>	10	15
<b>2017-2018</b>	5	18
<b>2018-2019</b>	21	16
<b>2019-2020</b>	9	13
<b>2020-2021</b>	8	17

3. Total: Changes among training field groups

<b>Year</b>	<b>Total</b>
<b>2016-2017</b>	93
<b>2017-2018</b>	97
<b>2018-2019</b>	132
<b>2019-2020</b>	97
<b>2020-2021</b>	121

**Note:** Movement of trainees between any training field and Palliative medicine are not counted as changes. Although most program changes occur at the PGY-1 level, these tables include program changes at all training levels.
