Acknowledgements

For the first time, the *CAPER Annual Census* will not be produced as a book. It will now be available in an electronic version only on the CAPER website: www.caper.ca. This is the 19th version of the *CAPER Annual Census* and is made possible by the participating national medical organizations and governments (Provincial, Territorial and Federal).

Our work with representatives from these organizations and governments ensures that the data we produce provide them with the information they require for the development of policies concerning post-M.D. training and physician resources in Canada.

Along with the data CAPER is provided by the postgraduate offices of the 17 Canadian faculties of medicine, our publication relies on data from two other sources, the Canadian Medical Association (CMA) and the Association of Faculties of Medicine of Canada (AFMC). We rely on and appreciate the work of Ms. Lynda Buske and Ms. Shelley Martin at the CMA and Dr. Nicholas Busing and his staff, Ms. Liane Kealey and Ms. Dale Yeatman at AFMC and the willing help of the 17 associate deans for postgraduate medical education and their administrative offices. All of the members of CAPER's Executive and Policy Committees have been most supportive in their help with the management of CAPER. In Ontario, we appreciate the work of the Ontario Physician Human Resources Data Centre toward the development of this publication.

Special thanks go to the CAPER staff, Ms. Hélène LeBlanc and Mr. Leslie Forward who have worked to a very high standard on behalf of the CAPER Executive Committee. Dr. Jill Nation, the chairman of the CAPER Executive Committee has provided special expertise on behalf of AFMC to manage this national cooperative endeavour.

It has been a pleasure to work for all of the participating organizations and governments in managing this unique national resource for them.

A. Dianne Thurber, M.A.
Director, CAPER

Remerciements

Pour la première fois, le *Recensement annuel des stagiaires en formation postdoctorale de CAPER* ne sera plus produit comme un livre. Il serait maintenant uniquement disponible sur notre Site Web: www.caper.ca. Ceci est la 19ième version du *Recensement annuel des stagiaires en formation postdoctorale de CAPER* et a été rendu possible grâce au soutien financier des organisations médicales nationales et des gouvernements participants (provinciaux, territoriaux et fédéral).

La collaboration de CAPER avec les représentants de ces organisations et gouvernements permet d'obtenir l'assurance que les données que nous réunissons fournissent à ces derniers l'information dont ils ont besoin pour élaborer des politiques concernant la formation postdoctorale et les ressources en médecins au Canada.

Outre les données que CAPER reçoit des 17 facultés canadiennes de médecine au sujet des stagiaires en formation postdoctorale, le *Recensement* repose sur deux autres sources d'information, à savoir l'Association médicale canadienne (AMC) et l'Association des facultés de médecine du Canada (AFMC). CAPER est très heureux de pouvoir compter sur la collaboration de M^{mes} Lynda Buske et Shelley Martin, à l'AMC, du D^r Nicholas Busing et de M^{mes} Liane Kealey et Dale Yeatman, à l'AFMC, sans oublier l'aide diligente des 17 vice-doyens responsables de l'éducation médicale postdoctorale et de leurs bureaux administratifs respectifs. Tous les membres du Comité exécutif et du Comité des politiques de CAPER ont également été d'un grand secours au titre de la gestion de l'organisation. En Ontario, le Centre des données sur les ressources humaines en médecins de l'Ontario a apporté une précieuse contribution à l'élaboration du présent rapport.

Je tiens également à remercier M^{me} Hélène LeBlanc et M. Leslie Forward, de CAPER, qui se sont tous les deux acquittés avec brio de leurs tâches pour le compte du Comité exécutif de l'organisation. D^r Jill Nation, présidente du Comité exécutif, a mis à profit son expertise spécialisée à l'AFMC pour mener à bien la gestion de cet exercice coopératif d'envergure nationale.

Je tiens à souligner que ce fut un véritable plaisir que de collaborer avec toutes les organisations et gouvernements participants et pour le compte de ces derniers, à la préparation de ce rapport national unique.

A. Dianne Thurber, M.A.
Directrice, CAPER

USE THE CAPER DATABASE TO ANSWER THESE FREQUENTLY ASKED QUESTIONS:

1. Where do I find a **summary** of changes in the post-M.D. training population over the **last 10 years**?
2. How many **ministry funded** residents are in a specific specialty at each **faculty**?
3. How many **ministry funded** residents are there at each rank **level**?
4. How many new residents **entered** training in each **specialty** this year?
5. What is the **gender** of residents **entering** each specialty?
6. **How many** new physicians completed and **exited from** Canadian residency training?
7. **How old** are Canada's new physicians when they finish training?
8. What is the **gender** of the new physicians who completed and **exited** from Canadian residency training?
9. Where do the **M.D. graduates** of my faculty (province) eventually go to **practise medicine**?
10. Where do the **post-M.D. trainees** from my faculty (province) eventually go to **practise medicine**?
11. **Individual training fields** - detailed information (the number of residents and fellows at each rank level at each faculty)

Background

CAPER (the Canadian Post-M.D. Education Registry) was established in 1986 through the co-operation of national medical organizations with an interest in the post-M.D. clinical education of physicians in Canada. The Association of Faculties of Medicine of Canada, the Canadian Association of Internes and Residents, the Canadian Medical Association, The College of Family Physicians of Canada, The Medical Council of Canada, Health Canada, and The Royal College of Physicians and Surgeons of Canada, have provided both expertise and financial support for the development and operation of CAPER. Provincial and territorial ministries of Health have contributed to CAPER beginning in 1992.

CAPER is incorporated within the by-laws of The Association of Faculties of Medicine of Canada with the mandate to provide accurate information which may be used for medical manpower planning on a national basis. To accomplish this task, an individual longitudinal file is maintained containing socio-demographic information and details of the current and past training programs of each resident or fellow under the supervision of the Canadian Faculties of Medicine on November 1 of each year. The data in this document are derived from information submitted for November 1, 2005 by the office of Postgraduate Medical Education at each of the 17 Canadian Faculties of Medicine.

Historique

CAPER (Système informatisé sur les stagiaires post-M.D. en formation clinique) a été établi en 1986 avec la coopération de diverses organisations médicales du Canada intéressées par la formation clinique post-M.D. au Canada. L'Association des facultés de médecine du Canada, l'Association canadienne des internes et des résidents, l'Association médicale canadienne, Le Collège des médecins de famille du Canada, Le Conseil médical du Canada, Santé Canada, ainsi que Le Collège royal des médecins et chirurgiens du Canada ont contribué au développement et au bon fonctionnement de CAPER en partageant leurs connaissances et en lui apportant un soutien financier depuis 1982.

CAPER est constitué en société dans le cadre des statuts de L'Association des facultés de médecine du Canada avec pour mandat de fournir des renseignements précis pouvant être utilisés pour fins de planification de la main-d'œuvre médicale au niveau national. Pour ce faire, un fichier longitudinal est tenu à jour contenant l'information pertinente à chaque résident ou moniteur clinique (fellow) inscrit aux différentes facultés de médecine canadiennes en date du 1^{er} novembre de chaque année. L'information socio-démographique et les détails du programme de formation de cette année et des années passées y sont inclus. Les données de ce document reflètent l'information soumise au 1^{er} novembre 2005 par le personnel administratif des bureaux de formation médicale postdoctorale des dix-sept facultés de médecine canadiennes.

The Reporting Process

The individual records of all trainees under the supervision of each Canadian faculty of medicine are provided to CAPER by the postgraduate medical education office of the respective faculty. All post-M.D. trainees (residents and fellows) in training positions on November 1 of the current academic year are reported to CAPER. The following information is included in the yearly report:

- the faculty of medicine supervising post-M.D. training
- socio-demographic information
- previous medical education and certification, and
- field of current post-M.D. training

This information is collected by all faculties at the time of registration for post-M.D. training each year and is sent to CAPER, in coded form. Information sent to CAPER is checked for missing or incorrect items. Reports are then sent back to the appropriate postgraduate medical education office of the Canadian faculties of medicine for further verification of the information on their trainees.

Data Privacy

At the Canadian Post-M.D. Education Registry (CAPER), we take physician privacy very seriously. It is a long-established policy of CAPER and the Association of Faculties of Medicine of Canada (AFMC), of which Association CAPER is a component division, to deal with all physician information in a sensitive manner, in order to ensure that our collections, uses, disclosures, retention and disposals of physician information are carried out in accordance with best privacy practices.

The full CAPER Privacy Policy is on the website: caper.ca.

Méthode de déclaration

Le bureau de la formation médicale postdoctorale de chaque faculté de médecine canadienne fournit à CAPER les dossiers de tous les stagiaires qui relèvent de la faculté. Sont déclarés à CAPER tous les stagiaires post-M.D. (résidents et moniteurs cliniques) qui occupent un poste de formation le 1^{er} novembre de l'année universitaire en cours. La déclaration annuelle comprend les renseignements suivants :

- la faculté de médecine qui encadre la formation post-M.D.,
- des données socio-démographiques,
- la formation médicale antérieure et les titres de compétence,
- le domaine de la formation post-M.D. en cours

Ces renseignements sont recueillis chaque année par toutes les facultés lors des inscriptions aux programmes de formation post-M.D., puis transmis à CAPER sous forme chiffrée. CAPER les vérifie pour déceler les erreurs ou omissions, puis renvoie les déclarations au bureau de la formation médicale postdoctorale de la faculté de médecine en question. Les renseignements sur les stagiaires font alors l'objet d'une nouvelle vérification.

Confidentialité des données

Le Système informatisé sur les stagiaires post-M.D. en formation clinique (CAPER) prend très au sérieux la confidentialité des renseignements concernant les médecins. CAPER et l'Association des facultés de médecine du Canada (AFMC), dont CAPER est une division, s'emploient de longue date à appliquer une politique des plus à jour sur la protection des renseignements personnels concernant les médecins, de façon à ce que les activités de collecte, d'utilisation, de divulgation, de conservation et d'élimination desdits renseignements respectent les règles de l'art en la matière.

La confidentialité des données de CAPER se trouve au complet sur le site Web : caper.ca.

How to Access the CAPER Data Tables

The CAPER data tables are now available on the CAPER website www.caper.ca.

The familiar *CAPER Annual Census of Post-M.D. Trainees* will no longer be available as a book. Be sure to use the website to access the information you need. The *CAPER Annual Census of Post-M.D. Trainees*, the *CAPER Provincial Reports*, and the *CAPER Individual Specialty Tables* can now be found at www.caper.ca

The CAPER database has been designed to serve as an information resource for physician workforce planning on a national and provincial or regional basis in Canada. Information is held in an individual longitudinal format to permit the study of the flow of trainees through the post-M.D. training system. Although information permitting the identification of individuals is not released from CAPER, group data tabulations and statistics will be prepared in response to requests. **Preparation will be on a cost-recovery basis.**

Data requests made to CAPER are welcome.

Utilisation de la banque de données de CAPER

Les tableaux de données de CAPER sur le site Web de celui-ci, à www.caper.ca.

L'*Annuaire de recensement de CAPER des stagiaires post-M. D. en formation clinique* ne sera plus publié sous forme de livre. Veuillez désormais utiliser le site Web pour obtenir des informations. Les *Rapports provinciaux sur les stagiaires post-M. D. en formation clinique*, ainsi que les *Tableaux individuels des spécialités* sont maintenant accessibles à www.caper.ca.

La base de données de CAPER fut conçue comme source d'information pour la planification de la main d'oeuvre médicale au niveau national et provincial ou régional. L'information est cueillie sous forme de fiches longitudinales individuelles afin de pouvoir obtenir un vue d'ensemble des stagiaires inscrits à la formation post-M.D. Bien que CAPER ne divulgue aucun renseignement permettant d'identifier des individus, des tableaux et des statistiques de groupe peuvent être préparés sur demande. **Ce service est offert à prix coûtant.**

Toutes demandes de statistiques faites auprès de CAPER seront les bienvenues.

Definitions

The data provided to CAPER by all the Canadian Faculties of medicine contain the information on each trainee in accordance with definitions established by CAPER. Following are these definitions and other important details pertaining to the specific variables used in the tables presented in this document.

Faculty of Medicine Providing Post-M.D. Training

The faculty of medicine supervising the post-M.D. trainee on November 1 of the report year.

Field of Post-M.D. Training

The type of non-specialized training, Family medicine training, or the speciality field in which a trainee is enrolled on November 1 of the report year.

Clinician Investigator Program

This is a training program accredited by the RCPSC for the purpose of providing additional research skills for physicians who are registered in one of the specialty or subspecialty training programs. Physicians reported in the A-7 table have already been included within their specialty training field in all other tables.

Rank

All new M.D. graduates now enter directly into either a Family medicine or a specialty training program at the R-1 level.

Two years of training, the R-1 and R-2 levels, are required for certification in Family medicine. R-3 level training in Family medicine is provided in the accredited Family medicine training programs in Care of the Elderly and Emergency Medicine as well as in other additional training programs. To meet the training requirements of the RCPSC a minimum of four to six years of training is required, depending on the specific specialty in which certification is sought.

A trainee progresses through the rank levels in the following sequence:

- R-1 (Family medicine or specialty training)
- R-2
- R-3
- R-4
- R-5
- R-6
- R-7

Définitions

Les données, fournies par toutes les facultés de médecine canadiennes à CAPER, contiennent les renseignements concernant chaque stagiaire suivant les définitions établies par CAPER. Ces définitions, ainsi que d'autres détails importants relatifs aux variables spécifiques utilisées dans les tableaux présentés dans ce document, sont énoncés ci-après.

Faculté de Médecine Offrant la Formation Post-M.D.

La faculté de médecine supervisant le stagiaire d'un programme post-M.D. au 1^{er} novembre de l'année du rapport.

Domaine de Formation Post-M.D.

Le genre de stage non spécialisé, de médecine de famille, ou la spécialité auquel le stagiaire s'est inscrit au 1^{er} novembre de l'année du rapport.

Programme de Formation de Cliniciens-Chercheurs

Voici un programme de formation accrédité par le CRMCC, qui a pour objet d'enseigner des techniques de recherche supplémentaires aux médecins inscrits à l'un des programmes de spécialisation ou sur-spécialisation. Les médecins inscrits au tableau A-7 sont déjà inclus avec leur champ de spécialité dans tous les autres tableaux.

Rang

Tous les nouveaux diplômés en médecine doivent commencer maintenant leur formation post-doctorale au niveau R-1 soit par le programme de médecine de famille soit par un programme de spécialité.

Le certificat de médecine de famille est une formation de deux ans, soit les niveaux R-1 et R-2. Le niveau R-3 de médecine de famille est dispensé par les programmes agréés de médecine de famille spécialisés dans les soins aux personnes âgées, la médecine d'urgence et d'autres programmes de formation. Selon la spécialité choisie, un minimum de 4 à 6 années sont nécessaires pour obtenir un certificat du CRMCC.

Un stagiaire progresse de la façon suivante:

- R-1 (médecine de famille ou spécialité)
- R-2
- R-3
- R-4
- R-5
- R-6
- R-7

The following details concerning the ranking system in specific provinces are to be noted:

Maritime Provinces

(Physicians training at Dalhousie University)
Physicians in the first year of a program are ranked at the R-1 level. Physicians designated from R-2 to R-7 by CAPER are listed according to the PGY-2 to PGY-7 levels used at Dalhousie University. Any physicians beyond the PGY-7 level are ranked according to the appropriate RCPSC training level.

Ontario

The PGY-1 to PGY-7 or higher training levels in Ontario are reported as R-1 to R-7 by CAPER.

Fellows

CAPER uses the following definition of the term "fellow": a post-M.D. trainee who is registered with the Postgraduate Medical Education Office of a university faculty of medicine and who, regardless of the source of funding, is pursuing clinical or research training which will **NOT** be evaluated by the supervising faculty for the purpose of Canadian licensure, or certification by The College of Family Physicians of Canada, the Collège des médecins du Québec or The Royal College of Physicians and Surgeons of Canada. (Trainees with appropriate prerequisite training registered in RCPSC "accreditation without certification" programs are considered as residents, not fellows.).

Location of the Faculty of Medicine That Awarded the M.D. Degree

For individuals who earned the degree in Canada, the province of location of the faculty of medicine that awarded the M.D. degree is used. Post-M.D. trainees who earned the M.D. degree outside Canada are classified as such.

Source of Funding

The source of funding is the organization or government agency providing the funding for the position occupied by the trainee. Two main categories are used: "Regular Ministry Funds" and "Other Funds". "Regular Ministry Funds" refers to funds provided by the appropriate provincial government ministry responsible for the training of residents within that province. All other funding sources are grouped as "Other Funds". Graph I-2 identifies a subcategory of "Other Funds". This subcategory is called "Other Provincial

Notez ci-après des détails concernant le système de classement spécifiques à certaines provinces:

Provinces maritimes

(Les médecins en formation à l'université Dalhousie)
Les médecins en première année d'un programme sont enregistrés au niveau R-1. Les médecins de la deuxième à la septième année post-M.D. à l'université Dalhousie sont enregistrés du niveau R-2 au niveau R-7 par CAPER. Les médecins ayant accompli la septième année post-M.D. sont enregistrés selon les niveaux de formation du CRMCC.

Ontario

Les première aux septième (ou plus) années post-M.D. en Ontario sont enregistrées par CAPER sous les appellations R-1 à R-7.

Moniteurs cliniques (Fellows)

CAPER utilise la définition du terme moniteur clinique (fellow) énoncée ci-après : un stagiaire post-M.D. qui est inscrit auprès du Bureau des études médicales postdoctorales de la faculté de médecine d'une université et qui, quelque soit la source du financement, poursuit un stage clinique ou de recherche n'étant **PAS** évalué par la faculté supervisante en vue de l'obtention du permis d'exercer la médecine au Canada ou de la certification par Le Collège des médecins de famille du Canada, par le Collège des médecins du Québec ou par Le Collège royal des médecins et chirurgiens du Canada. (Les stagiaires possédant la formation requise et qui sont inscrits dans les programmes de "l'agrément sans le certificat" du CRMCC sont considérés comme des résidents et non comme des "fellows".)

Lieu de la faculté de médecine qui a décerné le diplôme M.D.

Pour les individus qui ont reçu leur diplôme au Canada, la province de la faculté de médecine qui a décerné le diplôme M.D. est utilisé. Ceux qui ont reçu leur diplôme ailleurs qu'au Canada sont classifiés en tant que diplômés de facultés de médecine étrangères.

Source de financement

La source de financement est l'organisme ou l'agence gouvernementale qui fournit le financement pour la position occupée par le stagiaire. Deux grandes catégories sont utilisées: "Fonds ministériels habituels" et "Autres fonds". Les "Fonds ministériels habituels" sont les fonds provenant des ministères des gouvernements provinciaux appropriés responsables des stages des résidents au sein de la province. Tous les autres sources de financement sont regroupés sous l'appellation "Autres fonds". Le graphe I-2 présente une sous-catégorie de la

"Government Funds" and includes such sources as ministry funds provided for complementary training by the Quebec Ministry of Health and Social Services, funds for residency training transferred from one province to another, and government-funded foundations such as the Alberta Heritage Foundation.

Age

Age is calculated as the age of the trainee on July 1, 2005 (the age of the trainee at the beginning of the July 2005 training session).

Legal Status

Three categories are used:

Canadian Citizen / Permanent Resident

Trainee is a citizen of Canada or has been accepted as a landed immigrant and has the right to live and work in Canada.

Visa

Trainees holding a visa permitting employment in Canada temporarily as a post-M.D. trainee

First Year Trainees

Only first-time trainees in their first year of post-M.D. training in Canada at the R-1 level are designated as "first year trainees" and are included in Section G of the book. Other trainees at the R-1 level who are re-entering training, repeating the first year, or changing specialties requiring a second year at the R-1 level are NOT included in Section G on first year trainees.

Trainees included in the first year trainee category according to CAPER are:

1. Graduates of Canadian medical schools at the R-1 training level who have not been previously reported to CAPER.
2. Graduates of foreign medical schools who are entering training at the R-1 level in Canada for the first time (visa trainees beginning a program at the R-1 level are, therefore, included in this group).

Estimated Practice Entry Cohort

The practice entry cohort comprises the physicians who have left the post-M.D. training system each year and would be legally able to work in Canada. In order to give a picture of new entries to practice,

catégorie "Autres fonds". Cette sous-catégorie s'intitule "Autres fonds des gouvernements provinciaux" et comprend entre autres des fonds provenant du ministère de la Santé et des Services sociaux du Québec destinés à financer une formation complémentaire, des fonds de transfert d'une province à une autre pour la formation clinique, et des fonds provenant de fondations financées par les gouvernements comme l'Alberta Heritage Foundation.

Âge

L'âge est calculé en fonction de l'âge du stagiaire au 1^{er} juillet 2005 (l'âge du stagiaire au commencement de la séance de stage de juillet 2005).

Statut légal

On utilise trois catégories :

Citoyen canadien / Résident permanent

Le stagiaire est citoyen canadien ou un individu ayant reçu le droit d'établissement au Canada et qui, en tant que tel, a le droit de vivre et travailler au Canada.

Visa

Le stagiaire est en possession d'un visa permettant d'être employé temporairement en tant que stagiaire post-M.D.

Stagiaires en première année post-M.D.

Seuls les stagiaires en première année post-M.D. au Canada pour la première fois sont regroupés dans la catégorie "stagiaires en première année post-M.D. (first year trainees)" et sont inclus dans la section G de ce document. Les autres stagiaires du niveau R-1 qui reprennent une formation, redoublent leur première année ou changent de spécialité et ont besoin de recommencer une première année au niveau R-1 NE SONT PAS inclus dans la section G dans la catégorie "stagiaires en première année post-M.D."

Selon CAPER, les stagiaires regroupés dans la catégorie "stagiaires en première année post-M.D. (first year trainees)" sont les suivants :

1. les diplômés des facultés de médecine canadiennes au niveau R-1 et n'ayant pas encore été enregistrés dans les données de CAPER.
2. les diplômés de facultés de médecine étrangères qui sont admis au niveau R-1 au Canada pour la première fois (les stagiaires possédant un visa et débutant une formation au niveau R-1 sont donc inclus dans cette catégorie).

Estimation de la cohorte de nouveaux praticiens

La cohorte de nouveaux praticiens contient les médecins ayant terminé leur formation post-M.D. dans l'année et qui sont en droit d'exercer au Canada. Afin de présenter un tableau des nouveaux praticiens,

re-entry trainees (as discussed in Section H) and visa trainees have not been included in the estimated practice entry cohort.

Gender

Visa trainees have not been included in the data pertaining to gender. This was done to give a more realistic picture of the gender mix of the cohorts of physicians who will be entering practice in Canada. The tables which have been affected are A-3, G-5 and I-3.

Completion of Training

This term is used in Section J to indicate that the group exited training at a level appropriate for completion of training (e.g. R-2 or higher for Family medicine, R-4 or higher for most RCPSC specialties and R-5 or higher for subspecialties and surgical specialties).

Palliative Medicine

Palliative medicine is a unique specialty in that it is accredited jointly by the Royal College of Physicians and Surgeons of Canada and by the College of Family Physicians. As such, it is placed in a separate category where training programs have been listed separately. Where the training programs have been grouped in the categories "Family medicine", "Medical specialties", "Laboratory medicine specialties" and "Surgical specialties", Palliative medicine has been included with "Medical specialties". This is because it includes too few physicians in it to form an isolated category.

les stagiaires qui reprennent leur pratique (voir section H) et les stagiaires qui ont un visa d'emploi temporaire ne sont pas inclus dans cette estimation.

Sexe

Les stagiaires qui ont un visa n'ont pas été inclus dans les données relatives au sexe, de façon à présenter un tableau plus réaliste des sexes dans les cohortes de médecins commençant à exercer au Canada. Ce changement porte sur les tableaux A-3, G-5 et I-3.

Fin de formation

Ce terme est utilisé dans la section J et signifie que le groupe a atteint le niveau d'études correspondant à la fin de formation (par exemple: R-2 pour la médecine de famille, R-4 ou plus pour la plupart des spécialités du Collège royal et R-5 pour les sur-spécialités et spécialités de chirurgie).

Médecine palliative

Le programme de médecine palliative se distingue par le fait qu'il a été agréé à la fois par le Collège royal des médecins et chirurgiens du Canada et par le Collège des médecins de famille. À ce titre, il a été classé dans une catégorie distincte qui énumère séparément les programmes de formation. Lorsque ces derniers sont regroupés par catégorie, soit "Médecine de famille", "Spécialités médicales", "Spécialités de médecine de laboratoire" et "Spécialités chirurgicales", le programme de médecine palliative fait partie de "Spécialités médicales". Il comprend en effet trop peu de médecins pour former une catégorie à part entière.

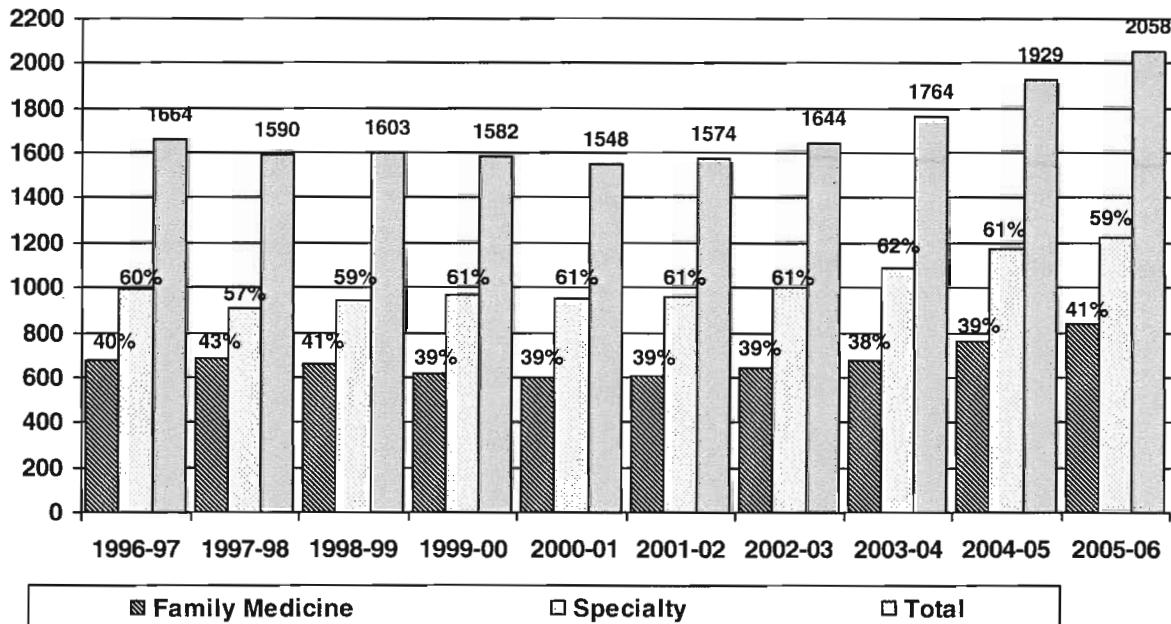

Quick Facts 2005-2006

1. Quick Facts: Concerning Canadian Citizens/Permanent Residents

This set of tables contains the post-M.D. trainees who we expect to be the new physicians for Canada. The majority in this group are graduates of Canadian Faculties of medicine, but International Medical Graduates who are Canadian citizens or permanent residents of Canada are also included in the following figures. As shown in table 3, International Medical Graduates who are Canadian citizens now account for 13% of the entry cohort.

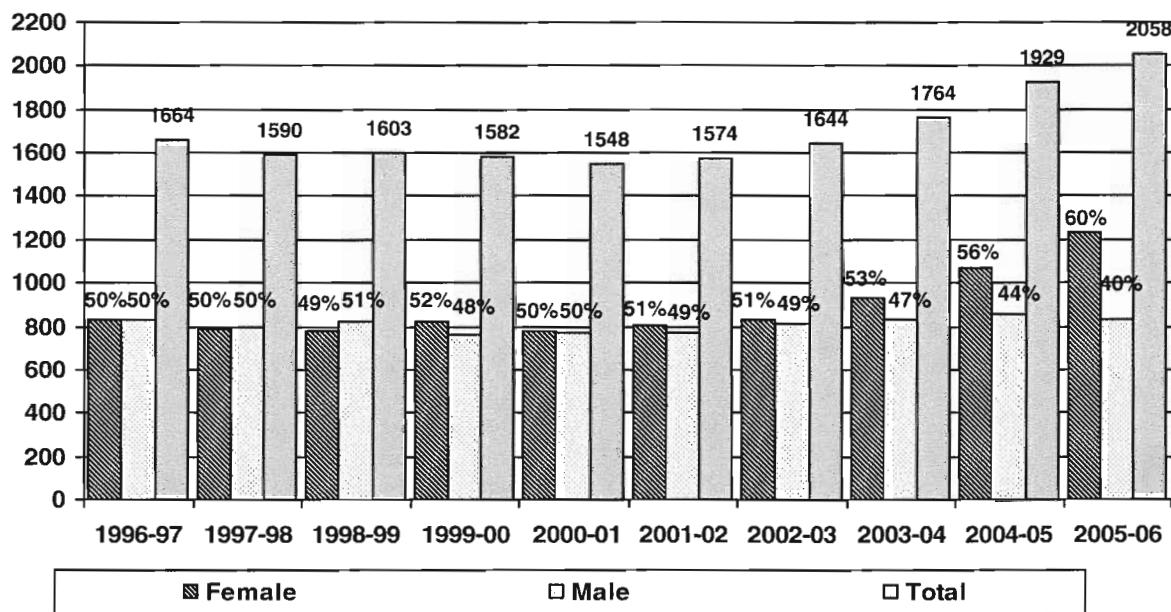

- A. **First year trainees:** Entry to post-M.D. training has increased as a result of the larger number of Canadian M.D. graduates in 2005. The number of first year Canadian citizens/permanent residents has increased to 2058. The number of Canadian citizen first year trainees started to increase in 2002-03 and will continue in line with the increasing number of undergraduate M.D. students in Canada. (*Tables 1 and 2*)
- B. **International Medical Graduates:** Both the number and proportion of International Medical Graduates (Canadian citizens/permanent residents) entering the first year of post-M.D. training have decreased slightly to 259 trainees which is 13% of the entry group. (*Table 3*)
- C. **Gender:** The proportion of women in medicine has been steadily increasing. In 2005-06, 60% of the Canadian citizen/permanent resident physicians entering training were female. When we consider physicians completing training in 2005, 61% of the new Family physicians were female and 46% of new specialists were women. (*Tables 2 and 10*)
- D. **Specialty mix:** Specialty mix at entry to and exit from post-M.D. training. In 2005-06, 41% of the first year trainees were in Family medicine. This proportion has increased this year and also the number of physicians entering training in both Family medicine and specialty training has started to increase. The proportion of Family physicians in the exit cohort in 2005 was 39%. (*Tables 1 and 7*)

1. Canadian Citizens and Permanent Residents: Comparison of the Proportions of First Year Trainees in Family Medicine and Specialty Training Programs

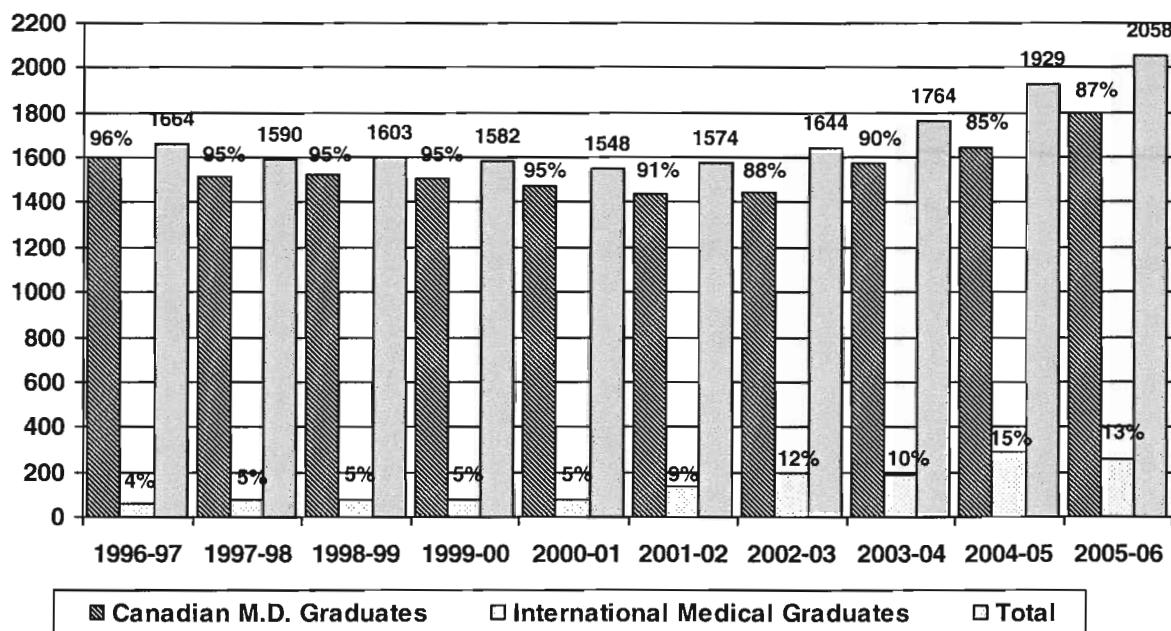

From a low of 1548 in 2000, we have seen an increase in the number of Canadian citizen/permanent resident physicians entering training. This number has risen to 2058 in 2005. Also the proportion of those in Family medicine has increased in the last year to 41% (n = 835). 59% of first year trainees (n = 1223) entered specialty training. These 2058 men and women will be the new physicians for Canada in 2 to 5 years from now,

2. Canadian Citizens and Permanent Residents: Comparison of the Proportions of Male and Female First Year Trainees

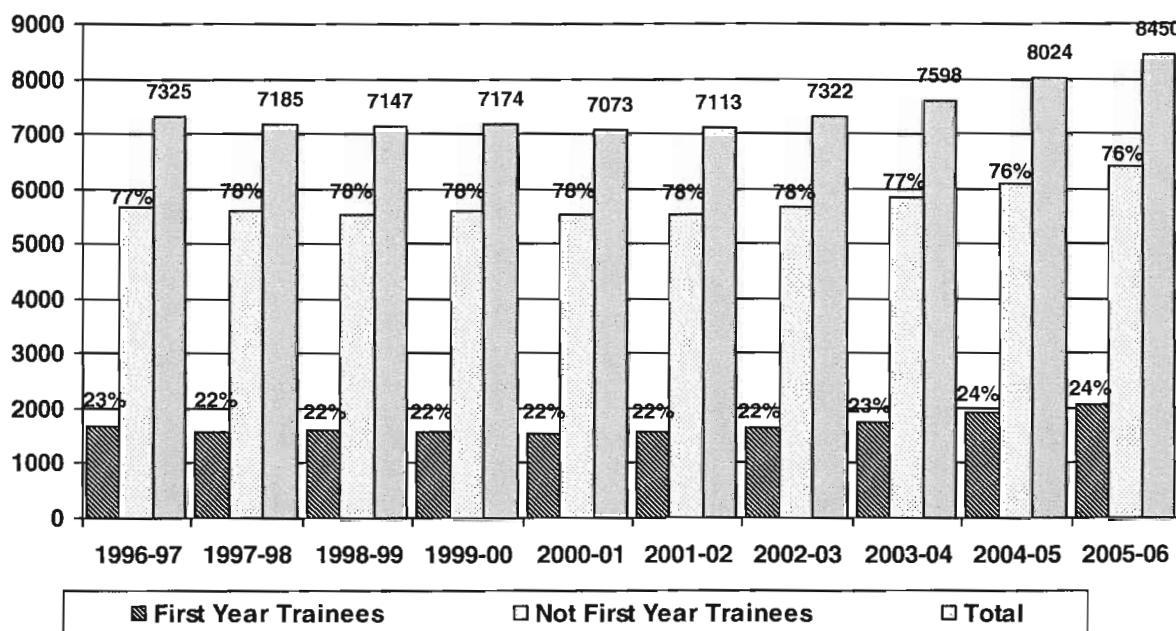

The proportion of women entering medicine and the first year of post-M.D. training has increased markedly in the last year with now 60% (n = 1231) of the first year trainees (Canadian citizens/permanent residents) who are female and 40% (n = 827) male.

3. Canadian Citizens and Permanent Residents: Comparison of the Proportions of First Year Trainees Who are Canadian M.D. Graduates and International Medical Graduates

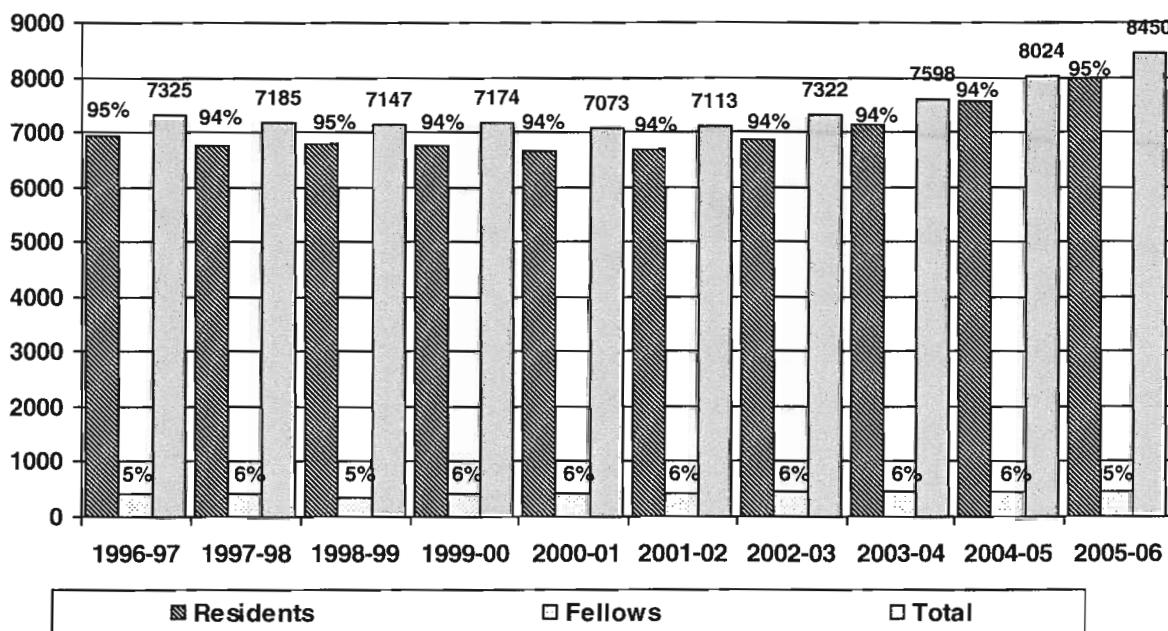

The number and proportion of the Canadian citizens/permanent residents who are graduates of Canadian Faculties of medicine has increased to 87% (n = 1799), of the first year trainees with 13% (n = 259) being International Medical Graduates. The absolute number of IMGs has dropped very little (from n = 289 to 259) but the number of Canadian graduates has increased as a result of increased intake to Canadian medical schools since 1997.

4. Canadian Citizens and Permanent Residents: Comparison of the Proportions of First Year Trainees and All Post-M.D. Trainees

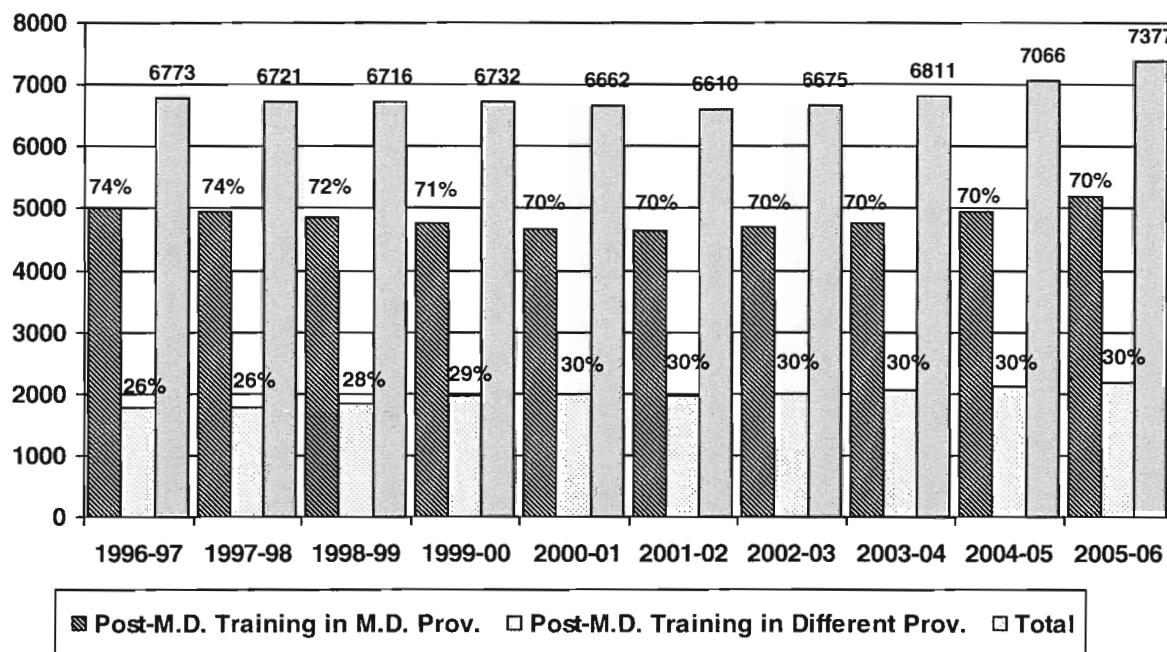

First year trainees continue to comprise 24% of all post-M.D. trainees resulting from the increasing number of Canadian M.D. graduates from our Faculties of medicine.

5. Canadian Citizens and Permanent Residents: Comparison of the Proportions of Residents and Fellows

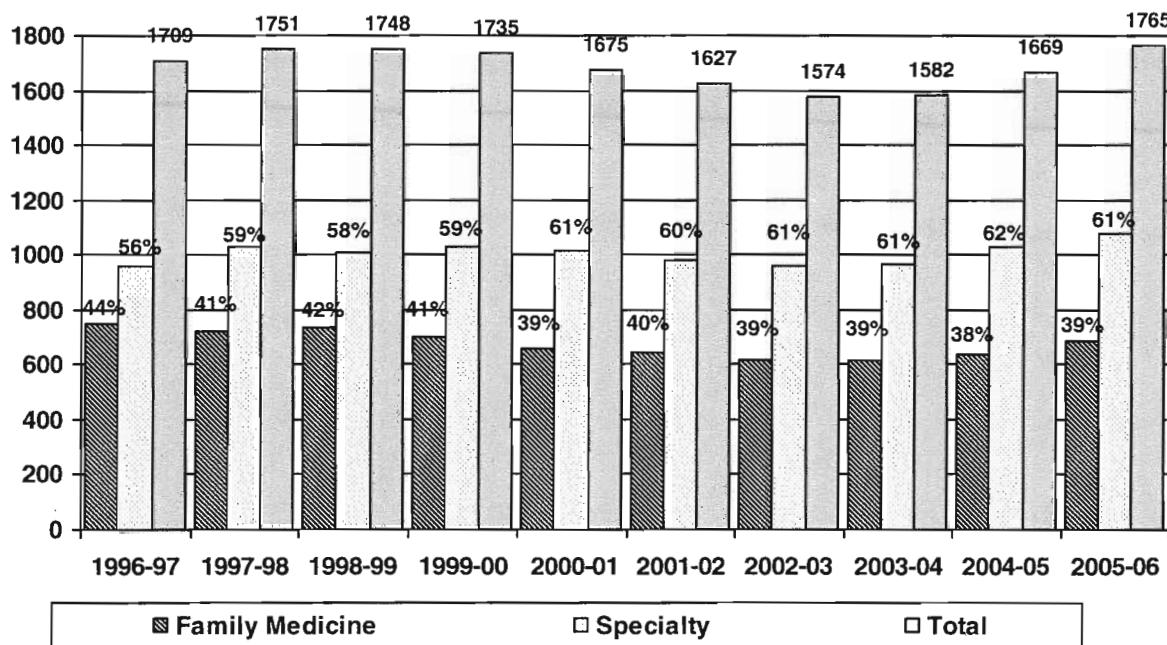

There has been a slight decrease in the proportion of Canadian citizen/permanent resident physicians who are fellows at the advanced levels of training. This is a result of the increasing number of residents entering at the R-1 level.

6. Canadian Citizens and Permanent Residents: Canadian M.D. Graduates and Who Pursued Post-M.D. Training in the Province Where the M.D. Degree Was Earned

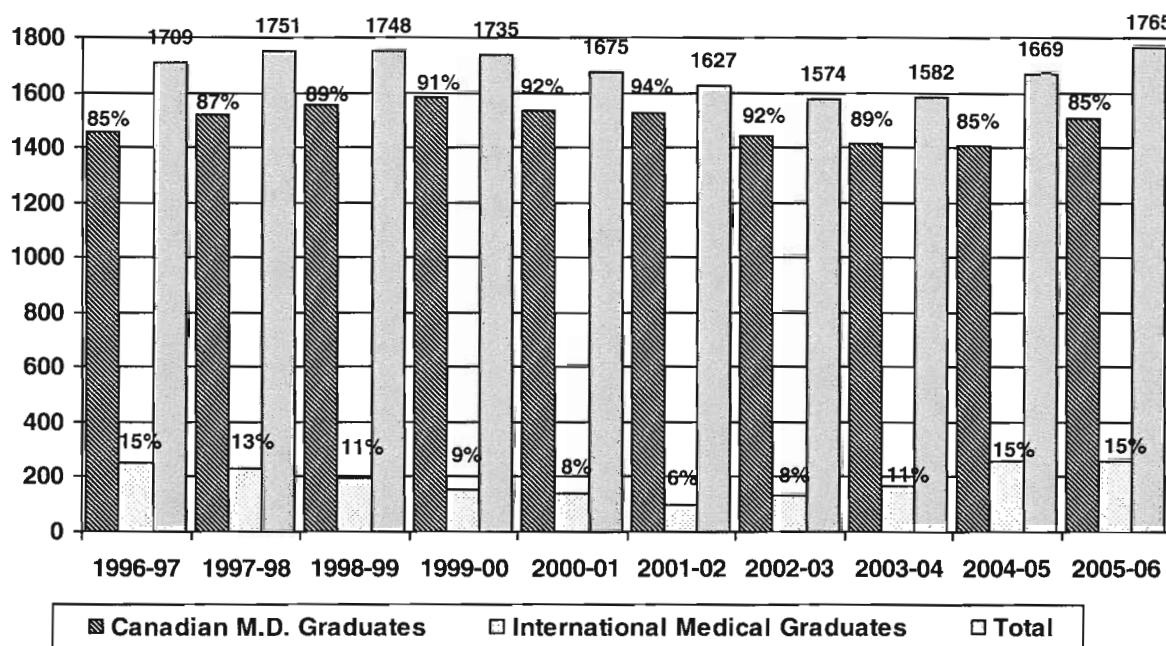

The proportion of Canadian graduates who do their post-M.D. training in the province where they earned their M.D. degree has remained stable at 30%.

7. Canadian Citizens and Permanent Residents: The Proportions of Trainees in Family Medicine Vs. Specialty Training. Proportions Based on the "Exiting" Trainees 1996 - 2005

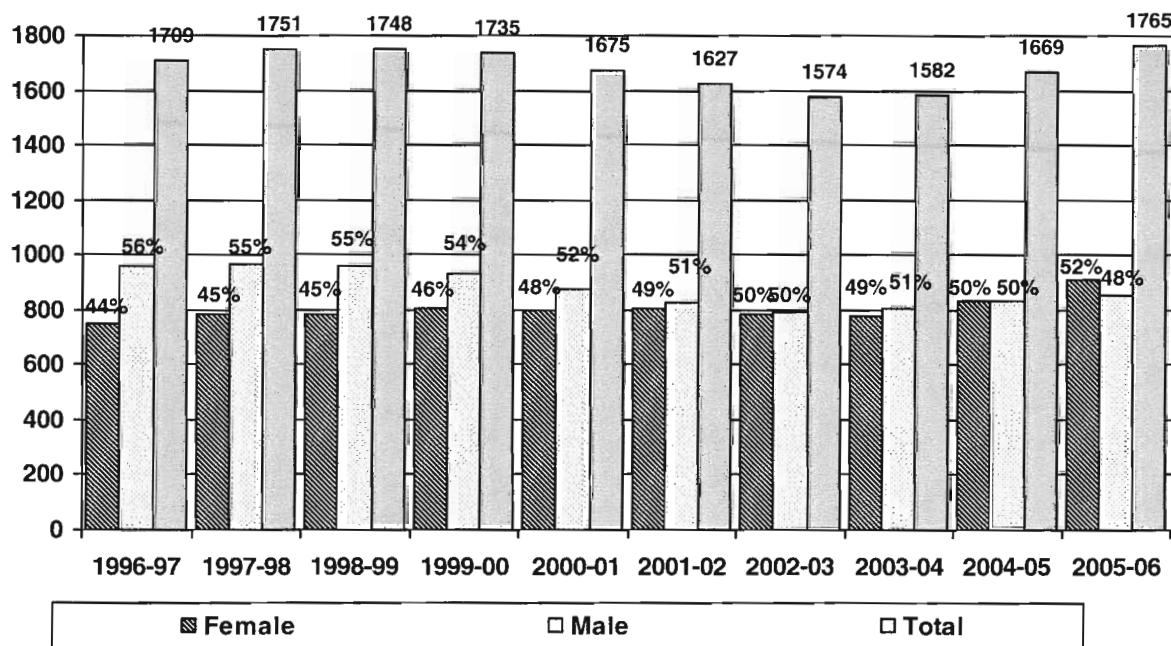

The number of Canadian citizen/permanent resident physicians completing post-M.D. training at a rank level consistent with completion has continued to increase to 1765 physicians. 39% (n = 685) of them were Family physicians and 61% (n = 1080) were specialists. The proportion of Family physicians increased in the last year.

8. Canadian Citizens and Permanent Residents: Comparison of the Proportions of Canadian M.D. Graduates and International Medical Graduates. Proportions Based on the "Exiting" Trainees 1996 - 2005

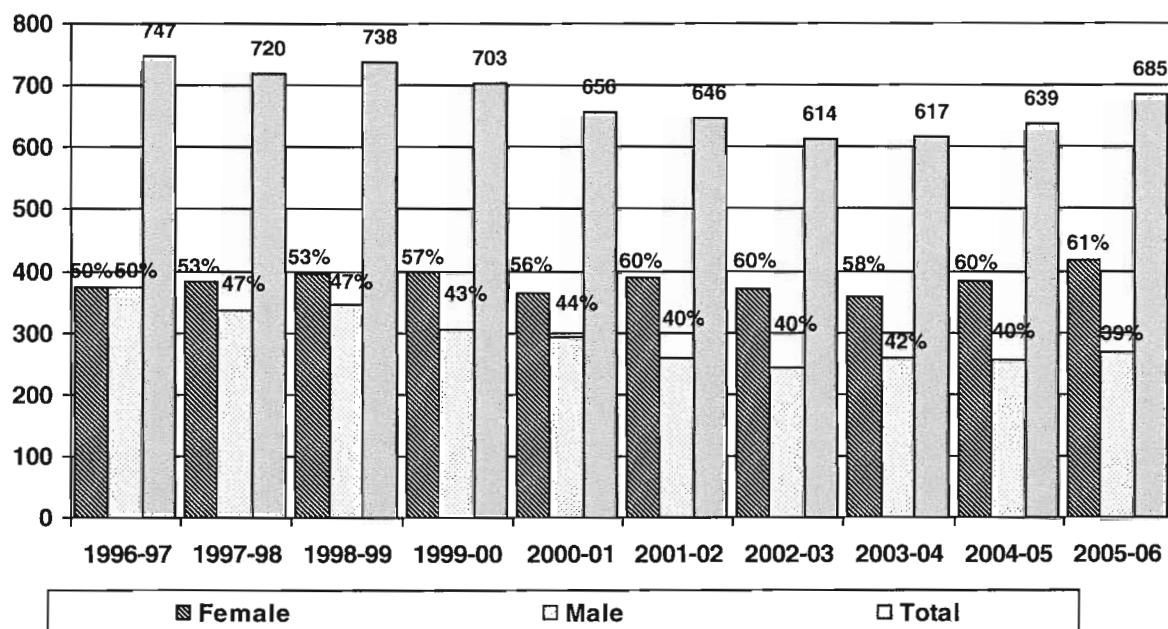

International Medical graduates (Canadian citizens/permanent residents) now comprise 15% ($n = 261$) of our practice entry cohort. There were 1504 graduates of Canadian medical schools (85%) in the practice entry group.

9. Canadian Citizens and Permanent Residents: Comparison of the Proportions of Males and Females. Proportions Based on the "Exiting" Trainees 1996 - 2005

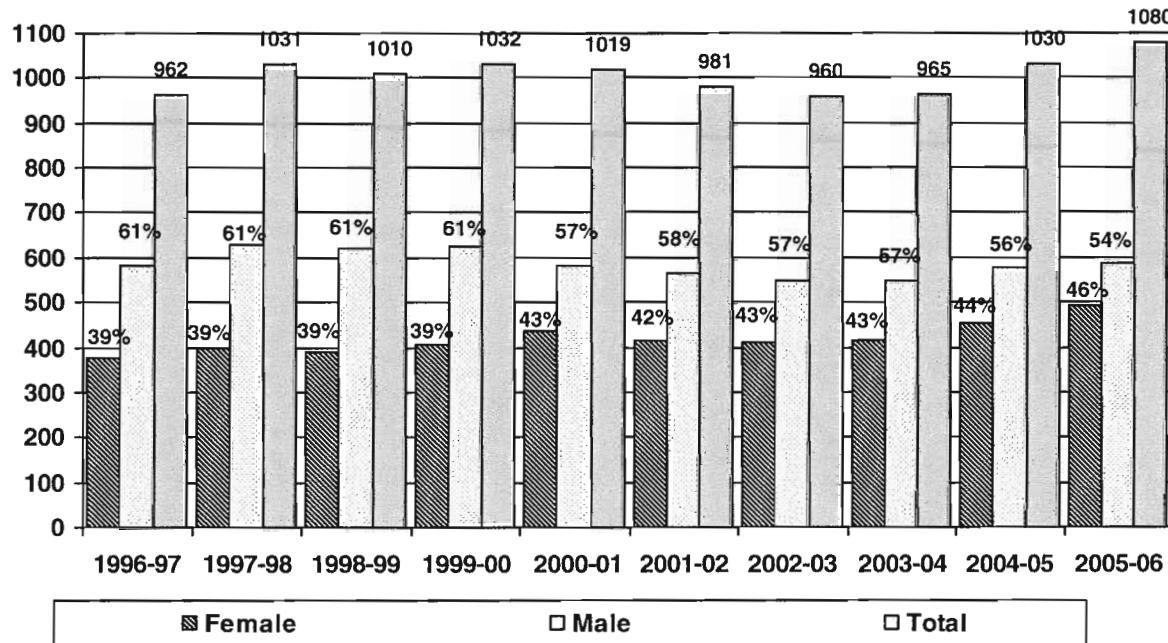

For the first time, the proportion of females in the practice entry cohort is higher than that of males. 52% of the new Canadian citizen/permanent resident physicians ready to enter practice in Canada in 2005 were women.

10. Canadian Citizens and Permanent Residents: Comparison of the Proportions of Males and Females in *Family Medicine*. Proportions Based on the "Exiting" Trainees 1996 - 2005

The proportion of women completing Family medicine training has increased steadily over the past 10 years to 61% of new Family physicians. There were 416 new female Family physicians and 269 new male Family physicians. Overall, the number of Family physicians exiting training has increased over the last three years.

11. Canadian Citizens and Permanent Residents: Comparison of the Proportions of Males and Females in *Specialty Programs*. Proportions Based on the "Exiting" Trainees 1996 - 2005

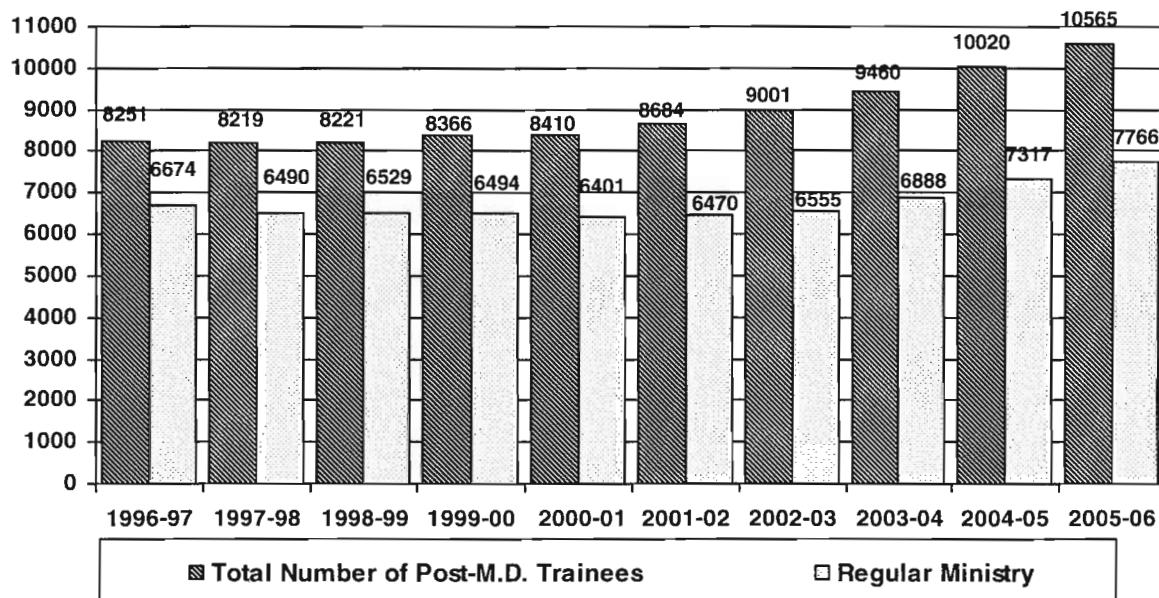

The number of specialty physicians completing training has increased to 1080. The proportion of new women specialists has increased to 46% from 44% last year. 54% of the new Canadian citizen/permanent resident specialists exiting from training in 2005 were men.

Quick Facts 2005-2006

2. Quick Facts: Concerning Post-M.D. Trainees in Regular Ministry Funded Positions

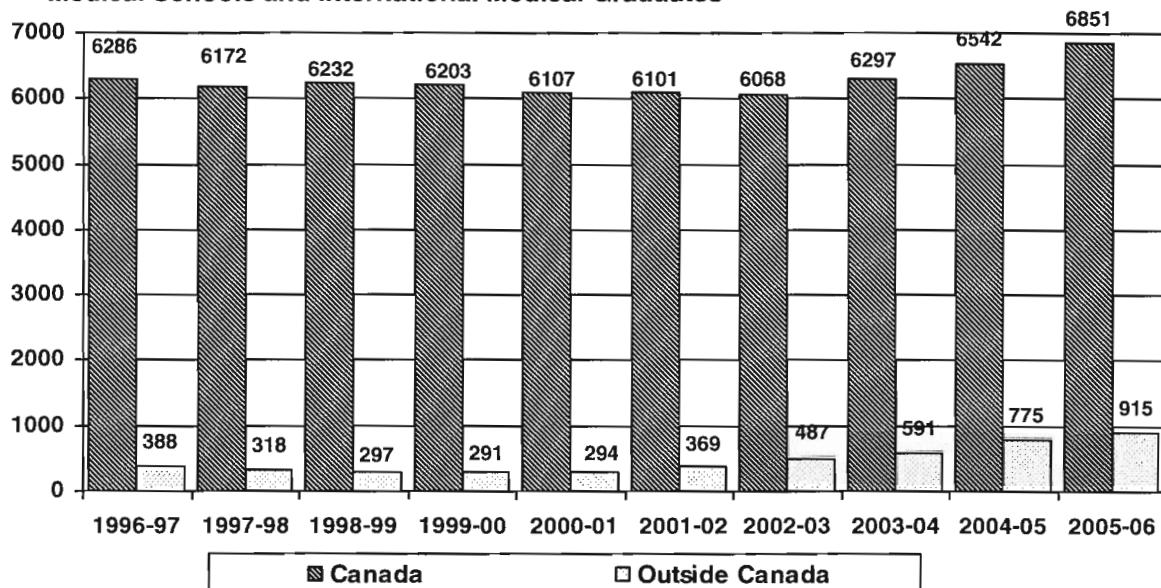

- A. The total number of regular ministry funded trainees has continued to increase to 7766. There has been a similar increase in the **total** number of post-M.D. trainees nationally (ministry and non-ministry funded) to 10,565. The reasons for the increase in both sectors are that the number of Canadian medical graduates has started to increase and the number of International Medical Graduates has also continued to increase. (*Table 1*)
- B. The number of ministry funded graduates of Canadian medical schools has increased as we are seeing the effect of the increased number of physicians graduating from Canadian medical schools (1756 in 2004 and 1850 in 2005 according to AFMC data). (*Table 2*)
- C. The number of current year Canadian medical graduates in post-M.D. training has increased sharply this year up to 1755 graduates. The increase in the number of graduates in 2005 is the reason behind this increase. (*Table 3*)
- D. The number of re-entry trainees has remained the same as the previous year. (*Table 4*)
- E. The number of ministry funded Family medicine trainees choosing to take an additional year has decreased to 162 trainees. This proportion is 23% of the 692 R-2 Family medicine trainees in 2004-2005. (*Table 5*) The proportion of R-4 trainees in subspecialty training has dropped slightly to 20% of the R-4 trainees. (*Table 6*)

1. Regular Ministry Funded Trainees: Comparison With the Total Number of Post-M.D. Trainees

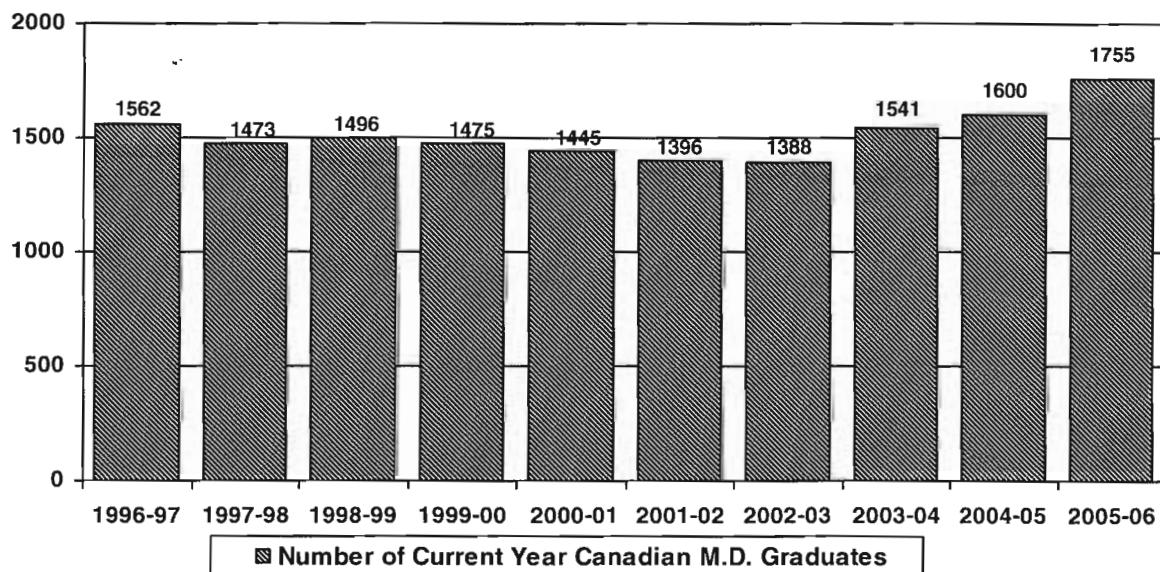

The total number of post-M.D. trainees has increased to 10,565 from 10,020 last year. 74% of our trainees were funded from regular provincial ministry of Health funds for the funding of post-M.D. trainees. There has been a small but steady increase in the number of trainees who are ministry funded.

2. Regular Ministry Funded Trainees: Comparison of the Number of Graduates of Canadian Medical Schools and International Medical Graduates

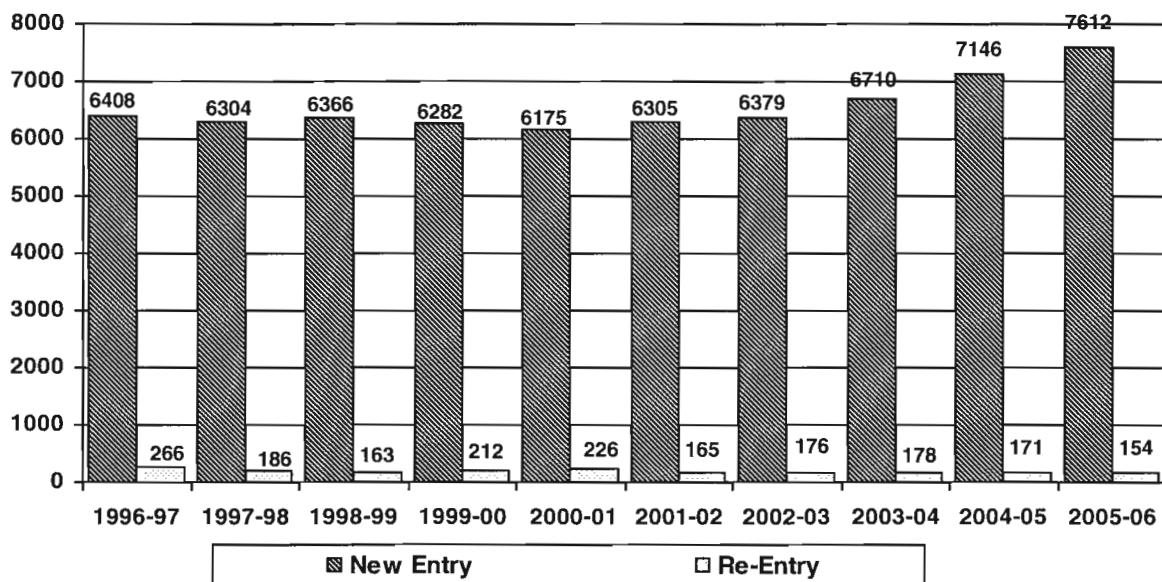

The number of ministry funded International Medical Graduates has increased to an all-time high of 915 physicians. That is a 214% increase since 1999 in the number of ministry funded IMGs.

3. Regular Ministry Funded Trainees: The Number of Current Year Graduates of Canadian Medical Schools in Post-M.D. Training

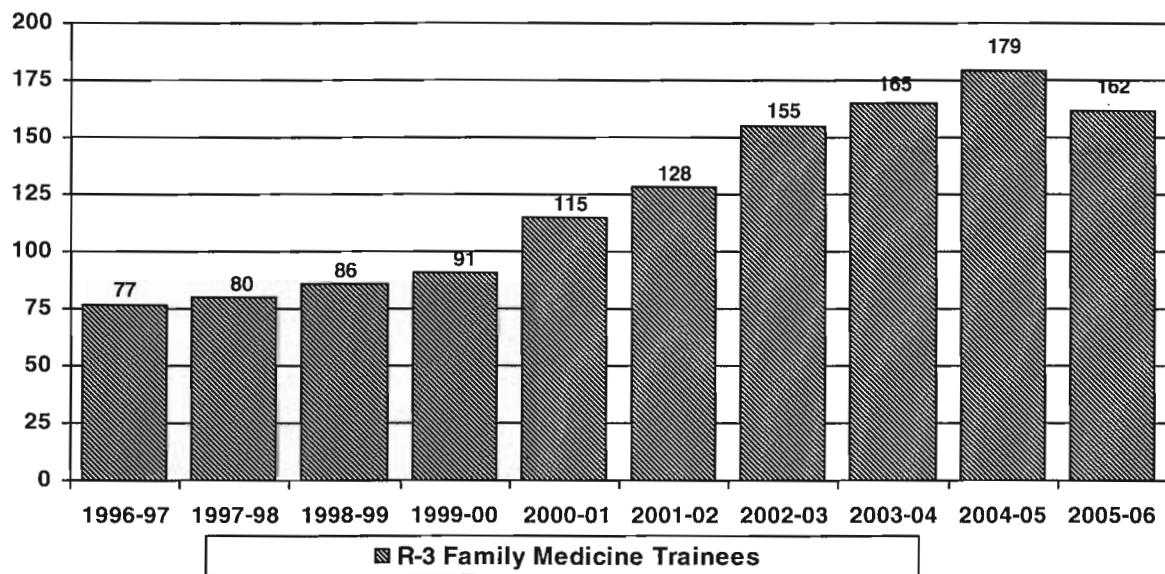

The number of current year Canadian M.D. graduates entering training in ministry funded positions in 2005 has increased to 1755. That is a 30% increase since 2002-03 (in the last 4 years).

4. Regular Ministry Funded Trainees: The Number of New Entry and Re-entry Residents

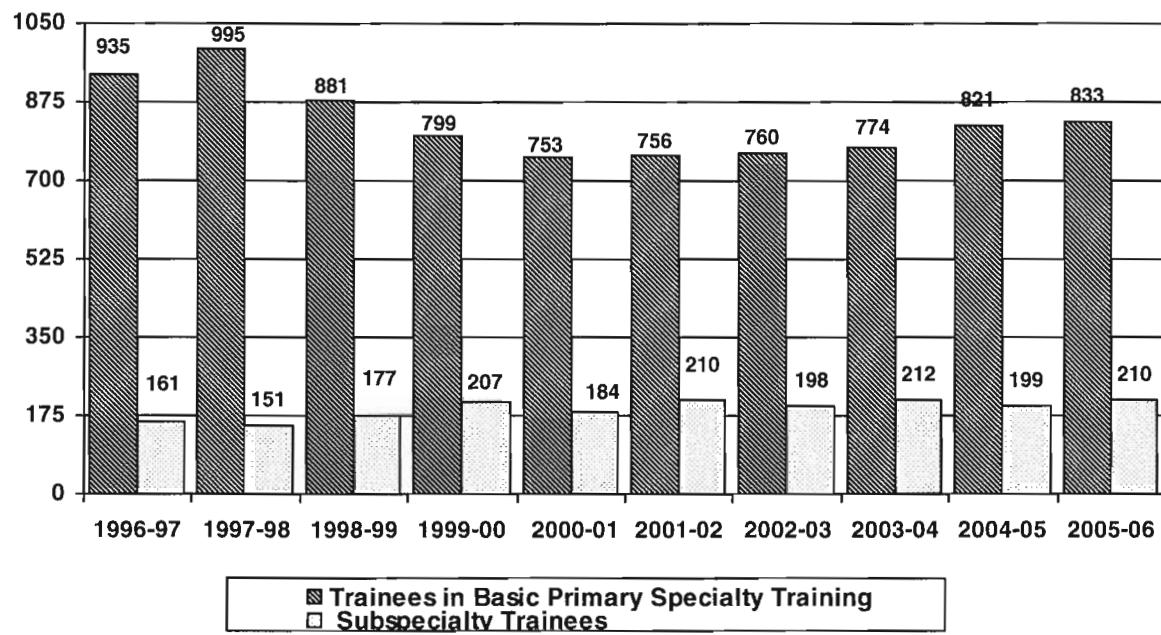

The number of ministry funded re-entry trainees across all rank levels has decreased to 174. The number of new entry trainees has increased.

5. Regular Ministry Funded Trainees: The Number of R-3 Level Trainees in Family Medicine

The number of R-3 level Family medicine trainees (ministry funded) dropped this year to 162. This is 23% of the 692 R-2 level Family medicine trainees in 2004-05.

6. Regular Ministry Funded Trainees: Comparison of the Proportion of Specialty Residents (R-4 level) in Primary Specialties and Subspecialties

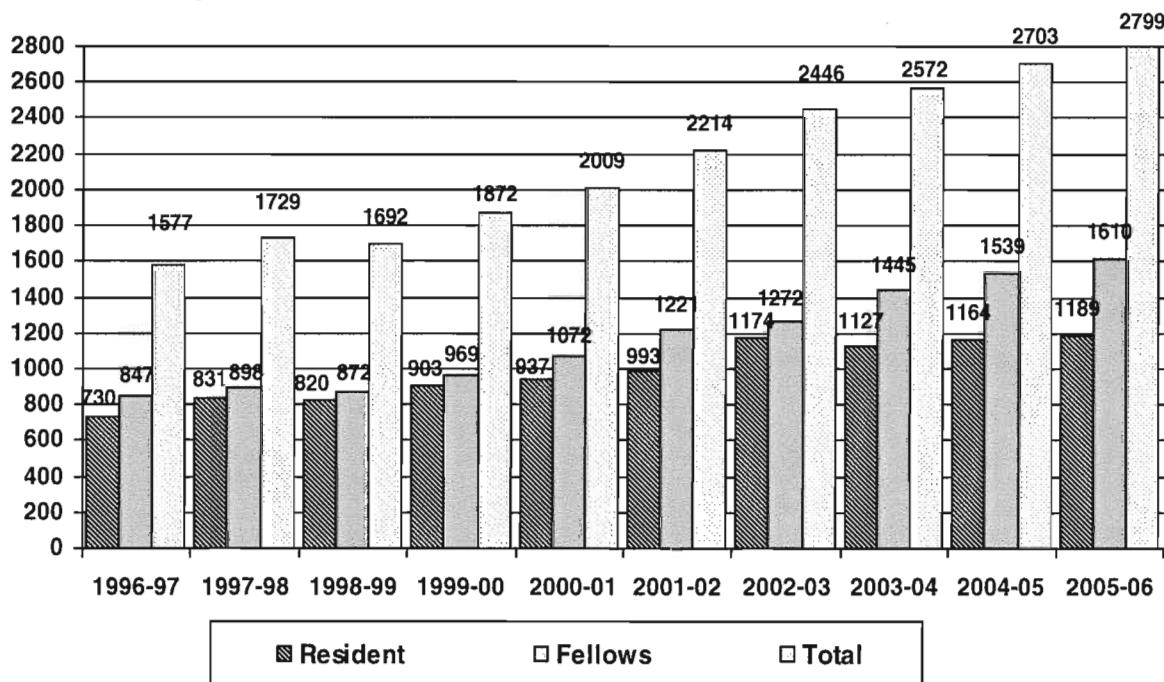

The proportion of R-4 level specialty residents who were in subspecialty training was 20% in 2005. Both the absolute number of primary specialty residents and subspecialty residents increased.

Quick Facts 2005-2006

3. Quick Facts: Concerning Non-Ministry Funded Post-M.D. Trainees 1996-1997 to 2005-2006

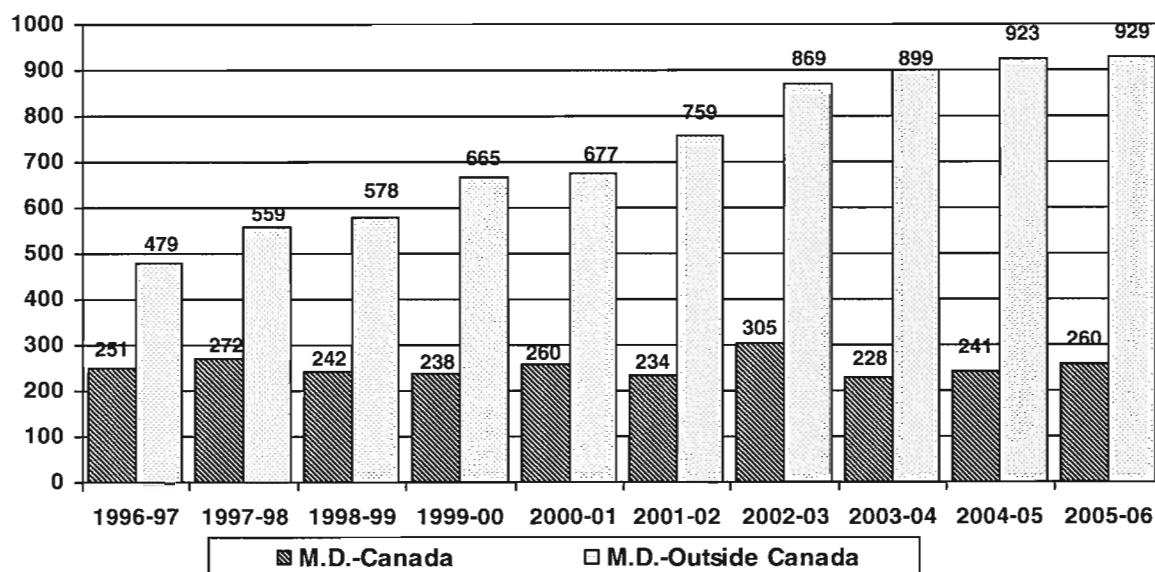

- A. From 1996 to 2005, there has been a steady increase in the number of non-ministry funded trainees from 1577 in 1996 to 2799 in 2005. (*Table 1*)
- B. Within the resident category of non-ministry funded trainees, the number of Canadian graduate trainees has increased slightly this year. The number of IMG non-ministry funded residents has continued to increase. These IMG residents are funded mainly from contracts with foreign governments. (*Table 2*)
- C. The number of non-ministry funded Canadian M.D. graduate fellows has decreased this year to 304. (*Table 3*)
- D. The number of non-ministry funded re-entry trainees has remained stable over the last 3 years. (*Table 4*)
- E. The number of non-ministry funded visa trainees has increased greatly from 1996-1997 to 2005-2006. This 140% increase in visa trainees over the last 10 years is the main factor in the increase in the number of non-ministry funded trainees. (*Table 5*)

1. Non-Ministry Funded Trainees : Residents Versus Fellows

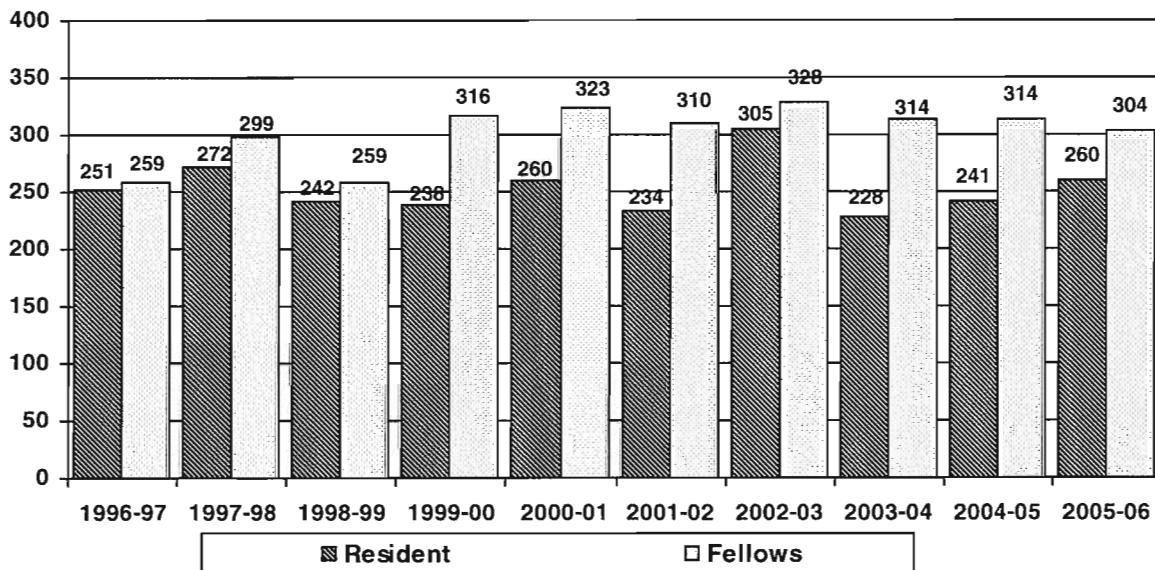

The number of non-ministry funded trainees increased only slightly this year (2005) from 2703 to 2799. Both the number of residents and the number of fellows increased slightly.

**2. Non-Ministry Funded Trainees : Comparison of the Number of Residents (Fellows Not Included)
Who Were Graduates of Canadian Versus Foreign Medical Schools**

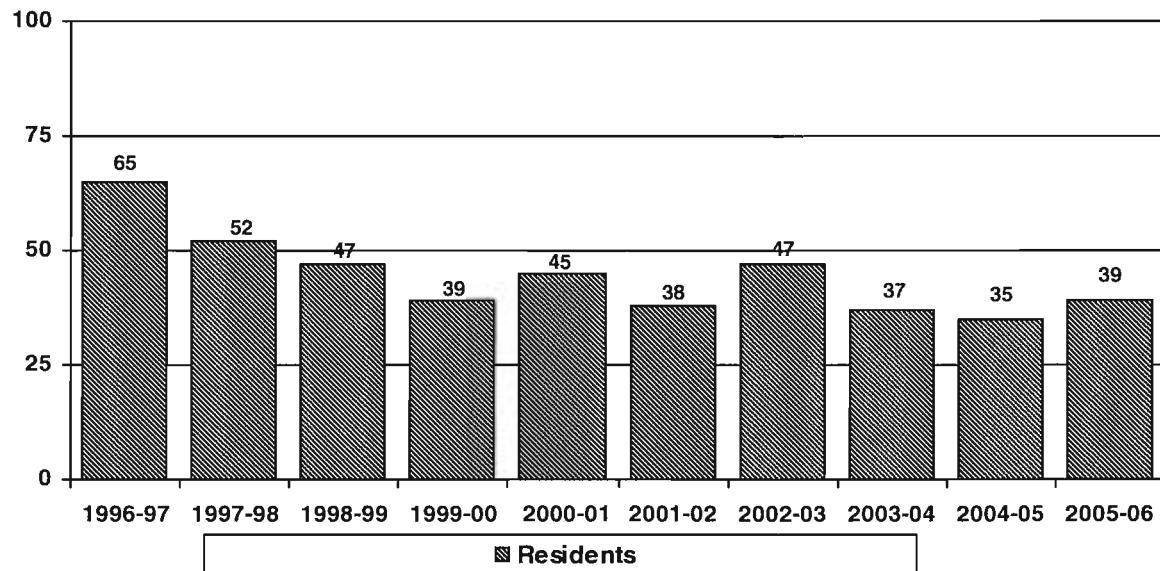

There has been a leveling in the number of International Medical Graduates funded from non-ministry funds. Foreign government contracts is the main source of these funds. There were 923 such IMGs in 2004 and 929 in 2005.

**3. Non-Ministry Funded Trainees: Residents Versus Fellows Who Were Graduates of
Canadian Medical Schools**

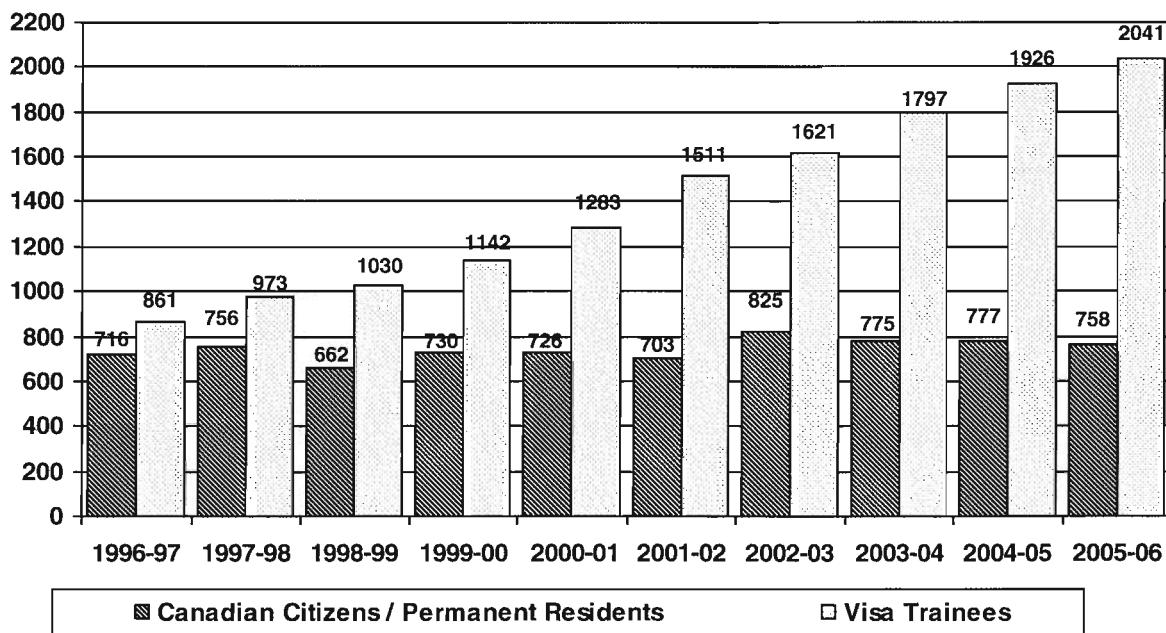

There was a decrease in the number of Canadian graduate fellows funded by non-ministry of Health funds and the number of residents remained relatively stable at 260.

4. Non-Ministry Funded Trainees: Re-entry Residents Who Were Graduates of Canadian Medical Schools

The number of non-ministry funded re-entry trainees has remained stable at 39.

5. Non-Ministry Funded Trainees: Canadian Citizens/Permanent Residents Versus Visa Trainees

The number of non-ministry funded visa trainees has continued to increase to 2041 and the non-ministry funded Canadian citizens/permanent residents has fallen back to 758.

Data from the 2005–2006 CAPER Annual Census of Post-M.D. Trainees

The following tables are grouped under topics of significance to post-M.D. training in Canada. The tables that have been selected give an overview of the distribution of the post-M.D. trainee population in Canada, among the provinces, faculties of medicine, and fields of training. These tables represent only a sample of the many ways variables can be combined to provide useful and interesting data.

See the section at the front of this report titled "**How to Access the CAPER Data Tables**" if you wish to request specific tables.

Données provenant du recensement annuel des stagiaires post-M.D. 2005–2006

Les tableaux sont groupés selon les domaines d'intérêt à la formation post-M.D. au Canada. Les tableaux choisis donnent une vue d'ensemble de la distribution des stagiaires post-M.D. à travers le Canada, parmi les provinces, les facultés de médecine et les domaines de formation. Ces tableaux ne représentent qu'un échantillon des multiples façons d'utiliser les variables afin de fournir une information qui soit à la fois utile et intéressante.

Si vous désirez obtenir des tableaux spécifiques, reportez-vous à la section intitulée "**Utilisation de la banque de données de CAPER**" située au début de cet ouvrage.

**Trainees Who Exited Post-M.D. Training Between
November 1, 2004 AND November 1, 2005
(at a rank level consistent with completion of training)**

Beginning with the "2000" exit cohort, physicians who left a training program prior to completing a sufficient number of years of training required for certification from any of Canada's three certification organizations (The College of Family Physicians of Canada, le Collège des médecins du Québec and The Royal College of Physicians and Surgeons of Canada) were not included in the estimated practice entry cohort. The CAPER Policy Committee agreed to this change in the definition of the practice entry cohort because unrestricted licensure in each province and territory of Canada requires certification in either Family medicine or a specialty. Physicians who exit training prior to completion of their program would not have the qualifications for full licensure in Canada.

Other than this change in exit criteria, the exit groups will be presented in the same four groups as in previous CAPER publications.

I. Graduates of Canadian Faculties of Medicine

- a) Physicians who earned the M.D. degree in Canada who went directly through post- M.D. training and are entering practice for the first time (the new entry cohort).
- b) Physicians who earned the M.D. degree in Canada who have re-entered training after having already had a period of practice in Canada (the re-entry cohort).

II. Graduates of Foreign Medical Schools

- a) Graduates of foreign medical schools who were Canadian citizens /permanent residents on July 1 of their last year of post-M.D. training (A small re-entry cohort has been isolated from this group). These physicians would have the legal status necessary to work in Canada.
- b) Graduates of foreign medical schools who held a temporary employment visa while in their last year of post-M.D. training. It is assumed that these physicians will not enter practice in Canada in view of their visa status and they are not included in the practice entry cohort.

I. Isolation of the New Entry and Re-Entry Groups of Graduates of Canadian Faculties of Medicine

Table 1 compares the proportion of trainees in each field of training for the new entry (1504 trainees) and re-entry (98 trainees) group of graduates of Canadian faculties of medicine in the exit group.

In the new entry group, 567 (38%) of the cohort were exiting from Family medicine programs, and 937 (62%) were exiting from specialty programs: 643 (42.5%) from medical specialties, 23 (1.5%) from lab medicine specialties and 271 (18.0%) from surgical specialties. (The 12 Palliative medicine physicians were included in the specialties total.)

In the re-entry group ($n = 98$), only 27 (28%) of the physicians were completing Family medicine programs and most of them were in the programs giving additional training beyond the 2-year Family medicine program. The majority of the residents (73%) were in specialty training programs.

II Graduates of Foreign Medical Schools

The two groups of exiting graduates of foreign medical schools have been compared in **Table 2**. Of the 271 trainees expected to stay in Canada, 110 (41%) exited from Family medicine training programs and 161 (59%) exited from specialty training programs. Altogether, 271 Canadian citizen International Medical Graduates exited from training in 2005.

Table 3: Trainees Exiting Canadian Training Programs Between November 1, 2004 and November 1, 2005 (at a rank level consistent with completion of training).

Four main exit groups have been isolated and a small group of re-entry graduates of foreign medical schools has also been noted.

Estimated Practice Entry Cohort (Table I-7)

The estimate is based on the number of new physicians entering medical practice in Canada via the post-M.D. training programs: The new entry Canadian M.D. graduates and the new entry graduates of foreign medical schools who were Canadian citizens/ permanent residents. Thus, groups 1A and 2Ai from Table 3 are combined to form the estimated practice entry cohort. In 2005, there were 1765 new physicians in the estimated practice entry cohort, 1504 graduates of Canadian Faculties of medicine and 261 (the 10 re-entry IMGs are not included in the practice entry cohort) graduates of foreign medical schools. The following tables, H-1 and H-2 were prepared using the estimated practice entry cohort. Only physicians exiting at a rank level consistent with completion of training were included.

Table 3
Summary Table
Trainees Exiting Canadian Post-M.D. Training Programs
Between Nov. 1, 2004 and Nov. 1, 2005
(at a rank level consistent with completion of training)

Exit Group	Description	No. of Trainees
IA	Graduates of Canadian faculties of medicine who proceeded directly through (includes physicians who had a one year absence) post-M.D. training (new entry group)	1504
IB	Graduates of Canadian faculties of medicine who had taken a break in training (re-entry group)	98
2Ai	Graduates of foreign medical schools who were Canadian citizens or permanent residents on July 1, 2004 who proceeded directly through (includes physicians who had a one year absence) post-M.D. training (new entry group)	261
2Aii	Graduates of foreign medical schools who were Canadian citizens or permanent residents on July 1, 2004 who had taken a break in training (re-entry group)	10
2B	Graduates of foreign medical schools who were visa trainees on July 1, 2004	679

I. Tables Covering The Time Period From 2001-02 to 2005-2006

Tableaux couvrant la période de 2001-02 à 2005-2006

1	Field of Post-M.D. Training <i>by Source of Funding for Post-M.D. Training</i>	85	1	Domaine de formation post-M.D. <i>par source de financement de la formation post-M.D.</i>
2	Province of Location of Faculty of Medicine Providing Post-M.D. Training <i>by Source of Funding for Post-M.D. Training</i>	91	2	Province de la faculté de médecine offrant la formation post-M.D. <i>par source de financement de la formation post-M.D.</i>
2i.	Province of Location of Faculty of Medicine Providing Post-M.D. Training <i>by Source of Funding for Post-M.D. Training (fellows and visa trainees not included)</i>	93	2i.	Province de la faculté de médecine offrant la formation post-M.D. <i>par source de financement de la formation post-M.D. (moniteurs cliniques et stagiaires avec permis de travail non compris)</i>
3	Field of Post-M.D. Training <i>by Gender (visa trainees not included)</i>	95	3	Domaine de formation post-M.D. <i>par sexe (stagiaires avec permis de travail non compris)</i>
4	Field of Post-M.D. Training <i>by Location of University Which Awarded the M.D. Degree</i>	102	4	Domaine de formation post-M.D. <i>par lieu de l'université ayant décerné le doctorat en médecine</i>
5	Faculty of Medicine Providing Post-M.D. Training <i>by Legal Status (residents only - fellows not included)</i>	108	5	Faculté de médecine offrant la formation post-M.D. <i>par statut légal (résidents seulement - moniteurs cliniques non compris)</i>
6	Faculty of Medicine Providing Post-M.D. Training <i>by M.D. Degree Awarded in the Province Providing Post-M.D. Training (current year Canadian M.D. graduates only)</i>	114	6	Faculté de médecine offrant la formation post-M.D. <i>par doctorat en médecine décerné dans la province offrant la formation post-M.D. (diplômés des facultés canadiennes pour l'année en cours seulement)</i>
7	Field of Post-M.D. Training <i>by Location of University Which Awarded the M.D. Degree (estimated practice entry cohort)</i>	117	7	Domaine de formation post-M.D. <i>par lieu de l'université ayant décerné le doctorat en médecine (taille approximative de la cohorte entrant en exercice)</i>
7i	Proportion of the Practice Entry Cohort in Each Training Field (estimated practice entry cohort)	123	7i	Proportion du cohorte qui entre en exercice dans chaque domaine de formation post-M.D. (la taille approximative du cohorte qui entre en exercice)
8	First Year Trainees, Field of Training <i>by Legal Status (Canadian citizens/permanent residents vs. visa trainees)</i>	129	8	Stagiaires en première année post-M.D., domaine de formation post-M.D. <i>par statut légal (citoyens canadiens ou résidents permanents contre stagiaires avec permis de travail)</i>
9	First Year Trainees: Proportion of First Year Trainees in Each Field of Training (Canadian citizens/permanent residents only)	132	9	Stagiaires en première année post-M.D.: Proportion de stagiaires en première année post-M.D. dans chaque domaine de formation post-M.D. (citoyens canadiens/résidents permanents seulement)

* Graduates of Canadian faculties of medicine (new entry group) AND graduates of foreign medical schools who were Canadian citizens or permanent residents (new entry group) at the completion of post-M.D. training.
 (See the methodology description in Section H.)

** Beginning in 2000, the new methodology was used to estimate the practice entry cohort in this publication. However, in the 2000-2001 edition of the CAPER Annual Census, the data for 2000-2001 were prepared using the old methodology.

* Graduates of Canadian faculties of medicine (new entry group) AND graduates of foreign medical schools who were Canadian citizens or permanent residents (new entry group) at the completion of post-M.D. training. (See Section H)

** Beginning in 2000, the new methodology was used to estimate the practice entry cohort in this publication. However, in the 2000-2001 edition of the CAPER Annual Census, the data for 2000-2001 were prepared using the old methodology.

Lieu de l'exercice

138 1 Faculté de médecine qui a décerné le diplôme M.D. (Médecins ayant terminé leur formation post-M.D. en 2003)
par lieu de l'exercice (région), juillet 2005

139 1i. Faculté de médecine offrant la dernière année de formation post-M.D. (2003)
par lieu de l'exercice (région), juillet 2005

140 1ii.A Lieu de l'exercice après 2 ans
Faculté de médecine offrant la dernière année de formation post-M.D. (2003)
par lieu de l'exercice (province), juillet 2005

141 1ii.B Lieu de l'exercice après 5 ans
Faculté de médecine offrant la dernière année de formation post-M.D. (2000)
par lieu de l'exercice (province), juillet 2005

Médecins ayant terminé leur formation post-M.D. en 2003 dans la même province que la faculté de médecine ayant décerné leur diplôme (diplômés des facultés de médecine canadiennes)

142 1iii. Faculté de médecine offrant la dernière année de formation post-M.D. (2003)
par lieu de l'exercice (région), juillet 2005

2005 (prelim)	1 796	30	1 826	53 ²	1 879

¹ Permanent Resident includes refugees and refugee claimants.

² For the first time in 1998, foreign students graduated from various Canadian faculties of medicine, but were enrolled in above-quota, contract positions. The following numbers of graduates of Canadian medical schools were in Canada in above-quota, contract positions:

Year of MD	Number	Year of MD	Number
1998	17	2005	25
1999	11		
2000	23		
2001	31		
2002	29		
2003	32		
2004	25		

Table J-6

The Number of Trainees Switching Between Major Training Field Categories for Each of the Last 5 Years

1. Changes between Family Medicine and Specialty training fields

	A. Changes <i>From:</i> Family Medicine <i>To:</i> Any Specialty	B. Changes <i>From:</i> Any Specialty <i>To:</i> Family Medicine
2000-2001	38	48
2001-2002	36	45
2002-2003	31	49
2003-2004	36	46
2004-2005	33	38

2. Changes between Specialty fields

	A. Changes <i>From:</i> Medical Specialties <i>To:</i> Surgical Specialties	B. Changes <i>From:</i> Surgical Specialties <i>To:</i> Medical Specialties
2000-2001	12	24
2001-2002	6	36
2002-2003	13	26
2003-2004	9	30
2004-2005	10	33

3. Total: Changes among training field groups

Year	Total
2000-2001	122
2001-2002	123
2002-2003	119
2003-2004	121
2004-2005	114

Note: Movement of trainees between any training field and Palliative medicine are not counted as changes.

Although most program changes occur at the R-1 level, these tables include program changes at all training levels.
