Acknowledgements

This 18th edition of the *CAPER Annual Census of Post-M.D. Trainees* has been made possible by the financial support of the participating national medical organizations and governments (Federal, Provincial and Territorial).

Our work with representatives from these organizations and governments ensures that the data we produce provide them with the information they require for the development of policies concerning post-M.D. training and physician resources in Canada.

Along with the data CAPER is provided by the postgraduate offices of the 17 Canadian faculties of medicine, our publication relies on data from two other sources, the Canadian Medical Association (CMA) and the Association of Faculties of Medicine of Canada (AFMC). We rely on and appreciate the work of Ms. Lynda Buske and Ms. Shelley Martin at the CMA and Dr. David Hawkins and his staff, Ms. Liane Kealey and Ms. Dale Yeatman at AFMC and the willing help of the associate deans for postgraduate medical education and their administrative offices. All of the members of CAPER's Executive and Policy Committees have been most supportive in their help with the management of CAPER. In Ontario, we appreciate the work of the Ontario Physician Human Resources data centre toward the development of this publication.

Special thanks go to the CAPER staff, Ms. H  l  ne LeBlanc and Mr. Leslie Forward who have worked to a very high standard on behalf of the CAPER Executive Committee. Dr. Jill Nation (Associate Dean, Graduate Clinical Education, Faculty of Medicine, University of Calgary) accepted the position of Chairman of the CAPER Executive Committee this year and we thank her for her assistance with the management of CAPER.

Again, it has been a pleasure to work for all of the participating organizations and governments in managing this unique national resource.

A. Dianne Thurber, M.A.
Director, CAPER

Remerciements

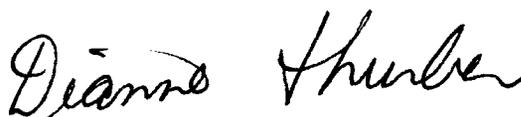

Le 18^e *Recensement annuel des stagiaires en formation postdoctorale de CAPER* a   t   rendu possible gr  ce au soutien financier des organisations m  dicales nationales et des gouvernements participants (f  d  ral, provinciaux et territoriaux).

La collaboration de CAPER avec les repr  sentants de ces organisations et gouvernements permet d'obtenir l'assurance que les donn  es que nous r  unissons fournissent    ces derniers l'information dont ils ont besoin pour   laborer des politiques concernant la formation postdoctorale et les ressources en m  decins au Canada.

Outre les donn  es que CAPER re  oit des 17 facult  s canadiennes de m  decine au sujet des stagiaires en formation postdoctorale, le *Recensement* repose sur deux autres sources d'information,    savoir l'Association m  dicale canadienne (AMC) et l'Association des facult  s de m  decine du Canada (AFMC). CAPER est tr  s heureux de pouvoir compter sur la collaboration de M^{mes} Lynda Buske et Shelley Martin,    l'AMC, et du D^r David Hawkins et de M^{mes} Liane Kealey et Dale Yeatman,    l'AFMC, sans oublier l'aide diligente des vice-doyens responsables de l'  ducation m  dicale postdoctorale et de leurs bureaux administratifs respectifs. Tous les membres du Comit   ex  cutif et du Comit   des politiques de CAPER ont   galement   t   d'un grand secours au titre de la gestion de l'organisation. En Ontario, le Centre des donn  es sur les ressources humaines en m  decins de l'Ontario a apport   une pr  cieuse contribution    l'  laboration du pr  sent rapport.

Je tiens   galement    remercier M^{me} H  l  ne LeBlanc et M. Leslie Forward, de CAPER, qui se sont tous les deux acquitt  s avec brio de leurs t  ches pour le compte du Comit   ex  cutif de l'organisation. Cette ann  e D^{re} Jill Nation (Vice-doyenne des   tudes postdoctorales, Facult   de m  decine, University of Calgary) a accept   la position de pr  sidente du Comit   ex  cutif de CAPER. Nous tenons    la remercier pour son appui    l'  gard de la direction de CAPER.

En terminant, je tiens    souligner que ce fut un v  ritable plaisir de collaborer avec toutes les organisations et gouvernements participants    la pr  paration de ce rapport national unique.

A. Dianne Thurber, M.A.
Directrice, CAPER

WHERE DO I FIND??

CAPER's frequently asked questions:

- | | | | |
|-----|---|--|------------|
| 1. | Where do I find a summary of changes in the post-M.D. training population over the last 10 years ? | Quick Facts | page 10-22 |
| 2. | How many ministry funded residents are in a specific specialty at each faculty ? | Table A-1i | page 27 |
| 3. | How many ministry funded residents are there at each rank level ? | Table B-1i | page 42 |
| 4. | How many new residents entered training in each specialty this year? | Table G-1 | page 60 |
| 5. | What is the gender of residents entering each specialty? | Table G-5 | page 65 |
| 6. | How many new physicians completed and exited from Canadian residency training? | Table H-1 | page 74 |
| 7. | How old are Canada's new physicians when they finish training? | Table H-2 | page 77 |
| 8. | What is the gender of the new physicians who completed and exited from Canadian residency training? | Table H-4 | page 78 |
| 9. | Where do the M.D. graduates of my faculty (province) eventually go to practise medicine ? | Table J-1 | page 138 |
| 10. | Where do the post-M.D. trainees from my faculty (province) eventually go to practise medicine ? | Table J-1iii | page 142 |
| 11. | Individual training fields - detailed information (the number of residents and fellows at each rank level at each faculty) | CAPER website: www.caper.ca

Background

CAPER (the Canadian Post-M.D. Education Registry) was established in 1986 through the co-operation of national medical organizations with an interest in the post-M.D. clinical education of physicians in Canada. The Association of Faculties of Medicine of Canada, the Canadian Association of Internes and Residents, the Canadian Medical Association, The College of Family Physicians of Canada, The Medical Council of Canada, Health Canada, and The Royal College of Physicians and Surgeons of Canada, have provided both expertise and financial support for the development and operation of CAPER. Provincial and territorial ministries of Health have contributed to CAPER beginning in 1992.

CAPER is incorporated within the by-laws of The Association of Faculties of Medicine of Canada with the mandate to provide accurate information which may be used for medical manpower planning on a national basis. To accomplish this task, an individual longitudinal file is maintained containing socio-demographic information and details of the current and past training programs of each resident or fellow under the supervision of the Canadian faculties of medicine on November 1 of each year. The data in this document are derived from information submitted for November 1, 2004 by the office of Postgraduate Medical Education at each of the 17 Canadian Faculties of Medicine.

Historique

CAPER (Système informatisé sur les stagiaires post-M.D. en formation clinique) a été établi en 1986 avec la coopération de diverses organisations médicales du Canada intéressées par la formation clinique post-M.D. au Canada. L'Association des facultés de médecine du Canada, l'Association canadienne des internes et des résidents, l'Association médicale canadienne, Le Collège des médecins de famille du Canada, Le Conseil médical du Canada, Santé Canada, ainsi que Le Collège royal des médecins et chirurgiens du Canada ont contribué au développement et au bon fonctionnement de CAPER en partageant leurs connaissances et en lui apportant un soutien financier depuis 1982.

CAPER est constitué en société dans le cadre des statuts de L'Association des facultés de médecine du Canada avec pour mandat de fournir des renseignements précis pouvant être utilisés pour fins de planification de la main-d'oeuvre médicale au niveau national. Pour ce faire, un fichier longitudinal est tenu à jour contenant l'information pertinente à chaque résident ou moniteur clinique (fellow) inscrit aux différentes facultés de médecine canadiennes en date du 1^{er} novembre de chaque année. L'information socio-démographique et les détails du programme de formation de cette année et des années passées y sont inclus. Les données de ce document reflètent l'information soumise au 1^{er} novembre 2004 par le personnel administratif des bureaux de formation médicale postdoctorale des dix-sept facultés de médecine canadiennes.

The Reporting Process

The individual records of all trainees under the supervision of each Canadian faculty of medicine are provided to CAPER by the postgraduate medical education office of the respective faculty. All post-M.D. trainees (residents and fellows) in training positions on November 1 of the current academic year are reported to CAPER. The following information is included in the yearly report:

- the faculty of medicine supervising post-M.D. training
- socio-demographic information
- previous medical education and certification, and
- field of current post-M.D. training

This information is collected by all faculties at the time of registration for post-M.D. training each year and is sent to CAPER, in coded form. Information sent to CAPER is checked for missing or incorrect items. Reports are then sent back to the appropriate postgraduate medical education office of the Canadian faculties of medicine for further verification of the information on their trainees.

Confidentiality of Individual Records

The CAPER policy concerning the confidentiality of individual records is as follows:

CAPER undertakes to maintain as confidential the identity of any individual to whom information it collects applies and no information shall be released or disclosed to any third party except as provided below.

Where a request is made for the disclosure of information in the possession of CAPER, such information may be disclosed only where the information is to be used for statistical purposes and where CAPER has been satisfied that the identity of the individuals to whom the information relates cannot be determined.

The CAPER Executive Committee shall ensure that appropriate confidentiality safeguards are in place and establish terms and conditions of disclosure of individual records.

Méthode de déclaration

Le bureau de la formation médicale postdoctorale de chaque faculté de médecine canadienne fournit à CAPER les dossiers de tous les stagiaires qui relèvent de la faculté. Sont déclarés à CAPER tous les stagiaires post-M.D. (résidents et moniteurs cliniques) qui occupent un poste de formation le 1^{er} novembre de l'année universitaire en cours. La déclaration annuelle comprend les renseignements suivants :

- la faculté de médecine qui encadre la formation post-M.D.,
- des données socio-démographiques,
- la formation médicale antérieure et les titres de compétence,
- le domaine de la formation post-M.D. en cours

Ces renseignements sont recueillis chaque année par toutes les facultés lors des inscriptions aux programmes de formation post-M.D., puis transmis à CAPER sous forme chiffrée. CAPER les vérifie pour déceler les erreurs ou omissions, puis renvoie les déclarations au bureau de la formation médicale postdoctorale de la faculté de médecine en question. Les renseignements sur les stagiaires font alors l'objet d'une nouvelle vérification.

Confidentialité des dossiers personnels

Voici la politique de CAPER en ce qui a trait à la confidentialité des dossiers personnels :

CAPER s'engage à garder secrète l'identité de toute personne au sujet de laquelle il obtient des renseignements; en outre, aucun renseignement ne doit être communiqué ou divulgué à un tiers, sauf dans le cas suivant :

Lorsque CAPER reçoit une demande de divulgation de renseignements en sa possession, ces renseignements ne peuvent être divulgués que s'ils doivent servir à des fins statistiques et si CAPER a l'assurance que les personnes auxquelles les renseignements se rapportent ne pourront être identifiées.

Le Comité exécutif de CAPER s'engage à instaurer des mesures pertinentes de protection des renseignements confidentiels et à établir les modalités de divulgation des dossiers personnels.

Using The CAPER Database

The CAPER database has been designed to serve as an information resource for physician workforce planning on a national and provincial or regional basis in Canada. Information is held in an individual longitudinal format to permit the study of the flow of trainees through the post-M.D. training system. Although information permitting the identification of individuals is not released from CAPER, group data tabulations and statistics will be prepared in response to requests. **Preparation will be on a cost-recovery basis.**

Examples of some of the categories into which tabulations can be grouped are: provinces, training fields, or cohorts of M.D. graduates. The CAPER database has been designed to study the mobility of trainees between faculties of medicine, provinces and training fields. Also, thanks to the co-operation of the CMA Research, Policy and Planning Directorate, CAPER can provide data concerning the geographic location of cohorts of post-M.D. trainees who have exited the training programs.

Data requests made to CAPER are welcome.

Utilisation de la Base de Données de CAPER

La base de données de CAPER fut conçue comme source d'information pour la planification de la main d'oeuvre médicale au niveau national et provincial ou régional. L'information est cueillie sous forme de fiches longitudinales individuelles afin de pouvoir obtenir un vue d'ensemble des stagiaires inscrits à la formation post-M.D. Bien que CAPER ne divulgue aucun renseignement permettant d'identifier des individus, des tableaux et des statistiques de groupe peuvent être préparés sur demande. **Ce service est offert à prix coûtant.**

Les données peuvent être groupées selon les catégories suivantes : provinces, domaines de formation ou cohortes de stagiaires post-M.D. La base de données fut conçue pour permettre l'étude de la mobilité des stagiaires entre facultés de médecine, provinces et domaines de formation. CAPER, grâce à la collaboration du directeur de recherche, de la planification et de la politique de l'AMC, peut également fournir des données sur le lieu géographique des promotions de stagiaires ayant terminé leur formation.

Toutes demandes de statistiques faites auprès de CAPER seront les bienvenues.

Definitions

The data provided to CAPER by the sixteen faculties of medicine contain the information on each trainee in accordance with definitions established by CAPER. Following are these definitions and other important details pertaining to the specific variables used in the tables presented in this document.

Faculty of Medicine Providing Post-M.D. Training

The faculty of medicine supervising the post-M.D. trainee on November 1 of the report year.

Field of Post-M.D. Training

The type of non-specialized training, Family medicine training, or the speciality field in which a trainee is enrolled on November 1 of the report year.

Clinician Investigator Program

This is a training program accredited by the RCPSC for the purpose of providing additional research skills for physicians who are registered in one of the specialty or subspecialty training programs. Physicians reported in the A-7 table have already been included within their specialty training field in all other tables.

Rank

All new M.D. graduates now enter directly into either a Family medicine or a specialty training program at the R-1 level.

Two years of training, the R-1 and R-2 levels, are required for certification in Family medicine. R-3 level training in Family medicine is provided in the accredited Family medicine training programs in Care of the Elderly and Emergency Medicine as well as in other additional training programs. To meet the training requirements of the RCPSC a minimum of four to six years of training is required, depending on the specific speciality in which certification is sought.

A trainee progresses through the rank levels in the following sequence:

- R-1 (Family medicine or specialty training)
- R-2
- R-3
- R-4
- R-5
- R-6
- R-7

Définitions

Les données, fournies par les seize facultés de médecine à CAPER, contiennent les renseignements concernant chaque stagiaire suivant les définitions établies par CAPER. Ces définitions, ainsi que d'autres détails importants relatifs aux variables spécifiques utilisées dans les tableaux présentés dans ce document, sont énoncés ci-après.

Faculté de Médecine Offrant la Formation Post-M.D.

La faculté de médecine supervisant le stagiaire d'un programme post-M.D. au 1^{er} novembre de l'année du rapport.

Domaine de Formation Post-M.D.

Le genre de stage non spécialisé, de médecine de famille, ou la spécialité auquel le stagiaire s'est inscrit au 1^{er} novembre de l'année du rapport.

Programme de Formation de Cliniciens-Chercheurs

Voici un programme de formation accrédité par le CRMCC, qui a pour objet d'enseigner des techniques de recherche supplémentaires aux médecins inscrits à l'un des programmes de spécialisation ou sur-spécialisation. Les médecins inscrits au tableau A-7 sont déjà inclus avec leur champ de spécialité dans tous les autres tableaux.

Rang

Tous les nouveaux diplômés en médecine doivent commencer maintenant leur formation post-doctorale au niveau R-1 soit par le programme de médecine de famille soit par un programme de spécialité.

Le certificat de médecine de famille est une formation de deux ans, soit les niveaux R-1 et R-2. Le niveau R-3 de médecine de famille est dispensé par les programmes agréés de médecine de famille spécialisés dans les soins aux personnes âgées, la médecine d'urgence et d'autres programmes de formation. Selon la spécialité choisie, un minimum de 4 à 6 années sont nécessaires pour obtenir un certificat du CRMCC.

Un stagiaire progresse de la façon suivante:

- R-1 (médecine de famille ou spécialité)
- R-2
- R-3
- R-4
- R-5
- R-6
- R-7

The following details concerning the ranking system in specific provinces are to be noted:

Maritime Provinces

(Physicians training at Dalhousie University)

Physicians in the first year of a program are ranked at the R-1 level. Physicians designated from R-2 to R-7 by CAPER are listed according to the PGY-2 to PGY-7 levels used at Dalhousie University. Any physicians beyond the PGY-7 level are ranked according to the appropriate RCPSC training level.

Ontario

The PGY-1 to PGY-7 or higher training levels in Ontario are reported as R-1 to R-7 by CAPER.

Fellows

CAPER uses the following definition of the term "fellow": a post-M.D. trainee who is registered with the Postgraduate Medical Education Office of a university faculty of medicine and who, regardless of the source of funding, is pursuing clinical or research training which will **NOT** be evaluated by the supervising faculty for the purpose of Canadian licensure, or certification by The College of Family Physicians of Canada, the Collège des médecins du Québec or The Royal College of Physicians and Surgeons of Canada. (Trainees with appropriate prerequisite training registered in RCPSC "accreditation without certification" programs are considered as residents, not fellows.).

Location of the Faculty of Medicine That Awarded the M.D. Degree

For individuals who earned the degree in Canada, the province of location of the faculty of medicine that awarded the M.D. degree is used. Post-M.D. trainees who earned the M.D. degree outside Canada are classified as such.

Source of Funding

The source of funding is the organization or government agency providing the funding for the position occupied by the trainee. Two main categories are used: "Regular Ministry Funds" and "Other Funds". "Regular Ministry Funds" refers to funds provided by the appropriate provincial government ministry responsible for the training of residents within that province. All other funding sources are grouped as "Other Funds". Graph I-2 identifies a subcategory of "Other Funds". This subcategory is called "Other Provincial

Notez ci-après des détails concernant le système de classement spécifiques à certaines provinces:

Provinces maritimes

(Les médecins en formation à l'université Dalhousie)

Les médecins en première année d'un programme sont enregistrés au niveau R-1. Les médecins de la deuxième à la septième année post-M.D. à l'université Dalhousie sont enregistrés du niveau R-2 au niveau R-7 par CAPER. Les médecins ayant accompli la septième année post-M.D. sont enregistrés selon les niveaux de formation du CRMCC.

Ontario

Les première aux septième (ou plus) années post-M.D. en Ontario sont enregistrées par CAPER sous les appellations R-1 à R-7.

Moniteurs cliniques (Fellows)

CAPER utilise la définition du terme moniteur clinique (fellow) énoncée ci-après : un stagiaire post-M.D. qui est inscrit auprès du Bureau des études médicales postdoctorales de la faculté de médecine d'une université et qui, quelque soit la source du financement, poursuit un stage clinique ou de recherche n'étant **PAS** évalué par la faculté supervisante en vue de l'obtention du permis d'exercer la médecine au Canada ou de la certification par Le Collège des médecins de famille du Canada, par le Collège des médecins du Québec ou par Le Collège royal des médecins et chirurgiens du Canada. (Les stagiaires possédant la formation requise et qui sont inscrits dans les programmes de "l'agrément sans le certificat" du CRMCC sont considérés comme des résidents et non comme des "fellows".)

Lieu de la faculté de médecine qui a décerné le diplôme M.D.

Pour les individus qui ont reçu leur diplôme au Canada, la province de la faculté de médecine qui a décerné le diplôme M.D. est utilisé. Ceux qui ont reçu leur diplôme ailleurs qu'au Canada sont classifiés en tant que diplômés de facultés de médecine étrangères.

Source de financement

La source de financement est l'organisme ou l'agence gouvernementale qui fournit le financement pour la position occupée par le stagiaire. Deux grandes catégories sont utilisées: "Fonds ministériels habituels" et "Autres fonds". Les "Fonds ministériels habituels" sont les fonds provenant des ministères des gouvernements provinciaux appropriés responsables des stages des résidents au sein de la province. Tous les autres sources de financement sont regroupés sous l'appellation "Autres fonds". Le graphe I-2 présente une sous-catégorie de la

Government Funds" and includes such sources as ministry funds provided for complementary training by the Quebec Ministry of Health and Social Services, funds for residency training transferred from one province to another, and government-funded foundations such as the Alberta Heritage Foundation.

Age

Age is calculated as the age of the trainee on July 1, 2004 (the age of the trainee at the beginning of the July 2004 training session).

Legal Status

Three categories are used:

Canadian Citizen / Permanent Resident

Trainee is a citizen of Canada or has been accepted as a landed immigrant and has the right to live and work in Canada.

Visa

Trainees holding a visa permitting employment in Canada temporarily as a post-M.D. trainee

First Year Trainees

Only first-time trainees in their first year of post-M.D. training in Canada at the R-1 level are designated as "first year trainees" and are included in Section G of the book. Other trainees at the R-1 level who are re-entering training, repeating the first year, or changing specialties requiring a second year at the R-1 level are NOT included in Section G on first year trainees.

Trainees included in the first year trainee category according to CAPER are:

1. Graduates of Canadian medical schools at the R-1 training level who have not been previously reported to CAPER.
2. Graduates of foreign medical schools who are entering training at the R-1 level in Canada for the first time (visa trainees beginning a program at the R-1 level are, therefore, included in this group).

Estimated Practice Entry Cohort

The practice entry cohort comprises the physicians who have left the post-M.D. training system each year and would be legally able to work in Canada. In order to give a picture of new entries to practice,

catégorie "Autres fonds". Cette sous-catégorie s'intitule "Autres fonds des gouvernements provinciaux" et comprend entre autres des fonds provenant du ministère de la Santé et des Services sociaux du Québec destinés à financer une formation complémentaire, des fonds de transfert d'une province à une autre pour la formation clinique, et des fonds provenant de fondations financées par les gouvernements comme l'Alberta Heritage Foundation.

Âge

L'âge est calculé en fonction de l'âge du stagiaire au 1^{er} juillet 2004 (l'âge du stagiaire au commencement de la séance de stage de juillet 2004).

Statut légal

On utilise trois catégories :

Citoyen canadien / Résident permanent

Le stagiaire est citoyen canadien ou un individu ayant reçu le droit d'établissement au Canada et qui, en tant que tel, a le droit de vivre et travailler au Canada.

Visa

Le stagiaire est en possession d'un visa permettant d'être employé temporairement en tant que stagiaire post-M.D.

Stagiaires en première année post-M.D.

Seuls les stagiaires en première année post-M.D. au Canada pour la première fois sont regroupés dans la catégorie "stagiaires en première année post-M.D. (first year trainees)" et sont inclus dans la section G de ce document. Les autres stagiaires du niveau R-1 qui reprennent une formation, redoublent leur première année ou changent de spécialité et ont besoin de recommencer une première année au niveau R-1 NE SONT PAS inclus dans la section G dans la catégorie "stagiaires en première année post-M.D."

Selon CAPER, les stagiaires regroupés dans la catégorie "stagiaires en première année post-M.D. (first year trainees)" sont les suivants :

1. les diplômés des facultés de médecine canadiennes au niveau R-1 et n'ayant pas encore été enregistrés dans les données de CAPER.
2. les diplômés de facultés de médecine étrangères qui sont admis au niveau R-1 au Canada pour la première fois (les stagiaires possédant un visa et débutant une formation au niveau R-1 sont donc inclus dans cette catégorie).

Estimation de la cohorte de nouveaux praticiens

La cohorte de nouveaux praticiens contient les médecins ayant terminé leur formation post-M.D. dans l'année et qui sont en droit d'exercer au Canada. Afin de présenter un tableau des nouveaux praticiens,

re-entry trainees (as discussed in Section H) and visa trainees have not been included in the estimated practice entry cohort.

Gender

Visa trainees have not been included in the data pertaining to gender. This was done to give a more realistic picture of the gender mix of the cohorts of physicians who will be entering practice in Canada. The tables which have been affected are A-3, G-5 and I-3.

Completion of Training

This term is used in Section J to indicate that the group exited training at a level appropriate for completion of training (e.g. R-2 or higher for Family medicine, R-4 or higher for most RCPSC specialties and R-5 or higher for subspecialties and surgical specialties).

Palliative Medicine

Palliative medicine is a unique specialty in that it is accredited jointly by the Royal College of Physicians and Surgeons of Canada and by the College of Family Physicians. As such, it is placed in a separate category where training programs have been listed separately. Where the training programs have been grouped in the categories "Family medicine", "Medical specialties", "Laboratory medicine specialties" and "Surgical specialties", Palliative medicine has been included with "Medical specialties". This is because it includes too few physicians in it to form an isolated category.

les stagiaires qui reprennent leur pratique (voir section H) et les stagiaires qui ont un visa d'emploi temporaire ne sont pas inclus dans cette estimation.

Sexe

Les stagiaires qui ont un visa n'ont pas été inclus dans les données relatives au sexe, de façon à présenter un tableau plus réaliste des sexes dans les cohortes de médecins commençant à exercer au Canada. Ce changement porte sur les tableaux A-3, G-5 et I-3.

Fin de formation

Ce terme est utilisé dans la section J et signifie que le groupe a atteint le niveau d'études correspondant à la fin de formation (par exemple: R-2 pour la médecine de famille, R-4 ou plus pour la plupart des spécialités du Collège royal et R-5 pour les sur-spécialités et spécialités de chirurgie).

Médecine palliative

Le programme de médecine palliative se distingue par le fait qu'il a été agréé à la fois par le Collège royal des médecins et chirurgiens du Canada et par le Collège des médecins de famille. À ce titre, il a été classé dans une catégorie distincte qui énumère séparément les programmes de formation. Lorsque ces derniers sont regroupés par catégorie, soit "Médecine de famille", "Spécialités médicales", "Spécialités de médecine de laboratoire" et "Spécialités chirurgicales", le programme de médecine palliative fait partie de "Spécialités médicales". Il comprend en effet trop peu de médecins pour former une catégorie à part entière.

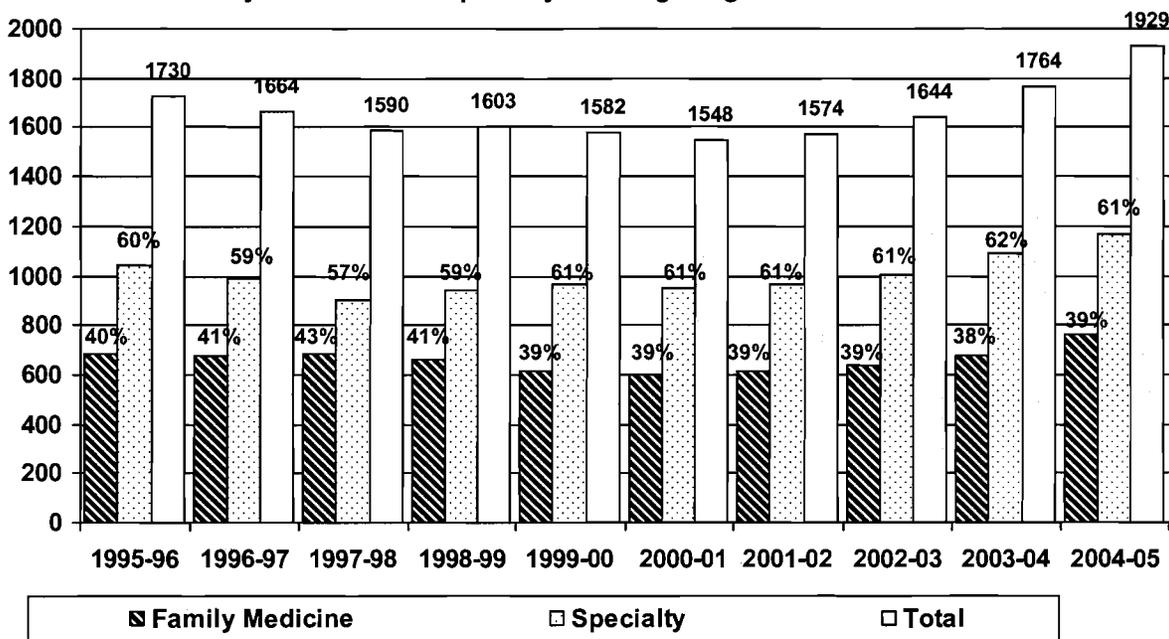

Quick Facts 2004-2005

1. Quick Facts: Concerning Canadian Citizens/Permanent Residents

This set of tables contains the post-M.D. trainees who we expect to be the new physicians for Canada. The majority in this group are graduates of Canadian Faculties of medicine, but International Medical Graduates who are Canadian citizens or permanent residents of Canada are also included in the following figures. As shown in table 3, International Medical Graduates who are Canadian citizens now account for 15% of this cohort.

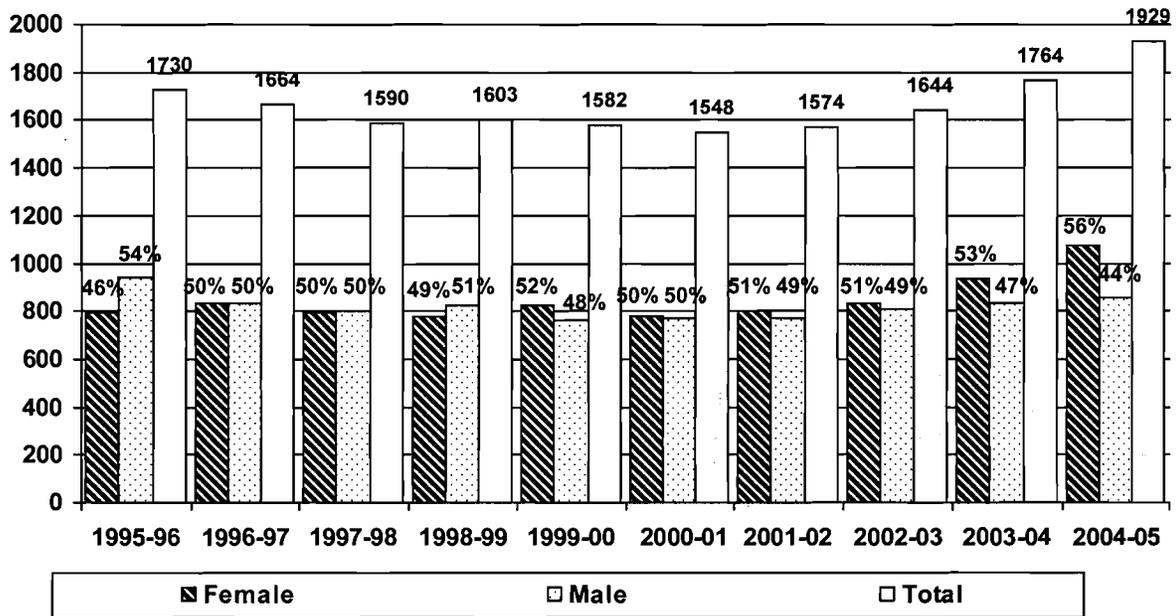

- A. Entry to post-M.D. training has increased as a result of the larger number of Canadian M.D. graduates in 2004 and also due to an increase in the number of IMGs at this level. The number of first year Canadian citizens/permanent residents has increased to 1929. The number of Canadian citizen first year trainees started to increase in 2002-03 and will continue in line with the number of undergraduate M.D. students. (Tables 1 and 2)
- B. Both the number and proportion of International Medical Graduates (Canadian citizen/permanent resident) entering the first year of post-M.D. training have increased to 289 trainees which is 15% of the entry group. (Table 3)
- C. Gender. The proportion of women in medicine has been steadily increasing. In 2004-05, 56% of the Canadian citizen/permanent resident physicians entering training were female. When we consider physicians completing training in 2004, 60% of the new Family physicians were female and 44% of new specialists were women. (Tables 2 and 10)
- D. Specialty mix at entry to and exit from post-M.D. training. In 2004/05, 39% of the first year trainees were in Family medicine. This proportion has been relatively stable over the past 5 years although the number of physicians entering training in both Family medicine and specialty training has started to increase. The proportion of Family physicians in the exit cohort in 2004 was also 38%. (Tables 1 and 7)

1. Canadian Citizens and Permanent Residents: Comparison of the Proportions of First Year Trainees in Family Medicine and Specialty Training Programs

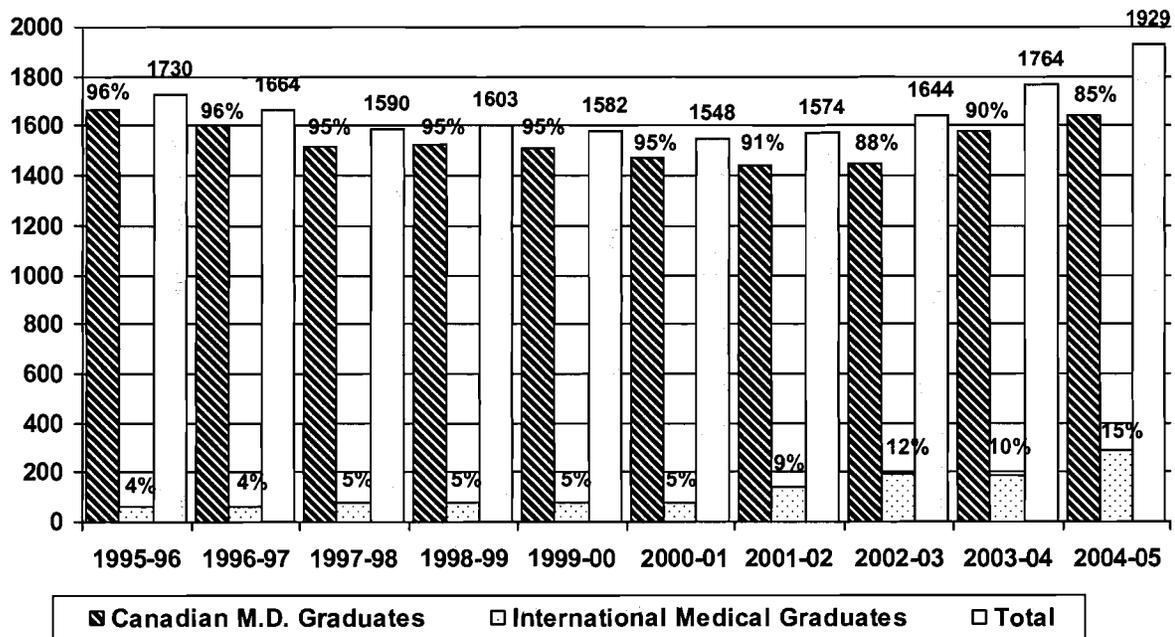

From 2001 to 2004, there has been a steady increase in the total number of first year trainees who are Canadian citizens and permanent residents after a decline over the years from 1994 to 2000. Over the past 10 years, the proportion of new trainees in Family medicine has varied from a high of 43% in 1997 to a low of 38% in 2003. Currently, 39% of the Canadian citizen/permanent resident trainees have entered Family medicine.

2. Canadian Citizens and Permanent Residents: Comparison of the Proportions of Male and Female First Year Trainees

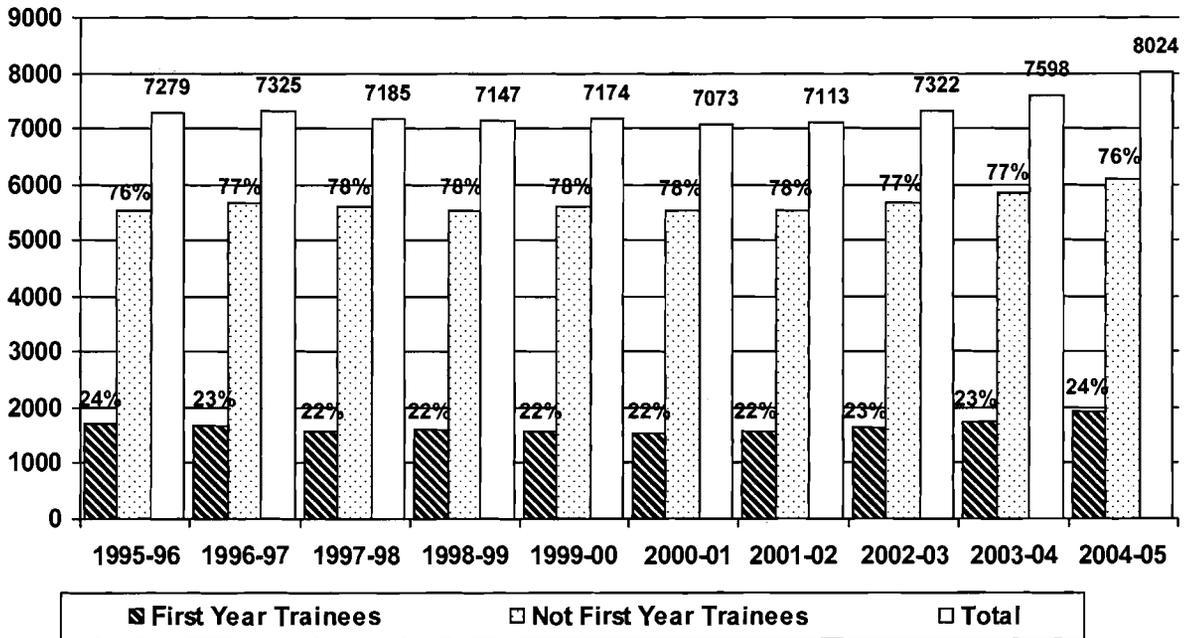

Over the past 10 years the proportion of women (Canadian citizens/permanent residents) has increased from 46% to 56%.

3. Canadian Citizens and Permanent Residents: Comparison of the Proportions of First Year Trainees Who are Canadian M.D. Graduates and International Medical Graduates

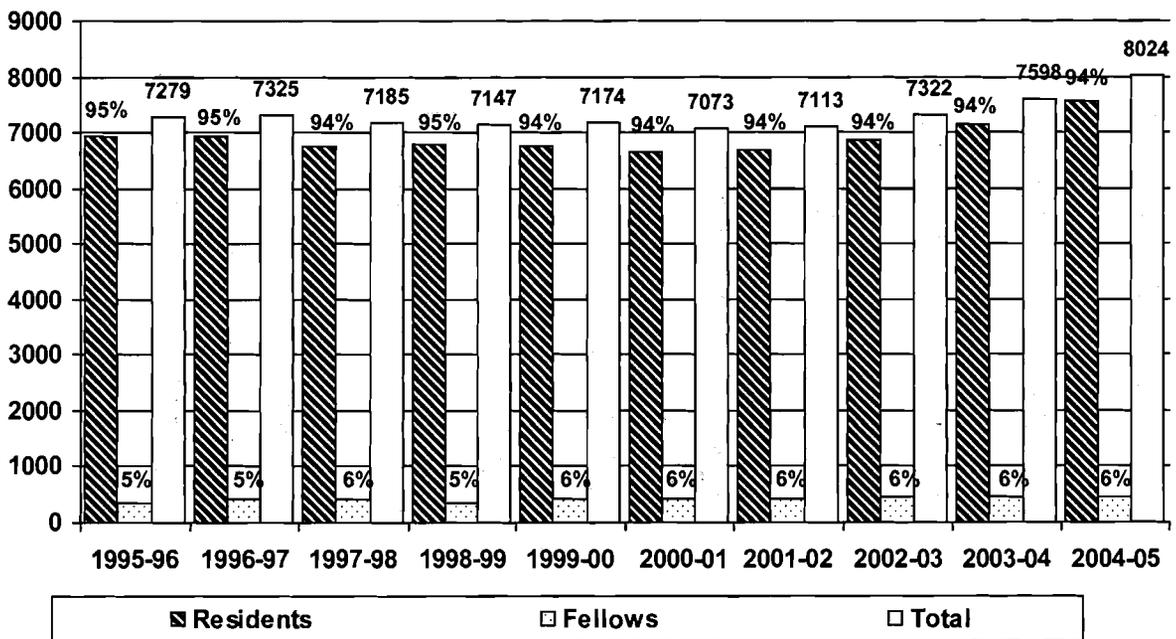

The proportion of International Medical Graduates (Canadian citizens and permanent residents) entering the first year of training in Canada has increased from 4% to 15%. There has been a 5% increase in this proportion in the last year.

4. Canadian Citizens and Permanent Residents: Comparison of the Proportions of First Year Trainees and All Post-M.D. Trainees

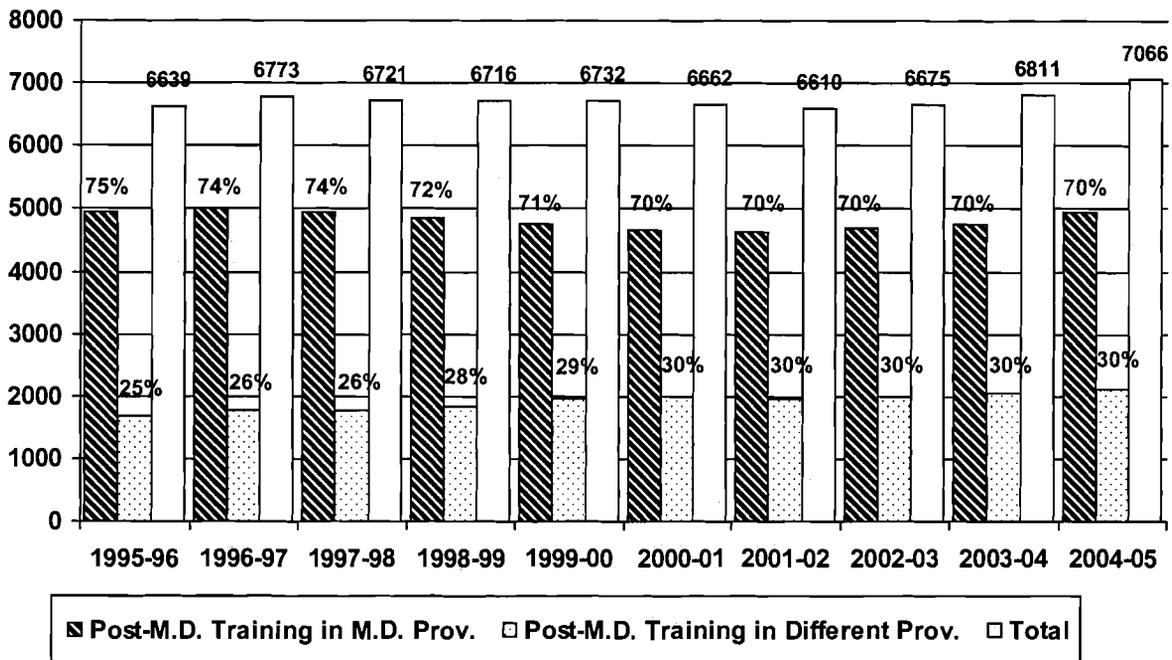

First year trainees comprise 24% of the full cohort of Canadian citizen/permanent resident trainees.

5. Canadian Citizens and Permanent Residents: Comparison of the Proportions of Residents and Fellows

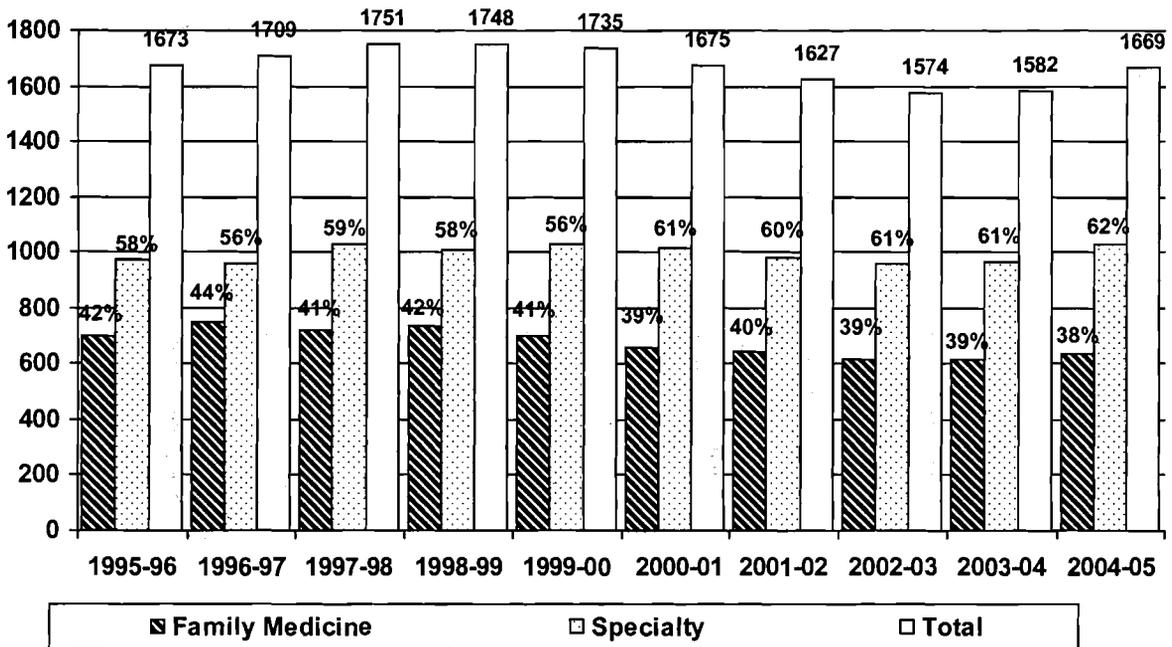

The proportion of Canadian citizen/permanent resident trainees who are fellows remained stable at 6% over the past 6 years.

6. Canadian Citizens and Permanent Residents: Canadian M.D. Graduates and Who Pursued Post-M.D. Training in the Province Where the M.D. Degree Was Earned

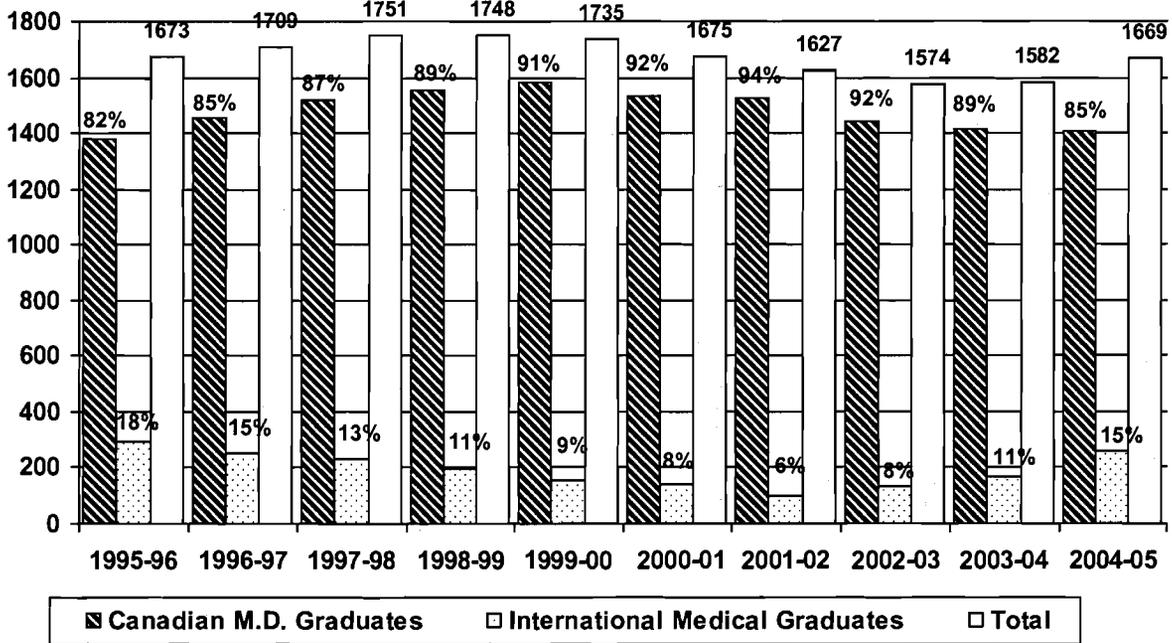

Over the past 10 years there has been a small increase (from 25% to 30%) in the proportion of trainees who do their post-M.D. training in the same province where they earned their M.D. degree. This proportion has remained stable at 30% for the last 5 years.

7. Canadian Citizens and Permanent Residents: The Proportions of Trainees in Family Medicine Vs. Specialty Training. Proportions Based on the "Exiting" Trainees 1995 - 2004

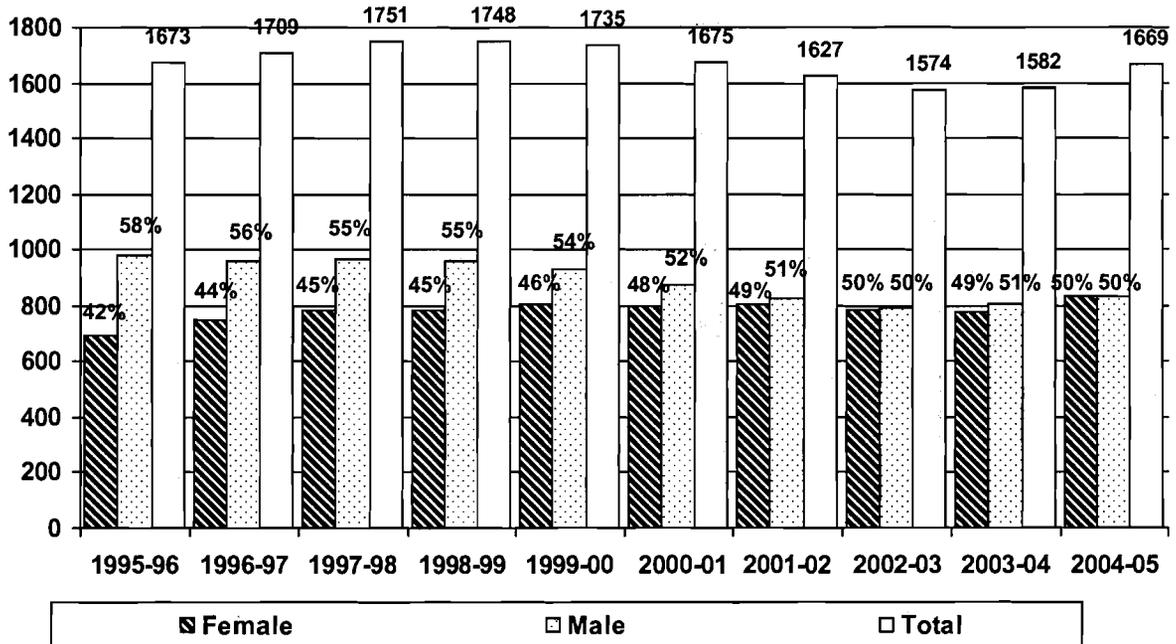

The total number of physicians (Canadian citizens/permanent residents) exiting training started to decline in 1998 down to a low of 1574 physicians in 2002. We are beginning to see an increase in the number of Canadian citizens/permanent residents who completed training in 2003.

8. Canadian Citizens and Permanent Residents: Comparison of the Proportions of Canadian M.D. Graduates and International Medical Graduates. Proportions Based on the "Exiting" Trainees 1995 - 2004

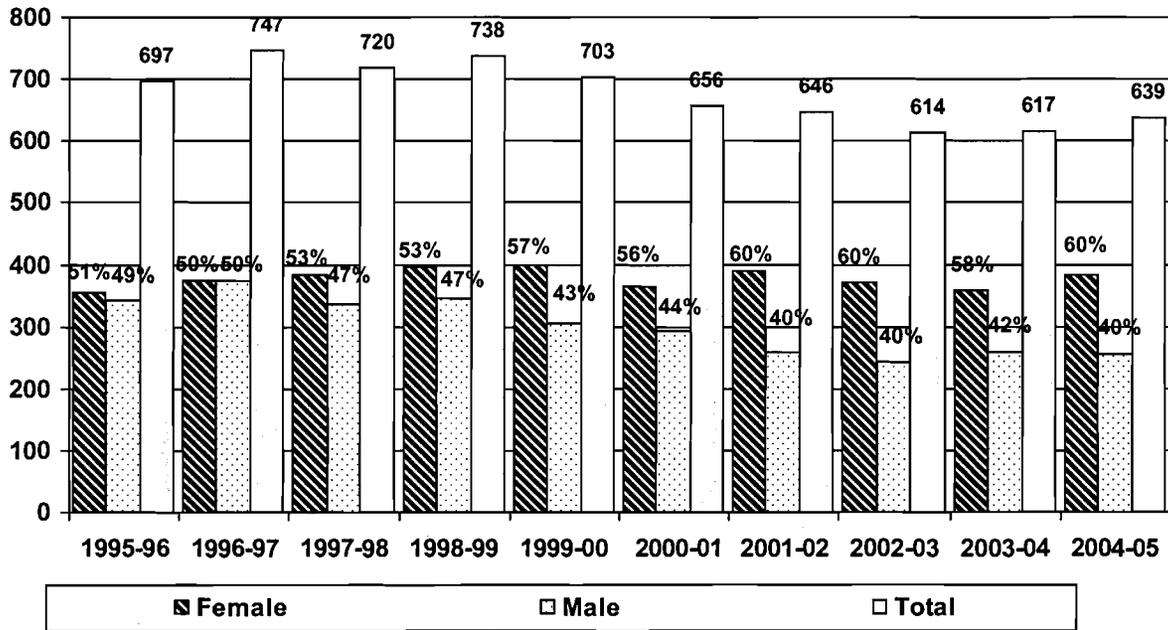

Since a decline which started in 1996-97, the proportion of IMG Canadian citizen/permanent resident trainees completing training has increased in 2004 to 15% of our new physicians.

9. Canadian Citizens and Permanent Residents: Comparison of the Proportions of Males and Females. Proportions Based on the "Exiting" Trainees 1995 - 2004

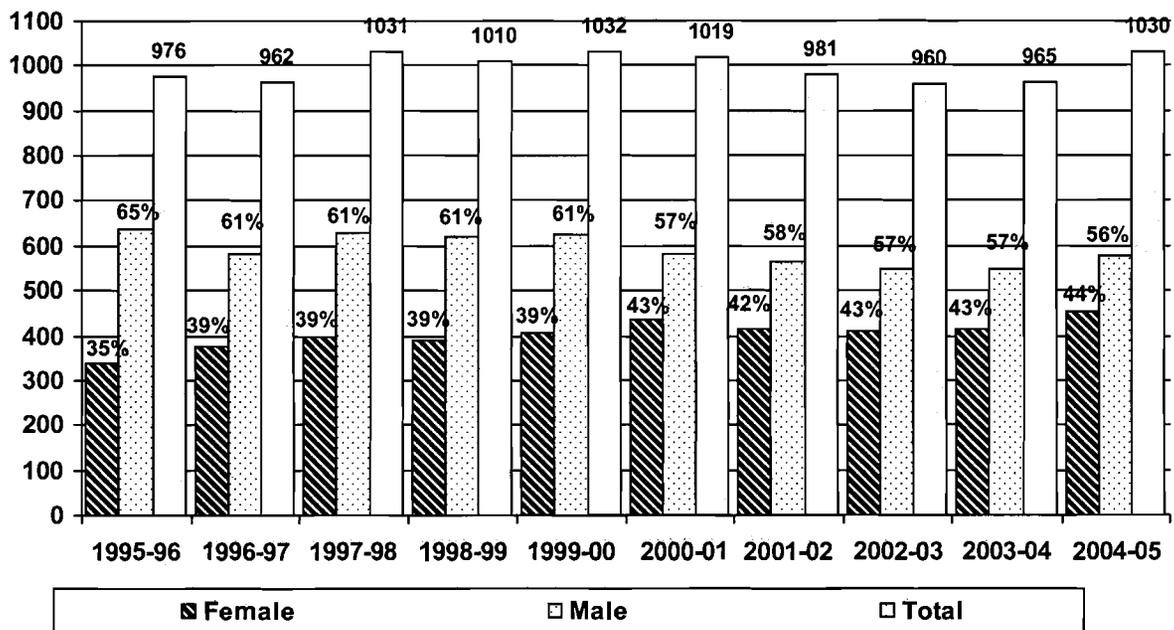

The proportion of female physicians (Canadian citizens/permanent residents) exiting from training has been increasing. For the past 3 years it has remained relatively stable at about 50%.

10. Canadian Citizens and Permanent Residents: Comparison of the Proportions of Males and Females in Family Medicine. Proportions Based on the "Exiting" Trainees 1995 - 2004

The proportion of women exiting from Family medicine training programs has increased from 50% to 60% over the past 10 years. Overall, the number of physicians completing training in Family medicine has started to increase in 2004-05.

11. Canadian Citizens and Permanent Residents: Comparison of the Proportions of Males and Females in Specialty Programs. Proportions Based on the "Exiting" Trainees 1995 - 2004

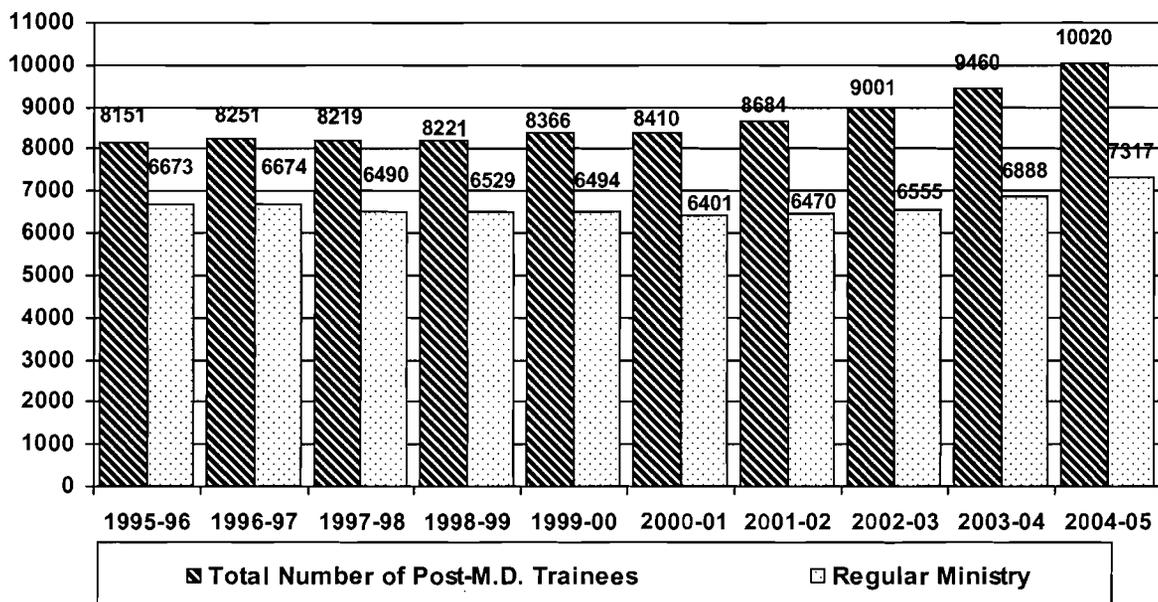

The number of Canadian citizen/permanent resident physicians exiting from specialty training programs has started to increase in 2004-05 to 1030. 44% of new specialists are women.

Quick Facts 2004-2005

2. Quick Facts: Concerning Post-M.D. Trainees in Regular Ministry Funded Positions

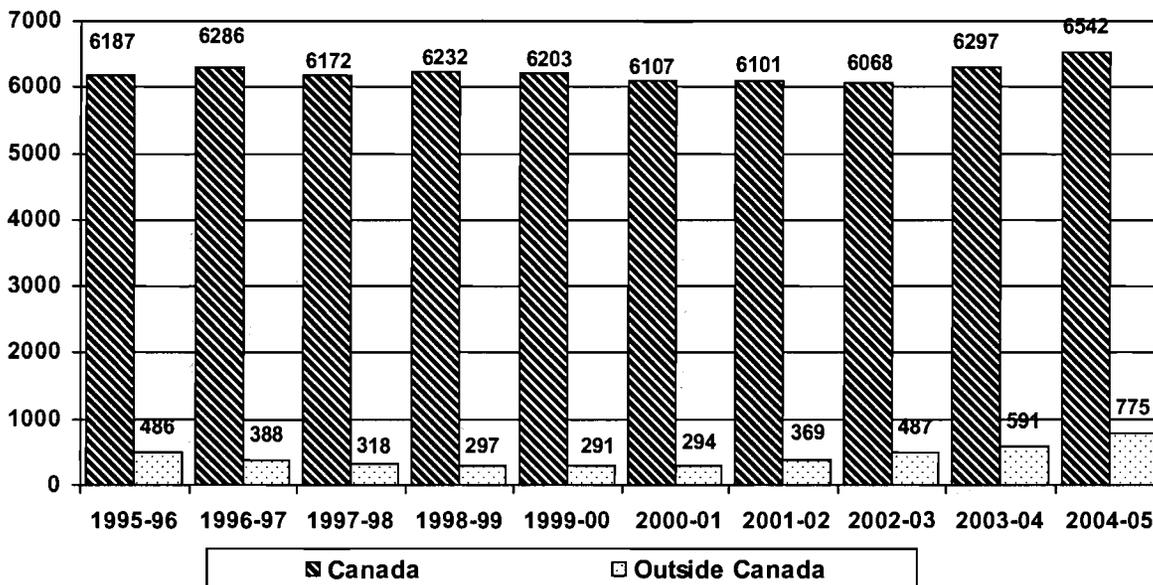

- A. The total number of regular ministry funded trainees has continued to increase to 7317. There has been a similar increase in the **total** number of post-M.D. trainees nationally (ministry and non-ministry funded) to 10,020. The reasons for the increase in both sectors are that the number of Canadian medical graduates has started to increase and the number of International Medical Graduates has also continued to increase. (Table 1)
- B. The number of ministry funded graduates of Canadian medical schools has increased as we are seeing the effect of the increased number of physicians graduating from Canadian medical schools (1663 in 2003 up to 1756 in 2004 according to AFMC data). (Table 2)
- C. The number of current year Canadian medical graduates in post-M.D. training has increased sharply this year up to 1600 graduates. The increase in the number of graduates in 2004 is the reason behind this increase. (Table 3)
- D. The number of re-entry trainees has remained the same as the previous year. (Table 4)
- E. The number of ministry funded Family medicine trainees choosing to take an additional year has continued to increase to 179 trainees. This proportion is 27% of the 667 R-2 Family medicine trainees in 2004-2005. (Table 5) The proportion of R-4 trainees in subspecialty training has dropped slightly to 21% of the R-4 trainees. (Table 6)

1. Regular Ministry Funded Trainees: Comparison With the Total Number of Post-M.D. Trainees

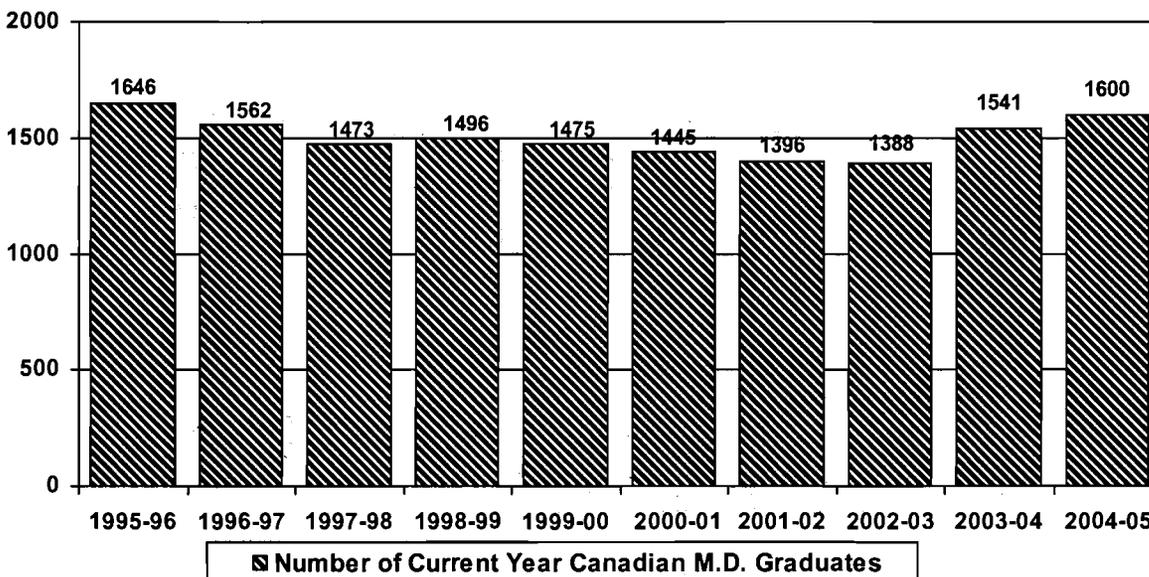

From 1995 to 2004, there has been a steady increase in the number of all post-M.D. trainees from 8151 to 10,020. The number of ministry funded trainees has continued to increase from the decline which started in 1995.

2. Regular Ministry Funded Trainees: Comparison of the Number of Graduates of Canadian Medical Schools and International Medical Graduates

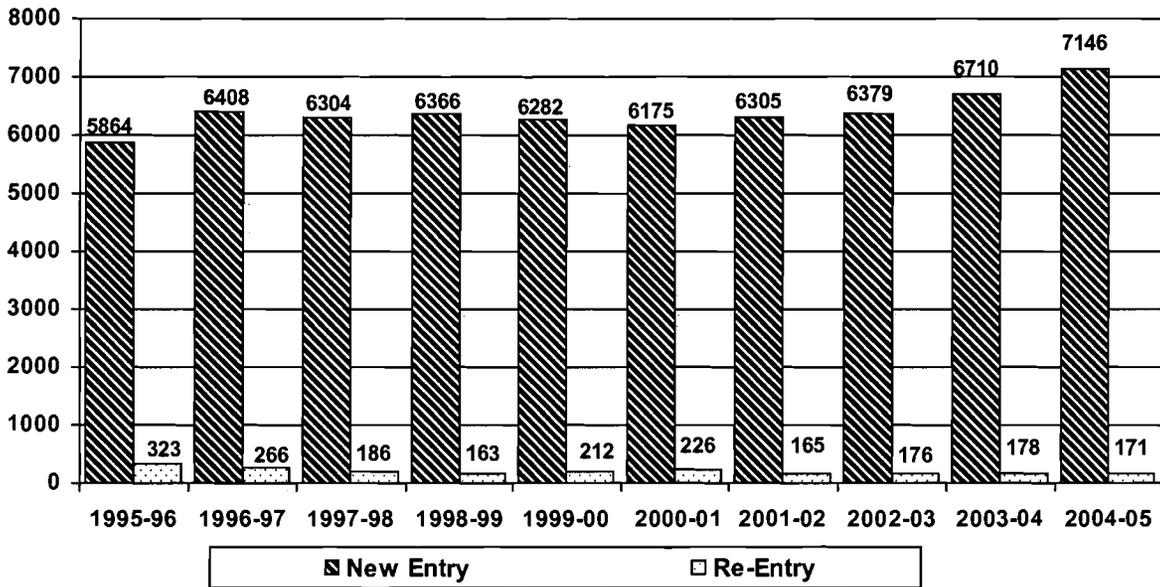

The number of ministry funded graduates of Canadian medical schools has increased (resulting from the larger graduating class in 2004) and also the number of ministry funded International Medical Graduates has increased from 591 last year to 775 in 2004.

3. Regular Ministry Funded Trainees: The Number of Current Year Graduates of Canadian Medical Schools in Post-M.D. Training

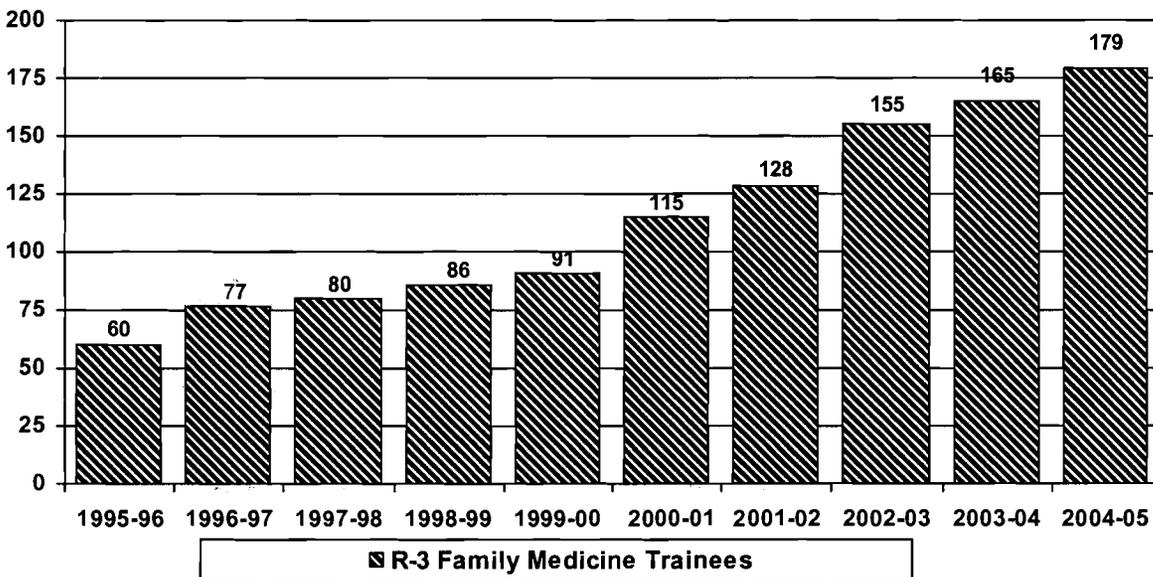

This table shows the number of new Canadian M.D. graduates entering training in the year in which they graduated. This number dropped abruptly in 1997 as a result in the cut to the number of medical school entry positions across Canada by more than 10% beginning in the 1990's. In 2004, the number of new Canadian graduates continues to increase with 1600 current year Canadian graduates entering residency.

4. Regular Ministry Funded Trainees: The Number of New Entry and Re-entry Residents

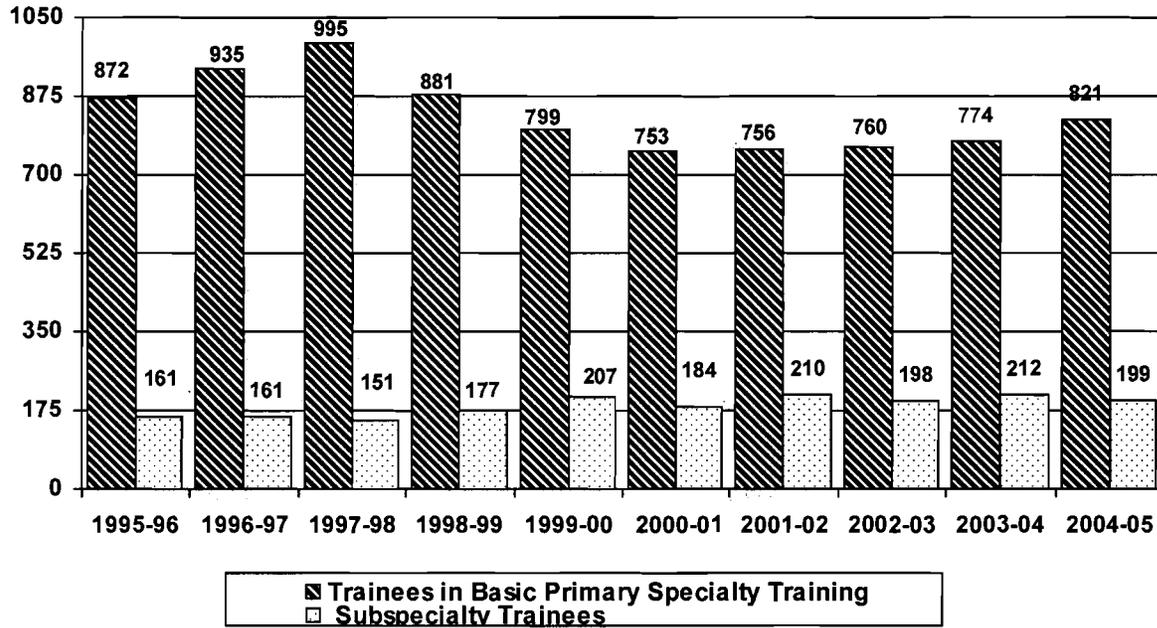

The number of re-entry trainees has remained low at 171 trainees in 2004.

5. Regular Ministry Funded Trainees: The Number of R-3 Level Trainees in Family Medicine

The number of Family medicine trainees at the R-3 level has continued to increase to 179 trainees. This number represents 27% of the previous year's R-2 level Family medicine trainees.

6. Regular Ministry Funded Trainees: Comparison of the Proportion of Specialty Residents (R-4 level) in Primary Specialties and Subspecialties

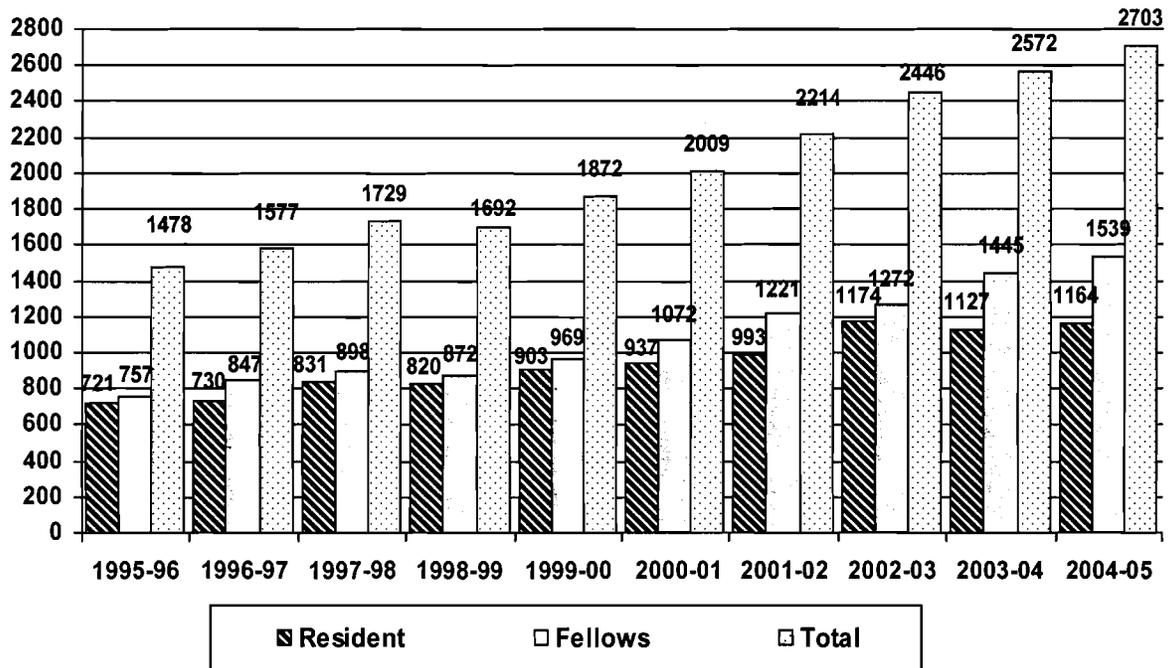

In 2004, 821 of the regular ministry funded R-4 trainees were in primary specialty programs and 199 were in subspecialty training. The proportion of subspecialty residents compared to specialty residents is 21% in 2004.

Quick Facts 2004-2005

3. Quick Facts: Concerning Non-Ministry Funded Post-M.D. Trainees 1995-1996 to 2004-2005

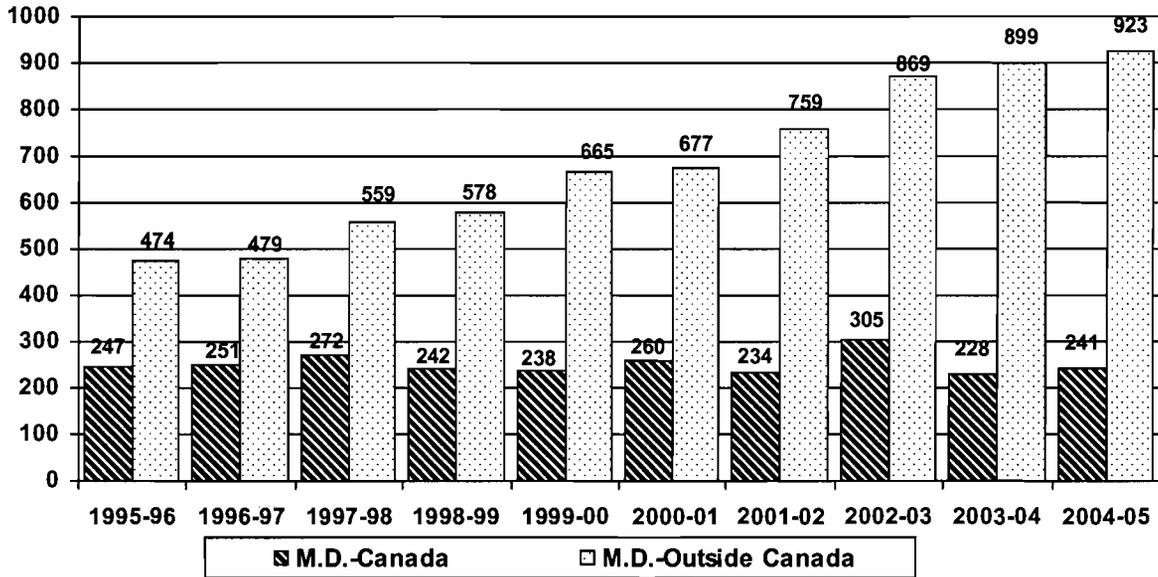

- A. From 1995 to 2004, there has been a steady increase in the number of non-ministry funded trainees from 1478 in 1995 to 2703 in 2004. (Table 1)
- B. Within the resident category of non-ministry funded trainees, the number of Canadian graduate trainees has increased slightly this year. The number of IMG non-ministry funded residents has continued to increase. These IMG residents are funded mainly from contracts with foreign governments.(Table 2)
- C. The number of non-ministry funded Canadian M.D. graduate fellows has remained stable this year. (Table 3)
- D. There has been a decrease to 35 non-ministry funded re-entry trainees. (Table 4)
- E. The number of non-ministry funded visa trainees has increased greatly from 1995-1996 to 2004-2005. This 140% increase in visa trainees over the last 10 years is the main factor in the increase in the number of non-ministry funded trainees. (Table 5)

1. Non-Ministry Funded Trainees : Residents Versus Fellows

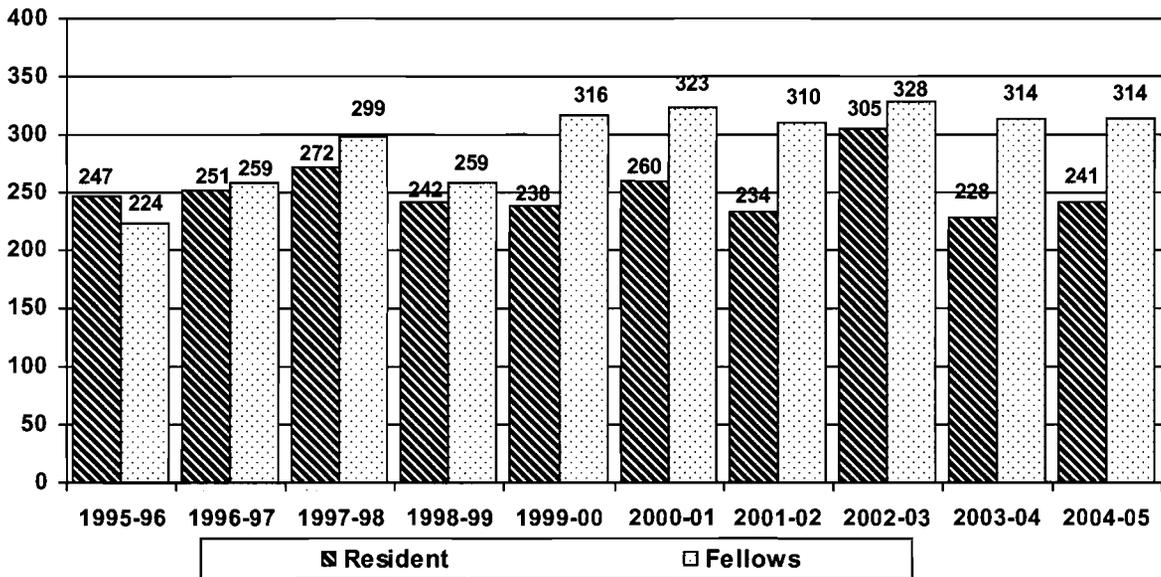

There has been an increase in both the number of non-ministry funded residents and non-ministry funded fellows.

2. Non-Ministry Funded Trainees : Comparison of the Number of Residents (Fellows Not Included) Who Were Graduates of Canadian Versus Foreign Medical Schools

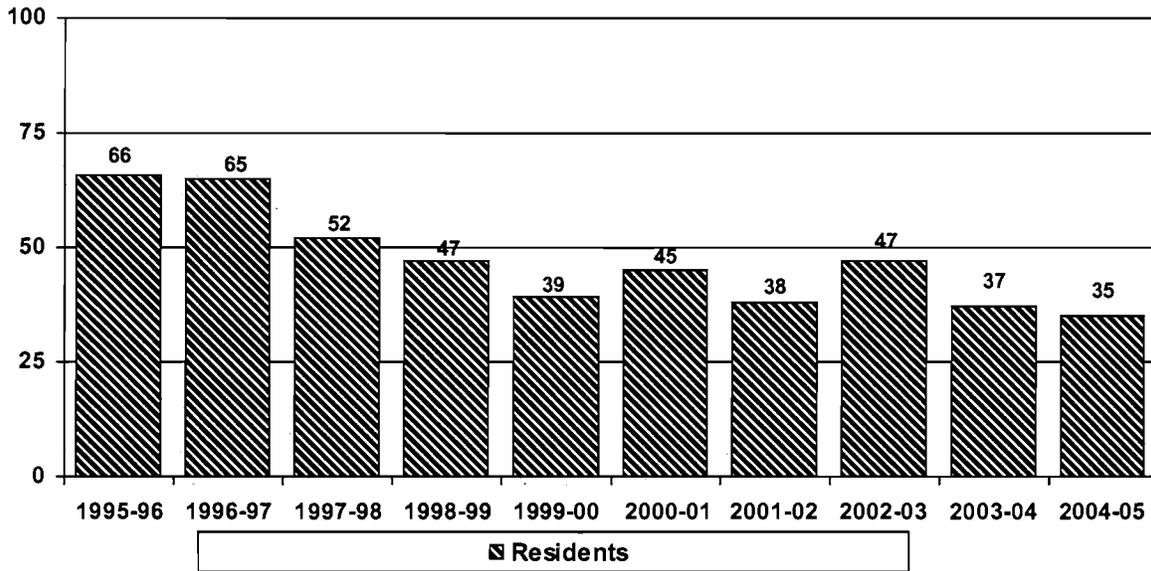

There has been a steady increase in the number of residents who are graduates of foreign medical schools supported by funds from outside the ministry of health, mainly from foreign government contracts. The number of non-ministry funded Canadian M.D. graduates (residents) in training has increased slightly over the last year.

3. Non-Ministry Funded Trainees: Residents Versus Fellows Who Were Graduates of Canadian Medical Schools

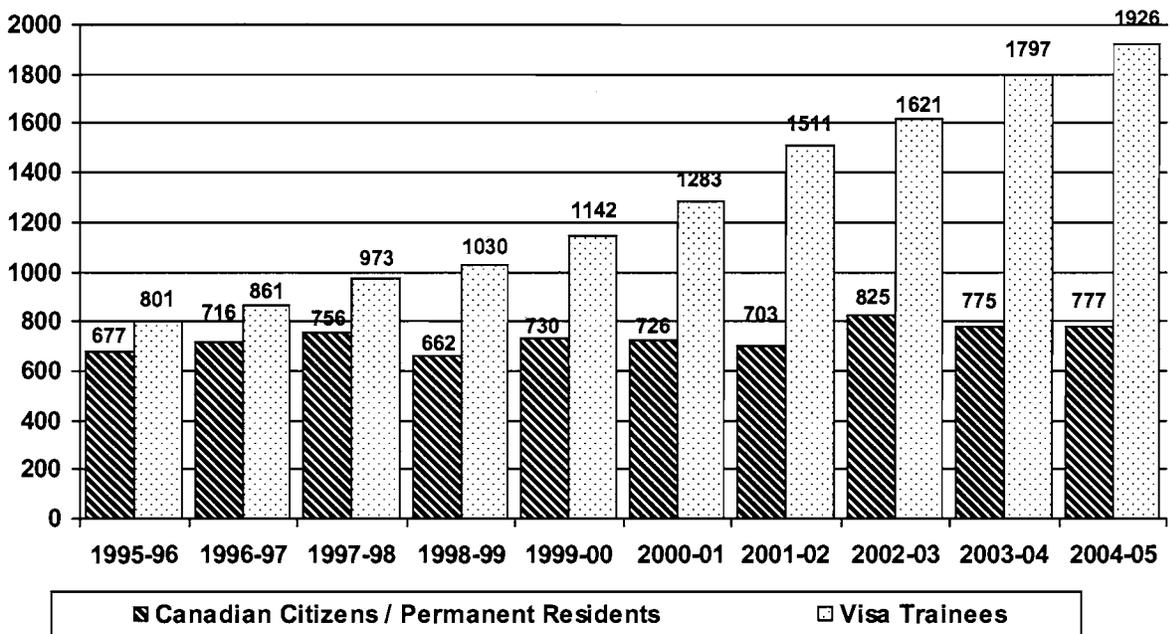

The number of fellows who were graduates of Canadian faculties of medicine funded by non-ministry of health sources has remained stable in the last year.

4. Non-Ministry Funded Trainees: Re-entry Residents Who Were Graduates of Canadian Medical Schools

The number of non-ministry funded re-entry positions has decreased to 35 trainees.

5. Non-Ministry Funded Trainees: Canadian Citizens/Permanent Residents Versus Visa Trainees

The increase in the total number of non-ministry funded trainees has resulted from the increasing funding for visa trainees, mainly from sources outside Canada. The number of Canadian citizens/permanent residents whose training is funded by non-ministry sources has remained stable over the past 2 years.

Data from the 2004–2005 CAPER Annual Census of Post-M.D. Trainees

The following tables are grouped under topics of significance to post-M.D. training in Canada. The tables that have been selected give an overview of the distribution of the post-M.D. trainee population in Canada, among the provinces, faculties of medicine, and fields of training. These tables represent only a sample of the many ways variables can be combined to provide useful and interesting data.

See the section at the front of this report titled **"Using The CAPER Database"** if you wish to request specific tables.

- J. Supplementary Data

Données provenant du recensement annuel des stagiaires post-M.D. 2004–2005

Les tableaux sont groupés selon les domaines d'intérêt à la formation post-M.D. au Canada. Les tableaux choisis donnent une vue d'ensemble de la distribution des stagiaires post-M.D. à travers le Canada, parmi les provinces, les facultés de médecine et les domaines de formation. Ces tableaux ne représentent qu'un échantillon des multiples façons d'utiliser les variables afin de fournir une information qui soit à la fois utile et intéressante.

Si vous désirez obtenir des tableaux spécifiques, reportez-vous à la section intitulée **"Utilisation de la base de données de CAPER"** située au début de cet ouvrage.

7	Year of Exit from Post-M.D. Training (1989-2004) <i>by</i> Field of Post-M.D. Training (Canadian citizens/permanent residents of Canada)	83	7	La dernière année de formation post-M.D. (1989-2004) <i>par</i> domaine de formation post-M.D. (citoyens canadiens/résidents permanents au Canada)

**Trainees Who Exited Post-M.D. Training Between
November 1, 2003 AND November 1, 2004
(at a rank level consistent with completion of training)**

Beginning with the "2000" exit cohort, physicians who left a training program prior to completing a sufficient number of years of training required for certification from any of Canada's three certification organizations (The College of Family Physicians of Canada, le Collège des médecins du Québec and The Royal College of Physicians and Surgeons of Canada) were not included in the estimated practice entry cohort. The CAPER Policy Committee agreed to this change in the definition of the practice entry cohort because unrestricted licensure in each province and territory of Canada requires certification in either Family medicine or a specialty. Physicians who exit training prior to completion of their program would not have the qualifications for full licensure in Canada.

Other than this change in exit criteria, the exit groups will be presented in the same four groups as in previous CAPER publications.

I. Graduates of Canadian Faculties of Medicine

- a) Physicians who earned the M.D. degree in Canada who went directly through post- M.D. training and are entering practice for the first time (the new entry cohort).
- b) Physicians who earned the M.D. degree in Canada who have re-entered training after having already had a period of practice in Canada (the re-entry cohort).

II. Graduates of Foreign Medical Schools

- a) Graduates of foreign medical schools who were Canadian citizens /permanent residents on July 1 of their last year of post-M.D. training (A small re-entry cohort has been isolated from this group). These physicians would have the legal status necessary to work in Canada.
- b) Graduates of foreign medical schools who held a temporary employment visa while in their last year of post-M.D. training. It is assumed that these physicians will not enter practice in Canada in view of their visa status and they are not included in the practice entry cohort.

I. Isolation of the New Entry and Re-Entry Groups of Graduates of Canadian Faculties of Medicine

Table 1 compares the proportion of trainees in each field of training for the new entry (1410 trainees) and re-entry (91 trainees) group of graduates of Canadian faculties of medicine in the exit group.

In the new entry group, 517 (36.7%) of the cohort were exiting from Family medicine programs, and 893 (63.3%) were exiting from specialty programs: 601 (42.6%) from medical specialties, 20 (1.4%) from lab medicine specialties and 272 (19.3%) from surgical specialties. (The 7 Palliative medicine physicians were included in the specialties total.)

In the re-entry group, only 21 (35.8%) of the physicians were completing Family medicine programs and most of them were in the programs giving additional training beyond the 2-year Family medicine program. The majority of the residents (80.8%) were in specialty training programs.

II Graduates of Foreign Medical Schools

The two groups of exiting graduates of foreign medical schools have been compared in **Table 2**. Of the trainees expected to stay in Canada, 114 (42.2%) exited from Family medicine training programs and 156 (57.8%) exited from specialty training programs. Altogether, 270 Canadian citizen International Medical Graduates exited from training in 2004.

Table 3: Trainees Exiting Canadian Training Programs Between November 1, 2003 and November 1, 2004 (at a rank level consistent with completion of training).

Four main exit groups have been isolated and a small group of re-entry graduates of foreign medical schools has also been noted.

Estimated Practice Entry Cohort (Table I-7)

The estimate is based on the number of new physicians entering medical practice in Canada via the post-M.D. training programs: The new entry Canadian M.D. graduates and the new entry graduates of foreign medical schools who were Canadian citizens/ permanent residents. Thus, groups 1A and 2Ai from Table 3 are combined to form the estimated practice entry cohort. In 2004, there were 1669 new physicians in the estimated practice entry cohort, 1410 graduates of Canadian Faculties of medicine and 270 graduates of foreign medical schools. The following tables, H-1 and H-2 were prepared using the estimated practice entry cohort. Only physicians exiting at a rank level consistent with completion of training were included.

**Table 3
 Summary Table
 Trainees Exiting Canadian Post-M.D. Training Programs
 Between Nov. 1, 2003 and Nov. 1, 2004
 (at a rank level consistent with completion of training)**

Exit Group	Description	No. of Trainees
IA	Graduates of Canadian faculties of medicine who proceeded directly through (includes physicians who had a one year absence) post-M.D. training (new entry group)	1410
IB	Graduates of Canadian faculties of medicine who had taken a break in training (re-entry group)	91
2Ai	Graduates of foreign medical schools who were Canadian citizens or permanent residents on July 1, 2003 who proceeded directly through (includes physicians who had a one year absence) post-M.D. training (new entry group)	259
2Aii	Graduates of foreign medical schools who were Canadian citizens or permanent residents on July 1, 2003 who had taken a break in training (re-entry group)	11
2B	Graduates of foreign medical schools who were visa trainees on July 1, 2003	625

I. Tables Covering The Time Period From 2000-01 to 2004-2005 Tableaux couvrant la période de 2000-01 à 2004-2005

1	Field of Post-M.D. Training <i>by</i> Source of Funding for Post-M.D. Training	85	1	Domaine de formation post-M.D. <i>par</i> source de financement de la formation post-M.D.
2	Province of Location of Faculty of Medicine Providing Post-M.D. Training <i>by</i> Source of Funding for Post-M.D. Training	91	2	Province de la faculté de médecine offrant la formation post-M.D. <i>par</i> source de financement de la formation post-M.D.
2i.	Province of Location of Faculty of Medicine Providing Post-M.D. Training <i>by</i> Source of Funding for Post-M.D. Training (fellows and visa trainees not included)	93	2i.	Province de la faculté de médecine offrant la formation post-M.D. <i>par</i> source de financement de la formation post-M.D. (moniteurs cliniques et stagiaires avec permis de travail non compris)
3	Field of Post-M.D. Training <i>by</i> Gender (visa trainees not included)	95	3	Domaine de formation post-M.D. <i>par</i> sexe (stagiaires avec permis de travail non compris)
4	Field of Post-M.D. Training <i>by</i> Location of University Which Awarded the M.D. Degree	102	4	Domaine de formation post-M.D. <i>par</i> lieu de l'université ayant décerné le doctorat en médecine
5	Faculty of Medicine Providing Post-M.D. Training <i>by</i> Legal Status (residents only - fellows not included)	108	5	Faculté de médecine offrant la formation post-M.D. <i>par</i> statut légal (résidents seulement - moniteurs cliniques non compris)
6	Faculty of Medicine Providing Post-M.D. Training <i>by</i> M.D. Degree Awarded in the Province Providing Post-M.D. Training (current year Canadian M.D. graduates only)	114	6	Faculté de médecine offrant la formation post-M.D. <i>par</i> doctorat en médecine décerné dans la province offrant la formation post-M.D. (diplômés des facultés canadiennes pour l'année en cours seulement)
7	Field of Post-M.D. Training <i>by</i> Location of University Which Awarded the M.D. Degree (estimated practice entry cohort)	117	7	Domaine de formation post-M.D. <i>par</i> lieu de l'université ayant décerné le doctorat en médecine (taille approximative de la cohorte entrant en exercice)
7i	Proportion of the Practice Entry Cohort in Each Training Field (estimated practice entry cohort)	123	7i	Proportion du cohorte qui entre en exercice dans chaque domaine de formation post-M.D. (la taille approximative du cohorte qui entre en exercice)
8	First Year Trainees, Field of Training <i>by</i> Legal Status (Canadian citizens/permanent residents vs. visa trainees)	129	8	Stagiaires en première année post-M.D., domaine de formation post-M.D. <i>par</i> statut légal (citoyens canadiens ou résidents permanents contre stagiaires avec permis de travail)
9	First Year Trainees: Proportion of First Year Trainees in Each Field of Training (Canadian citizens/permanent residents only)	132	9	Stagiaires en première année post-M.D.: Proportion de stagiaires en première année post-M.D. dans chaque domaine de formation post-M.D. (citoyens canadiens/résidents permanents seulement)

* Graduates of Canadian faculties of medicine (new entry group) AND graduates of foreign medical schools who were Canadian citizens or permanent residents (new entry group) at the completion of post-M.D. training.
(See the methodology description in Section H.)

** Beginning in 2000, the new methodology was used to estimate the practice entry cohort in this publication. However, in the 2000-2001 edition of the CAPER Annual Census, the data for 2000-2001 were prepared using the old methodology.

* Graduates of Canadian faculties of medicine (new entry group) AND graduates of foreign medical schools who were Canadian citizens or permanent residents (new entry group) at the completion of post-M.D. training. (See Section H)

** Beginning in 2000, the new methodology was used to estimate the practice entry cohort in this publication. However, in the 2000-2001 edition of the CAPER Annual Census, the data for 2000-2001 were prepared using the old methodology.

†These data include 56 students (5 three years from graduation, 22 two years from graduation, 29 in the final year) enrolled in above-quota positions under contract between the medical school and a foreign government or institution.

Table J-5
Table/Tableau 32 (AFMC data)

**MD Degrees Awarded by Canadian Universities by Legal Status in Canada
at Time of Entry to Medical School**

1986 - 2004 (preliminary)

**Diplômes de doctorat en médecine (MD) décernés par les universités
canadiennes selon le statut légal au Canada
au commencement des études en médecine**

Year of MD	Legal Status In Canada			Student Visa ²	Total
	Canadian Citizen	Permanent ¹ Resident	Sub-total CC+ PR		
1986	1 658	63	1 721	37	1 758
1987	1 657	74	1 731	35	1 766
1988	1 683	60	1 743	38	1 781
1989	1 625	65	1 690	32	1 722
1990	1 604	72	1 676	32	1 708
1991	1 604	71	1 675	29	1 704
1992	1 648	60	1 708	41	1 749
1993	1 608	71	1 679	23	1 702
1994	1 564	91	1 655	31	1 686
1995	1 613	92	1 705	34	1 739
1996	1 568	77	1 645	40	1 685
1997	1 496	52	1 548	29	1 577
1998	1 514	44	1 558	46 ²	1 604
1999	1 518	34	1 552	42 ²	1 594
2000	1 479	28	1 507	71 ²	1 578
2001	1 446	23	1 469	68 ²	1 537
2002	1 451	26	1 477	66 ²	1 543
2003	1 559	31	1 590	73 ²	1 663
2004	1 650	40	1 690	66 ²	1 756

¹ *Permanent Resident* includes refugees and refugee claimants.

² For the first time in 1998, foreign students graduated from various Canadian faculties of medicine, but were enrolled in above-quota, contract positions. The following numbers of graduates of Canadian medical schools were in Canada in above-quota, contract positions:

<u>Year of MD</u>	<u>Number</u>
1998	17
1999	11
2000	23
2001	31
2002	29
2003	32
2004	25

Table J-6

The Number of Trainees Switching Between Major Training Field Categories for Each of the Last 5 Years

1. Changes between Family Medicine and Specialty training fields

	A. Changes <i>From</i>: Family Medicine <i>To</i>: Any Specialty	B. Changes <i>From</i>: Any Specialty <i>To</i>: Family Medicine
1999-2000	47	68
2000-2001	38	48
2001-2002	36	45
2002-2003	31	49
2004-2005	36	46

2. Changes between Specialty fields

	A. Changes <i>From</i>: Medical Specialties <i>To</i>: Surgical Specialties	B. Changes <i>From</i>: Surgical Specialties <i>To</i>: Medical Specialties
1999-2000	8	16
2000-2001	12	24
2001-2002	6	36
2002-2003	13	26
2004-2005	9	30

3. Total: Changes among training field groups

Year	Total
1999-2000	139
2000-2001	122
2001-2002	123
2002-2003	119
2004-2005	121

Note: Movement of trainees between any training field and Palliative medicine are not counted as changes.

Although most program changes occur at the R-1 level, these tables include program changes at all training levels.
