The *CAPER Annual Census* is available in electronic format on the CAPER website: www.caper.ca. This is the 20th version of the *CAPER Annual Census* and is made possible by the participating national medical organizations and governments (Provincial, Territorial and Federal).

Our work with representatives from these organizations and governments ensures that the data we produce provide them with the information they require for the development of policies concerning post-M.D. training and physician resources in Canada.

Along with the data CAPER is provided by the postgraduate offices of the Canadian faculties of medicine, our publication relies on data from two other sources, the Canadian Medical Association (CMA) and the Association of Faculties of Medicine of Canada (AFMC). We rely on and appreciate the work of Ms. Lynda Buske and Ms. Shelley Martin at the CMA and Dr. Nicholas Busing and his staff, Ms. Liane Kealey and Ms. Dale Yeatman at AFMC and the willing help of the associate deans for postgraduate medical education and their administrative offices. All of the members of CAPER's Executive and Policy Committees have been most supportive in their help with the management of CAPER. In Ontario, we appreciate the work of the Ontario Physician Human Resources Data Centre toward the development of this publication.

Special thanks go to the CAPER staff, Ms. Hélène LeBlanc and Mr. Leslie Forward who have worked to a very high standard on behalf of the CAPER Executive Committee. Dr. Jill Nation, the chairman of the CAPER Executive Committee has provided special expertise on behalf of AFMC to manage this national cooperative endeavour.

It has been a pleasure to work for all of the participating organizations and governments in managing this unique national resource for them.

Steve Slade
Vice President Research: CAPER/ORIS

Remerciements

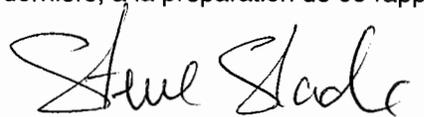

Le *Recensement annuel des stagiaires en formation postdoctorale de CAPER* est disponible sur notre Site web: www.caper.ca. Ceci est la 20^{ième} version du *Recensement annuel des stagiaires en formation postdoctorale de CAPER* et a été rendu possible grâce au soutien financier des organisations médicales nationales et des gouvernements participants (provinciaux, territoriaux et fédéral).

La collaboration de CAPER avec les représentants de ces organisations et gouvernements permet d'obtenir l'assurance que les données que nous réunissons fournissent à ces derniers l'information dont ils ont besoin pour élaborer des politiques concernant la formation postdoctorale et les ressources en médecins au Canada.

Outre les données que CAPER reçoit des facultés canadiennes de médecine au sujet des stagiaires en formation postdoctorale, le *Recensement* repose sur deux autres sources d'information, à savoir l'Association médicale canadienne (AMC) et l'Association des facultés de médecine du Canada (AFMC). CAPER est très heureux de pouvoir compter sur la collaboration de M^{mes} Lynda Buske et Shelley Martin, à l'AMC, du D^r Nicholas Busing et de M^{mes} Liane Kealey et Dale Yeatman, à l'AFMC, sans oublier l'aide diligente des vice-doyens responsables de l'éducation médicale postdoctorale et de leurs bureaux administratifs respectifs. Tous les membres du Comité exécutif et du Comité des politiques de CAPER ont également été d'un grand secours au titre de la gestion de l'organisation. En Ontario, le Centre des données sur les ressources humaines en médecins de l'Ontario a apporté une précieuse contribution à l'élaboration du présent rapport.

Je tiens également à remercier M^{me} Hélène LeBlanc et M. Leslie Forward, de CAPER, qui se sont tous les deux acquittés avec brio de leurs tâches pour le compte du Comité exécutif de l'organisation. D^{re} Jill Nation, présidente du Comité exécutif, a mis à profit son expertise spécialisée à l'AFMC pour mener à bien la gestion de cet exercice coopératif d'envergure nationale.

Je tiens à souligner que ce fut un véritable plaisir que de collaborer avec toutes les organisations et gouvernements participants et pour le compte de ces derniers, à la préparation de ce rapport national unique.

Steve Slade
Vice-président à la recherche, CAPER/ORI

USE THE CAPER DATABASE TO ANSWER THESE FREQUENTLY ASKED QUESTIONS:

UTILISER LA BASE DE DONNÉES DU CAPER POUR TROUVER CES RENSEIGNEMENTS SUR DES QUESTIONS SOUVENT POSÉES :

1.	Where do I find a summary of changes in the post-M.D. training population over the last 10 years ?	Où puis-je trouver un résumé des changements qu'ont connus les stagiaires post M. D. en formation clinique, au cours des dix dernières années ?	Quick Facts En bref!	page 10-22
2.	How many ministry funded residents are in a specific specialty at each faculty ?	Combien de stagiaires ayant droit à une bourse ministérielle trouve-t-on, pour une spécialité donnée, dans chaque faculté ?	Table A-1i Tableau A-1i	page 27
3.	How many ministry funded residents are there at each rank level ?	Combien de médecins résidents bénéficiant d'une bourse ministérielle trouve-t-on, à chaque niveau de formation ?	Table B-1i Tableau B-1i	page 42
4.	How many new residents entered training in each specialty this year?	Pour chaque spécialité , quel est le nombre de médecins qui ont commencé leur résidence cette année?	Table G-1 Tableau G-1	page 60
5.	What is the gender of residents entering each specialty?	Pour chaque spécialité , de quel sexe sont les médecins qui commencent leur résidence?	Table G-5 Tableau G-5	page 65
6.	How many new physicians completed and exited from Canadian residency training?	Combien de nouveaux médecins ont fait toute leur résidence en suivant le programme canadien de formation clinique?	Table H-1 Tableau H-1	page 74
7.	How old are Canada's new physicians when they finish training?	À quel âge les nouveaux médecins terminent-ils le programme canadien de formation clinique?	Table H-2 Tableau H-2	page 77
8.	What is the gender of the new physicians who completed and exited from Canadian residency training?	De quel sexe sont les nouveaux médecins qui ont fait toute leur résidence en suivant le programme canadien de formation clinique?	Table H-4 Tableau H-4	page 78
9.	Where do the M.D. graduates of my faculty (province) eventually go to practise medicine ?	Où les diplômés en médecine (M.D.) de ma faculté (province) entrent-ils généralement en pratique?	Table J-1 Tableau J-1	page 137
10.	Where do the post-M.D. trainees from my faculty (province) eventually go to practise medicine ?	Où les stagiaires post M.D. de ma faculté (province) entrent-ils généralement en pratique?	Table J-1iii Tableau J-1iii	page 141
11.	Individual training fields - detailed information (the number of residents and fellows at each rank level at each faculty)	Tableaux individuels des spécialités - Renseignements détaillés (nombre de résidents et de stagiaires inscrits, à chaque niveau de formation et pour chaque faculté).	Individual Specialty Tables Tableaux individuels des spécialités

Background

CAPER (the Canadian Post-M.D. Education Registry) was established in 1986 through the co-operation of national medical organizations with an interest in the post-M.D. clinical education of physicians in Canada. The Association of Faculties of Medicine of Canada, the Canadian Association of Internes and Residents, the Canadian Medical Association, The College of Family Physicians of Canada, The Medical Council of Canada, Health Canada, and The Royal College of Physicians and Surgeons of Canada, have provided both expertise and financial support for the development and operation of CAPER. Provincial and territorial ministries of Health have contributed to CAPER beginning in 1992.

CAPER is incorporated within the by-laws of The Association of Faculties of Medicine of Canada with the mandate to provide accurate information which may be used for medical manpower planning on a national basis. To accomplish this task, an individual longitudinal file is maintained containing socio-demographic information and details of the current and past training programs of each resident or fellow under the supervision of the Canadian Faculties of Medicine on November 1 of each year. The data in this document are derived from information submitted for November 1, 2006 by the office of Postgraduate Medical Education at each of the Canadian Faculties of Medicine.

Historique

CAPER (Système informatisé sur les stagiaires post-M.D. en formation clinique) a été établi en 1986 avec la coopération de diverses organisations médicales du Canada intéressées par la formation clinique post-M.D. au Canada. L'Association des facultés de médecine du Canada, l'Association canadienne des internes et des résidents, l'Association médicale canadienne, Le Collège des médecins de famille du Canada, Le Conseil médical du Canada, Santé Canada, ainsi que Le Collège royal des médecins et chirurgiens du Canada ont contribué au développement et au bon fonctionnement de CAPER en partageant leurs connaissances et en lui apportant un soutien financier depuis 1992.

CAPER est constitué en société dans le cadre des statuts de L'Association des facultés de médecine du Canada avec pour mandat de fournir des renseignements précis pouvant être utilisés pour fins de planification de la main-d'oeuvre médicale au niveau national. Pour ce faire, un fichier longitudinal est tenu à jour contenant l'information pertinente à chaque résident ou moniteur clinique (fellow) inscrit aux différentes facultés de médecine canadiennes en date du 1^{er} novembre de chaque année. L'information socio-démographique et les détails du programme de formation de cette année et des années passées y sont inclus. Les données de ce document reflètent l'information soumise au 1^{er} novembre 2006 par le personnel administratif des bureaux de formation médicale postdoctorale des facultés de médecine canadiennes.

The Reporting Process

The individual records of all trainees under the supervision of each Canadian faculty of medicine are provided to CAPER by the postgraduate medical education office of the respective faculty. All post-M.D. trainees (residents and fellows) in training positions on November 1 of the current academic year are reported to CAPER. The following information is included in the yearly report:

- the faculty of medicine supervising post-M.D. training
- socio-demographic information
- previous medical education and certification, and
- field of current post-M.D. training

This information is collected by all faculties at the time of registration for post-M.D. training each year and is sent to CAPER, in coded form. Information sent to CAPER is checked for missing or incorrect items. Reports are then sent back to the appropriate postgraduate medical education office of the Canadian faculties of medicine for further verification of the information on their trainees.

Data Privacy

At the Canadian Post-M.D. Education Registry (CAPER), we take physician privacy very seriously. It is a long-established policy of CAPER and the Association of Faculties of Medicine of Canada (AFMC), of which Association CAPER is a component division, to deal with all physician information in a sensitive manner, in order to ensure that our collections, uses, disclosures, retention and disposals of physician information are carried out in accordance with best privacy practices.

The full CAPER Privacy Policy is on the website: caper.ca.

Méthode de déclaration

Le bureau de la formation médicale postdoctorale de chaque faculté de médecine canadienne fournit à CAPER les dossiers de tous les stagiaires qui relèvent de la faculté. Sont déclarés à CAPER tous les stagiaires post-M.D. (résidents et moniteurs cliniques) qui occupent un poste de formation le 1^{er} novembre de l'année universitaire en cours. La déclaration annuelle comprend les renseignements suivants :

- la faculté de médecine qui encadre la formation post-M.D.,
- des données socio-démographiques,
- la formation médicale antérieure et les titres de compétence,
- le domaine de la formation post-M.D. en cours

Ces renseignements sont recueillis chaque année par toutes les facultés lors des inscriptions aux programmes de formation post-M.D., puis transmis à CAPER sous forme chiffrée. CAPER les vérifie pour déceler les erreurs ou omissions, puis renvoie les déclarations au bureau de la formation médicale postdoctorale de la faculté de médecine en question. Les renseignements sur les stagiaires font alors l'objet d'une nouvelle vérification.

Confidentialité des données

Le Système informatisé sur les stagiaires post-M.D. en formation clinique (CAPER) prend très au sérieux la confidentialité des renseignements concernant les médecins. CAPER et l'Association des facultés de médecine du Canada (AFMC), dont CAPER est une division, s'emploient de longue date à appliquer une politique des plus à jour sur la protection des renseignements personnels concernant les médecins, de façon à ce que les activités de collecte, d'utilisation, de divulgation, de conservation et d'élimination desdits renseignements respectent les règles de l'art en la matière.

La confidentialité des données de CAPER se trouve au complet sur le site Web : caper.ca.

How to Access the CAPER Data Tables

The CAPER data tables are available on the CAPER website www.caper.ca.

A hard copy of *CAPER Annual Census of Post-M.D. Trainees* is available upon request. Be sure to use the website to access the information you need. The *CAPER Annual Census of Post-M.D. Trainees*, the *CAPER Provincial Reports*, and the *CAPER Individual Specialty Tables* can be found at www.caper.ca

The CAPER database has been designed to serve as an information resource for physician workforce planning on a national and provincial or regional basis in Canada. Information is held in an individual longitudinal format to permit the study of the flow of trainees through the post-M.D. training system. Although information permitting the identification of individuals is not released from CAPER, group data tabulations and statistics will be prepared in response to requests. **Preparation will be on a cost-recovery basis.**

Data requests made to CAPER are welcome.

Utilisation de la banque de données de CAPER

Les tableaux de données de *CAPER* sont disponible sur le site Web à www.caper.ca.

L'*Annuaire de recensement de CAPER des stagiaires post-M. D. en formation clinique* est disponible sur demande. Veuillez désormais utiliser le site Web pour obtenir des informations. Les *Rapports provinciaux sur les stagiaires post-M. D. en formation clinique*, ainsi que les *Tableaux individuels des spécialités* sont disponible à www.caper.ca.

La base de données de CAPER fut conçue comme source d'information pour la planification de la main d'oeuvre médicale au niveau national et provincial ou régional. L'information est cueillie sous forme de fiches longitudinales individuelles afin de pouvoir obtenir un vue d'ensemble des stagiaires inscrits à la formation post-M.D. Bien que CAPER ne divulgue aucun renseignement permettant d'identifier des individus, des tableaux et des statistiques de groupe peuvent être préparés sur demande. **Ce service est offert à prix coûtant.**

Toutes demandes de statistiques faites auprès de CAPER seront les bienvenues.

Definitions

The data provided to CAPER by all the Canadian Faculties of medicine contain the information on each trainee in accordance with definitions established by CAPER. Following are these definitions and other important details pertaining to the specific variables used in the tables presented in this document.

Faculty of Medicine Providing Post-M.D. Training

The faculty of medicine supervising the post-M.D. trainee on November 1 of the report year.

Field of Post-M.D. Training

The type of non-specialized training, Family medicine training, or the speciality field in which a trainee is enrolled on November 1 of the report year.

Clinician Investigator Program

This is a training program accredited by the RCPSC for the purpose of providing additional research skills for physicians who are registered in one of the specialty or subspecialty training programs. Physicians reported in the A-7 table have already been included within their specialty training field in all other tables.

Note:

Occupational Medicine

Effective July 1, 2006 the recognition status of Occupational Medicine has been changed from a specialty to a subspecialty (with written examination) of Internal Medicine.

Rank

All new M.D. graduates now enter directly into either a Family medicine or a specialty training program at the R-1 level.

Two years of training, the R-1 and R-2 levels, are required for certification in Family medicine. R-3 level training in Family medicine is provided in the accredited Family medicine training programs in Care of the Elderly and Emergency Medicine as well as in other additional training programs. To meet the training requirements of the RCPSC a minimum of four to six years of training is required, depending on the specific specialty in which certification is sought.

A trainee progresses through the rank levels in the following sequence:

Définitions

Les données, fournies par toutes les facultés de médecine canadiennes à CAPER, contiennent les renseignements concernant chaque stagiaire suivant les définitions établies par CAPER. Ces définitions, ainsi que d'autres détails importants relatifs aux variables spécifiques utilisées dans les tableaux présentés dans ce document, sont énoncés ci-après.

Faculté de Médecine Offrant la Formation Post-M.D.

La faculté de médecine supervisant le stagiaire d'un programme post-M.D. au 1^{er} novembre de l'année du rapport.

Domaine de Formation Post-M.D.

Le genre de stage non spécialisé, de médecine de famille, ou la spécialité auquel le stagiaire s'est inscrit au 1^{er} novembre de l'année du rapport.

Programme de Formation de Cliniciens-Chercheurs

Voici un programme de formation accrédité par le CRMCC, qui a pour objet d'enseigner des techniques de recherche supplémentaires aux médecins inscrits à l'un des programmes de spécialisation ou sur-spécialisation. Les médecins inscrits au tableau A-7 sont déjà inclus avec leur champ de spécialité dans tous les autres tableaux.

Note:

Médecine du travail

Depuis 1^{er} juillet 2006, le domaine de la médecine du travail est passé du rang de spécialité à celui de sur-spécialité (avec examens écrits) de la médecine interne.

Rang

Tous les nouveaux diplômés en médecine doivent commencer maintenant leur formation post-doctorale au niveau R-1 soit par le programme de médecine de famille soit par un programme de spécialité.

Le certificat de médecine de famille est une formation de deux ans, soit les niveaux R-1 et R-2. Le niveau R-3 de médecine de famille est dispensé par les programmes agréés de médecine de famille spécialisés dans les soins aux personnes âgées, la médecine d'urgence et d'autres programmes de formation. Selon la spécialité choisie, un minimum de 4 à 6 années sont nécessaires pour obtenir un certificat du CRMCC.

Un stagiaire progresse de la façon suivante:

R-1 (Family medicine or specialty training)
R-2
R-3
R-4
R-5
R-6
R-7

R-1 (médecine de famille ou spécialité)
R-2
R-3
R-4
R-5
R-6
R-7

The following details concerning the ranking system in specific provinces are to be noted:

Notez ci-après des détails concernant le système de classement spécifiques à certaines provinces:

Maritime Provinces

(Physicians training at Dalhousie University)

Physicians in the first year of a program are ranked at the R-1 level. Physicians designated from R-2 to R-7 by CAPER are listed according to the PGY-2 to PGY-7 levels used at Dalhousie University. Any physicians beyond the PGY-7 level are ranked according to the appropriate RCPSC training level.

Provinces maritimes

(Les médecins en formation à l'université Dalhousie)

Les médecins en première année d'un programme sont enregistrés au niveau R-1. Les médecins de la deuxième à la septième année post-M.D. à l'université Dalhousie sont enregistrés du niveau R-2 au niveau R-7 par CAPER. Les médecins ayant accompli la septième année post-M.D. sont enregistrés selon les niveaux de formation du CRMCC.

Ontario

The PGY-1 to PGY-7 or higher training levels in Ontario are reported as R-1 to R-7 by CAPER.

Ontario

Les première aux septième (ou plus) années post-M.D. en Ontario sont enregistrées par CAPER sous les appellations R-1 à R-7.

Fellows

CAPER uses the following definition of the term "fellow": a post-M.D. trainee who is registered with the Postgraduate Medical Education Office of a university faculty of medicine and who, regardless of the source of funding, is pursuing clinical or research training which will **NOT** be evaluated by the supervising faculty for the purpose of Canadian licensure, or certification by The College of Family Physicians of Canada, the Collège des médecins du Québec or The Royal College of Physicians and Surgeons of Canada. (Trainees with appropriate prerequisite training registered in RCPSC "accreditation without certification" programs are considered as residents, not fellows.).

Moniteurs cliniques (Fellows)

CAPER utilise la définition du terme moniteur clinique (fellow) énoncée ci-après : un stagiaire post-M.D. qui est inscrit auprès du Bureau des études médicales postdoctorales de la faculté de médecine d'une université et qui, quelque soit la source du financement, poursuit un stage clinique ou de recherche n'étant **PAS** évalué par la faculté supervisante en vue de l'obtention du permis d'exercer la médecine au Canada ou de la certification par Le Collège des médecins de famille du Canada, par le Collège des médecins du Québec ou par Le Collège royal des médecins et chirurgiens du Canada. (Les stagiaires possédant la formation requise et qui sont inscrits dans les programmes de "l'agrément sans le certificat" du CRMCC sont considérés comme des résidents et non comme des "fellows".)

Location of the Faculty of Medicine That Awarded the M.D. Degree

For individuals who earned the degree in Canada, the province of location of the faculty of medicine that awarded the M.D. degree is used. Post-M.D. trainees who earned the M.D. degree outside Canada are classified as such.

Lieu de la faculté de médecine qui a décerné le diplôme M.D.

Pour les individus qui ont reçu leur diplôme au Canada, la province de la faculté de médecine qui a décerné le diplôme M.D. est utilisé. Ceux qui ont reçu leur diplôme ailleurs qu'au Canada sont classifiés en tant que diplômés de facultés de médecine étrangères.

Source of Funding

The source of funding is the organization or government agency providing the funding for the

Source de financement

La source de financement est l'organisme ou l'agence gouvernementale qui fournit le financement pour la

position occupied by the trainee. Two main categories are used: "Regular Ministry Funds" and "Other Funds". "Regular Ministry Funds" refers to funds provided by the appropriate provincial government ministry responsible for the training of residents within that province. All other funding sources are grouped as "Other Funds". Graph I-2 identifies a subcategory of "Other Funds". This subcategory is called "Other Provincial Government Funds" and includes such sources as ministry funds provided for complementary training by the Quebec Ministry of Health and Social Services, funds for residency training transferred from one province to another, and government-funded foundations such as the Alberta Heritage Foundation.

Age

Age is calculated as the age of the trainee on July 1, 2006 (the age of the trainee at the beginning of the July 2006 training session).

Legal Status

Three categories are used:

Canadian Citizen / Permanent Resident

Trainee is a citizen of Canada or has been accepted as a landed immigrant and has the right to live and work in Canada.

Visa

Trainees holding a visa permitting employment in Canada temporarily as a post-M.D. trainee

First Year Trainees

Only first-time trainees in their first year of post-M.D. training in Canada at the R-1 level are designated as "first year trainees" and are included in Section G of the book. Other trainees at the R-1 level who are re-entering training, repeating the first year, or changing specialties requiring a second year at the R-1 level are NOT included in Section G on first year trainees.

Trainees included in the first year trainee category according to CAPER are:

1. Graduates of Canadian medical schools at the R-1 training level who have not been previously reported to CAPER.
2. Graduates of foreign medical schools who are entering training at the R-1 level in Canada for the first time (visa trainees beginning a

position occupée par le stagiaire. Deux grandes catégories sont utilisées: "Fonds ministériels habituels" et "Autres fonds". Les "Fonds ministériels habituels" sont les fonds provenant des ministères des gouvernements provinciaux appropriés responsables des stages des résidents au sein de la province. Tous les autres sources de financement sont regroupés sous l'appellation "Autres fonds". Le graphe I-2 présente une sous-catégorie de la catégorie "Autres fonds". Cette sous-catégorie s'intitule "Autres fonds des gouvernements provinciaux" et comprend entre autres des fonds provenant du ministère de la Santé et des Services sociaux du Québec destinés à financer une formation complémentaire, des fonds de transfert d'une province à une autre pour la formation clinique, et des fonds provenant de fondations financées par les gouvernements comme l'Alberta Heritage Foundation.

Âge

L'âge est calculé en fonction de l'âge du stagiaire au 1^{er} juillet 2006 (l'âge du stagiaire au commencement de la séance de stage de juillet 2006).

Statut légal

On utilise trois catégories :

Citoyen canadien / Résident permanent

Le stagiaire est citoyen canadien ou un individu ayant reçu le droit d'établissement au Canada et qui, en tant que tel, a le droit de vivre et travailler au Canada.

Visa

Le stagiaire est en possession d'un visa permettant d'être employé temporairement en tant que stagiaire post-M.D.

Stagiaires en première année post-M.D.

Seuls les stagiaires en première année post-M.D. au Canada pour la première fois sont regroupés dans la catégorie "stagiaires en première année post-M.D. (first year trainees)" et sont inclus dans la section G de ce document. Les autres stagiaires du niveau R-1 qui reprennent une formation, redoublent leur première année ou changent de spécialité et ont besoin de recommencer une première année au niveau R-1 NE SONT PAS inclus dans la section G dans la catégorie "stagiaires en première année post-M.D."

Selon CAPER, les stagiaires regroupés dans la catégorie "stagiaires en première année post-M.D. (first year trainees)" sont les suivants :

1. les diplômés des facultés de médecine canadiennes au niveau R-1 et n'ayant pas encore été enregistrés dans les données de CAPER.
2. les diplômés de facultés de médecine étrangères qui sont admis au niveau R-1 au Canada pour la

program at the R-1 level are, therefore, included in this group).

Estimated Practice Entry Cohort

The practice entry cohort comprises the physicians who have left the post-M.D. training system each year and would be legally able to work in Canada. In order to give a picture of new entries to practice, re-entry trainees (as discussed in Section H) and visa trainees have not been included in the estimated practice entry cohort.

Gender

Visa trainees have not been included in the data pertaining to gender. This was done to give a more realistic picture of the gender mix of the cohorts of physicians who will be entering practice in Canada. The tables which have been affected are A-3, G-5 and I-3.

Completion of Training

This term is used in Section J to indicate that the group exited training at a level appropriate for completion of training (e.g. R-2 or higher for Family medicine, R-4 or higher for most RCPSC specialties and R-5 or higher for subspecialties and surgical specialties).

Palliative Medicine

Palliative medicine is a unique specialty in that it is accredited jointly by the Royal College of Physicians and Surgeons of Canada and by the College of Family Physicians. As such, it is placed in a separate category where training programs have been listed separately. Where the training programs have been grouped in the categories "Family medicine", "Medical specialties", "Laboratory medicine specialties" and "Surgical specialties", Palliative medicine has been included with "Medical specialties". This is because it includes too few physicians in it to form an isolated category.

première fois (les stagiaires possédant un visa et débutant une formation au niveau R-1 sont donc inclus dans cette catégorie).

Estimation de la cohorte de nouveaux praticiens

La cohorte de nouveaux praticiens contient les médecins ayant terminé leur formation post-M.D. dans l'année et qui sont en droit d'exercer au Canada. Afin de présenter un tableau des nouveaux praticiens, les stagiaires qui reprennent leur pratique (voir section H) et les stagiaires qui ont un visa d'emploi temporaire ne sont pas inclus dans cette estimation.

Sexe

Les stagiaires qui ont un visa n'ont pas été inclus dans les données relatives au sexe, de façon à présenter un tableau plus réaliste des sexes dans les cohortes de médecins commençant à exercer au Canada. Ce changement porte sur les tableaux A-3, G-5 et I-3.

Fin de formation

Ce terme est utilisé dans la section J et signifie que le groupe a atteint le niveau d'études correspondant à la fin de formation (par exemple: R-2 pour la médecine de famille, R-4 ou plus pour la plupart des spécialités du Collège royal et R-5 pour les sur-spécialités et spécialités de chirurgie).

Médecine palliative

Le programme de médecine palliative se distingue par le fait qu'il a été agréé à la fois par le Collège royal des médecins et chirurgiens du Canada et par le Collège des médecins de famille. À ce titre, il a été classé dans une catégorie distincte qui énumère séparément les programmes de formation. Lorsque ces derniers sont regroupés par catégorie, soit "Médecine de famille", "Spécialités médicales", "Spécialités de médecine de laboratoire" et "Spécialités chirurgicales", le programme de médecine palliative fait partie de "Spécialités médicales". Il comprend en effet trop peu de médecins pour former une catégorie à part entière.

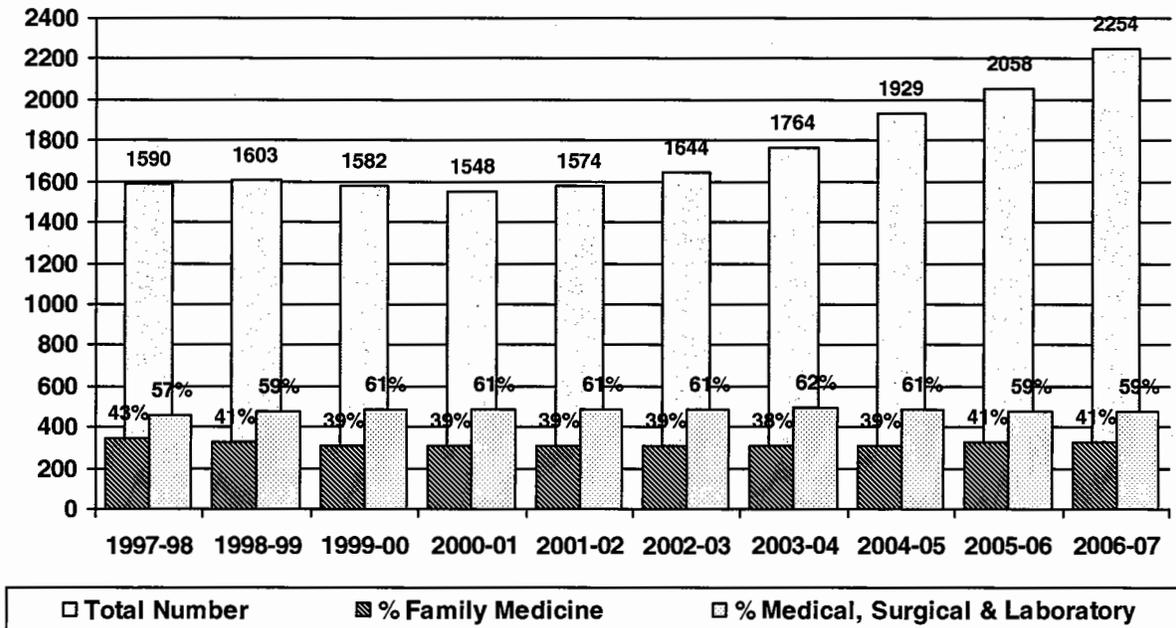

Quick Facts 2006-2007

1. Quick Facts: Concerning Canadian Citizens/Permanent Residents

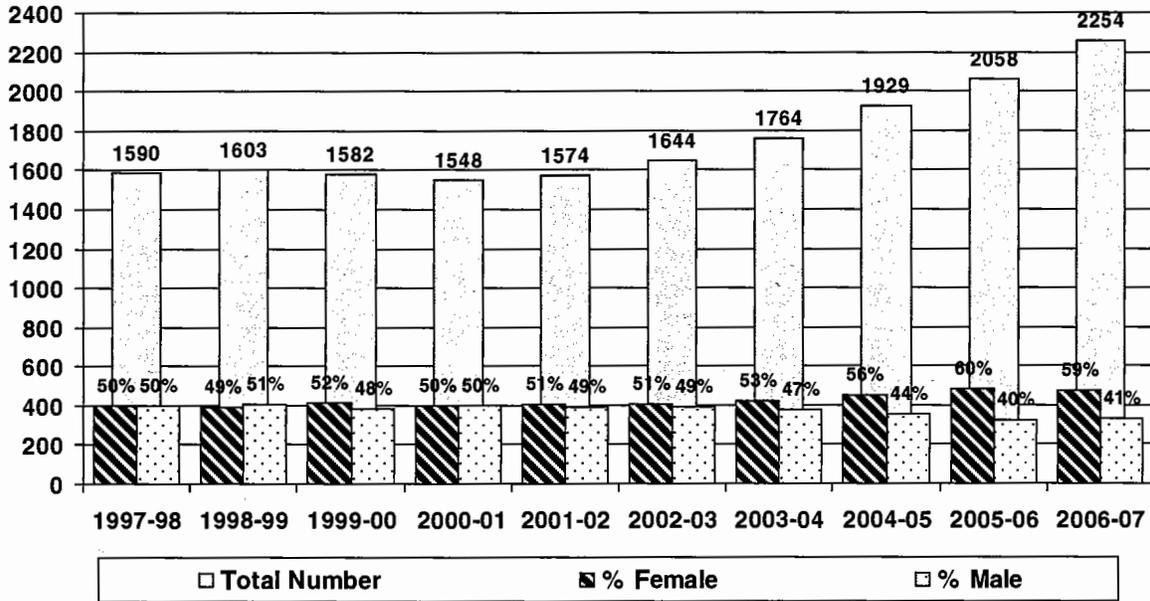

This section presents summary statistics for post-M.D. trainees who are possibly more likely to be among Canada's future physicians due to their citizenship status. Included in the results are graduates of Canadian faculties of medicine as well as international medical graduates (IMGs) who are Canadian citizens or permanent residents.

- A. First year trainees:** During the period 1997-98, the number of first year post-M.D. medical trainees was lowest in 2000-01 (n=1548). Since 2000-01 the number of first year trainees has increased in each consecutive year. At 2254, the number of first year trainees in 2006-07 is 46% higher than the number in 2000-01. Among all trainees, first year trainees have increased proportionately from 22% in 1997-98 to 25% in 2006-07. (Figures 1 and 4)
- B. International Medical Graduates:** Among first year trainees IMGs have increased in number and as a proportion of all first year trainees. In 2006-07 there were 360 first year post-M.D. IMG trainees in Canada, up from 259 the previous year. IMGs comprised 16% of all first year post-M.D. trainees in 2006-07, the highest such percentage value between 1997-98 and 2006-07. (Figure 3)
- C. Gender:** The proportion of medical trainees who are women has increased over the past decade; 59% of physicians entering training in 2006-07 were female, compared to 50% in 1997-98. In 2006-07, 66% of physicians exiting family medicine training programs were female and 44% of those exiting medical, surgical and laboratory programs were women. (Figures 2, 10 and 11)
- D. Specialty mix:** In 2006-07, 923 (41%) of the first year trainees were in family medicine programs and 1331 (59%) were in medical, surgical and laboratory programs. Among exiting trainees in 2006-07, 40% were completing family medicine programs and 60% were completing medical, surgical and laboratory programs. (Figures 1 and 7)

1. Canadian Citizens and Permanent Residents: First Year Trainees in Family Medicine and Medical/Surgical/Laboratory Training Programs

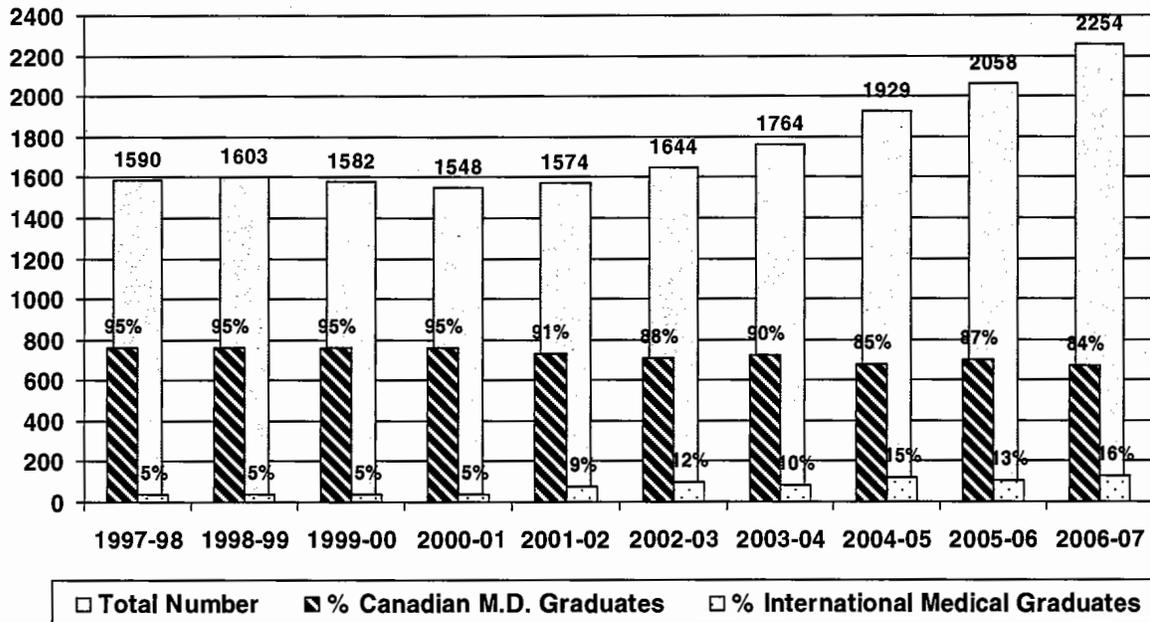

2. Canadian Citizens and Permanent Residents: First Year Trainees by Sex

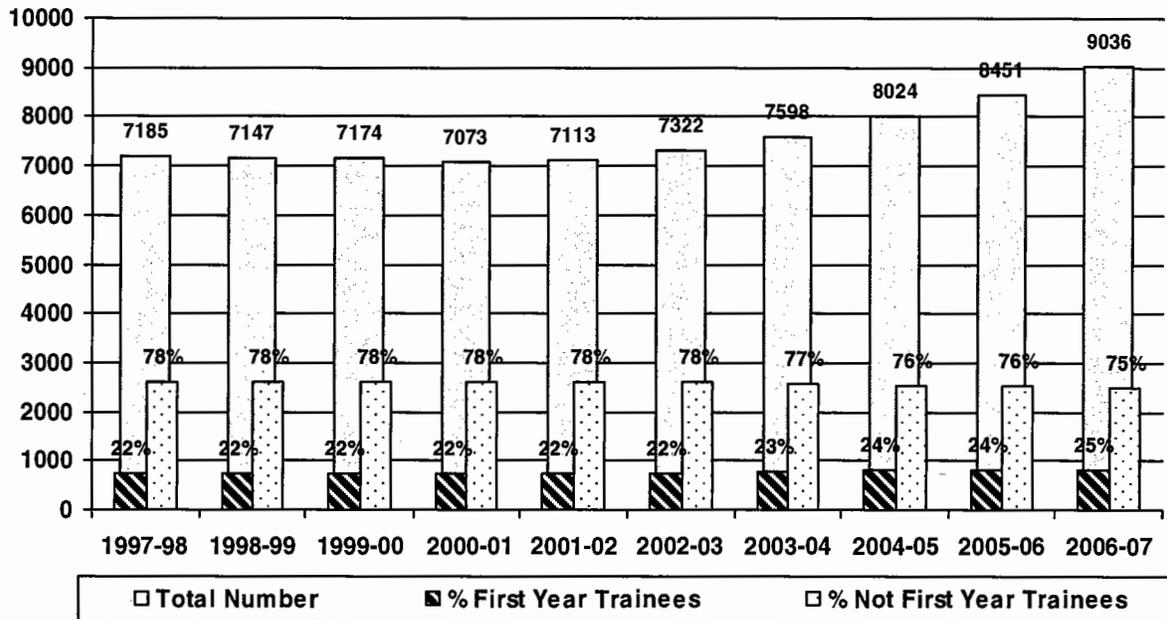

While the total number of Canadian citizens/permanent residents entering training has increased almost 10%, from 2058 in 2005-06 to 2254 in 2006-07, the male:female ratio is similar in both years.

3. Canadian Citizens and Permanent Residents: Comparison of First Year Trainees Based on Canadian M.D. Graduation and International Medical Graduation

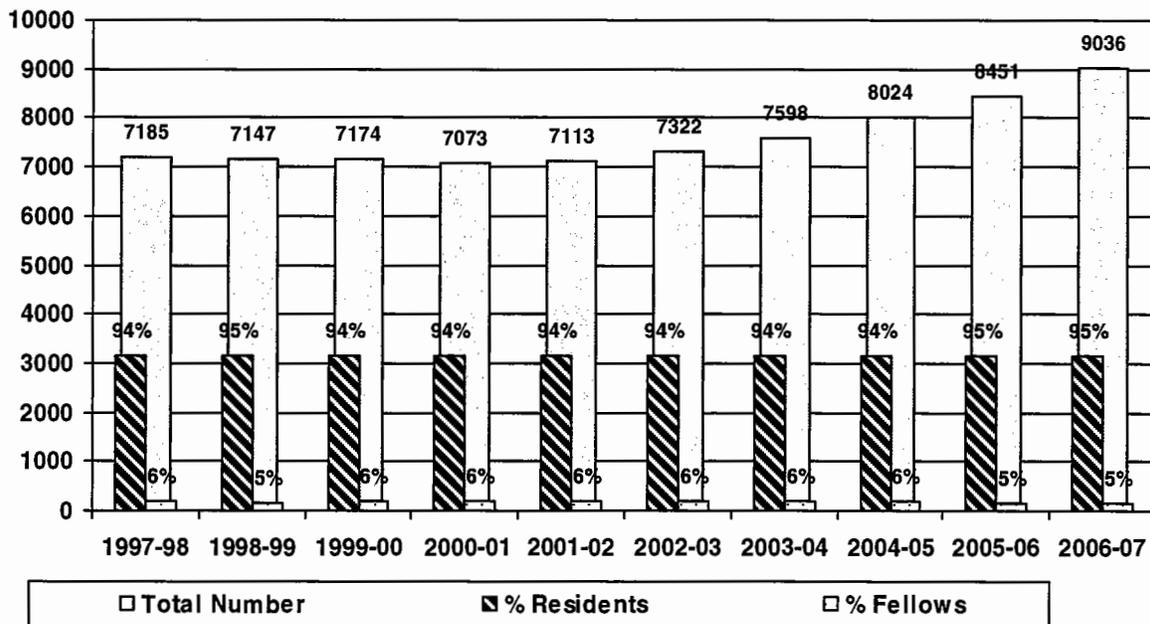

The numbers of Canadian and international medical graduates increased in 2006-07. IMGs represented 5% of first year trainees in each year between 1997-98 and 2000-01. Since then, there has been a general increase in the proportion of first year trainees who are IMGs.

4. Canadian Citizens and Permanent Residents: First Year Post-M.D. Trainees and Non First Year Trainees

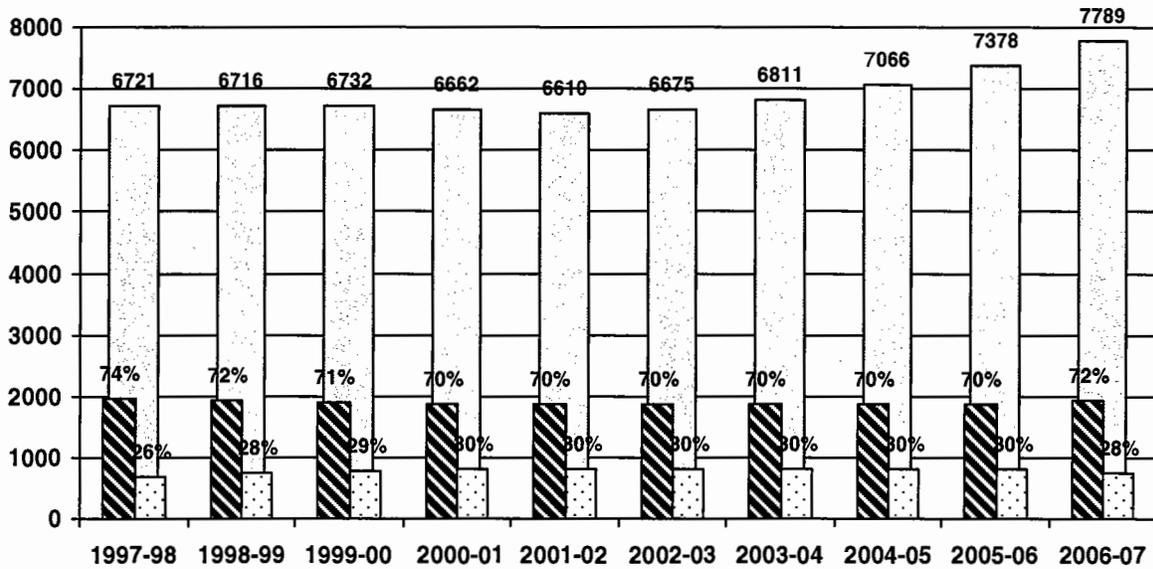

First year trainees continue to comprise approximately one-quarter of all post-M.D. trainees. Total post-M.D. enrollment has grown steadily since 2000-01. The total number of Canadian citizens/permanent residents enrolled in post-M.D. training increased 28% between 2000-01 and 2006-07.

5. Canadian Citizens and Permanent Residents: Residents and Fellows

There has been a slight decrease in the proportion of Canadian citizen/permanent resident physicians who are fellows at advanced levels of training. This is a result of the increasing number of residents entering at the R-1 level.

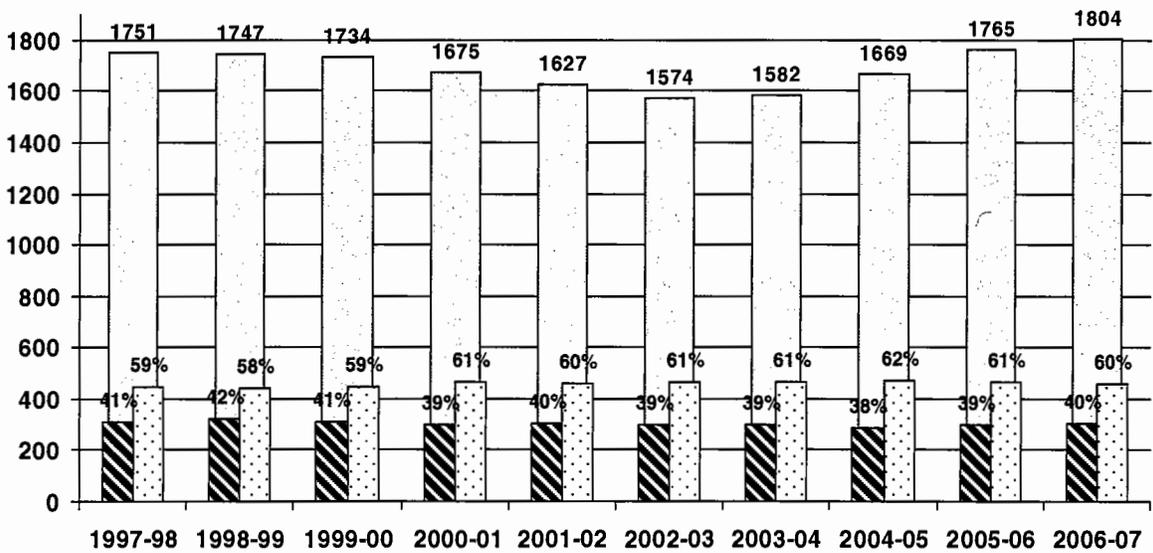

6. Canadian Citizens and Permanent Residents: Canadian M.D. Graduates Pursuing Post-M.D. Training Within and Outside Their Province of M.D. Graduation

□ Total Number ▨ % Post-M.D. Training in M.D. Prov. □ % Post-M.D. Training in Different Prov.

The proportion of Canadian graduates who do their post-M.D. training in the province where they earned their M.D. degree remained stable at 70% between 2000-01 and 2005-06. The percentage increased slightly (to 72%) in 2006-07.

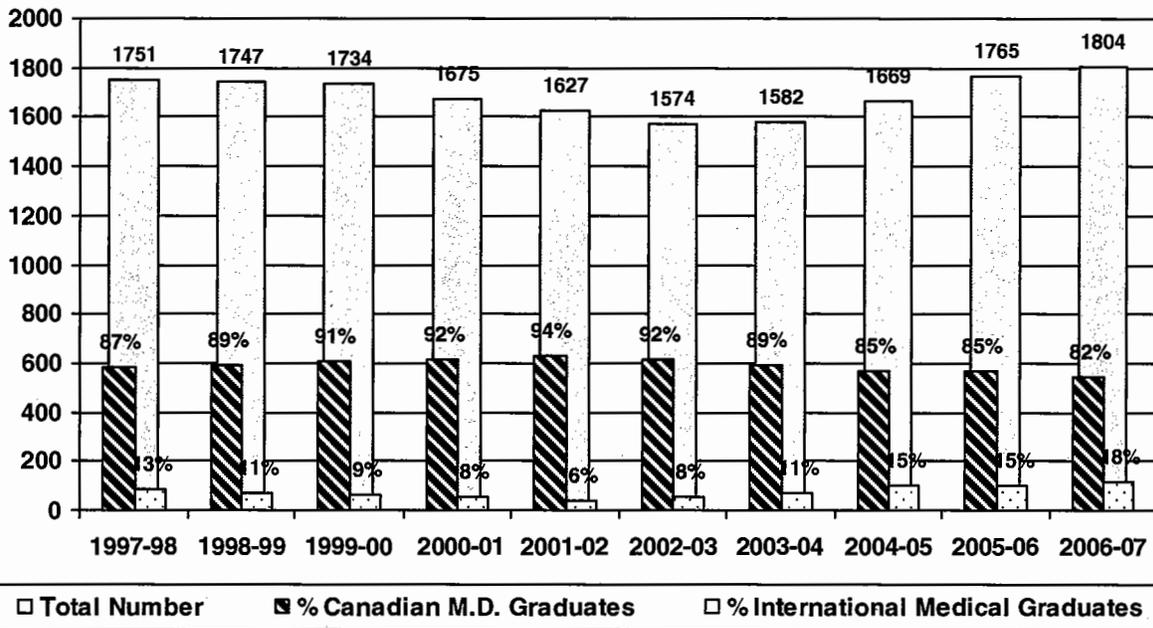

7. Canadian Citizens and Permanent Residents: Post-M.D. Trainees Exiting Family Medicine Vs. Medical, Surgical Laboratory Programs

□ Total Number ▨ % Family Medicine □ % Medical, Surgical & Laboratory

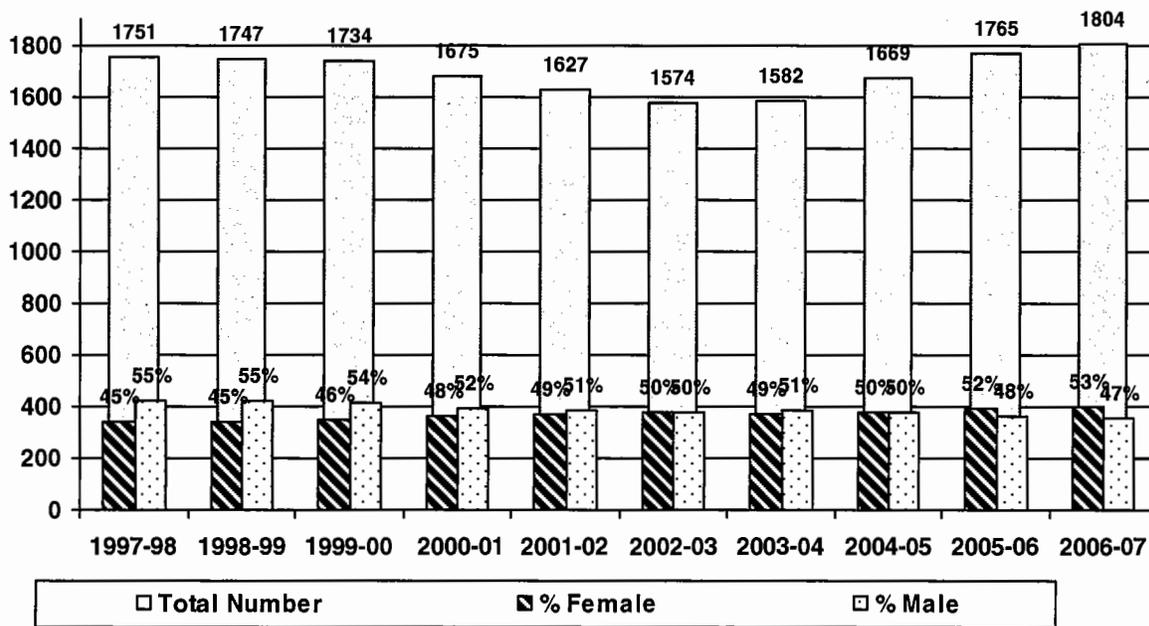

As the number of Canadian citizens/permanent residents entering post-M.D. training has increased, so too has the number of physicians exiting post-M.D. training. The number of physicians exiting post-M.D. training went from 1574 in 2002-03 to 1804 in 2006-07, a 15% increase.

8. Canadian Citizens and Permanent Residents: Exiting Post-M.D. Trainees by Canadian M.D. Graduate and International Medical Graduate Status

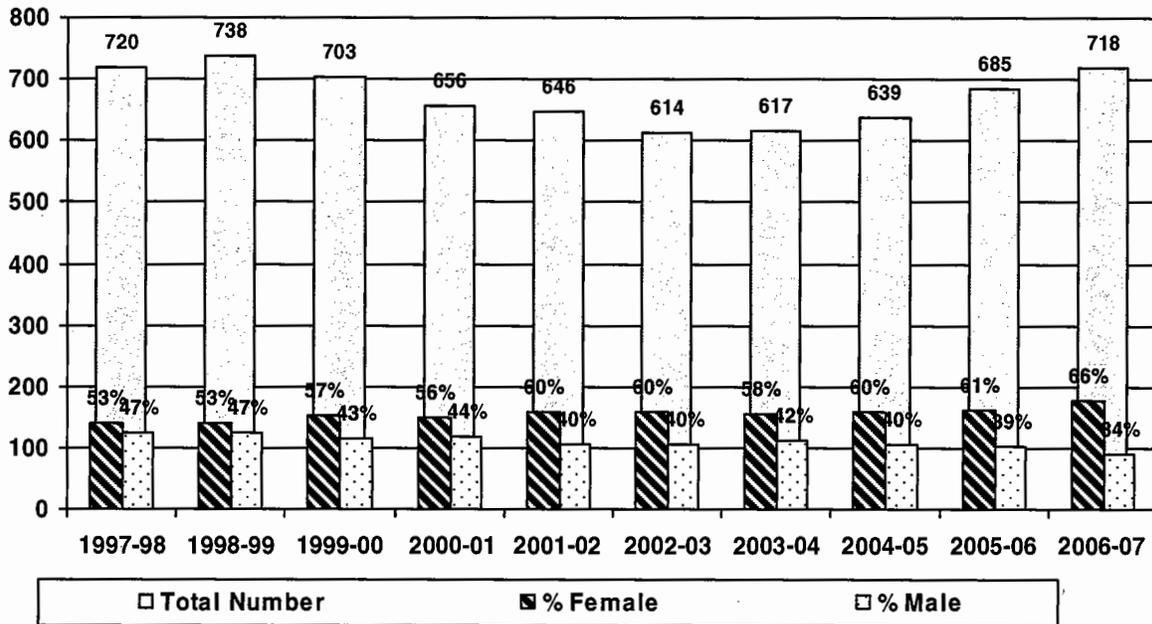

In 2006-07 international medical graduates (Canadian citizens/permanent residents) comprise 18% (n = 325) of the practice entry cohort. There were 1479 graduates of Canadian medical schools (82%) in the practice entry group.

9. Canadian Citizens and Permanent Residents: Exiting Post-M.D. Trainees by Sex

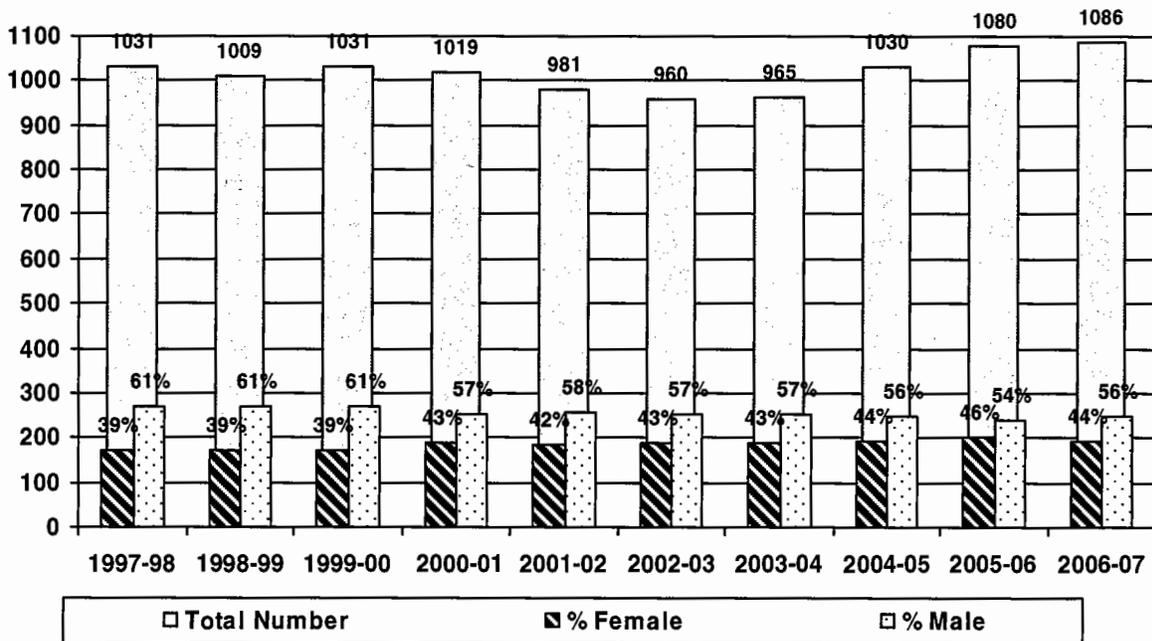

2005-06 was the first year in which females outnumbered males in Canada's physician practice entry cohort. This pattern is repeated in 2006-07.

10. Canadian Citizens and Permanent Residents: Exiting Family Medicine Post-M.D. Trainees by Sex

Over the past 10 years females constitute an increasing proportion of family physicians completing post-M.D. training. Of the 718 physicians who completed family medicine training in 2006-07, 471 (66%) were female and 247 (34%) were male.

11. Canadian Citizens and Permanent Residents: Exiting Medical, Surgical and Laboratory Post-M.D. Trainees by Sex

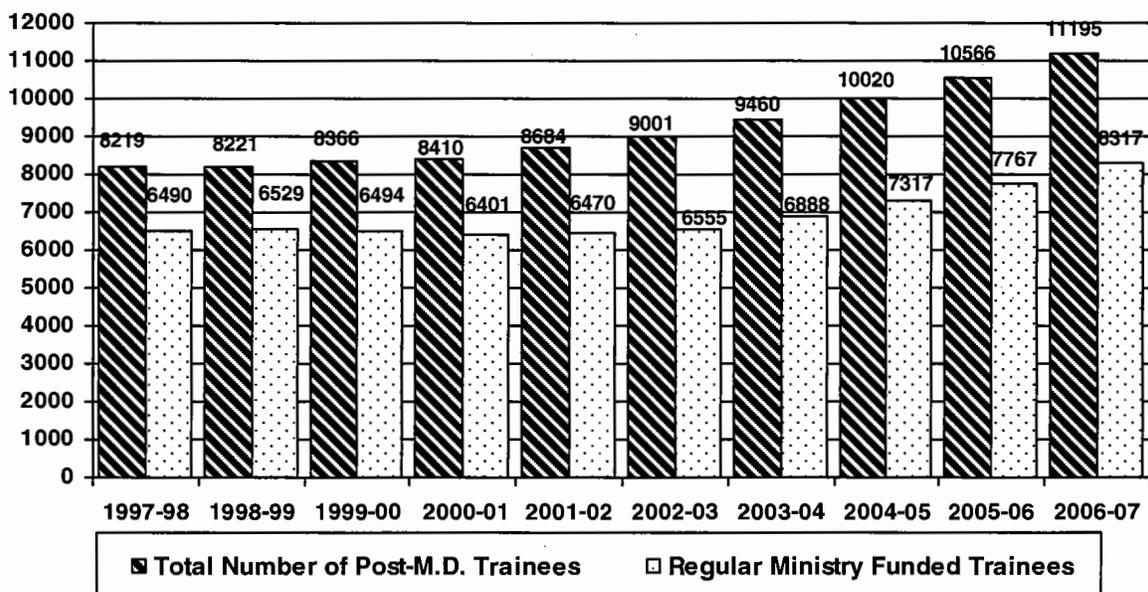

The number of female physicians completing medical, surgical or laboratory training programs decreased slightly, from 493 in 2005-06 to 480 in 2006-07. The number of female physicians exiting medical, surgical and lab programs has not yet exceeded the number of males exiting these programs.

Quick Facts 2006-2007

2. Quick Facts: Concerning Post-M.D. Trainees in Regular Ministry Funded Positions

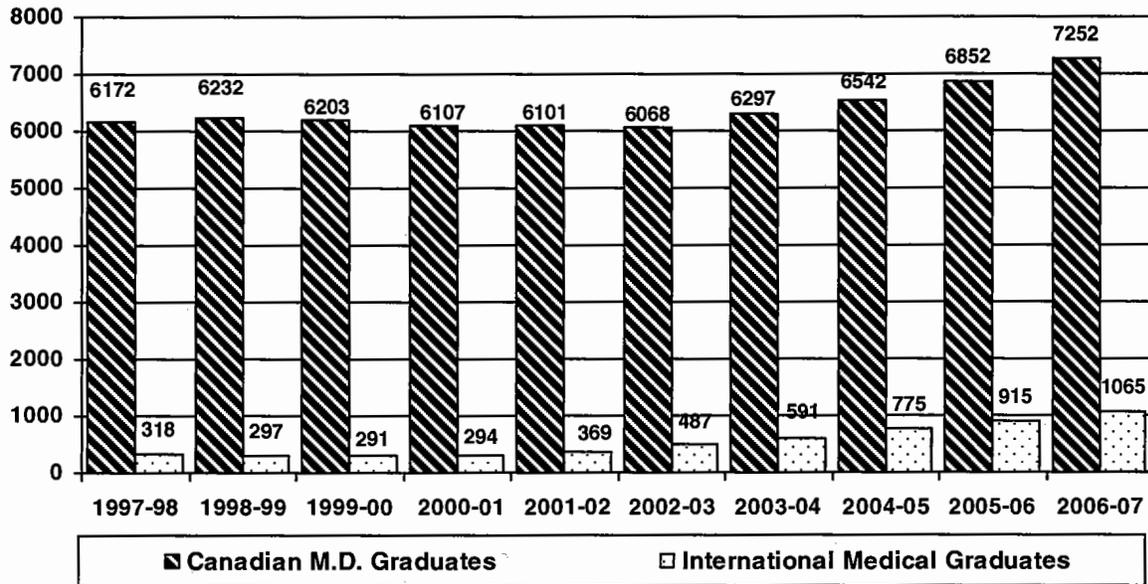

- A. The total number of regular ministry funded trainees continues to increase, reaching 8317 in 2006-07. The **total** number of post-M.D. trainees (ministry and non-ministry funded) also continues to increase, reaching 11195 in 2006-07. (*Figure 1*)
- B. Over the ten year period 1997-98 to 2006-07, the number of regular ministry funded Canadian medical graduates (CMGs) was lowest in 2001-02 (n=6101); By 2006-07 the number of ministry funded CMGs increased 19%, to 7252. During the same time period the number of regular ministry funded international medical graduates (IMGs) was lowest in 1999-00 (n=291); This figure has more than tripled in 2006-07 (n=1065). (*Figure 2*)
- C. The number of current year CMGs in post-M.D. training increased sharply over the period 2002-03 to 2006-07. The steady increase from 1388 in 2002-03 to 1827 in 2006-07 represents a 32% increase. (*Figure 3*)
- D. Throughout the period 1997-98 to 2006-07, the number of physicians re-entering post-M.D. training is relatively low compared to new entry physicians. However, in 2000-01 the number of new entry physicians was at its lowest (n=6175) and the number re-entry physicians was at its highest (n=226). The situation is reversed in 2006-07, with the number of new entry physicians at its 10-year high (n=8176) and the number of re-entry physicians at its lowest (n=141). (*Figure 4*)
- E. The number of family medicine trainees enrolled at the R-3 level has decreased in each of the two most recent data years, 2005-06 and 2006-07. The number of medical, surgical and laboratory trainees pursuing subspecialty training has increased in each of the two most recent data years. (*Figures 5 and 6*)

1. Total Post-M.D. Trainees and Regular Ministry Funded Post-M.D. Trainees

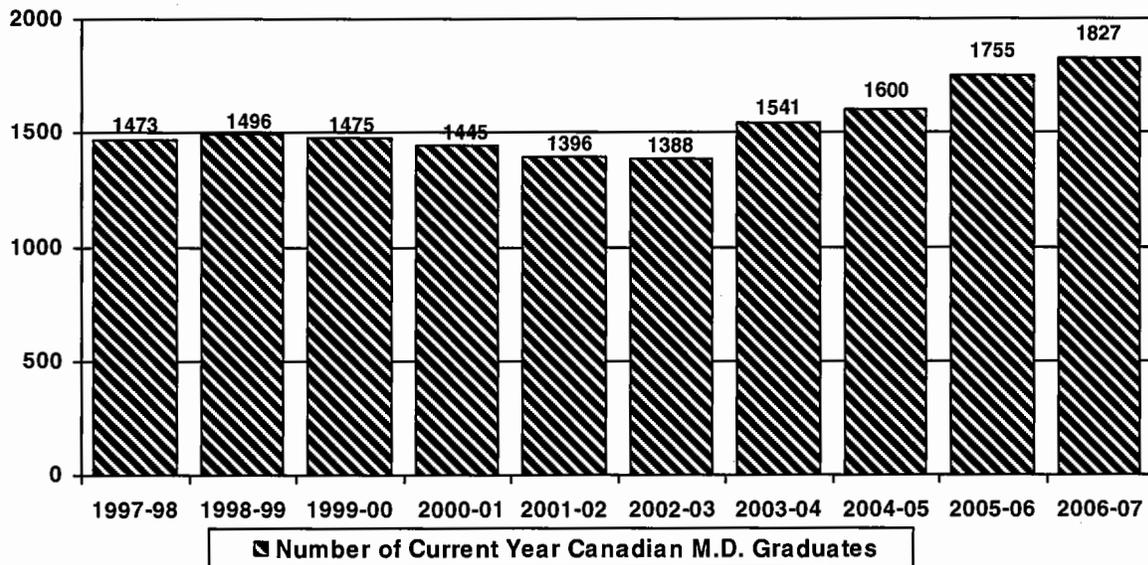

The total number of post-M.D. trainees increased to 11195 in 2006-07, a 6% increase over the 2005-06 figure. The ten-year low for total enrolment occurred in 1997-98 and the ten-year low for ministry funded enrolment occurred in 2000-01. In 2006-07, total enrolment is 36% higher than its ten year low and ministry funded enrolment is 30% higher than its ten year low.

2. Regular Ministry Funded Trainees: Canadian M.D. Graduates and International Medical Graduates

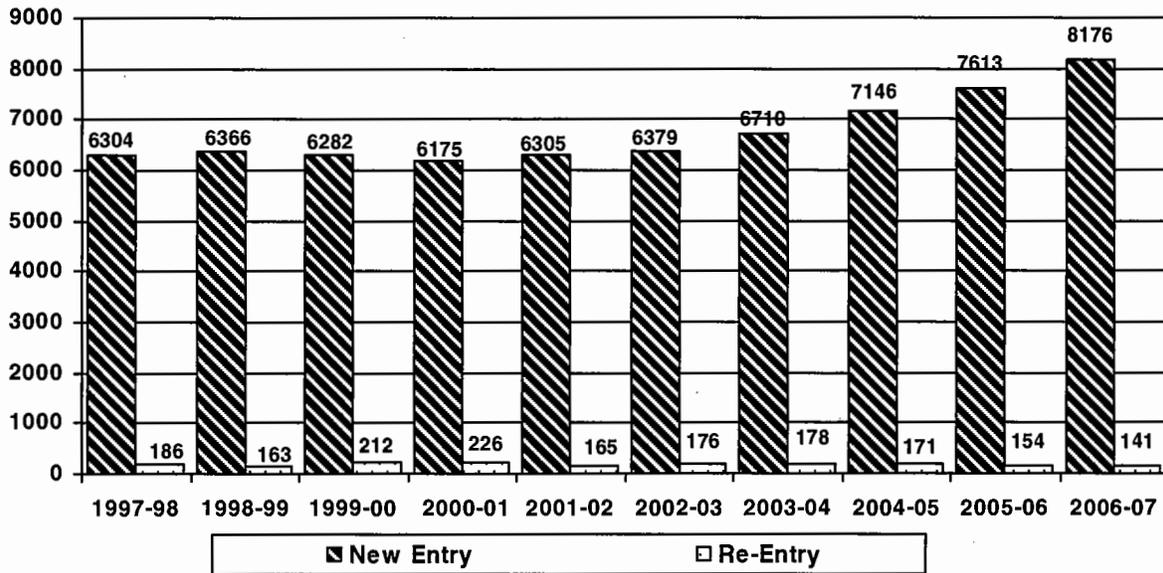

The number of ministry funded IMGs has increased to 1065 in 2006-07. Each year, for the past five years, the number of ministry funded IMGs has increased by no less than 100 over the previous year's figure. The largest one-year increase occurred in 2004-05 when the number of ministry funded IMGs increased by 184 over the previous year's figure.

3. Regular Ministry Funded Trainees: Number of Current Year Graduates of Canadian Medical Schools in Post-M.D. Training

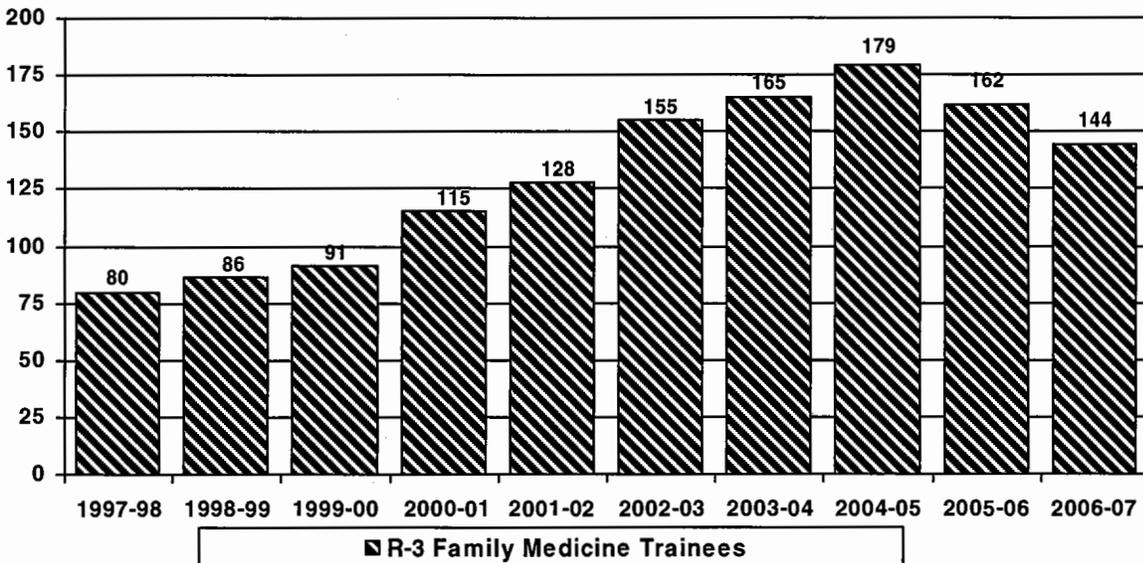

The number of current year Canadian M.D. graduates entering training in ministry funded positions increased to 1827 in 2006-07. This represents a 32% increase over 2002-03, when the number was at a ten year low.

4. Regular Ministry Funded Trainees: Number of New Entry and Re-entry Residents

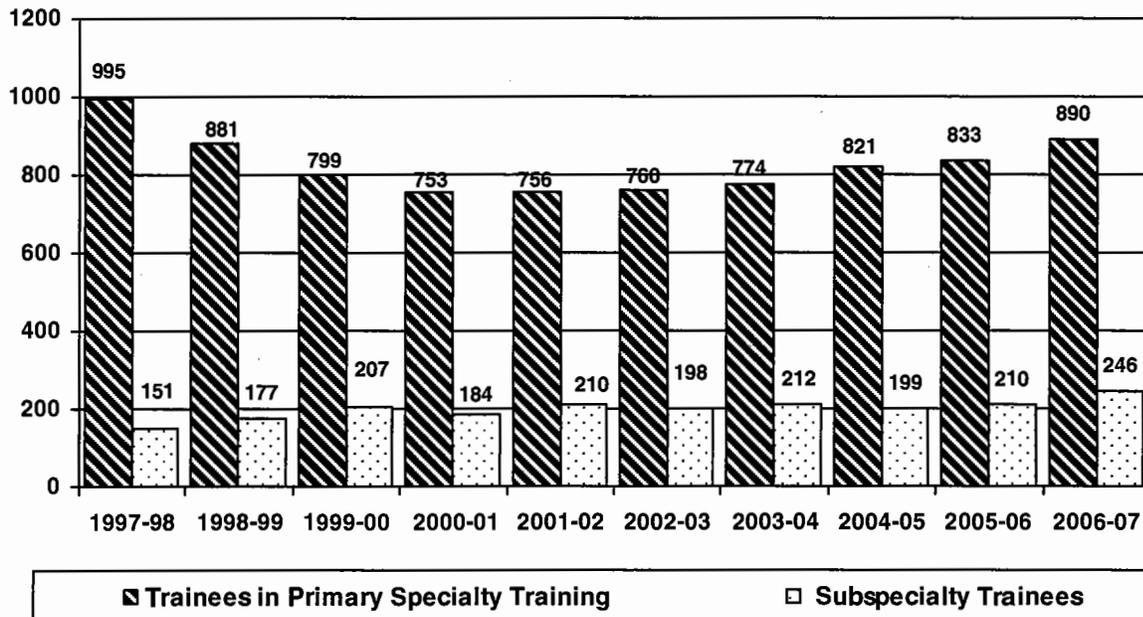

In 2000-01 the number of new entry physicians was at its lowest (n=6175) and the number re-entry physicians was at its highest (n=226). The situation is reversed in 2006-07, with the number of new entry physicians at a ten year high (n=8176) and the number of re-entry physicians at its lowest (n=141).

5. Regular Ministry Funded Trainees: Number of R-3 Level Trainees in Family Medicine

At 144 in 2006-07, the number of family medicine trainees pursuing R-3 training is lower than it has been in the five most recent data years.

6. Regular Ministry Funded Trainees: Number of R-4 Medical, Surgical and Laboratory Residents in Primary Specialties and Subspecialties

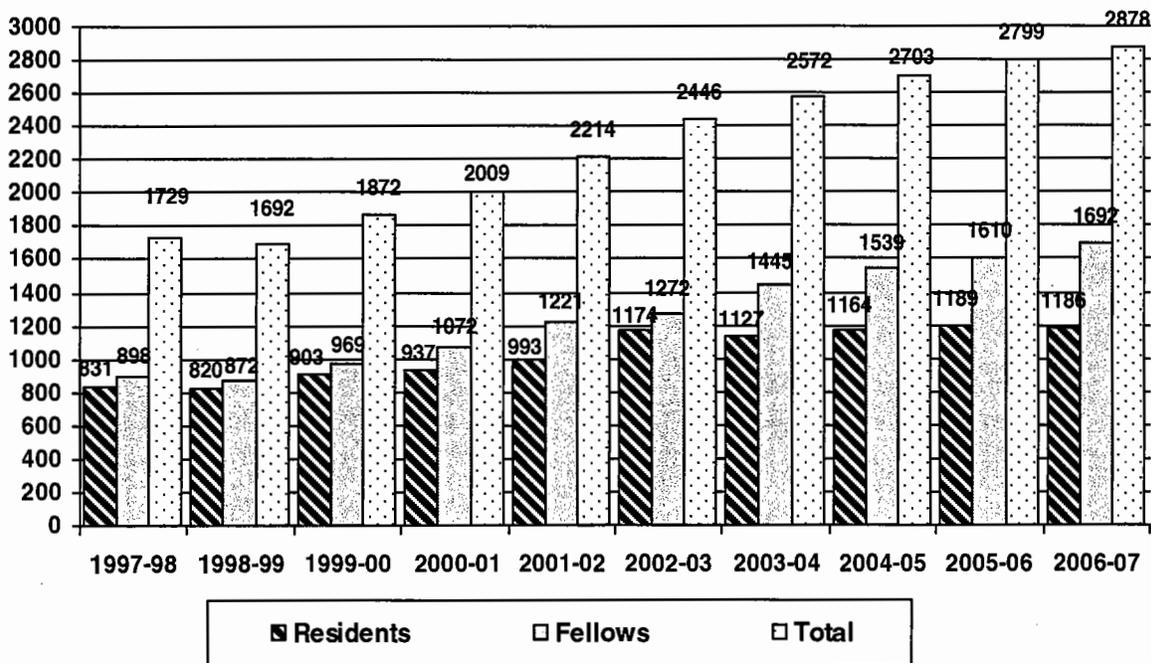

In 2006-07, 246 R-4 level medical, surgical and laboratory residents were in subspecialty training and 890 were in the primary specialties. Since 1999-00, between 20%-22% of medical, surgical and laboratory trainees have been enrolled in subspecialty training. (By way of clarification, the primary specialty Internal Medicine has a number of subspecialties, such as Cardiology, Gastroenterology, Nephrology, etc.)

Quick Facts 2006-2007

3. Quick Facts: Concerning Non-Ministry Funded Post-M.D. Trainees

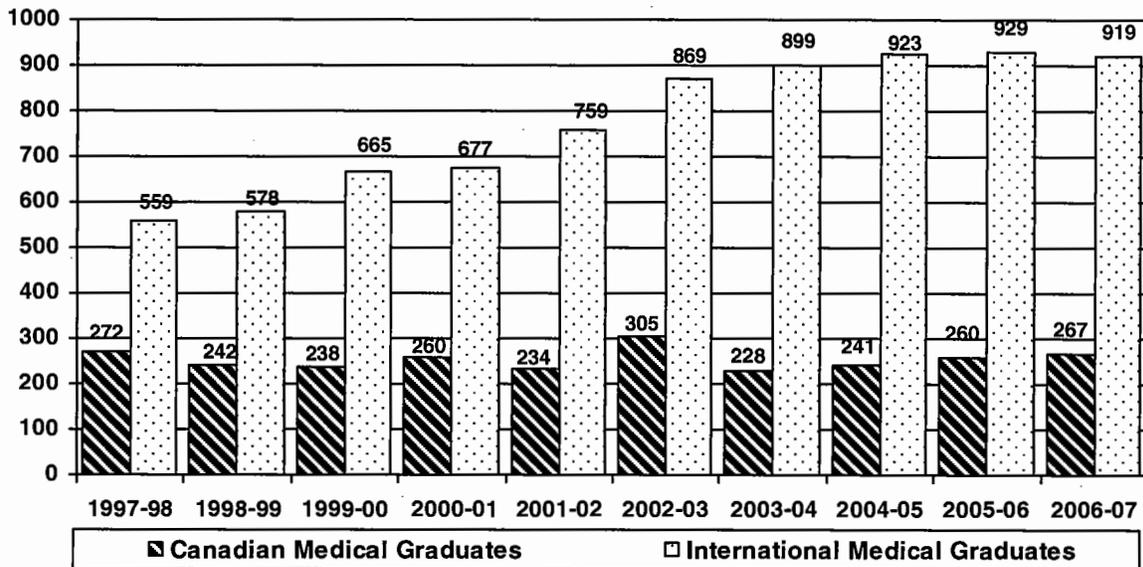

- A. From 1997-98 to 2006-07, there has been a steady increase in the number of non-ministry funded trainees from 1729 in 1997-98 to 2878 in 2006-07. (Figure 1)
- B. In each year between 1997-98 and 2006-07 most non-ministry funded post-M.D. trainees were international medical graduates (IMGs). These IMG trainees are funded mainly through contracts with foreign governments and numbered 919 in 2006-07. By comparison, in 2006-07 there were 267 non-ministry funded Canadian medical graduates (CMGs). These figures do not include post-M.D. Fellows. (Figure 2)
- C. In 2006-07 there were 267 non-ministry funded CMG Residents and 307 non-ministry funded CMG Fellows. Fellows typically outnumber Residents among non-ministry funded CMGs. (Figure 3)
- D. The number of non-ministry funded CMG re-entry trainees has increased slightly over the last 3 years, from 35 in 2004-05 to 43 in 2006-07. (Figure 4)
- E. There has been a marked increase in the number of non-ministry funded post-M.D. Visa trainees over the past decade. Non-ministry funded Visa trainees have increased from 973 in 1997-98 to 2082 in 2006-07. (Figure 5)

1. Non-Ministry Funded Trainees : Residents Versus Fellows

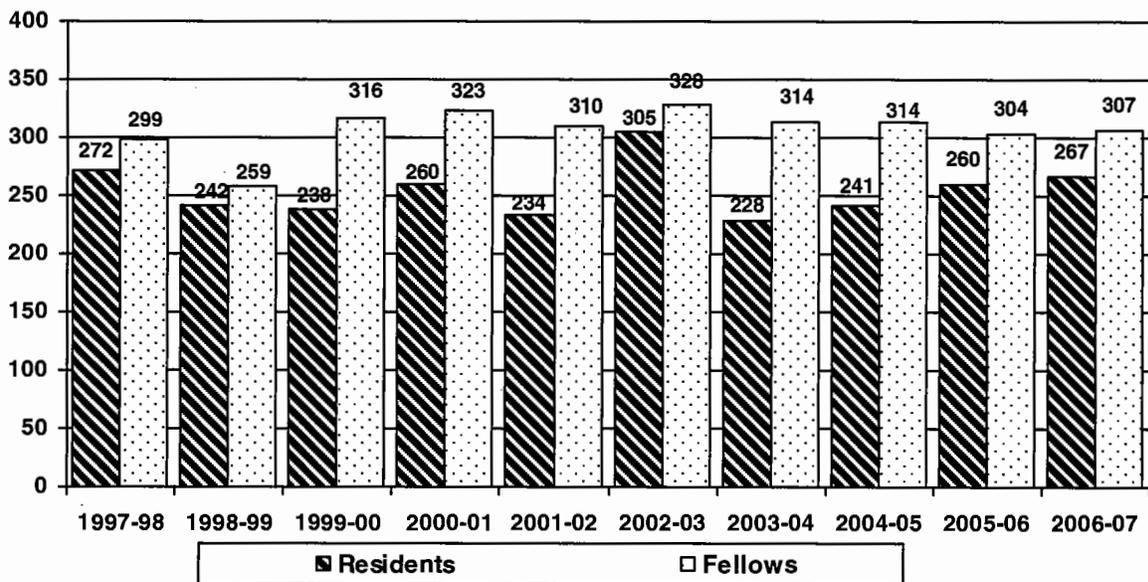

The number of non-ministry funded trainees increased from 2799 in 2005-06 to 2878 in 2006-07. This overall increase is attributable to an increase in the number of non-ministry funded post-M.D. Fellows .

3. Non-Ministry Funded Trainees (Excluding Fellows): Canadian Medical Graduates and International Medical Graduates

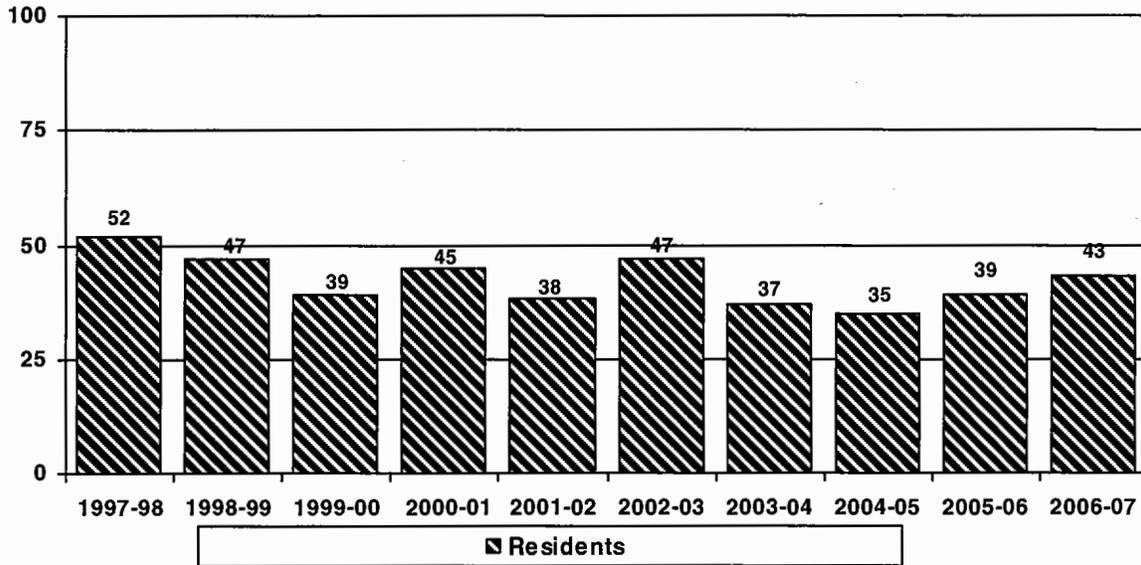

Between 1997-98 and 2006-07 there has been relatively little change in the number of non-ministry funded CMG Residents. These trainees numbered 272 in 1997-98 and 267 in 2006-07. While the number of non-ministry funded IMG Residents increased substantially between 1997-98 and 2004-05, there has been little change in the number of these trainees in the three most recent data years.

3. Non-Ministry Funded Trainees (CMGs Only – IMGs Excluded): Residents Versus Fellows

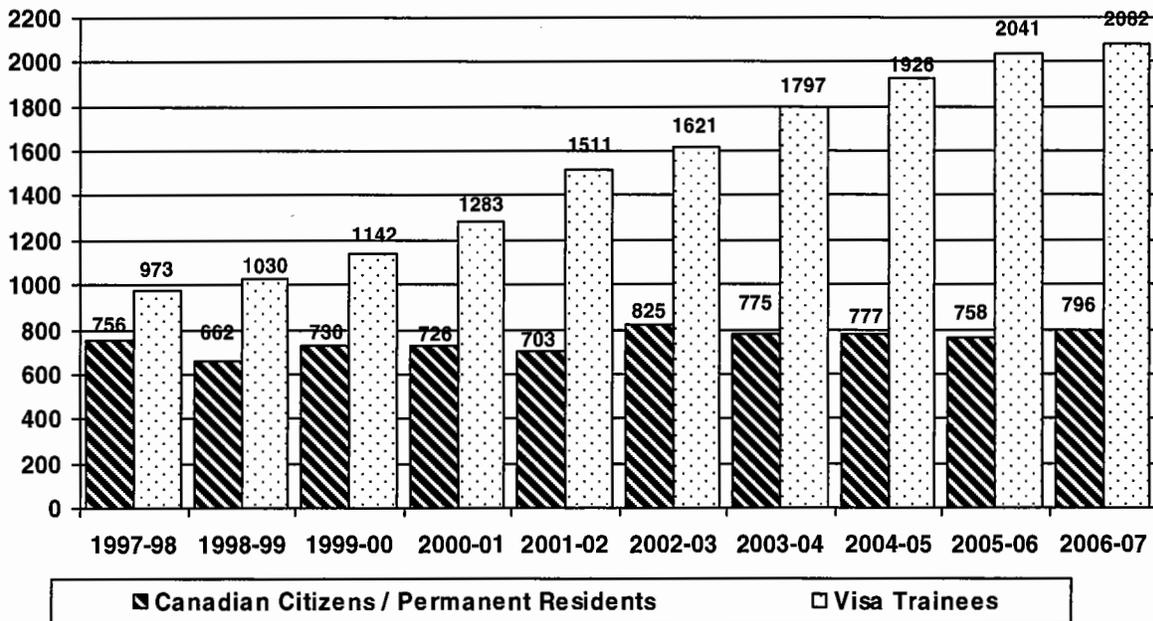

In 2006-07 there were 267 non-ministry funded CMG Residents and 307 non-ministry funded CMG Fellows. Fellows have outnumbered Residents among non-ministry funded CMGs in each year during the period 1997-98 – 2006-07.

4. Non-Ministry Funded Trainees (CMGs Only – IMGs Excluded): Number of Re-entry Residents

The number of non-ministry funded CMG re-entry trainees has increased slightly over the last 3 years, from 35 in 2004-05 to 43 in 2006-07.

5. Non-Ministry Funded Trainees: Canadian Citizens/Permanent Residents Versus Visa Trainees

There has been a marked increase in the number of non-ministry funded post-M.D. Visa trainees over the past decade. Non-ministry funded Visa trainees have increased from 973 in 1997-98 to 2082 in 2006-07. By contrast, the number of non-ministry funded Canadian citizens/permanent residents has remained relatively stable.

Data from the 2006–2007 CAPER Annual Census of Post-M.D. Trainees

The following tables are grouped under topics of significance to post-M.D. training in Canada. The tables that have been selected give an overview of the distribution of the post-M.D. trainee population in Canada, among the provinces, faculties of medicine, and fields of training. These tables represent only a sample of the many ways variables can be combined to provide useful and interesting data.

See the section at the front of this report titled **"How to Access the CAPER Data Tables"** if you wish to request specific tables.

- A. Faculty of Medicine Providing Post-M.D. Training

- J. Supplementary Data

Données provenant du recensement annuel des stagiaires post-M.D. 2006–2007

Les tableaux sont groupés selon les domaines d'intérêt à la formation post-M.D. au Canada. Les tableaux choisis donnent une vue d'ensemble de la distribution des stagiaires post-M.D. à travers le Canada, parmi les provinces, les facultés de médecine et les domaines de formation. Ces tableaux ne représentent qu'un échantillon des multiples façons d'utiliser les variables afin de fournir une information qui soit à la fois utile et intéressante.

Si vous désirez obtenir des tableaux spécifiques, reportez-vous à la section intitulée **"Utilisation de la banque de données de CAPER"** située au début de cet ouvrage.

**Trainees Who Exited Post-M.D. Training Between
November 1, 2005 AND November 1, 2006
(at a rank level consistent with completion of training)**

Beginning with the "2000" exit cohort, physicians who left a training program prior to completing a sufficient number of years of training required for certification from any of Canada's three certification organizations (The College of Family Physicians of Canada, le Collège des médecins du Québec and The Royal College of Physicians and Surgeons of Canada) were not included in the estimated practice entry cohort. The CAPER Policy Committee agreed to this change in the definition of the practice entry cohort because unrestricted licensure in each province and territory of Canada requires certification in either Family medicine or a specialty. Physicians who exit training prior to completion of their program would not have the qualifications for full licensure in Canada.

Other than this change in exit criteria, the exit groups will be presented in the same four groups as in previous CAPER publications.

I. Graduates of Canadian Faculties of Medicine

- a) Physicians who earned the M.D. degree in Canada who went directly through post-M.D. training and are entering practice for the first time (the new entry cohort).
- b) Physicians who earned the M.D. degree in Canada who have re-entered training after having already had a period of practice in Canada (the re-entry cohort).

II. Graduates of Foreign Medical Schools

- a) Graduates of foreign medical schools who were Canadian citizens /permanent residents on July 1 of their last year of post-M.D. training (A small re-entry cohort has been isolated from this group). These physicians would have the legal status necessary to work in Canada.
- b) Graduates of foreign medical schools who held a temporary employment visa while in their last year of post-M.D. training. It is assumed that these physicians will not enter practice in Canada in view of their visa status and they are not included in the practice entry cohort.

I. Isolation of the New Entry and Re-Entry Groups of Graduates of Canadian Faculties of Medicine

Table 1 compares the proportion of trainees in each field of training for the new entry (1479 trainees) and re-entry (80 trainees) group of graduates of Canadian faculties of medicine in the exit group.

In the new entry group, 544 (37%) of the cohort exited from family medicine programs, and 935 (63%) exited from medical, surgical and laboratory programs: 642 (43%) from medical programs, 31 (2%) from lab medicine programs and 262 (18.0%) from surgical programs. (Ten palliative medicine physicians are included in the medical/surgical/lab program total.)

Among the re-entry group (n = 80), 26 (33%) physicians were completing family medicine programs and most of them were in programs giving additional training beyond the 2-year family medicine program. The majority of re-entry residents (67%) were in medical, surgical or laboratory training programs.

II Graduates of International Medical Schools

Table 2 compares two groups of international medical school graduates - those exiting as Canadian citizens/permanent residents and those exiting as Visa trainees. Of the 337 Canadian citizens/permanent residents, 173 (51%) exited from family medicine training programs and 164 (49%) exited from medical/surgical/laboratory training programs. Physicians who exit postgraduate training as Canadian citizens/permanent residents are considered to be eligible for practice in Canada.

Table 3: Trainees Exiting Canadian Training Programs Between November 1, 2005 and November 1, 2006 (at a rank level consistent with completion of training).

Four main exit groups have been isolated and a small group of re-entry graduates of international medical schools has also been noted.

Estimated Practice Entry Cohort (Table I-7)

Table I-7 reports the numbers of new physicians expected to enter medical practice in Canada via Canadian post-M.D. training programs. These estimates include graduates of Canadian faculties of medicine as well as international medical graduates who are Canadian citizens/permanent residents. Thus, groups 1A and 2Ai from Table 3 are combined to form the estimated practice entry cohort.

In 2006, there were 1804 new physicians in the estimated practice entry cohort. This figure includes 1479 graduates of Canadian faculties of medicine and 325 graduates of international medical schools (the 12 re-entry international graduates are not included in the practice entry cohort). The following tables, H-1 and H-2, were prepared using the estimated practice entry cohort. Only physicians exiting at a rank level consistent with completion of training were included.

**Table 3
 Summary Table
 Trainees Exiting Canadian Post-M.D. Training Programs
 Between Nov. 1, 2005 and Nov. 1, 2006
 (at a rank level consistent with completion of training)**

Exit Group	Description	No. of Trainees
IA	Graduates of Canadian faculties of medicine who proceeded directly through (includes physicians who had a one year absence) post-M.D. training (new entry group)	1479
IB	Graduates of Canadian faculties of medicine who had taken a break in training (re-entry group)	80
2Ai	Graduates of foreign medical schools who were Canadian citizens or permanent residents on July 1, 2005 who proceeded directly through (includes physicians who had a one year absence) post-M.D. training (new entry group)	325
2Aii	Graduates of foreign medical schools who were Canadian citizens or permanent residents on July 1, 2005 who had taken a break in training (re-entry group)	12
2B	Graduates of foreign medical schools who were visa trainees on July 1, 2005	774

Lieu de l'exercice

- 1 Faculté de médecine qui a décerné le diplôme M.D. (Médecins ayant terminé leur formation post-M.D. en 2004) 137
par lieu de l'exercice (région), juillet 2006
- 1i. Faculté de médecine offrant la dernière année de formation post-M.D. (2004) 138
par lieu de l'exercice (région), juillet 2006
- 1ii.A Lieu de l'exercice après 2 ans 139
Faculté de médecine offrant la dernière année de formation post-M.D. (2004)
par lieu de l'exercice (province), juillet 2006
- 1ii.B Lieu de l'exercice après 5 ans 140
Faculté de médecine offrant la dernière année de formation post-M.D. (2001)
par lieu de l'exercice (province), juillet 2006

Médecins ayant terminé leur formation post-M.D. en 2004 dans la même province que la faculté de médecine ayant décerné leur diplôme (diplômés des facultés de médecine canadiennes)

- 1iii. Faculté de médecine offrant la dernière année de formation post-M.D. (2004) 141
par lieu de l'exercice (région), juillet 2006

2006*	1 895	21	1 916	52 ²	1 968

* Estimate only

¹ *Permanent Resident* includes refugees and refugee claimants.

² For the first time in 1998, foreign students graduated from various Canadian faculties of medicine, but were enrolled in above-quota, contract positions. The following numbers of graduates of Canadian medical schools were in Canada in above-quota, contract positions:

<u>Year of MD</u>	<u>Number</u>	<u>Year of MD</u>	<u>Number</u>	<u>Year of MD</u>	<u>Number</u>
1998	17	2002	29	2006*	22
1999	11	2003	32		
2000	23	2004	25		
2001	31	2005	29		

Table J-6

**The Number of Trainees Switching Between Major Training
Field Categories for Each of the Last 5 Years**

1. Changes between Family Medicine and Specialty training fields

	A. Changes <i>From:</i> Family Medicine <i>To:</i> Any Specialty	B. Changes <i>From:</i> Any Specialty <i>To:</i> Family Medicine
2001-2002	36	45
2002-2003	31	49
2003-2004	36	46
2004-2005	33	38
2005-2006	35	39

2. Changes between Specialty fields

	A. Changes <i>From:</i> Medical Specialties <i>To:</i> Surgical Specialties	B. Changes <i>From:</i> Surgical Specialties <i>To:</i> Medical Specialties
2001-2002	6	36
2002-2003	13	26
2003-2004	9	30
2004-2005	10	33
2005-2006	17	34

3. Total: Changes among training field groups

Year	Total
2001-2002	123
2002-2003	119
2003-2004	121
2004-2005	114
2005-2006	125

Note: Movement of trainees between any training field and Palliative medicine are not counted as changes.

Although most program changes occur at the R-1 level, these tables include program changes at all training levels.
