Welcome to the 26th edition of the CAPER Annual Census of Post-M.D. Trainees. Today's postgraduate medical residents are completing the final stage of their initial medical training. Soon they will serve our communities as family physicians, surgeons, pediatricians, internists, anesthetists, pathologists, and the many other medical specialists who care for Canadians. The CAPER Annual Census report is Canada's definitive source of information on the numbers and types of physicians being trained to meet our societal needs.

The Annual Census report is made possible through a longstanding partnership between governments, faculties of medicine and professional medical organizations. The federal, provincial and territorial governments listed on the inside of the front cover guide and financially support CAPER. Guidance and financial support are also given by the Association of Faculties of Medicine of Canada, Canadian Association of Internes and Residents, Canadian Medical Association, College of Family Physicians of Canada, Medical Council of Canada and Royal College of Physicians and Surgeons of Canada. CAPER is sincerely grateful for the stewardship and financial support of its contributing members.

Many individuals also need to be thanked for the time and effort they give to CAPER. Members of CAPERs Policy and Executive Committees provide guidance through their participation in annual meetings.

A sincere thank you is extended to CAPER data providers. Associate Deans, Managers and other staff in Canada's postgraduate medical education offices submit and verify CAPER data files. The Ontario Physician Human Resources Data Centre performs this work for all Ontario faculties of medicine. The time and effort given by data providers forms the cornerstone of the CAPER database.

Special thanks go to CAPER Database Manager, Mr. Leslie Forward, for working to a very high standard preparing the Annual Census report.

On behalf of CAPER, it is a pleasure working for our participating members and clients in managing this unique national resource.

Steve Slade
Vice President, Research and Analysis
CAPER/ORIS

Remerciements

Voici la 26^e édition du Recensement annuel des stagiaires post-M.D. de CAPER. Les résidents postdoctoraux actuels achèvent leur formation médicale initiale. Ils œuvreront bientôt au sein de nos communautés en tant que médecins de famille, chirurgiens, pédiatres, internistes, anesthésistes, pathologistes ou comme l'un des nombreux médecins spécialistes qui fournissent des soins aux Canadiens. Le rapport du Recensement annuel de CAPER est la source définitive d'information sur la quantité et les types de médecins en formation qui s'apprêtent à répondre à nos besoins sociaux.

Le rapport du Recensement annuel est rendu possible grâce au partenariat de longue date entre les gouvernements, les facultés de médecine et les organisations médicales professionnelles. Les gouvernements de niveau fédéral, provincial et territorial dont le nom se trouve à l'endos de la couverture avant agissent à titre de guide et de subventionneur pour CAPER. Nous profitons également d'une orientation et d'une aide financière de la part de l'Association des facultés de médecine du Canada, de l'Association canadienne des médecins résidents, du Conseil médical du Canada, du Collège des médecins de famille du Canada et du Collège royal des médecins et chirurgiens du Canada. CAPER reconnaît en toute sincérité le soutien et l'aide financière de ses membres adhérents.

Il faut également souligner le temps et l'effort que plusieurs personnes consacrent à CAPER. Les membres du comité des politiques et du conseil exécutif de CAPER agissent à titre de guide en participant aux réunions annuelles.

Un merci sincère aux fournisseurs de données de CAPER. Les doyens associés, les directeurs et les autres membres du personnel des bureaux de formation médicale postdoctorale à l'échelle du Canada soumettent et vérifient des fichiers de données de CAPER. *L'Ontario Physician Human Resources Data Centre* s'attelle à cette tâche dans l'ensemble des facultés de médecine de l'Ontario. Le temps et l'effort qu'offrent les fournisseurs de données représentent la pierre angulaire de la base de données de CAPER.

Nous tenons à remercier tout particulièrement M. Leslie Forward, gestionnaire de la base de données de CAPER, pour la très grande qualité de son travail en ce qui a trait à la préparation du rapport sur le Recensement annuel.

Sachez que CAPER se fait un plaisir de collaborer avec ses membres actifs et ses clients pour gérer notre ressource nationale unique.

Steve Slade

Use the CAPER database to answer these frequently asked questions:

Utiliser la base de données du CAPER pour trouver ces renseignements sur des questions souvent posées :

1. Where do I find a summary of changes in the post-M.D. training population over the last 10 years?	Où puis-je trouver un résumé des changements qu'ont connus les stagiaires post-M. D. en formation clinique, au cours des dix dernières années ?	Quick Facts En bref!	pages 11-23
2. How many ministry funded residents are in a specific specialty at each faculty?	Combien de stagiaires ayant droit à une bourse ministérielle trouve-t-on, pour une spécialité donnée, dans chaque faculté ?	Table A-1i Tableau A-1i	page 29
3. How many ministry funded residents are there at each rank level?	Combien de médecins résidents bénéficiant d'une bourse ministérielle trouve-t-on, à chaque niveau de formation?	Table B-1i Tableau B-1i	page 48
4. How many new residents entered training in each specialty this year?	Pour chaque spécialité, quel est le nombre de médecins qui ont commencé leur résidence cette année?	Table G-1 Tableau G-1	page 71
5. What is the gender of residents entering each specialty?	Pour chaque spécialité, de quel sexe sont les médecins qui commencent leur résidence?	Table G-6 Tableau G-6	page 76
6. How many new physicians completed and exited from Canadian residency training?	Combien de nouveaux médecins ont fait toute leur résidence en suivant le programme canadien de formation clinique?	Table H-4 Tableau H-4	page 88
7. How old are Canada's new physicians when they finish training?	À quel âge les nouveaux médecins terminent-ils le programme canadien de formation clinique?	Table H-6 Tableau H-6	page 92
8. What is the gender of the new physicians who completed and exited from Canadian residency training?	De quel sexe sont les nouveaux médecins qui ont fait toute leur résidence en suivant le programme canadien de formation clinique?	Table H-7 Tableau H-7	page 93
9. Where do the M.D. graduates of my faculty (province) eventually go to practise medicine?	Où les diplômés en médecine (M.D.) de ma faculté (province) entrent-ils généralement en pratique?	Table J-2 Tableau J-2	page 144
10. Where do the post-M.D. trainees from my faculty (province) eventually go to practise medicine?	Où les stagiaires post-M.D. de ma faculté (province) entrent-ils généralement en pratique?	Table J-2i Tableau J-2i	page 145
11. Individual training fields – detailed information (the number of residents and fellows at each rank level at each faculty)	Tableaux individuels des spécialités – Renseignements détaillés (nombre de résidents et de stagiaires inscrits, à chaque niveau de formation et pour chaque faculté).	Individual Specialty Tables Tableaux individuels des spécialités	

Background Historique

CAPER (the Canadian Post-M.D. Education Registry) was established in 1986 through the co-operation of national medical organizations with an interest in the post-M.D. clinical education of physicians in Canada. The Association of Faculties of Medicine of Canada, the Canadian Association of Internes and Residents, the Canadian Medical Association, the College of Family Physicians of Canada, the Medical Council of Canada, Health Canada, and the Royal College of Physicians and Surgeons of Canada, have provided both expertise and financial support for the development and operation of CAPER. Provincial and territorial ministries of Health have contributed to CAPER since 1992.

CAPER is incorporated within the by-laws of The Association of Faculties of Medicine of Canada with the mandate to provide accurate information which may be used for medical manpower planning on a national basis. To accomplish this task, an individual longitudinal file is maintained containing socio-demographic information and details of the current and past training programs of each resident or fellow under the supervision of the Canadian Faculties of Medicine on November 1 of each year. The data in this document are derived from information submitted for November 1, 2013 by the office of Postgraduate Medical Education at each of the Canadian Faculties of Medicine.

CAPER (Système informatisé sur les stagiaires post-M.D. en formation clinique) a été établi en 1986 avec la coopération de diverses organisations médicales du Canada intéressées par la formation clinique post-M.D. au Canada. L'Association des facultés de médecine du Canada, l'Association canadienne des médecins résidents, l'Association médicale canadienne, le Collège des médecins de famille du Canada, Le Conseil médical du Canada, Santé Canada, ainsi que le Collège royal des médecins et chirurgiens du Canada ont contribué au développement et au bon fonctionnement de CAPER en partageant leurs connaissances et en lui apportant un soutien financier. Les Ministères de la Santé des provinces et des territoires ont contribué depuis 1992.

CAPER est constitué en société dans le cadre des statuts de L'Association des facultés de médecine du Canada avec pour mandat de fournir des renseignements précis pouvant être utilisés pour fins de planification de la main-d'œuvre médicale au niveau national. Pour ce faire, un fichier longitudinal est tenu à jour contenant l'information pertinente à chaque résident ou moniteur clinique (fellow) inscrit aux différentes facultés de médecine canadiennes en date du 1^{er} novembre de chaque année. L'information socio-démographique et les détails du programme de formation de cette année et des années passées y sont inclus. Les données de ce document reflètent l'information soumise au 1^{er} novembre 2013 par le personnel administratif des bureaux de formation médicale postdoctorale des facultés de médecine canadiennes.

The Reporting Process

Méthode de déclaration

The individual records of all trainees under the supervision of each Canadian faculty of medicine are provided to CAPER by the postgraduate medical education office of the respective faculty. All post-M.D. trainees (residents and fellows) in training positions on November 1 of the current academic year are reported to CAPER. The following information is included in the yearly report:

- the faculty of medicine supervising post-M.D. training
- socio-demographic information
- previous medical education and certification, and
- field of current post-M.D. training

This information is collected by all faculties at the time of registration for post-M.D. training each year and is sent to CAPER, in coded form. Information sent to CAPER is checked for missing or incorrect items. Reports are then sent back to the appropriate postgraduate medical education office of the Canadian faculties of medicine for further verification of the information on their trainees.

Data Privacy

At the Canadian Post-M.D. Education Registry (CAPER), we take physician privacy very seriously. It is a long-established policy of CAPER and the Association of Faculties of Medicine of Canada (AFMC), of which Association CAPER is a component division, to deal with all physician information in a sensitive manner, in order to ensure that our collections, uses, disclosures, retention and disposal of physician information are carried out in accordance with best privacy practices.

The full CAPER Privacy Policy is on the website: caper.ca.

Le bureau de la formation médicale postdoctorale de chaque faculté de médecine canadienne fournit à CAPER les dossiers de tous les stagiaires qui relèvent de la faculté. Sont déclarés à CAPER tous les stagiaires post-M.D. (résidents et moniteurs cliniques) qui occupent un poste de formation le 1^{er} novembre de l'année universitaire en cours. La déclaration annuelle comprend les renseignements suivants :

- la faculté de médecine qui encadre la formation post-M.D.,
- des données sociodémographiques,
- la formation médicale antérieure et les titres de compétence,
- le domaine de la formation post-M.D. en cours

Ces renseignements sont recueillis chaque année par toutes les facultés lors des inscriptions aux programmes de formation post-M.D., puis transmis à CAPER sous forme chiffrée. CAPER les vérifie pour déceler les erreurs ou omissions, puis renvoie les déclarations au bureau de la formation médicale postdoctorale de la faculté de médecine en question. Les renseignements sur les stagiaires font alors l'objet d'une nouvelle vérification.

Confidentialité des données

Le Système informatisé sur les stagiaires post-M.D. en formation clinique (CAPER) prend très au sérieux la confidentialité des renseignements concernant les médecins. CAPER et l'Association des facultés de médecine du Canada (AFMC), dont CAPER est une division, s'emploient de longue date à appliquer une politique des plus à jour sur la protection des renseignements personnels concernant les médecins, de façon à ce que les activités de collecte, d'utilisation, de divulgation, de conservation et d'élimination desdits renseignements respectent les règles de l'art en la matière.

La confidentialité des données de CAPER se trouve au complet sur le site Web : caper.ca.

How to Access the CAPER Data Tables

Utilisation de la banque de données de CAPER

The CAPER data tables are available on the CAPER website www.caper.ca.

A hard copy of *CAPER Annual Census of Post-M.D. Trainees* is available upon request. Be sure to use the website to access the information you need. The *CAPER Annual Census of Post-M.D. Trainees*, the *CAPER Provincial Reports*, and the *CAPER Individual Specialty Tables* can be found at www.caper.ca.

The CAPER database has been designed to serve as an information resource for physician workforce planning on a national and provincial or regional basis in Canada. Information is held in an individual longitudinal format to permit the study of the flow of trainees through the post-M.D. training system. Although information permitting the identification of individuals is not released from CAPER, group data tabulations and statistics will be prepared in response to requests. **Preparation will be on a cost-recovery basis.**

Data requests made to CAPER are welcome.

Les tableaux de données de CAPER sont disponibles sur le site Web à www.caper.ca.

L'*Annuaire de recensement de CAPER des stagiaires post-M.D. en formation clinique* est disponible sur demande. Veuillez désormais utiliser le site Web pour obtenir des informations. Les *Rapports provinciaux sur les stagiaires post-M.D. en formation clinique*, ainsi que les *Tableaux individuels des spécialités* sont disponibles à www.caper.ca.

La base de données de CAPER fut conçue comme source d'information pour la planification de la main d'œuvre médicale au niveau national et provincial ou régional. L'information est cueillie sous forme de fiches longitudinales individuelles afin de pouvoir obtenir une vue d'ensemble des stagiaires inscrits à la formation post-M.D. Bien que CAPER ne divulgue aucun renseignement permettant d'identifier des individus, des tableaux et des statistiques de groupe peuvent être préparés sur demande. **Ce service est offert à prix coûtant.**

Toutes demandes de statistiques faites auprès de CAPER seront les bienvenues.

Definitions

Définitions

The data provided to CAPER by all the Canadian Faculties of medicine contain the information on each trainee in accordance with definitions established by CAPER. Following are these definitions and other important details pertaining to the specific variables used in the tables presented in this document.

Faculty of Medicine Providing Post-M.D. Training

The faculty of medicine supervising the post-M.D. trainee on November 1 of the report year.

Field of Post-M.D. Training

The type of non-specialized training, family medicine training, or the specialty field in which a trainee is enrolled on November 1 of the report year. Several subspecialties have multiple entry points. For example, anaesthesiology, emergency medicine, internal medicine, pediatrics and general surgery all have critical care subspecialties. As individuals transition from primary to subspecialty training, CAPER counts them within the subspecialty field that is consistent with their prior training.

Clinician Investigator Program

This is a training program accredited by the RCPSC for the purpose of providing additional research skills for physicians who are registered in one of the specialty or subspecialty training programs. Physicians reported in the A-5 table have already been included within their specialty training field in all other tables.

Note

Child and Adolescent Psychiatry

Effective September, 2009 Child and Adolescent Psychiatry is a recognized subspecialty of the Royal

Les données, fournies par toutes les facultés de médecine canadiennes à CAPER, contiennent les renseignements concernant chaque stagiaire suivant les définitions établies par CAPER. Ces définitions, ainsi que d'autres détails importants relatifs aux variables spécifiques utilisées dans les tableaux présentés dans ce document, sont énoncés ci-après.

Faculté de Médecine Offrant la Formation Post-M.D.

La faculté de médecine supervisant le stagiaire d'un programme post-M.D. au 1^{er} novembre de l'année du rapport.

Domaine de Formation Post-M.D.

Le genre de stage non spécialisé, de médecine de famille, ou la spécialité auquel le stagiaire s'est inscrit au 1^{er} novembre de l'année du rapport. Plusieurs sur-spécialités se greffent en définitive à de multiples disciplines particulières. Par exemple, l'anesthésiologie, la médecine d'urgence, la médecine interne, la pédiatrie et la chirurgie générale s'accompagnent toutes d'une surspécialité en soins intensifs. Alors que les personnes passent de la formation de base à la formation de surspécialité, CAPER inscrit ces personnes dans le domaine de surspécialité correspondant à leur formation antérieure.

Programme de Formation de Cliniciens-Chercheurs

Voici un programme de formation accrédité par le CRMCC, qui a pour objet d'enseigner des techniques de recherche supplémentaires aux médecins inscrits à l'un des programmes de spécialisation ou surspécialisation. Les médecins inscrits au tableau A-5 sont déjà inclus avec leur champ de spécialité dans tous les autres tableaux.

Note

Psychiatrie de l'enfant et de l'adolescent

Depuis septembre 2009, la psychiatrie de l'enfant et de l'adolescent est une surspécialité reconnue du Collège

College of Physicians and Surgeons of Canada. Starting in 2012/13 this subspecialty will be reported in CAPER publications.

Forensic Psychiatry

Effective September, 2009 Forensic Psychiatry is a recognized subspecialty of the Royal College of Physicians and Surgeons of Canada. Starting in 2012/13 this subspecialty will be reported in CAPER publications.

Geriatric Psychiatry

Effective September, 2009 Geriatric Psychiatry is a recognized subspecialty of the Royal College of Physicians and Surgeons of Canada. Starting in 2012/13 this subspecialty will be reported in CAPER publications.

Rank

All new M.D. graduates now enter directly into either a family medicine or a specialty training program at the PGY-1 level.

Two years of training, the PGY-1 and PGY-2 levels, are required for certification in family medicine. PGY-3 level training in family medicine is provided in the accredited family medicine training programs in care of the elderly and emergency medicine as well as in other additional training programs. To meet the training requirements of the RCPSC a minimum of four to six years of training is required, depending on the specific specialty in which certification is sought.

A trainee progresses through the rank levels in the following sequence:

PGY-1 (Family medicine or specialty training)
PGY-2
PGY-3
PGY-4
PGY-5
PGY-6
PGY-7

royal des médecins et chirurgiens du Canada. À compter de 2012/13, nous ferons rapport de cette surspécialité dans les publications de CAPER.

Psychiatrie légale

Depuis septembre 2009, la psychiatrie légale est une surspécialité reconnue du Collège royal des médecins et chirurgiens du Canada. À compter de 2012/13, nous ferons rapport de cette surspécialité dans les publications de CAPER.

Gérontopsychiatrie

Depuis septembre 2009, la gérontopsychiatrie est une surspécialité reconnue du Collège royal des médecins et chirurgiens du Canada. À compter de 2012/13, nous ferons rapport de cette surspécialité dans les publications de CAPER.

Rang

Tous les nouveaux diplômés en médecine doivent commencer maintenant leur formation postdoctorale au niveau PGY-1 soit par le programme de médecine de famille soit par un programme de spécialité.

Le certificat de médecine de famille est une formation de deux ans, soit les niveaux PGY-1 et PGY-2. Le niveau PGY-3 de médecine de famille est dispensé par les programmes agrés de médecine de famille spécialisés dans les soins aux personnes âgées, la médecine d'urgence et d'autres programmes de formation. Selon la spécialité choisie, un minimum de 4 à 6 années est nécessaire pour obtenir un certificat du CRMCC.

Un stagiaire progresse de la façon suivante:

PGY-1 (médecine de famille ou spécialité)
PGY-2
PGY-3
PGY-4
PGY-5
PGY-6
PGY-7

Fellows

CAPER uses the following definition of the term “fellow”: a post-M.D. trainee who is registered with the Postgraduate Medical Education Office of a university faculty of medicine and who, regardless of the source of funding, is pursuing clinical or research training which will **NOT** be evaluated by the supervising faculty for the purpose of Canadian licensure, or certification by the College of Family Physicians of Canada, the Collège des médecins du Québec or the Royal College of Physicians and Surgeons of Canada. (Trainees with appropriate prerequisite training registered in RCPSC “accreditation without certification” programs are considered as residents, not fellows.)

Location of the Faculty of Medicine That Awarded the M.D. Degree

For individuals who earned the degree in Canada, the province of location of the faculty of medicine that awarded the M.D. degree is used. Post-M.D. trainees who earned the M.D. degree outside Canada are classified as such.

Source of Funding

The source of funding is the organization or government agency providing the funding for the position occupied by the trainee. Two main categories are used: “Regular Ministry Funds” and “Other Funds”. “Regular Ministry Funds” refers to funds provided by the appropriate provincial government ministry responsible for the training of residents within that province. All other funding sources are grouped as “Other Funds”. Graph I-2 identifies a subcategory of “Other Funds”. This subcategory is called “Other Provincial Government Funds” and includes such sources as ministry funds provided for complementary training by the Quebec Ministry of Health and Social Services, funds for residency training transferred from one province to another and government-funded foundations such as the Alberta Heritage Foundation.

Moniteurs cliniques (Fellows)

CAPER utilise la définition du terme moniteur clinique (fellow) énoncée ci-après : un stagiaire post-M.D. qui est inscrit auprès du Bureau des études médicales postdoctorales de la faculté de médecine d'une université et qui, quelque soit la source du financement, poursuit un stage clinique ou de recherche n'étant **PAS** évalué par la faculté supervisant en vue de l'obtention du permis d'exercer la médecine au Canada ou de la certification par le Collège des médecins de famille du Canada, par le Collège des médecins du Québec ou par le Collège royal des médecins et chirurgiens du Canada. (Les stagiaires possédant la formation requise et qui sont inscrits dans les programmes de “l'agrément sans le certificat” du CRMCC sont considérés comme des résidents et non comme des « fellows ».)

Lieu de la faculté de médecine qui a décerné le diplôme M.D.

Pour les individus qui ont reçu leur diplôme au Canada, la province de la faculté de médecine qui a décerné le diplôme M.D. est utilisé. Ceux qui ont reçu leur diplôme ailleurs qu'au Canada sont classifiés en tant que diplômés de facultés de médecine étrangères.

Source de financement

La source de financement est l'organisme ou l'agence gouvernementale qui fournit le financement pour la position occupée par le stagiaire. Deux grandes catégories sont utilisées: « Fonds ministériels habituels » et « Autres fonds ». Les « Fonds ministériels habituels » sont les fonds provenant des ministères des gouvernements provinciaux appropriés responsables des stages des résidents au sein de la province. Tous les autres sources de financement sont regroupés sous l'appellation « Autres fonds ». Le graphe I-2 présente une sous-catégorie de la catégorie « Autres fonds ». Cette sous-catégorie s'intitule « Autres fonds des gouvernements provinciaux » et comprend entre autres des fonds provenant du ministère de la Santé et des Services sociaux du Québec destinés à financer une formation complémentaire, des fonds de transfert d'une province à une autre pour la formation clinique, et des fonds provenant de fondations financées par les gouvernements comme l'Alberta Heritage Foundation.

Age

Age is calculated as the age of the trainee on July 1, 2013 (the age of the trainee at the beginning of the July 2013 training session).

Legal Status

Three categories are used:

Canadian Citizen / Permanent Resident

Trainee is a citizen of Canada or has been accepted as a landed immigrant and has the right to live and work in Canada.

Visa

Trainees holding a visa permitting employment in Canada temporarily as a post-M.D. trainee.

First Year Trainees

Only first-time trainees in their first year of post-M.D. training in Canada at the PGY-1 level are designated as “first year trainees” and are included in Section G of the book. Other trainees at the PGY-1 level who are re-entering training, repeating the first year, or changing specialties requiring a second year at the PGY-1 level are **NOT** included in Section G on first year trainees.

Trainees included in the first year trainee category according to CAPER are:

1. Graduates of Canadian medical schools at the PGY-1 training level who have not been previously reported to CAPER.
2. International medical graduates who are entering training at the PGY-1 level in Canada for the first time (visa trainees beginning a program at the PGY-1 level are, therefore, included in this group).

Âge

L'âge est calculé en fonction de l'âge du stagiaire au 1^{er} juillet 2013 (l'âge du stagiaire au commencement de la séance de stage de juillet 2013).

Statut légal

On utilise trois catégories :

Citoyen canadien / Résident permanent

Le stagiaire est citoyen canadien ou un individu ayant reçu le droit d'établissement au Canada et qui, en tant que tel, a le droit de vivre et travailler au Canada.

Visa

Le stagiaire est en possession d'un visa permettant d'être employé temporairement en tant que stagiaire post-M.D..

Stagiaires en première année post-M.D.

Seuls les stagiaires en première année post-M.D. au Canada pour la première fois sont regroupés dans la catégorie « stagiaires en première année post-M.D. » et sont inclus dans la section G de ce document. Les autres stagiaires du niveau PGY-1 qui reprennent une formation, redoublent leur première année ou changent de spécialité et ont besoin de recommencer une première année au niveau PGY-1 **NE SONT PAS** inclus dans la section G dans la catégorie « stagiaires en première année post-M.D. ».

Selon CAPER, les stagiaires regroupés dans la catégorie « stagiaires en première année post-M.D. » sont les suivants :

1. les diplômés des facultés de médecine canadiennes au niveau PGY-1 et n'ayant pas encore été enregistrés dans les données de CAPER.
2. les diplômés de facultés de médecine étrangères qui sont admis au niveau PGY-1 au Canada pour la première fois (les stagiaires possédant un visa et débutant une formation au niveau PGY-1 sont donc inclus dans cette catégorie).

Estimated Practice Entry Cohort

The practice entry cohort comprises the physicians who have left the post-M.D. training system each year and would be legally able to work in Canada. In order to give a picture of new entries to practice, re-entry trainees (as discussed in Section H) and visa trainees have not been included in the estimated practice entry cohort.

Gender

Visa trainees have not been included in the data pertaining to gender. This was done to give a more realistic picture of the gender mix of the cohorts of physicians who will be entering practice in Canada. The tables which have been affected are A-3, G-6 and I-3.

Completion of Training

This term is used in Section J to indicate that the group exited training at a level appropriate for completion of training (e.g. PGY-2 or higher for Family medicine, PGY-4 or higher for most RCPSC specialties and PGY-5 or higher for subspecialties and surgical specialties).

Palliative Medicine

Palliative medicine is a unique specialty in that it is accredited jointly by the Royal College of Physicians and Surgeons of Canada and by the College of Family Physicians of Canada. As such, it is placed in a separate category where training programs have been listed separately. Where the training programs have been grouped in the categories “family medicine”, “medical specialties”, “laboratory medicine specialties” and “surgical specialties”, palliative medicine has been included with “medical specialties”. This is because it includes too few physicians in it to form an isolated category.

Estimation de la cohorte de nouveaux praticiens

La cohorte de nouveaux praticiens contient les médecins ayant terminé leur formation post-M.D. dans l'année et qui sont en droit d'exercer au Canada. Afin de présenter un tableau des nouveaux praticiens, les stagiaires qui reprennent leur pratique (voir section H) et les stagiaires qui ont un visa d'emploi temporaire ne sont pas inclus dans cette estimation.

Sexe

Les stagiaires qui ont un visa n'ont pas été inclus dans les données relatives au sexe, de façon à présenter un tableau plus réaliste des sexes dans les cohortes de médecins commençant à exercer au Canada. Ce changement porte sur les tableaux A-3, G-6 et I-3.

Fin de formation

Ce terme est utilisé dans la section J et signifie que le groupe a atteint le niveau d'études correspondant à la fin de formation (par exemple: PGY-2 pour la médecine de famille, PGY-4 ou plus pour la plupart des spécialités du Collège royal et PGY-5 pour les surspécialités et spécialités de chirurgie).

Médecine palliative

Le programme de médecine palliative se distingue par le fait qu'il a été agréé à la fois par le Collège royal des médecins et chirurgiens du Canada et par le Collège des médecins de famille du Canada. À ce titre, il a été classé dans une catégorie distincte qui énumère séparément les programmes de formation. Lorsque ces derniers sont regroupés par catégorie, soit « médecine de famille », « spécialités médicales », « spécialités de médecine de laboratoire » et « spécialités chirurgicales », le programme de médecine palliative fait partie de « spécialités médicales ». Il comprend en effet trop peu de médecins pour former une catégorie à part entière.

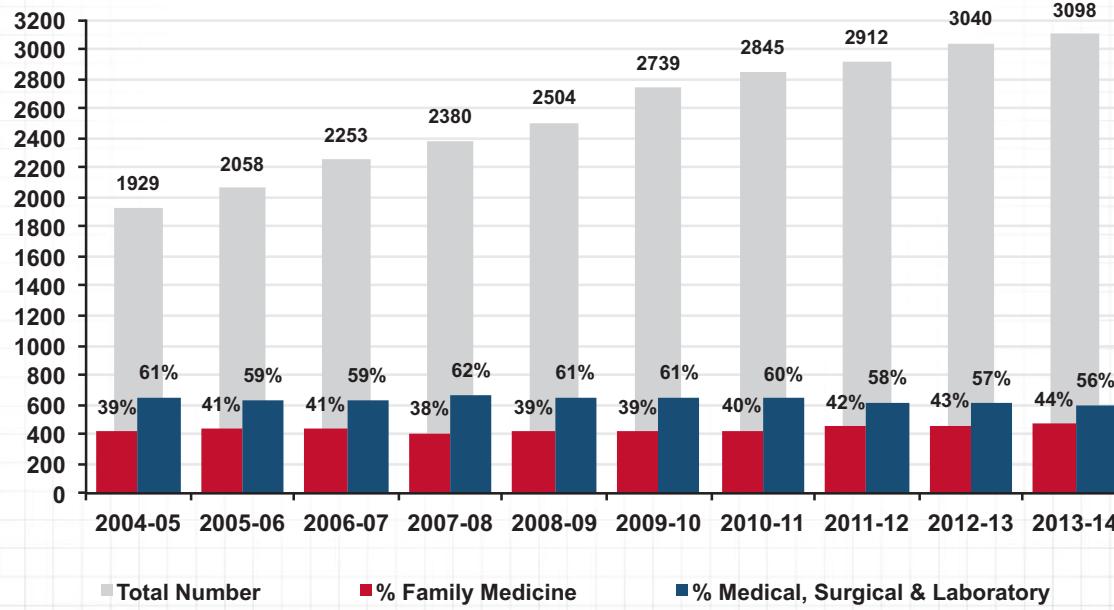

1. Quick Facts:

Concerning Canadian Citizens/Permanent Residents

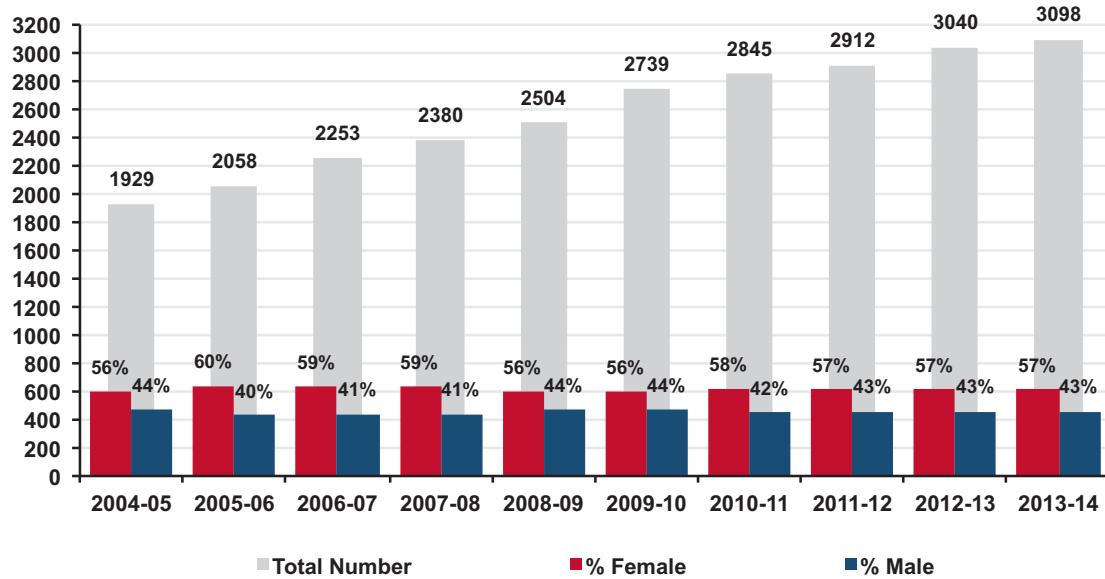

This section presents summary statistics for post-M.D. trainees who are likely to be among Canada's future physician workforce, due to their citizenship status. Included in the results are graduates of Canadian faculties of medicine as well as international medical graduates (IMGs) who are Canadian citizens or permanent residents.

- A. **First year trainees:** Since 2004-05 the number of first year trainees has increased in each consecutive year. At 3098, the number of first year trainees in 2013-14 is 61% higher than the number in 2004-05. Among all trainees, first year trainees increased proportionately from 24% in 2004-05 to 25% in 2009-10. Their percentage decreased to 23% in 2011-12 and is again at 23% in 2013-14. (*Figures 1 and 4*)
- B. **International Medical Graduates:** Among first year trainees IMGs increased in number and as a proportion of all first year trainees up until 2009-10. However the number and proportion of IMGs dropped from 467 (17%) in 2009/10 to 426 (15%) in 2010-11. In 2013-14, 486 IMGs accounted for 16% of all first year trainees. (*Figure 3*)
- C. **Gender:** The proportion of medical trainees who are women has increased in the past few decades. From 2004-05 to 2013-14 the proportion of first year trainees who are female fluctuated between 56% and 60%. In 2013-14, 63% of physicians exiting family medicine training programs were female and 52% of those exiting medical, surgical and laboratory programs were women. (*Figures 2, 10 and 11*)
- D. **Specialty mix:** In 2013-14, 1354 (44%) of the first year trainees were in family medicine programs and 1744 (56%) were in medical, surgical and laboratory programs. Among exiting trainees in 2013-14, 41% were completing family medicine programs and 59% were completing medical, surgical and laboratory programs. (*Figures 1 and 7*)

1. Canadian Citizens and Permanent Residents: First Year Trainees in Family Medicine and Medical/Surgical/Laboratory Training Programs

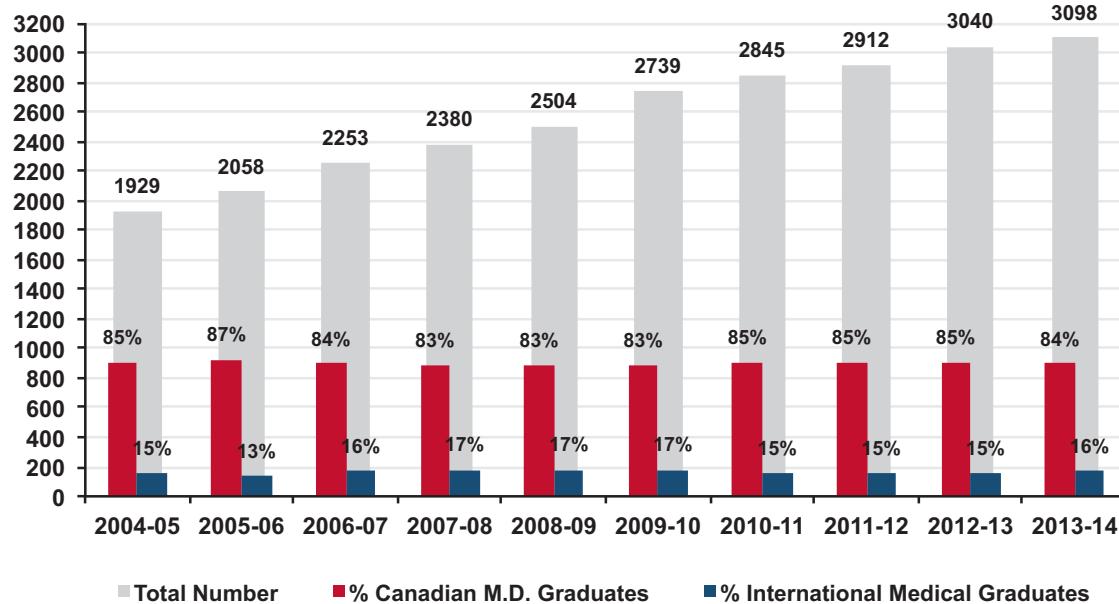

2. Canadian Citizens and Permanent Residents: First Year Trainees by Sex

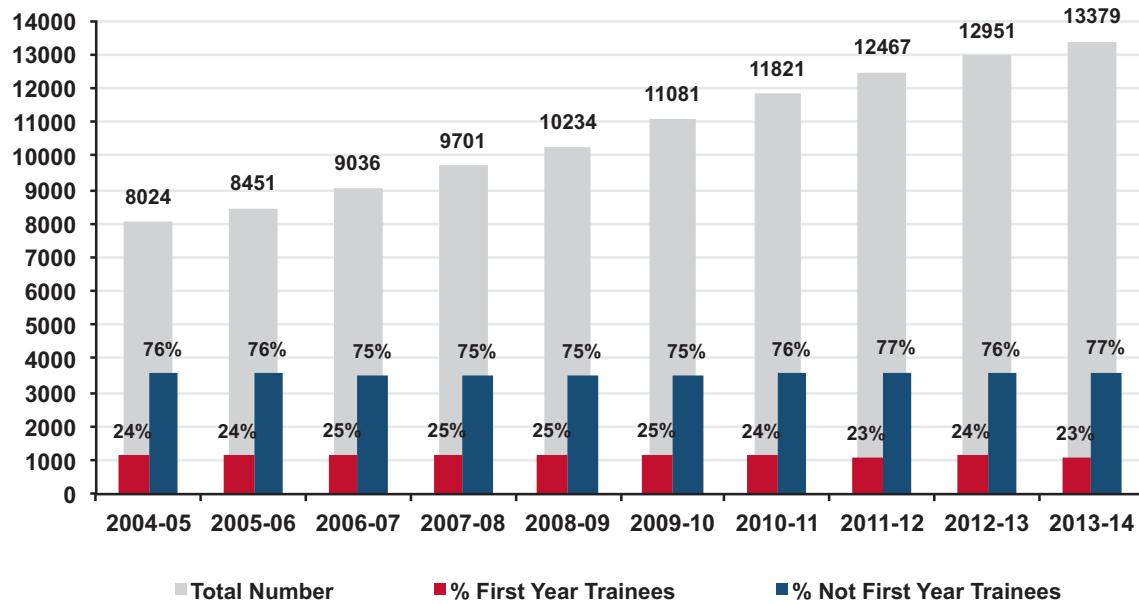

The total number of Canadian citizens/permanent residents entering training increased about 2%, from 3040 in 2012-13 to 3098 in 2013-14; 57% of entering trainees are female, the same as in 2012-13.

3. Canadian Citizens and Permanent Residents: Comparison of First Year Trainees Based on Canadian M.D. Graduation and International Medical Graduation

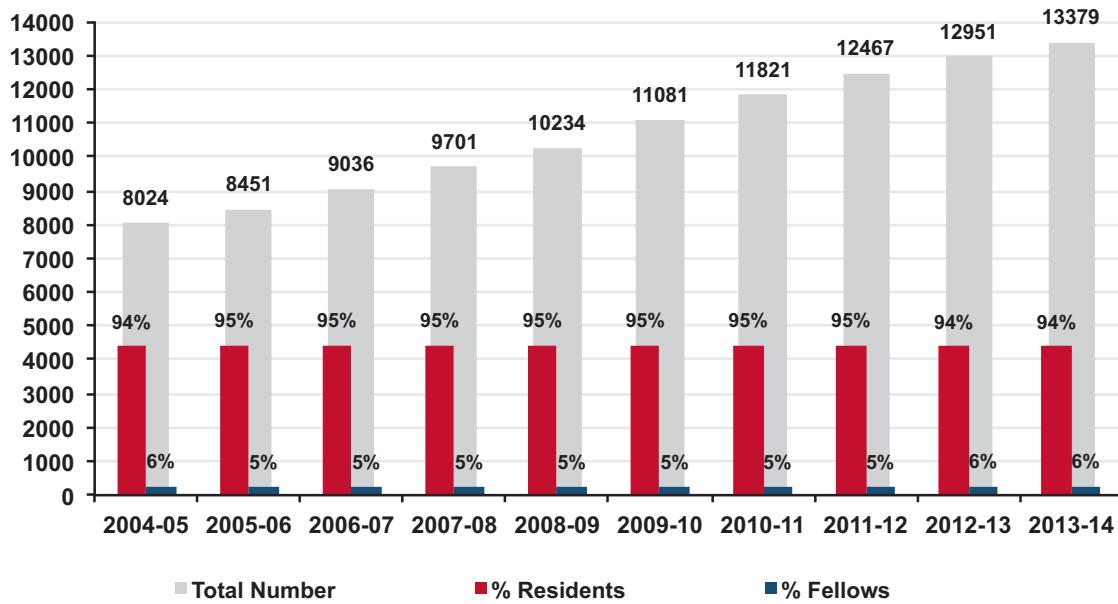

In 2013-14, the numbers of Canadian and international medical graduates entering training increased although the proportion of Canadian medical graduates decreased slightly from 85% in 2012-13 to 84% in 2013-14.

4. Canadian Citizens and Permanent Residents: First Year Post-M.D. Trainees and Non First Year Trainees

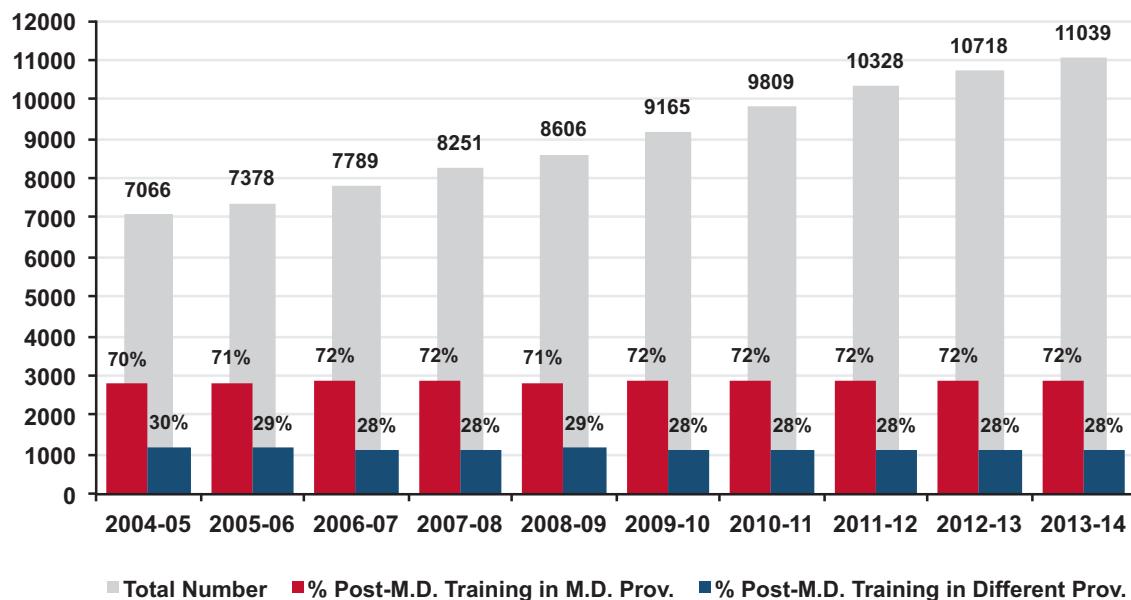

The total number of Canadian citizens/ permanent residents enrolled in post-M.D. training increased 67% between 2004-05 and 2013-14. First year trainees continue to comprise approximately one-quarter of all post-M.D. trainees.

5. Canadian Citizens and Permanent Residents: Residents and Fellows

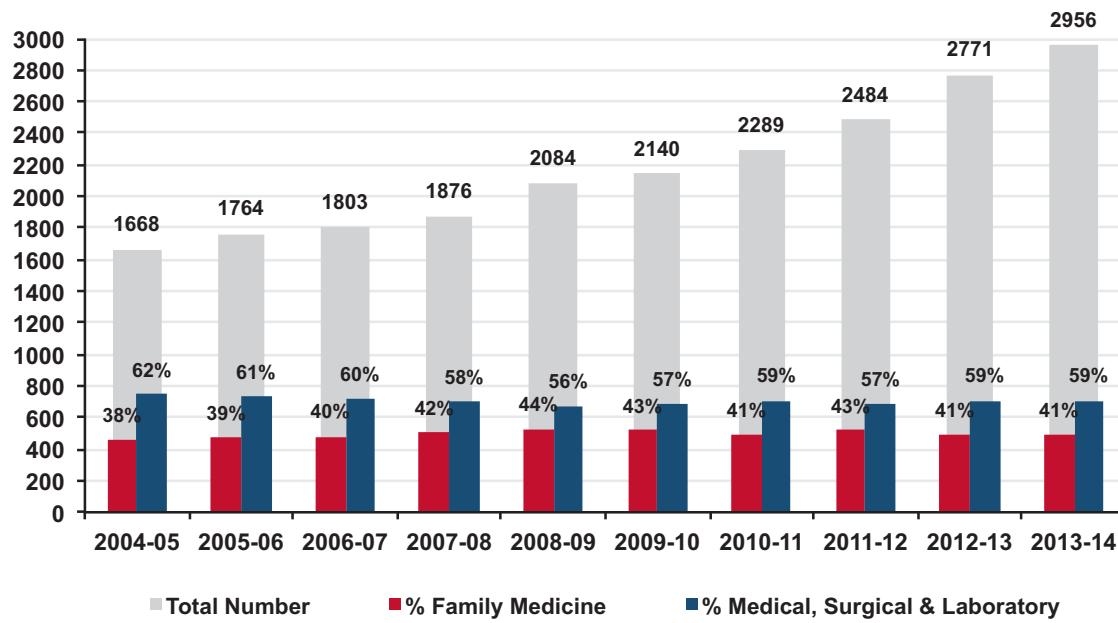

Fellows comprise about 5-6% of post-M.D. trainees in Canada. This figure has remained relatively constant over the past ten years.

6. Canadian Citizens and Permanent Residents: Canadian M.D. Graduates Pursuing Post-M.D. Training Within and Outside Their Province of M.D. Graduation

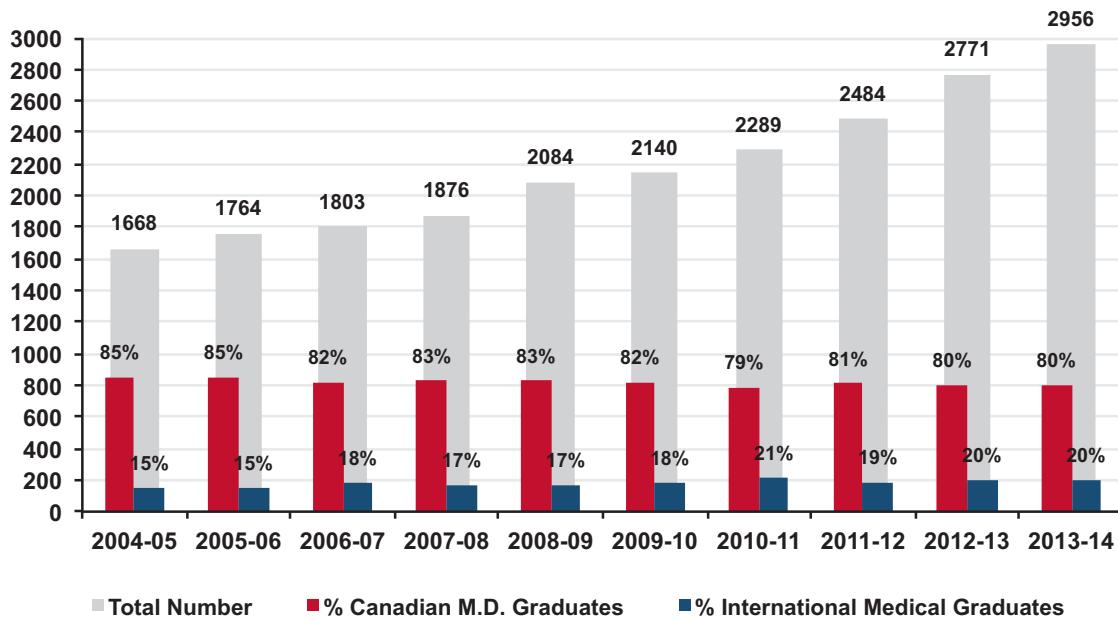

The proportion of Canadian graduates who do their post-M.D. training in the province where they earned their M.D. degree remained stable at 70% between 2001-02 and 2005-06. The proportion increased only slightly since then and is at 72% in 2013-14.

7. Canadian Citizens and Permanent Residents: Post-M.D. Trainees Exiting Family Medicine vs. Medical, Surgical Laboratory Programs

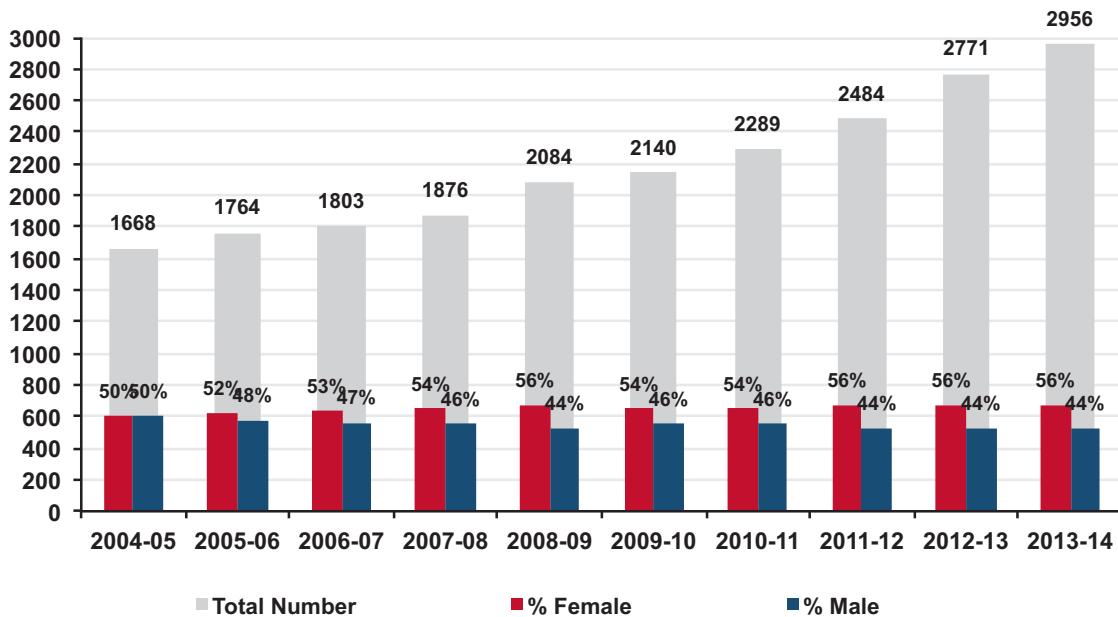

As the number of Canadian citizens/permanent residents entering post-M.D. training has increased, so too has the number of physicians exiting post-M.D. training. The number of physicians exiting post-M.D. training went from 1668 in 2004-05 to 2956 in 2013-14, a 77% increase.

8. Canadian Citizens and Permanent Residents: Exiting Post-M.D. Trainees by Canadian M.D. Graduate and International Medical Graduate Status

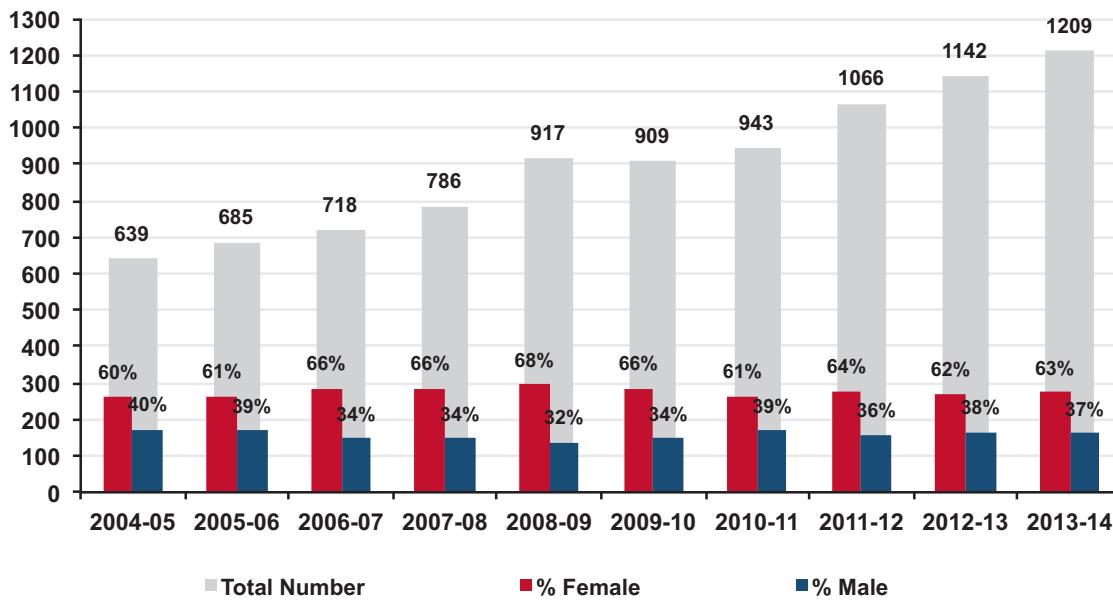

In 2010-11 international medical graduates reached a ten year high of 21% (n=475) of the practice entry cohort, which excludes Visa trainees. There were 1814 graduates of Canadian medical schools (79%) in the practice entry group. In 2013-13 IMGs represent 20% (n = 582) of exiting post-M.D. trainees.

9. Canadian Citizens and Permanent Residents: Exiting Post-M.D. Trainees by Sex

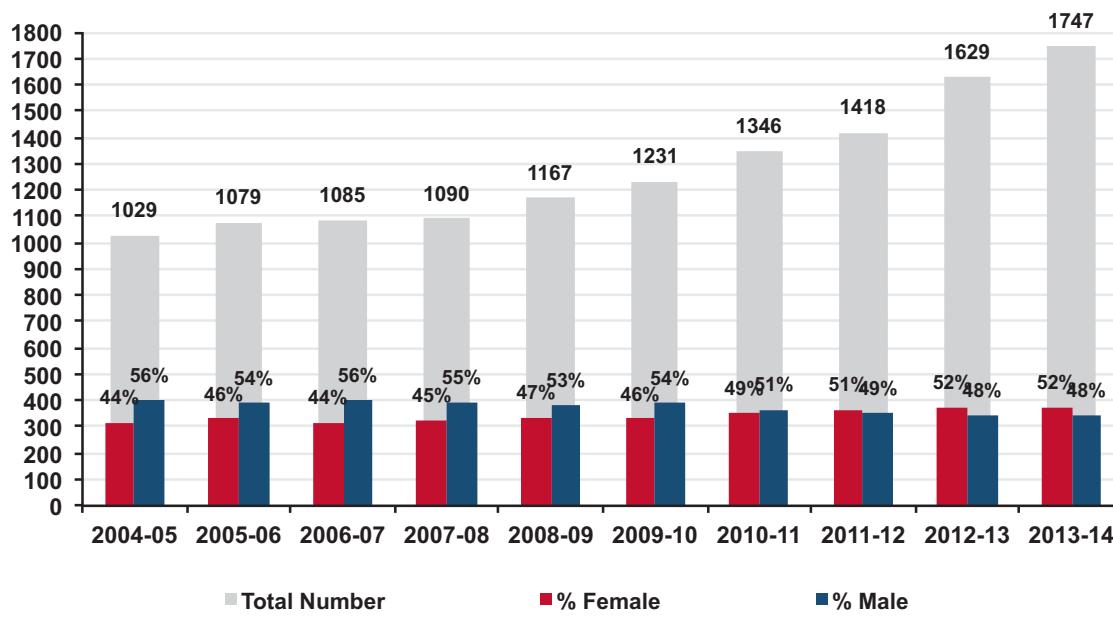

From 2004-05 to 2008-09, males comprised a decreasing proportion of trainees exiting post-M.D. training. The proportion of males increased slightly in 2009-10 and 2010-11 to 46% but decreased to 44% from 2011-12 to 2013-14.

10. Canadian Citizens and Permanent Residents: Exiting Family Medicine Post-M.D. Trainees by Sex

From 2004-05 to 2008-09, females constituted an increasing proportion of family physicians completing post-M.D. training, reaching 68% in 2008-09. The proportion of females has since dropped in 2010-11 to 61% and is now at 63% in 2013-14.

11. Canadian Citizens and Permanent Residents: Exiting Medical, Surgical and Laboratory Post-M.D. Trainees by Sex

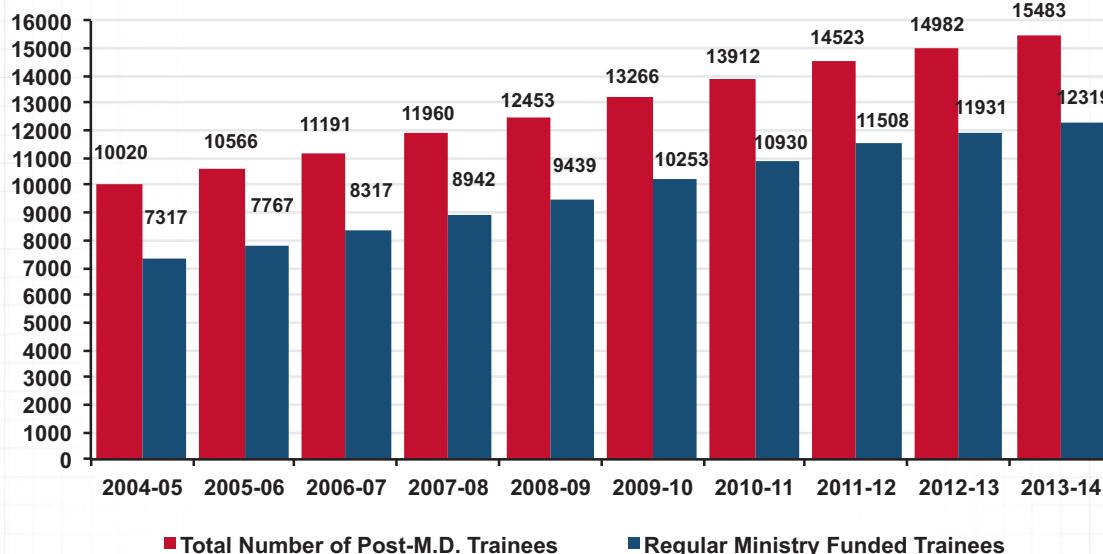

The number and proportion of female physicians completing medical, surgical or laboratory training programs increased from 547 (47%) in 2008-09 to 903 (52%) in 2013-14 and is at a ten year high. The proportion of males exiting medical, surgical or laboratory training programs was slightly lower than females for the first time in 2011-12.

2. Quick Facts: Concerning Post-M.D. Trainees in Regular Ministry Funded Positions

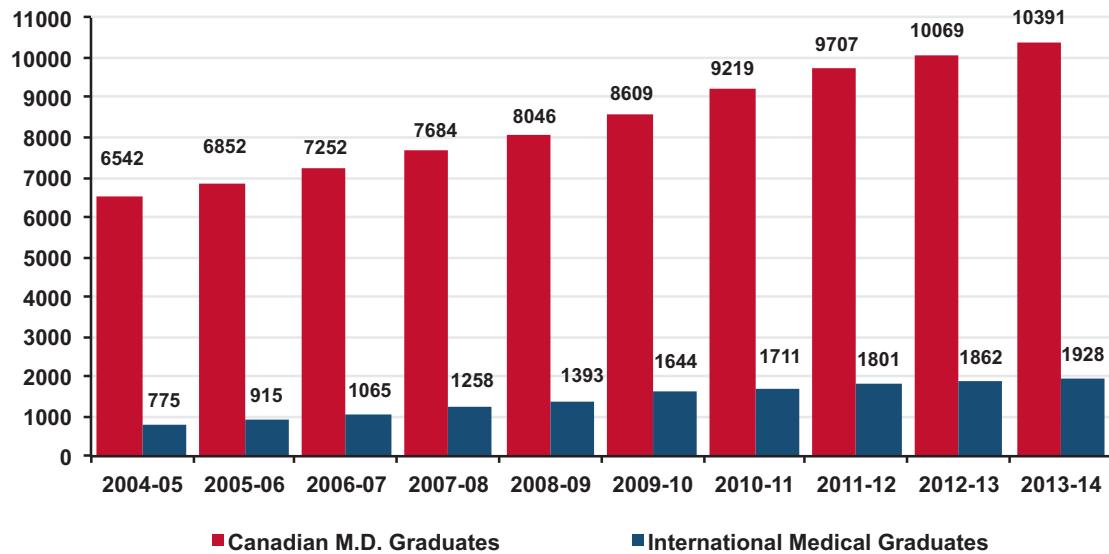

- A. The total number of regular ministry funded trainees continues to increase, reaching 12319 in 2013-14. The total number of post-M.D. trainees (ministry and non-ministry funded) also continues to increase, reaching 15483 in 2013-14. (Figure 1)
- B. Over the ten year period 2004-05 to 2013-14, the number of regular ministry funded Canadian medical graduates (CMGs) was lowest in 2004-05 (n=6542). By 2013-14 the number of ministry funded CMGs increased 59%, to 10391. During the same time period the number of regular ministry funded international medical graduates (IMGs) was lowest in 2004-05 (n=775). This figure is two and a half times larger in 2013-14 (n=1928). (Figure 2)
- C. The number of current year CMGs in post-M.D. training increased sharply over the period 2004-05 to 2013-14. The steady increase from 1600 in 2004-05 to 2516 in 2013-14 represents a 57% increase. (Figure 3)
- D. Throughout the period 2004-05 to 2013-14, the number of physicians re-entering post-M.D. training is relatively low compared to new entry physicians. In 2013-14 the number of re-entry physicians was at its lowest (n=132) and the number of new entry physicians was at its highest (n=12187). (Figure 4)
- E. After two consecutive drops in 2005-06 and 2006-07, R-3 family medicine enrolment increased steadily to a high of 274 in 2013-14. The number of medical, surgical and laboratory trainees pursuing subspecialty training increased to a high of 470 in 2013-14. (Figures 5 and 6)

1. Total Post-M.D. Trainees and Regular Ministry Funded Post-M.D. Trainees

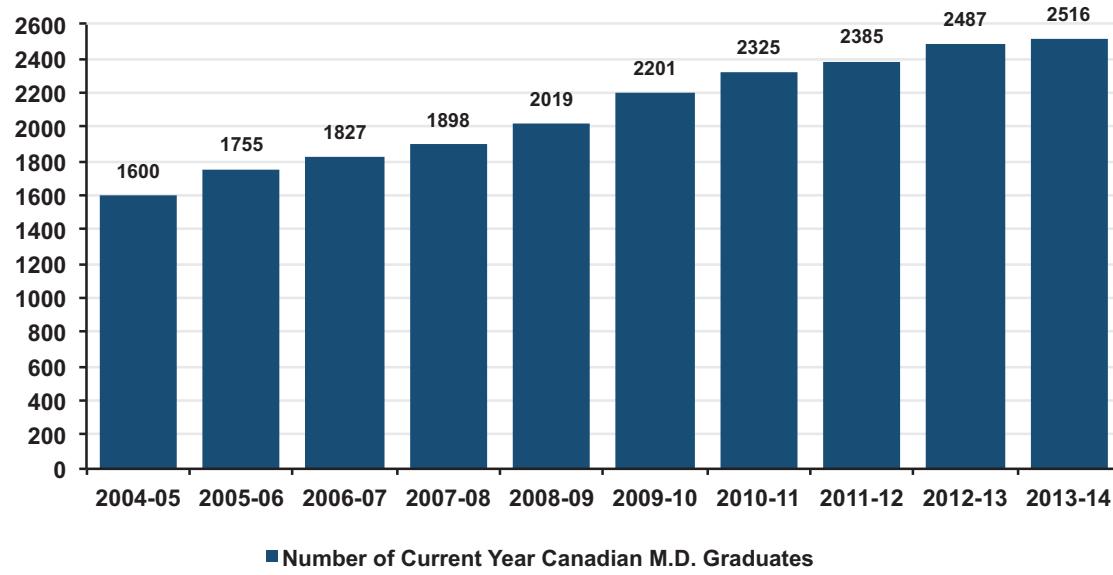

The total number of post-M.D. trainees increased to 15483 in 2013-14, a 3% increase over the 2012-13 figure. Compared to 2004-05, total enrolment is 55% higher and ministry funded enrolment is 68% higher in 2013-14.

2. Regular Ministry Funded Trainees: Canadian M.D. Graduates and International Medical Graduates

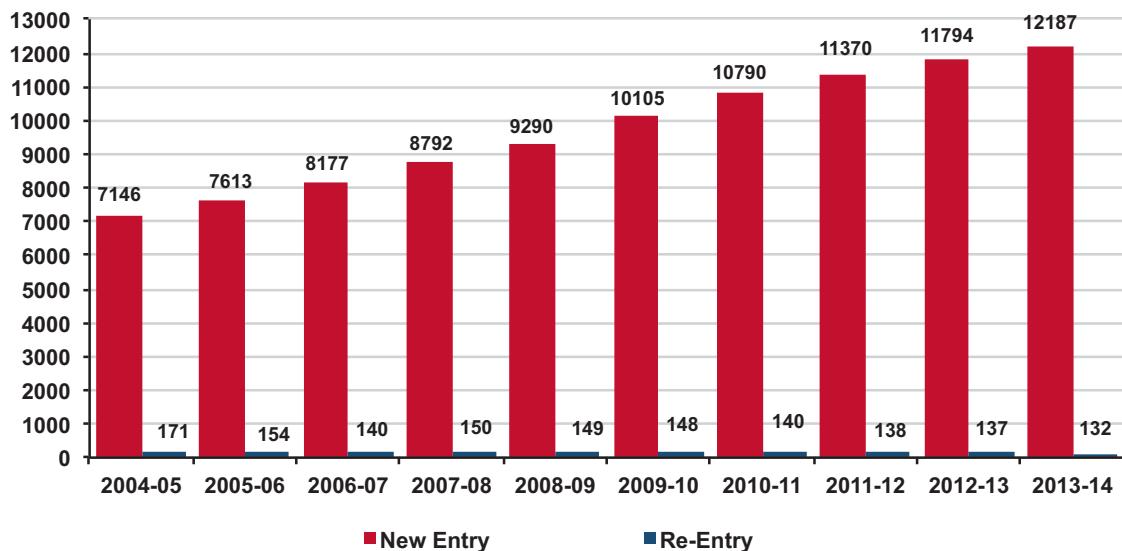

The number of ministry funded IMGs increased to 1928 in 2013-14, in line with steady increases over the last ten years. The largest one-year increase occurred in 2009-10, when the number of ministry funded IMGs increased by 251 over the previous year's figure.

3. Regular Ministry Funded Trainees: Number of Current Year Graduates of Canadian Medical Schools in Post-M.D. Training

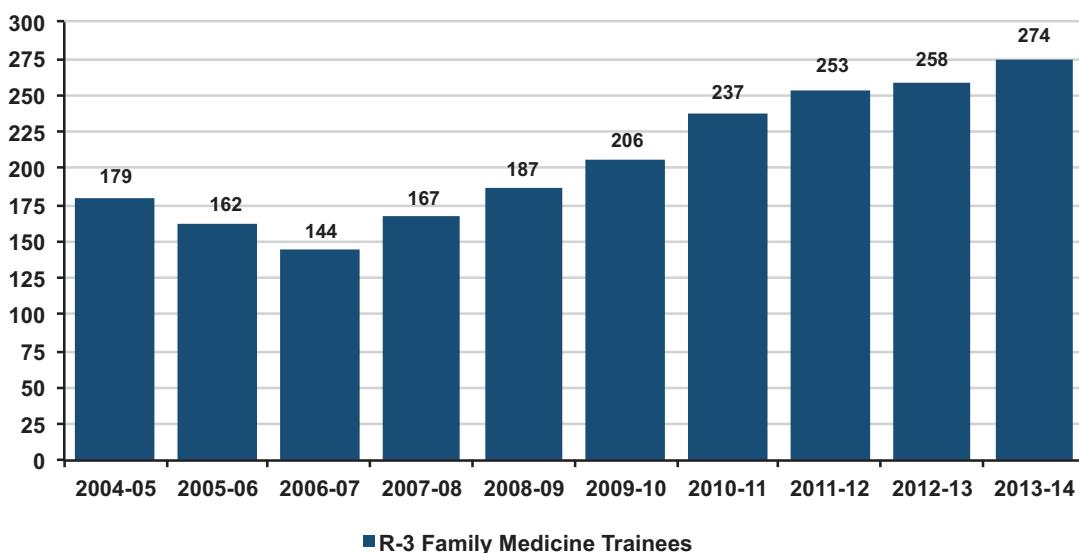

The number of current year Canadian M.D. graduates entering training in ministry funded positions increased to 2516 in 2013-14. This represents a 57% increase over 2004-05, when the number was 1600.

4. Regular Ministry Funded Trainees: Number of New Entry and Re-entry Residents

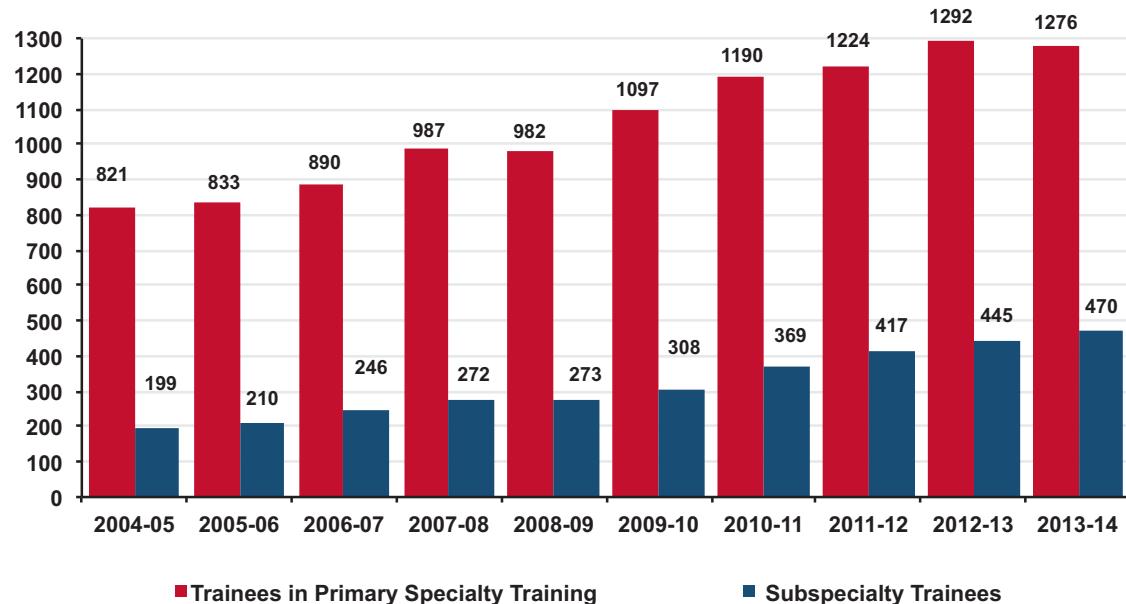

In 2004-05 the number of new entry physicians was at its lowest (n=7146) . Since 2004-05, new entries have increased while re-entries have generally decreased to a low of 132 in 2013-14.

5. Regular Ministry Funded Trainees: Number of R-3 Level Trainees in Family Medicine

After two consecutive drops in 2005-06 and 2006-07, R-3 family medicine enrolment increased steadily to a high of 274 in 2013-14. This represents an increase of 6% over the number of R-3 family medicine trainees in the previous year, 2012-13.

6. Regular Ministry Funded Trainees: Number of R-4 Medical, Surgical and Laboratory Residents in Primary Specialties and Subspecialties

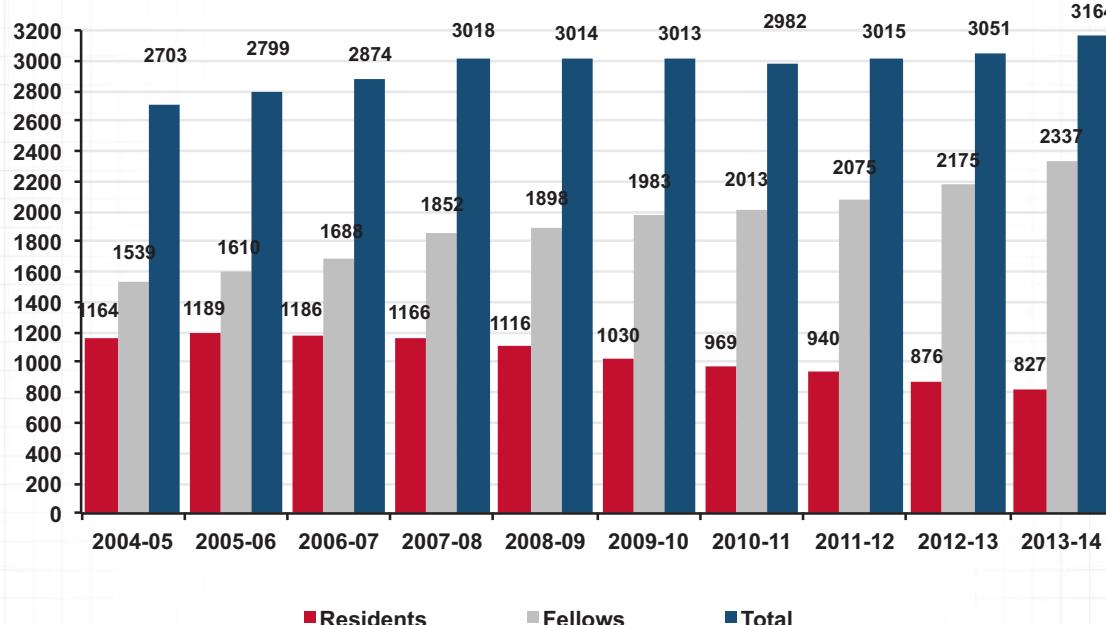

In 2013-14, 470 R-4 level medical, surgical and laboratory residents were in subspecialty training and 1276 were in the primary specialties. Since 2004-05, between 20%-27% of medical, surgical and laboratory trainees have been enrolled in subspecialty training.

3. Quick Facts:

Quick Facts: Concerning Non-Ministry Funded Post-M.D. Trainees

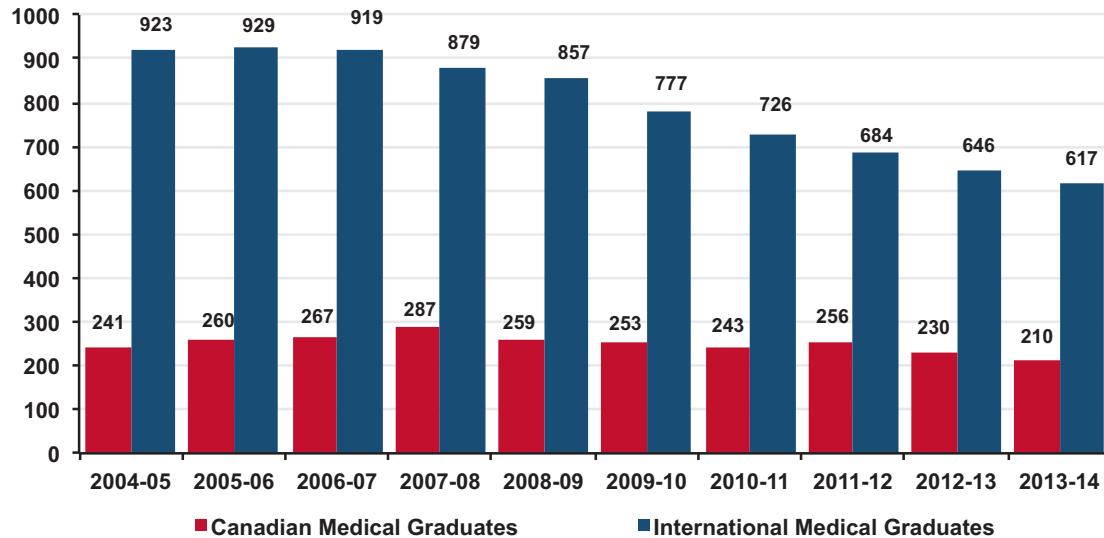

- A. From 2004-05 to 2007-08, there was a general increase in the number of non-ministry funded trainees, from 2703 in 2004-05 to 3018 in 2007-08. This number remained fairly constant at about 3000 from 2007-08 to 2011-12 and increased to 3164 in 2013-14. (Figure 1)
- B. In each year between 2004-05 and 2013-14 most non-ministry funded post-M.D. trainees were international medical graduates (IMGs). In 2013-14, there were 617 non-ministry funded IMGs and 210 non-ministry funded Canadian medical graduates (CMGs). These figures do not include post-M.D. Fellows. (Figure 2)
- C. In 2013-14 there were 210 non-ministry funded CMG Residents and 459 non-ministry funded CMG Fellows. Fellows typically outnumber Residents among non-ministry funded CMGs. (Figure 3)
- D. The number of non-ministry funded CMG re-entry trainees has fluctuated little over the past ten years, from a high of 43 in 2006-07 and a low of 16 in 2012-13 and 2013-14. (Figure 4)
- E. From 2004-05 to 2007-08, there was a general increase in the number of non-ministry funded post-M.D. visa trainees, reaching 2175 in 2007-08. The number of non-ministry funded visa trainees decreased 9% from 2007-08 to 2012-13, but increased 4% in 2013-14. (Figure 5)

1. Non-Ministry Funded Trainees : Residents Versus Fellows

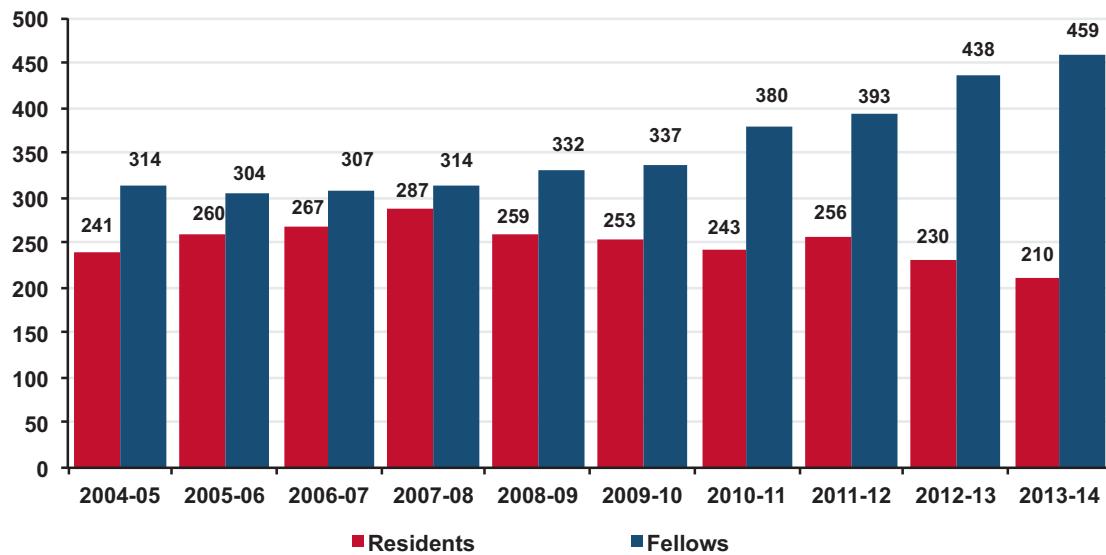

The number of non-ministry funded trainees increased from 2703 in 2004-05 to 3164 in 2013-14. This overall increase is attributable to an increase in the number of non-ministry funded post-M.D. Fellows.

**2. Non-Ministry Funded Trainees (Excluding Fellows):
Canadian Medical Graduates and International Medical Graduates**

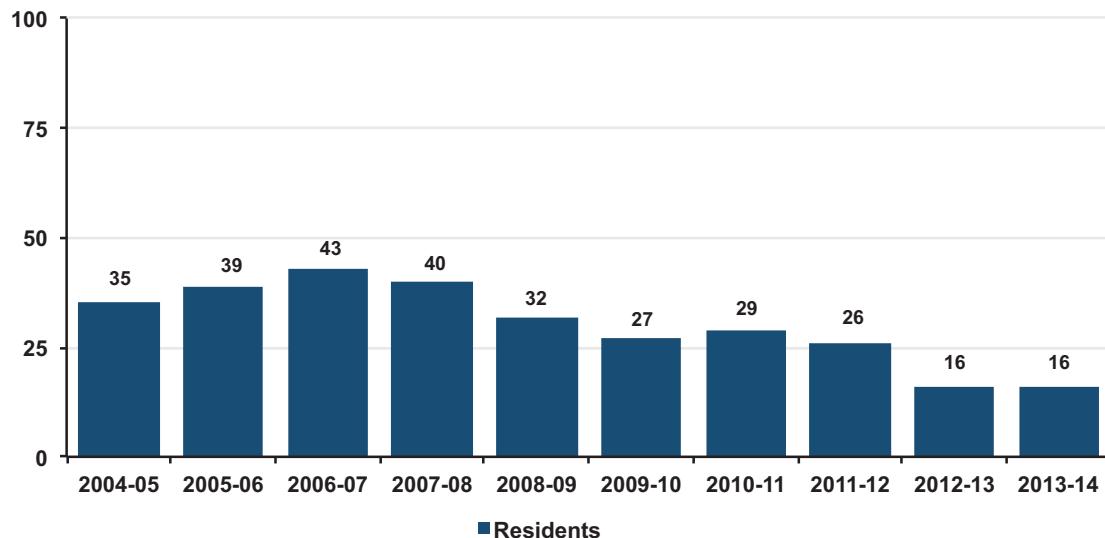

Between 2004-05 and 2013-14 there has been relatively little change in the number of non-ministry funded CMG Residents. These trainees numbered 241 in 2004-05 with a slight decrease to 210 in 2013-14. While the number of non-ministry funded IMG Residents increased between 2004-05 and 2005-06, the numbers have decreased each year since then to a ten year low of 617 in 2013-14.

3. Non-Ministry Funded Trainees (CMGs Only – IMGs Excluded): Residents Versus Fellows

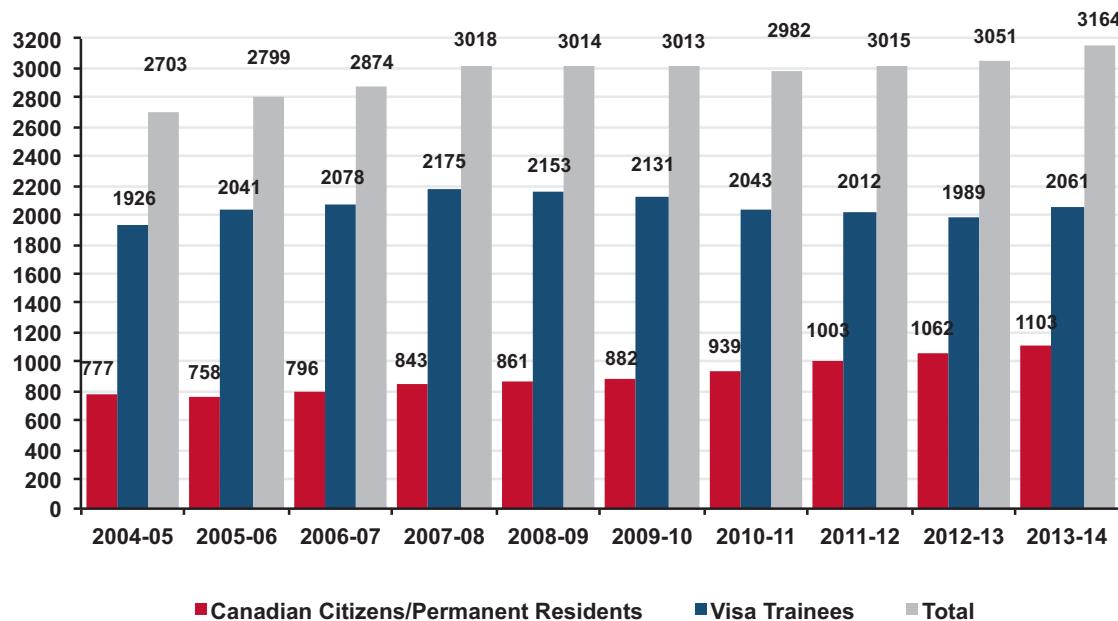

In 2013-14 there were 210 non-ministry funded CMG Residents and 459 non-ministry funded CMG Fellows. Fellows have outnumbered Residents among non-ministry funded CMGs in each year during the period 2004-05 to 2013-14.

**4. Non-Ministry Funded Trainees (CMGs Only – IMGs Excluded):
Number of Re-entry Residents**

The number of non-ministry funded CMG re-entry trainees has fluctuated little over the past ten years, from a high of 43 in 2006-07 to a low of 16 in 2012-13 and 2013-14.

**5. Non-Ministry Funded Trainees:
Canadian Citizens/Permanent Residents Versus Visa Trainees**

From 2004-05 to 2007-08, there was a general increase in the number of non-ministry funded post-M.D. visa trainees, reaching 2175 in 2007-08. The number of non-ministry funded visa trainees decreased 9% from 2007-08 to 2012-13, but increased 4% in 2013-14.

Data from the 2013–2014 CAPER Annual Census of Post-M.D. Trainees

Données provenant du recensement annuel des stagiaires post-M.D. 2013–2014

The following tables are grouped under topics of significance to post-M.D. training in Canada. The tables that have been selected give an overview of the distribution of the post-M.D. trainee population in Canada, among the provinces, faculties of medicine, and fields of training. These tables represent only a sample of the many ways variables can be combined to provide useful and interesting data.

See the section at the front of this report titled “**How to Access the CAPER Data Tables**” if you wish to request specific tables.

- A. Faculty of Medicine Providing Post-M.D. Training
- B. Field of Post-M.D. Training
- C. M.D. Degree
- D. Source of Funding for Post-M.D. Training
- E. Gender
- E.i. Age
- F. Legal Status
- G. First Year Trainees Only
- H. Estimated Practice Entry Cohort
- I. Tables Covering the Time Period from 2009-2010 to 2013-2014
- J. Supplementary Data

Les tableaux sont groupés selon les domaines d'intérêt à la formation post-M.D. au Canada. Les tableaux choisis donnent une vue d'ensemble de la distribution des stagiaires post-M.D. à travers le Canada, parmi les provinces, les facultés de médecine et les domaines de formation. Ces tableaux ne représentent qu'un échantillon des multiples façons d'utiliser les variables afin de fournir une information qui soit à la fois utile et intéressante.

Si vous désirez obtenir des tableaux spécifiques, reportez-vous à la section intitulée « **Utilisation de la banque de données de CAPER** » située au début de cet ouvrage.

- A. Faculté de médecine offrant la formation post-M.D.
- B. Domaine de formation post-M.D.
- C. Diplôme M.D.
- D. Source de financement pour la formation post-M.D.
- E. Sexe
- E.i. Âge
- F. Statut légal
- G. Stagiaires en première année post-M.D. seulement
- H. La taille approximative du groupe qui entre en exercice
- I. Tableaux couvrant la période de 2009-2010 à 2013-2014
- J. Données supplémentaires

Faculty of Medicine Providing Post-M.D. Training

Faculté de médecine offrant la formation post-M.D.

by Field of Post-M.D. Training
(Table A-1)

26

par domaine de formation post-M.D.
(tableau A-1)

by Field of Post-M.D. Training
(regular ministry funded trainees only)
(Table A-1i)

29

par domaine de formation post-M.D.
(stagiaires subventionnés par les fonds ministériels habituels seulement)
(tableau A-1i)

by Field of Post-M.D. Training
(residents only – fellows not included)
(Table A-1ii)

32

par domaine de formation post-M.D. (résidents seulement – moniteurs cliniques non compris)
(tableau A-1ii)

by Field of Post-M.D. Training
(visa trainees not included)
(Table A-1iii)

35

par domaine de formation post-M.D.
(stagiaires avec permis de travail non compris)
(tableau A-1iii)

by Rank
(Table A-2)

38

par rang
(tableau A-2)

by Rank
(regular ministry funded trainees only)
(Table A-2i)

38

par rang (stagiaires subventionnés par les fonds ministériels habituels seulement)
(tableau A-2i)

by Gender
(visa trainees not included)
(Table A-3)

39

par sexe (stagiaires avec permis de travail non compris)
(tableau A-3)

by Province of Location of University
Which Awarded the M.D. Degree
(Table A-4)

40

par province de l'université ayant décerné le doctorat en médecine
(tableau A-4)

by Province of Location of University
Which Awarded the M.D. Degree
(visa trainees not included)
(Table A-4i)

41

par province de l'université ayant décerné le doctorat en médecine
(stagiaires avec permis de travail non compris)
(tableau A-4i)

Clinician Investigator Program:
Field of Post-M.D. Training
by Faculty of Medicine Providing
Post-M.D. Training
(Table A-5)

43

Programme de formation de cliniciens-rechercheurs :
Domaine de formation post-M.D. par faculté de médecine offrant la formation post-M.D.
(tableau A-5)

Trainees Who Exited Post-M.D. Training Between November 1, 2012 AND November 1, 2013

(at a rank level consistent with completion of training)

Beginning with the “2000” exit cohort, physicians who left a training program prior to completing a sufficient number of years of training required for certification from any of Canada’s three certification organizations (the College of Family Physicians of Canada, le Collège des médecins du Québec and the Royal College of Physicians and Surgeons of Canada) were not included in the estimated practice entry cohort. The CAPER Policy Committee agreed to this change in the definition of the practice entry cohort because unrestricted licensure in each province and territory of Canada requires certification in either Family medicine or a specialty. Physicians who exit training prior to completion of their program would not have the qualifications for full licensure in Canada.

Other than this change in exit criteria, the exit groups will be presented in the same four groups as in previous CAPER publications.

I. Graduates of Canadian Faculties of Medicine

- a) Physicians who earned the M.D. degree in Canada who went directly through post-M.D. training and are entering practice for the first time (the new entry cohort).
- b) Physicians who earned the M.D. degree in Canada who have re-entered training after having already had a period of practice in Canada (the re-entry cohort).

II. Graduates of International Medical Schools

- a) International medical graduates who were Canadian citizens /permanent residents on July 1 of their last year of post-M.D. training (A small re-entry cohort has been isolated from this group). These physicians would have the legal status necessary to work in Canada.

Stagiaires ayant obtenu un diplôme postdoctoral entre le 1^{er} novembre 2012 ET le 1^{er} novembre 2013

(conformément à l’achèvement de la formation)

Depuis 2000, l'estimation de la cohorte accédant à l'exercice ne tient pas compte des médecins ayant quitté un programme de formation avant d'avoir achevé le nombre d'années de formation requises pour obtenir une certification de la part d'un des trois organismes de certification (le Collège des médecins de famille du Canada, le Collège des médecins du Québec et le Collège royal des médecins et chirurgiens du Canada). Le Comité des politiques de CAPER a approuvé ce changement de définition de la cohorte accédant à l'exercice étant donné que l'accréditation inconditionnelle dans chaque province et territoire du Canada exige une certification en médecine familiale ou dans une spécialité. Les médecins qui quittent la formation avant d'achever leur programme n'ont pas les compétences nécessaires à l'accréditation intégrale au Canada.

À part ce changement aux critères d'achèvement, les groupes de diplômés feront partie des mêmes quatre groupes que dans les publications antérieures de CAPER.

I. Diplômés des facultés de médecine canadiennes

- a) Médecins ayant obtenu leur diplôme en médecine au Canada, ayant entamé tout de suite une formation postdoctorale et accédant à l'exercice pour la première fois (la cohorte de nouvel exercice).
- b) Médecins ayant obtenu leur diplôme en médecine au Canada et ayant retourné aux études après une période d'exercice au Canada (la cohorte de second exercice).

II. Diplômés d'écoles de médecine internationales

- a) Diplômés internationaux en médecine étant citoyens canadiens/résidents permanents le 1^{er} juillet de leur dernière année de formation postdoctorale (on a isolé une petite cohorte de second exercice de ce groupe). Ces médecins sont légalement autorisés à travailler au Canada.

- a) International medical graduates who held a temporary employment visa while in their last year of post-M.D. training. It is assumed that these physicians will not enter practice in Canada in view of their visa status and they are not included in the practice entry cohort.

I. Isolation of the New Entry and Re-Entry Groups of Graduates of Canadian Faculties of Medicine

Table H-1 compares the proportion of trainees in each field of training for the new entry (2380 trainees) and re-entry (86 trainees) group of graduates of Canadian faculties of medicine in the exit group.

In the new entry group, 988 (42%) of the cohort exited from family medicine programs, and 1392 (58%) exited from medical, surgical and laboratory programs: 957 (40%) from medical programs, 42 (2%) from lab medicine programs and 385 (16%) from surgical programs. (8 palliative medicine physicians are included in the medical/surgical/lab program total.)

Among the re-entry group ($n = 86$), 24 (28%) physicians were completing family medicine programs and most of them were in programs giving additional training beyond the 2-year family medicine program. The majority of re-entry residents (72%) were in medical, surgical or laboratory training programs.

II. Graduates of International Medical Schools

Table H-2 compares two groups of international medical school graduates – those exiting as Canadian citizens/permanent residents and those exiting as Visa trainees. Of the 605 Canadian citizens/permanent residents, 226 (37%) exited from family medicine training programs and 379 (63%) exited from medical/surgical/laboratory

- a) Diplômés internationaux en médecine possédant un visa d'emploi temporaire pendant leur dernière année de formation postdoctorale. On prend pour acquis que ces médecins n'accéderont pas à l'exercice au Canada en raison de leur visa et ne sont donc pas inclus dans la cohorte accédant à l'exercice.

I. Isolement des groupes de nouvel exercice et de second exercice parmi les diplômés des facultés de médecine canadiennes

Le tableau H-1 compare la proportion de stagiaires dans chaque domaine de formation pour les groupes de nouvel exercice (2 380 stagiaires) et de second exercice (86 stagiaires) parmi les diplômés des facultés de médecine canadiennes dans le groupe accédant à l'exercice.

Dans le groupe de nouvel exercice, 998 diplômés (42 %) de la cohorte ont quitté un programme de médecine familiale, et 1 392 diplômés (58 %) ont quitté un programme de médecine, de chirurgie et de laboratoire : 957 diplômés (40 %) ont quitté un programme en médecine, 42 diplômés (2 %) ont quitté un programme en médecine de laboratoire et 385 diplômés (16 %) ont quitté un programme en chirurgie. (Le total de médecins dans un programme de médecine/chirurgie/ laboratoire compte 8 participants au programme de médecine palliative.)

Parmi le groupe de second exercice ($n = 86$), 24 médecins (28 %) achevaient un programme en médecine familiale et la plupart d'entre eux participaient à un programme offrant une formation supplémentaire au-delà du programme de deux ans en médecine familiale. La majorité des résidents de second exercice (72 %) étaient dans un programme de formation en médecine, chirurgie ou laboratoire.

II. Diplômés d'écoles de médecine internationales

Le tableau H-2 compare les deux groupes de diplômés d'écoles de médecine internationales – ceux achevant en tant que citoyens canadiens/résidents permanents et ceux achevant en tant que stagiaires avec visa. Parmi les 605 citoyens canadiens/résidents permanents, 226 diplômés (37 %) ont quitté un programme de formation en médecine familiale et 379 diplômés (63 %) ont

training programs. Physicians who exit postgraduate training as Canadian citizens/permanent residents are considered to be eligible for practice in Canada.

Table H-3: Trainees Exiting Canadian Training Programs Between November 1, 2012 and November 1, 2013 (at a rank level consistent with completion of training).

Four main exit groups have been isolated and a small group of re-entry graduates of international medical schools has also been noted.

Estimated Practice Entry Cohort (Table I-7)

Table I-7 reports the number of new physicians expected to enter medical practice in Canada via Canadian post-M.D. training programs. These estimates include graduates of Canadian faculties of medicine as well as international medical graduates who are Canadian citizens/permanent residents. Thus, groups 1A and 2Ai from Table H-3 are combined to form the estimated practice entry cohort.

In 2013, there were 2956 new physicians in the estimated practice entry cohort. This figure includes 2374 graduates of Canadian faculties of medicine and 582 graduates of international medical schools (the 23 re-entry international graduates are not included in the practice entry cohort). The following tables, H-4 and H-5, were prepared using the estimated practice entry cohort. Only physicians exiting at a rank level consistent with completion of training were included.

quitté un programme de formation en médecine/chirurgie/ laboratoire. On considère que les médecins qui achèvent une formation postdoctorale en tant que citoyens canadiens/résidents permanents sont admissibles à l'exercice au Canada.

Tableau H-3 : Stagiaires achevant un programme de formation canadien entre le 1^{er} novembre 2012 et le 1^{er} novembre 2013 (conformément à l'achèvement de la formation).

On a isolé quatre principaux groupes accédant à l'exercice et un petit groupe de diplômés de second exercice parmi les diplômés d'écoles de médecine internationales.

Estimation de la cohorte accédant à l'exercice (tableau I-7)

Le tableau I-7 représente le nombre prévu de nouveaux médecins qui accéderont à l'exercice de la médecine au Canada par un programme de formation postdoctorale canadien. Ces estimations comprennent les diplômés des facultés de médecine canadiennes ainsi que les diplômés internationaux en médecine qui sont citoyens canadiens/résidents permanents. Par conséquent, les groupes 1A et 2Ai du tableau H-3 sont combinés pour former la cohorte prévue accédant à l'exercice.

En 2013, la cohorte prévue accédant à l'exercice comptait 2 956 nouveaux médecins. Cette figure comprend 2 374 diplômés des facultés de médecine canadiennes et 582 diplômés des écoles de médecine internationales (les 23 diplômés internationaux de second exercice ne font pas partie de la cohorte accédant à l'exercice). Les tableaux suivants, H-4 et H-5, ont été préparés à l'aide de la cohorte prévue accédant à l'exercice. Seuls les médecins obtenant un diplôme conformément à l'achèvement de la formation ont été inclus.

124

Field of Post-M.D. Training by Location of University Which Awarded the M.D. Degree (estimated practice entry cohort)

(Table I-7)

127

Field of Post-M.D. Training by Gender (estimated practice entry cohort)

(Table I-8)

132

First Year Trainees, Field of Training by Legal Status (Canadian citizens/ permanent residents vs. visa trainees)

(Table I-9)

137

First Year Trainees: Proportion of First Year Trainees in Each Field of Training (Canadian citizens/permanent residents only)

(Table I-10)

139

Domaine de formation post-M.D. par source de financement pour la formation post-M.D.

(tableau I-1)

Province où est située la faculté de médecine offrant la formation post-M.D. par source de financement pour la formation post-M.D.

(tableau I-2)

Province où est située la faculté de médecine offrant la formation post-M.D. par source de financement pour la formation post-M.D. (moniteurs cliniques et stagiaires avec permis de travail non compris)

(tableau I-2i)

Domaine de formation post-M.D. par sexe (stagiaires avec permis de travail non compris)

(tableau I-3)

Domaine de formation post-M.D. par lieu où est située l'université ayant décerné le doctorat en médecine

(tableau I-4)

Faculté de médecine offrant la formation post-M.D. par statut légal (résidents seulement – moniteurs cliniques non compris)

(tableau I-5)

Faculté de médecine offrant la formation post-M.D. par doctorat en médecine décerné dans la province offrant la formation post-M.D. (diplômés des facultés canadiennes pour l'année en cours seulement)

(tableau I-6)

Domaine de formation post-M.D. par lieu où est située l'université ayant décerné le doctorat en médecine (taille approximative de la cohorte entrant en exercice)

(tableau I-7)

Domaine de formation post M.D par sexe (la taille approximative de la cohorte qui entre en exercice)

(tableau I-8)

Stagiaires en première année post-M.D., domaine de formation post-M.D. par statut légal (citoyens canadiens ou résidents permanents contre stagiaires avec permis de travail)

(tableau I-9)

Stagiaires en première année post-M.D.: Proportion de stagiaires en première année post-M.D. dans chaque domaine de formation post-M.D. (citoyens canadiens/résidents permanents seulement)

(tableau I-10)

M/H = Men/Hommes W/F = Women/Femmes T = Total * = not yet enrolled

¹ Students at Université Laval have the option to spread their MD program over five years instead of four years. The numbers who are five years from graduation include an estimate of those students already enrolled in year 1 who opt to prolong their program; those reported as being four years from graduation include those in year 1 who intend to complete the program in 4 years and those in year 2 who intend to take an additional year. The majority of students each year choose to extend their program of study over five years.

² Students listed as five years to graduation are enrolled in *année préparatoire* of the four year program at *Université de Montréal*.
