

## The National IMG Database Report

Rapport de la base de données nationale sur les DIM

CAPER would like to acknowledge the contribution of its funder and data providers and thank them for their continued support.

CAPER souhaite souligner la contribution de son bailleur de fonds et de ses fournisseurs de données et les remercier de leur collaboration soutenue.

## Acknowledgements

It is a pleasure to present the 2011 edition of the National IMG Database Report.

This report is made possible through data inputs from an array of organizations that engage with International Medical Graduates (IMGs) in Canada. Canada's IMG assessment centres contribute data to the National IMG Database. Data is provided by all national medical examination and certification bodies, including the Collège des médecins du Québec, the College of Family Physicians of Canada, the Medical Council of Canada and the Royal College of Physicians and Surgeons of Canada. The Canadian Post-M.D. Education Registry (CAPER) provides a complete picture of IMG entry to, and progression through, the postgraduate medical education system. Finally, medical regulatory authorities throughout Canada provide invaluable data about IMGs who achieve licensure status within their jurisdictions.

Enormous thanks is given to all of these data provider organizations. Their time and effort make the National IMG Database Report possible.

We are also very grateful to Human Resources and Skills Development Canada (HRSDC) for their continued support of the IMGs in Canada project. HRSDC funding has helped build the National IMG Database since 2005.

Finally, we would like to thank the members of CAPER's Policy and Executive Committees. Their early input helped establish the National IMG Database and their continued guidance ensures that it remains a valuable information resource today.

Sincerely,

### The IMGs in Canada Project Team:

*Steve Slade*, Vice President,  
Research and Analysis CAPER-ORIS

*Tamara Brown*, Project Manager

*Linda Bourgeois*, Research Associate

## Remerciements

Nous sommes heureux de présenter l'édition de 2011 du Rapport de la Base de données nationale sur les DIM.

Ce rapport est rendu possible grâce à la panoplie d'organisations qui ont bien voulu partager leurs données relatives aux Diplômés internationaux en médecine (DIM) au Canada. Les centres d'évaluation des DIM du Canada fournissent des données pour la Base de données nationale sur les DIM. Les données nous parviennent de tous les organismes nationaux d'examen et de certification de la médecine, y compris le Collège des médecins du Québec, le Collège des médecins de famille du Canada, le Conseil médical du Canada et le Collège royal des médecins et chirurgiens du Canada. Le Système informatisé sur les stagiaires post-M.D. en formation clinique (CAPER) offre une vue d'ensemble du cheminement d'un DIM, à partir de l'inscription jusqu'à la formation médicale postdoctorale. Les organismes de réglementation médicale à l'échelle du Canada fournissent aussi des données inestimables au sujet des DIM qui obtiennent leur permis d'exercer dans leur ressort territorial.

Nous remercions énormément toutes ces organisations qui ont bien voulu partager leurs données. C'est grâce à elles que le Rapport de la Base de données nationale sur les DIM est rendu possible.

Nous sommes également très reconnaissants de la collaboration soutenue du projet portant sur les DIM au Canada de la part du ministère des Ressources humaines et du Développement des compétences (RHDCC). Le financement de RHDCC a aidé à peupler la Base de données nationale sur les DIM depuis 2005.

En dernier lieu, nous souhaitons remercier les membres du comité des politiques et du comité exécutif de CAPER. Leur entrée de données diligente a servi de fondement pour la Base de données nationale sur les DIM et leur orientation soutenue veille à ce qu'elle demeure une ressource d'information très utile.

Sincères salutations,

### L'équipe du projet portant sur les DIM au Canada,

*Steve Slade*, vice-président,  
Recherche et analyse CAPER-ORI

*Tamara Brown*, gestionnaire de projet

*Linda Bourgeois*, associée en recherche

# The National IMG Database Report

## Rapport de la base de données nationale sur les diplômés internationaux en médecine (DIM)

### A. BACKGROUND AND INTRODUCTION

International Medical Graduates (IMGs) play a long-standing role in providing care to Canadians. In 2009, 16,072 IMGs were licensed to practise in Canada.<sup>1</sup> This represents 23.6% of the 68,101 active physicians in that year. The proportion of IMGs in the physician workforce varies significantly across jurisdictions, ranging from 10.8% in Quebec to 46.2% in Saskatchewan.

The contribution and role of IMGs have surfaced in numerous systematic evaluations of the Canadian health care system. The 2002 Kirby Senate Committee report on the state of the health care system in Canada emphasized the need for a national strategy to enhance the integration of International Medical Graduates.<sup>2</sup> Soon after, the Romanow Commission report ‘Building on Values: The Future of Health Care in Canada’<sup>3</sup> called for a coordinated Human Health Resources (HHR) planning strategy and consideration of the processes IMGs undertake to enter into the physician workforce. Aligned with the call for collaborative HHR planning, the 2003 First Ministers’ Accord on Health Care Renewal<sup>4</sup> supported evidence-based initiatives in order to develop an information base to facilitate the integration of IMGs and increase the recruitment and retention of the health workforce.<sup>5</sup>

The creation of the Canadian Task Force on Licensure of IMGs in 2002 was a key step in addressing the issues faced by IMGs in Canada. Recognizing their importance in Canada’s health care delivery system, the Taskforce made six recommendations to address IMG barriers to licensure and practice.<sup>6</sup> They were:

- (1) Increase the capacity to assess and prepare IMGs for licensure.
- (2) Work toward standardization of licensure requirements.

### A. CONTEXTE ET INTRODUCTION

Les diplômés internationaux en médecine (DIM) jouent un rôle de longue date dans la prestation de soins aux Canadiens. En 2009, 16 072 DIM ont reçu l’autorisation d’exercer au Canada.<sup>1</sup> Cela représente 23,6 % des 68 101 médecins en pratique active pendant l’année en question. Les DIM comptant parmi les médecins en pratique active varient considérablement selon le ressort territorial, le Québec en compte 10,8 % alors qu’en Saskatchewan, ils représentent 46,2 %.

La contribution et le rôle des DIM ont fait l’objet de plusieurs évaluations systématiques du système de soins de santé canadien. Le rapport Kirby de 2002 du Comité sénatorial sur l’état du système de santé canadien a mis l’accent sur le besoin d’une stratégie nationale visant à améliorer l’intégration des diplômés internationaux en médecine.<sup>2</sup> Peu de temps après, le rapport de la Commission Romanow intitulé *Guidé par nos valeurs : L’avenir des soins de santé au Canada*<sup>3</sup> a recommandé une approche coordonnée de la planification stratégique des ressources humaines en santé (RHS) et un examen des processus entrepris par les DIM avant de pouvoir faire partie de la main-d’œuvre des médecins. Dans la même optique de planification coopérative des RHS, l’Accord de 2003 des premiers ministres sur le renouvellement des soins de santé<sup>4</sup> a appuyé des initiatives factuelles pour l’élaboration de données qui favorisent l’intégration des DIM et augmentent le recrutement et la conservation des professionnels de la santé.<sup>5</sup>

La création du Groupe de travail canadien sur l'accréditation des médecins formés à l'étranger en 2002 a permis de franchir une étape clé du processus de résolution des problèmes auxquels font face les DIM au Canada. Reconnaissant leur importance au sein du système de prestation de soins de santé au Canada, le Groupe de travail a formulé six recommandations visant à limiter les obstacles des DIM quant à l'accréditation et à la pratique.<sup>6</sup> Les recommandations étaient les suivantes :

- (1) accroître la capacité d’évaluer et de préparer les DIM à l’obtention du permis d’exercice;
- (2) travailler à la normalisation des exigences liées à l’autorisation d’exercer;

- (3) Expand or develop supports/programs to assist IMGs with the licensure process and requirements in Canada.
- (4) Develop orientation programs to support faculty and physicians working with IMGs.
- (5) Develop capacity to track and recruit IMGs.
- (6) Develop a national research agenda, including evaluation of the IMG strategy.

Responding to recommendation #5, the Canadian Post-M.D. Education Registry (CAPER)<sup>7</sup> began work on the National IMG Database in 2005. The effort has been supported by the Association of Faculties of Medicine of Canada (AFMC)<sup>8</sup> and the Foreign Credentials Recognition Division of Human Resources and Skills Development Canada (HRSDC).<sup>9</sup>

Phase I of the National IMG Database project focused on building a data-sharing partnership among all agencies that IMGs encounter as they progress towards medical licensure within Canada. The initial project work also involved defining sector-specific datasets to support research and statistical reporting on the flow of IMGs. By the end of Phase I, in May 2009, IMG assessment centres, national medical examination and certification bodies, postgraduate medical education training programs and medical regulatory authorities were all contributing annual data files to the National IMG Database. The first annual National IMG Database Report was published in 2009. The report provided a new and comprehensive statistical overview of the number of IMGs passing Canada's assessment, training, examination, certification and licensing processes.

Phase II of the National IMG Database started in November 2009 as part of the 'IMGs in Canada Project'. Database development is again led by CAPER, under the auspices of AFMC and with financial support from HRSDC. The IMGs in Canada Project will strive to maintain and build upon the foundational database that was established through the Phase I partnership. It will also push towards a collaborative analytical agenda that supports the information and dissemination needs of data providers, planners, decision-makers and other stakeholders.

- (3) étendre les programmes ou les élaborer en vue d'aider les DIM en ce qui concerne les processus d'autorisation d'exercer au Canada et les exigences qui y sont liées;
- (4) élaborer des programmes d'orientation afin d'appuyer les professeurs et les médecins qui travaillent avec les DIM;
- (5) renforcer la capacité de suivre les DIM et d'en recruter;
- (6) mettre au point un programme national de recherche, y compris une évaluation de la stratégie relative aux DIM.

En réponse à la cinquième recommandation, le Système informatisé sur les stagiaires post-M.D. en formation clinique (CAPER)<sup>7</sup> a entamé la Base de données nationale sur les DIM en 2005. Ce projet profite de l'appui de l'Association des facultés de médecine du Canada (AFMC)<sup>8</sup> et du Bureau d'orientation relatif aux titres de compétences étrangers du ministère des Ressources humaines et du Développement des compétences du Canada (RHDCC).<sup>9</sup>

La première phase du projet portant sur la Base de données nationale sur les DIM a veillé à la création d'un partenariat d'échange de données parmi l'ensemble des organismes qui entretiennent des rapports avec les DIM pendant leur cheminement vers l'accréditation en médecine au Canada. Dans le cadre de l'effort initial du projet, on a également défini des ensembles de données propres aux secteurs dans le but d'appuyer la recherche et la représentation statistique du parcours des DIM. À la fin de la première phase, en mai 2009, les centres d'évaluation des DIM, les organismes nationaux d'examen et de certification de la médecine, les programmes de formation d'enseignement médical postdoctoral et les organismes de réglementation figuraient tous parmi les fournisseurs de données annuelles de la Base de données nationale sur les DIM. Le premier rapport annuel de la Base de données nationale sur les DIM est paru en 2009. Grâce au rapport, on avait accès pour la première fois à un aperçu statistique exhaustif du nombre de DIM qui participaient aux processus d'évaluation, de formation, d'examen, de certification et d'accréditation à l'échelle du Canada.

La deuxième phase de la Base de données nationale sur les DIM a vu le jour en novembre 2009 dans le cadre du « Projet portant sur les DIM au Canada ». CAPER est toujours responsable du développement de la base de données, sous les auspices de l'AFMC et avec l'appui

The analysis, evaluation and decision-support goals of the IMGs in Canada Project are most timely. There are currently more than 60 different combinations of qualifications that entitle individuals to be licensed as physicians in various Canadian jurisdictions.<sup>10</sup> Not surprisingly, developments like Chapter 7 of the Agreement on Internal Trade (AIT)<sup>11</sup> and the Pan-Canadian Framework for the Assessment and Recognition of Foreign Qualification<sup>12</sup> are driving change within the regulatory environment. For example, the Federation of Medical Regulatory Authorities of Canada (FMRAC) and the Medical Council of Canada (MCC) are developing a national process of Application for Medical Registration in Canada. The MCC has also partnered with Canada's IMG assessment centres and other stakeholder organizations on the National Assessment Collaboration (NAC),<sup>13</sup> which will bring greater standardization to IMG assessment for entry to postgraduate medical education. In addition to national projects, the regulatory environment has been incrementally transformed by provincial initiatives such as the Québec-France Mutual Recognition Arrangement<sup>14</sup> and Ontario's simplified Registration for Qualified International Medical Doctors.<sup>15</sup>

It is clear that there is a rapidly changing environment of policies and initiatives that affect IMGs. It is critically important that we evaluate whether these changes are creating a more navigable system for IMGs, while simultaneously improving access to high quality physician care. This report, based on the National IMG Database, marks an important milestone in measuring system performance at present. Future studies of the IMGs in Canada Project will tell us if system changes benefit IMGs and the patients who require their care.

financier de RHDCC. Le Projet portant sur les DIM au Canada veillera à entretenir et à édifier le fondement de la base de données mise sur pied grâce au partenariat de la première phase. Nous miserons également sur un programme collaboratif et analytique appuyant les besoins en matière de renseignements des fournisseurs de données, des planificateurs, des décideurs et des autres intervenants.

Les objectifs en matière d'analyse, d'évaluation et d'aide à la prise de décisions du Projet portant sur les DIM au Canada sont des plus opportuns. Il existe actuellement plus de 60 combinaisons différentes de qualifications qui autorisent la pratique médicale dans les ressorts territoriaux du Canada.<sup>10</sup> Il n'est pas surprenant que des percées comme le chapitre 7 de l'Accord sur le commerce intérieur (AIT)<sup>11</sup> et le Cadre pancanadien d'évaluation et de reconnaissance des qualifications professionnelles acquises à l'étranger<sup>12</sup> encouragent le changement quant à la réglementation. Par exemple, la Fédération des ordres des médecins du Canada (FOMC) et le Conseil médical du Canada (CMC) veillent à la mise en œuvre d'un processus national de demande d'inscription médicale au Canada. Le CMC s'est aussi joint aux centres d'évaluation des DIM du Canada et à d'autres groupes d'intervenants dans le cadre de la Collaboration nationale en matière d'évaluation (CNE),<sup>13</sup> grâce à laquelle l'évaluation des DIM pour l'admission à l'enseignement médical postdoctoral sera sous-tendue de normes plus rigoureuses. En plus des projets nationaux, le milieu de la réglementation connaît des transformations progressives qui découlent des initiatives provinciales comme l'Accord de reconnaissance mutuelle entre le Québec et la France<sup>14</sup> et la nouvelle inscription simplifiée de l'Ontario à l'intention des médecins internationaux qualifiés.<sup>15</sup>

En toute évidence, les politiques et les initiatives qui touchent aux DIM changent rapidement. Il est essentiel de s'assurer que ces changements donnent lieu à un système plus navigable pour les DIM tout en améliorant l'accès à des soins médicaux de qualité supérieure. Ce rapport de la Base de données nationale sur les DIM est une étape clé dans la mesure actuelle du rendement de notre système. Les études ultérieures du Projet portant sur les DIM au Canada détermineront si les changements au système sont bénéfiques aux DIM et aux patients qui profitent de leurs soins.

## B. NATIONAL IMG DATABASE

### B.1 Contributing Data Providers

Building on the Canadian Post-M.D. Education Registry's (CAPER) existing network, the IMG Database reflects a collaborative design and a consultative methodology. Data providers include the 17 Faculties of medicine,<sup>16</sup> the Medical Council of Canada (MCC),<sup>17</sup> the College of Family Physicians of Canada (CFPC),<sup>18</sup> the Royal College of Physicians and Surgeons of Canada (RCPSC),<sup>19</sup> Collège des médecins du Québec (CMQ),<sup>20</sup> 9 provincial and territorial regulatory authorities,<sup>21</sup> and 7 IMG assessment and training centres.<sup>22</sup> Each data contributor adds a unique and critical component to the database. Together, their contributions support decision-makers, researchers and analysts within governments as well as professional and academic organizations. As the National IMG Database continues to evolve, it is becoming a valued resource for informed health care policy development.

#### B.1.1 Regional and Provincial IMG Assessment Centres

The provinces of Newfoundland and Labrador, Nova Scotia, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia have established assessment centres to evaluate the credentials, skills and training of IMGs. Some assessment centres offer programs that include a training component. Depending on the mandate of the specific assessment centre, IMGs may be referred directly for licensure, to post-M.D. training or to various forms of remediation. IMGs may elect to cease the assessment process at any stage.

#### B.1.2 Canadian Faculties of Medicine

The 17 Faculties of medicine provide postgraduate training to IMGs who enter through the Canadian Resident Matching Service (CaRMS)<sup>23</sup> or who have successfully completed certain assessment programs, such as the Alberta IMG program. In some instances, faculties may also provide remediation to IMGs who have been referred by assessment centres or medical regulatory authorities.

## B. BASE DE DONNÉES NATIONALE SUR LES DIM

### B.1 Fournisseurs actifs de données

En se fondant sur le réseau existant du Système informatisé sur les stagiaires post-M.D. en formation clinique (CAPER), la Base de données sur les DIM fait preuve d'un esprit de collaboration et d'une approche de consultation. Les fournisseurs de données comprennent les 17 facultés de médecine,<sup>16</sup> le Conseil médical du Canada (CMC),<sup>17</sup> le Collège des médecins de famille du Canada (CMFC),<sup>18</sup> le Collège royal des médecins et chirurgiens du Canada (CRMCC),<sup>19</sup> le Collège des médecins du Québec (CMQ),<sup>20</sup> les 9 organismes de réglementation provinciaux et territoriaux,<sup>21</sup> et les 7 centres d'évaluation et de formation des DIM.<sup>22</sup> Chaque fournisseur de données apporte une touche unique et essentielle à la base de données. Ensemble, ces contributions ont appuyé les décideurs, les chercheurs et les analystes au sein du gouvernement et des organisations professionnelles et académiques. Au fur et à mesure que la Base de données nationale sur les DIM évolue, elle devient une ressource réputée quant à l'élaboration de politiques éclairées en matière de soins de santé.

#### B.1.1 Centres régionaux et provinciaux d'évaluation des DIM

Les provinces de Terre-Neuve-et-Labrador, de la Nouvelle-Écosse, de l'Ontario, du Manitoba, de la Saskatchewan, de l'Alberta et de la Colombie-Britannique ont mis en place des centres d'évaluation des titres, des compétences et de la formation des DIM. Certains centres d'évaluation offrent des programmes comprenant un volet de formation. Selon le mandat de chaque centre d'évaluation, les DIM peuvent être orientés directement vers l'autorisation d'exercer, la formation postdoctorale ou divers types d'enseignement correctif. Les DIM peuvent se retirer du processus d'évaluation à tout moment.

#### B.1.2 Facultés canadiennes de médecine

Les 17 facultés de médecine offre une formation postdoctorale aux DIM qui s'inscrivent par l'entremise du Service canadien de jumelage des résidents (SCJR)<sup>23</sup> ou qui réussissent à certains programmes d'évaluation, comme le programme DIM de l'Alberta. Dans certains cas, les facultés offrent aussi un enseignement correctif aux DIM qui sont référencés par les centres d'évaluation ou les organismes de réglementation médicale.

### **B.1.3 Medical Regulatory Authorities**

Among the responsibilities of the provincial/territorial regulatory authorities are the licensing of physicians and monitoring of medical practice to safeguard the public's interest.

### **B.1.4 Certification and Evaluation Bodies**

#### **B.1.4.1 College of Family Physicians of Canada (CFPC)**

The CFPC evaluates and accredits the family medicine and enhanced skills residency training programs for the 17 Canadian Faculties of medicine. The CFPC maintains standards of excellence for family medicine training at the undergraduate and postgraduate levels. In general, certification by the CFPC is recognized as a portable credential that facilitates licensure in all Canadian jurisdictions.

#### **B.1.4.2 Royal College of Physicians and Surgeons of Canada (RCPSC)**

The RCPSC determines the standards for education in medical, surgical and laboratory medicine specialties. It evaluates and accredits residency programs for the 17 Canadian Faculties of medicine. In general, a certification by the RCPSC is recognized as a portable credential that facilitates licensure in all Canadian jurisdictions.

#### **B.1.4.3 Medical Council of Canada (MCC)**

The MCC develops and administers examinations to evaluate the competency of physicians. The MCC Qualifying Examination Part I (MCCQEI) assesses the knowledge, clinical skills and attitudes of those who have obtained their medical degree for entry into supervised clinical practice in postgraduate training programs. The Qualifying Examination Part II (MCCQEII) assesses knowledge, skills and attitudes essential for medical licensure, prior to entry into independent clinical practice. The MCC Evaluating Examination (MCCEE) is administered to International Medical Graduates as a prerequisite for eligibility to challenge the MCC's Qualifying Examinations. Successful completion of the MCC Qualifying Examinations leads to the designation as Licentiate of the Medical Council of Canada (LMCC),

### **B.1.3 Organismes de réglementation médicale**

Les organismes provinciaux et territoriaux de réglementation sont, entre autres, responsables d'autoriser l'exercice des médecins et de surveiller la pratique médicale dans le but de protéger l'intérêt du grand public.

### **B.1.4 Organismes d'accréditation et d'évaluation**

#### **B.1.4.1 Collège des médecins de famille du Canada (CMFC)**

Le CMFC est responsable de l'évaluation et de l'accréditation des médecins de famille ainsi que des programmes de formation des résidents de compétences avancées dans chacune des 17 facultés de médecine au Canada. Le CMFC encourage l'excellence de la formation de la médecine familiale de premier cycle et de niveau postdoctoral. En général, la certification par le CMFC est reconnue en tant que titres de compétences transférables qui simplifient l'autorisation d'exercer dans tous les ressorts du Canada.

#### **B.1.4.2 Collège royal des médecins et chirurgiens du Canada (CRMCC)**

Le CRMCC identifie les normes éducatives des spécialités en médecine, en chirurgie et en laboratoire. Il est responsable de l'évaluation et de l'accréditation des programmes de résidence dans chacune des 17 facultés de médecine au Canada. En général, la certification par le CRMCC est reconnue en tant que titres de compétences transférables qui simplifient l'autorisation d'exercer dans tous les ressorts du Canada.

#### **B.1.4.3 Conseil médical du Canada (CMC)**

Le CMC élabore et régit les examens d'évaluation des compétences des médecins. L'examen d'aptitude du CMC, partie I (EACMCI) évalue le savoir, les compétences cliniques et les attitudes des personnes diplômées en médecine qui demandent à être admis à des programmes de formation clinique postdoctorale sous supervision. L'examen d'aptitude du CMC, partie II (EACMCII) évalue le savoir, les compétences cliniques et les attitudes jugées essentielles pour la délivrance d'un permis d'exercice de la médecine au Canada et ce, avant leur entrée en pratique clinique indépendante. L'examen d'évaluation du CMC (EECMC) est destiné aux diplômés internationaux en médecine comme condition préalable à l'admissibilité aux examens d'aptitude du CMC. Une personne qui réussit aux examens d'aptitude du CMC est licenciée du Conseil médical du Canada (LCMC). Ce titre est habituellement

which is generally a precondition to medical licensure in many Canadian jurisdictions.

#### B.1.4.4 Collège des médecins du Québec (CMQ)

The CMQ plays a multifaceted role in the management of physicians for the province of Quebec. As an assessment centre it conducts evaluations. As a regulatory authority it awards practice licenses. As a certification body it attests to the achievement of medical competencies.

## C. PURPOSE AND OBJECTIVES

The goal of the National IMG Database is to compile longitudinal data that measures the flow of International Medical Graduates as they acquire credentials and eventually contribute to the Canadian physician workforce.

The following three objectives will shape project activities through to 2013:

1. Continue to gather data that will support the development of policy regulation and legislation relating to IMGs in Canada.
2. Develop and implement a collaborative analysis agenda that facilitates and supports meaningful knowledge transfer activities.
3. Develop a sustainable business model for the National IMG Database.

### C.1 Challenges

#### C.1.1 Processes and Terminology

Regulatory authorities and assessment centres employ different processes to achieve goals related to the evaluation, training, remediation and licensing of IMGs. Likewise, the terms used to describe these activities and outcomes are not standardized. This generates difficulties in establishing equivalencies among datasets from different sources. In the report, this limitation prevents the pooling of certain data elements and affects the capacity to present general findings. For this reason, explanatory notes precede each section of this report, which is organized according to data provider categories.

une condition préalable à l'admissibilité au permis d'exercice de la médecine dans plusieurs ressorts canadiens.

#### B.1.4.4 Collège des médecins du Québec (CMQ)

Le CMQ joue un rôle diversifié dans l'administration des médecins dans la province du Québec. En tant que centre d'évaluation, il mène des évaluations. En tant qu'organisme de réglementation, il octroie des autorisations d'exercer. En tant qu'organisme de certification, il confirme la réussite de compétences médicales.

## C. BUT ET OBJECTIFS

Le but de la Base de données nationale sur les DIM est de compiler des données longitudinales qui tiennent compte du parcours des diplômés internationaux en médecine au fur et à mesure qu'ils obtiennent leurs titres de compétences pour faire un jour partie de la main-d'œuvre canadienne de médecins.

Les trois objectifs suivants sous-tendent les activités du projet d'ici 2013 :

1. continuer à recueillir des données qui appuieront l'élaboration de politiques, de règlements et de lois en matière de DIM au Canada;
2. élaborer et mettre en œuvre un plan analytique collaboratif favorisant des activités de transfert des connaissances significatives;
3. élaborer un modèle opérationnel durable pour la Base de données nationale sur les DIM.

### C.1 Défis

#### C.1.1 Processus et terminologie

Les organismes de réglementation et les centres d'évaluation ont recours à divers processus pour concrétiser les buts relatifs à l'évaluation, à la formation, à l'enseignement correctif et à l'autorisation d'exercer des DIM. De même, les expressions qu'on utilise pour décrire ces activités et ces résultats ne sont pas normalisées. Par conséquent, il est difficile d'identifier des équivalences parmi les ensembles de données provenant de sources différentes. Il est ainsi impossible de rassembler certains éléments de données, ce qui nuit à la présentation de résultats globaux. C'est pourquoi des notes explicatives figurent au début de chaque section de ce rapport, lequel est divisé selon les catégories de fournisseurs de données.

## **D. PRIVACY AND ACCESS TO PERSONAL INFORMATION**

CAPER is committed to the highest standards of privacy and protection of personal information. To review the principles that guide CAPER's management of data, please consult our Privacy Policy at [www.caper.ca](http://www.caper.ca).

## **D. RESPECT DE LA VIE PRIVÉE ET ACCÈS AUX RENSEIGNEMENTS PERSONNELS**

CAPER se conforme à des normes supérieures en matière de respect de la vie privée et de protection des renseignements personnels. Pour connaître les principes directeurs de CAPER en matière de gestion des données, veuillez consulter notre Politique de confidentialité au [www.caper.ca](http://www.caper.ca).

# The Reporting Process

## Méthode de déclaration

Through data sharing agreements that comply with privacy legislation, the individual records of International Medical Graduates are provided to CAPER by regulatory authorities, assessment centres and certification bodies. Datasets are submitted on a calendar year basis by April 30th following the end of the report year.

In addition to providing information relevant to the assessment, licensing or certification process, annual submissions also include a series of common data elements. These common data elements are essential in that they provide a basis by which to match the IMGs in the database, and to avoid duplication of entries. Common data elements submitted by data providers include variables such as last name, first name, gender, date of birth, MD university, MD country, MD year and in some cases MINC number.

Every data submission sent to CAPER is verified for missing items and inconsistencies. Records with data content above a specific threshold are assigned an in-house unique identifier.

Data providers are consulted prior to the publication of findings derived from their contribution. The process of verification can lead to the resubmission of data for the current year and/or past years. Where data are resubmitted, results may differ from previous years.

### **Privacy & Protection of Personal Information**

AFMC and CAPER have a long-established policy to treat all physician information in a sensitive manner to ensure that our collections, uses, disclosures, retention and disposal of physician information are carried out in accordance with best practices in privacy protection.

The CAPER Privacy Policy is available on our website at [www.caper.ca](http://www.caper.ca)

Les dossiers personnels des diplômés internationaux en médecine sont transmis au Système informatisé sur les stagiaires post-M.D. en formation clinique (CAPER) par les organismes de réglementation, les centres d'évaluation et les organismes de certification en vertu d'ententes de partage de données qui respectent la législation relative à la protection de la vie privée. Les données portent sur l'année civile et sont transmises le ou avant le 30 avril suivant l'année faisant l'objet du rapport.

En plus de fournir des renseignements pertinents quant à l'évaluation, au permis d'exercice et au processus de certification, les présentations annuelles comptent également des éléments de données communes. Ces éléments de données communes sont essentiels; ils sous-tendent l'association des DIM dans la base de données et empêchent le chevauchement de la saisie de données. Les éléments de données communes reçus de la part de fournisseurs de données comprennent le nom de famille, le prénom, le sexe, la date de naissance, l'université ayant décerné le doctorat en médecine, le pays d'obtention du doctorat en médecine, l'année d'obtention du doctorat en médecine et, dans certains cas, le NIMC.

Chaque groupe de données transmis à CAPER est vérifié pour déterminer les éléments manquants et les incohérences. Un identificateur unique est donné aux dossiers dont les données dépassent un seuil déterminé.

Les fournisseurs de données sont consultés avant la publication des découvertes dérivées de leurs déclarations. En raison du processus de vérification, il se peut que des données de l'année en cours et (ou) des années antérieures soient présentées de nouveau. S'il y a lieu, les résultats des années antérieures peuvent être différents.

### **Vie privée et protection des renseignements personnels**

L'AFMC et CAPER ont une politique en vigueur depuis longtemps qui vise à traiter confidentiellement tous les renseignements concernant les médecins pour assurer que la collecte, l'utilisation, la divulgation, la conservation et l'élimination des renseignements concernant les médecins se fassent conformément aux meilleures pratiques en matière de protection de la vie privée.

La politique de confidentialité de CAPER peut être consultée sur notre site Web à l'adresse [www.caper.ca](http://www.caper.ca)

# How to Access the IMG Data Tables

## Utilisation du Rapport de la banque de données sur les DIM

Tables are grouped by types of data providers:

- A. Faculties of Medicine
- B. Assessment Centres
- C. Certification Bodies
- D. Regulatory Authorities

Data items from each data provider may vary depending on the organization's privacy policies with respect to data sharing.

To request specific tables and/or to recommend tables for future reports, please contact CAPER at:

265 Carling Ave, Suite 800  
Ottawa, ON, Canada  
K1S 2E1

Telephone: (613) 730-1204  
Fax: (613) 730-1196

E-mail: [caper@afmc.ca](mailto:caper@afmc.ca)

Les tableaux sont regroupés selon le genre de fournisseurs de données :

- A. Facultés de médecine
- B. Centres d'évaluation
- C. Organismes de certification
- D. Organismes de réglementation

Les éléments de données de chaque fournisseur peuvent varier en fonction des politiques de confidentialité de chacun traitant du partage de données.

Pour demander des tableaux particuliers ou pour suggérer l'ajout de tableaux dans les rapports futurs, veuillez communiquer avec CAPER à l'adresse suivante :

265, avenue Carling, bureau 800  
Ottawa (Ontario) Canada  
K1S 2E1

Téléphone : 613-730-1204  
Télécopieur : 613-730-1196

Courriel : [caper@afmc.ca](mailto:caper@afmc.ca)

# Definitions

## Définitions

File specifications for the National IMG Database were developed in accordance with definitions established by CAPER. Following are CAPER's conventional definitions for data submission and reporting. Further explanatory notes precede each Data Provider section of this report.

### **Age**

Age is calculated by subtracting the year of birth from the year in which data on an IMG are reported.

### **Broad Medical Specialties**

Broad medical specialties are groupings for areas of specialization and subspecialization relevant to training and medical practice. The four broad specialties used in this report are family medicine, medical specialties, laboratory medicine and surgical specialties. See the Specialization definition for a listing of subspecialties assigned to each of the broad specialties.

### **Fellows**

CAPER uses the following definition for the term "fellow": a post M.D. trainee who is registered with the Postgraduate Medical Education Office of a university faculty of medicine and who, regardless of the source of funding, is pursuing clinical or research training which will **NOT** be evaluated by the supervising faculty for the purpose of Canadian licensure or certification by The College of Family Physicians of Canada, the Collège des médecins du Québec or The Royal College of Physicians and Surgeons of Canada. (Trainees with appropriate prerequisite training registered in RCPSC "accreditation without certification" programs are considered residents, not fellows.).

### **Geographic Region where M.D. Earned**

Geographic region where M.D. earned is a grouping scheme for categorizing where IMGs earned their first professional qualification in medicine or M.D. The model used in this publication is the United Nations'

Les spécifications des fichiers de la base de données nationale sur les DIM ont été établies conformément aux définitions de CAPER. Les définitions conventionnelles de CAPER pour la transmission et la déclaration de données apparaissent plus bas. Des explications supplémentaires sont fournies au début de chaque section de fournisseurs de données du présent rapport.

### **Âge**

L'âge est calculé en soustrayant l'année de naissance de l'année au cours de laquelle les données d'un DIM sont déclarées.

### **Spécialités médicales élargies**

Les spécialités médicales élargies correspondent à des groupes de spécialisations et de sur-spécialisations pertinentes en fonction de la formation et de la pratique médicale. Les quatre spécialités élargies utilisées dans le présent rapport sont : familiale, médicale, laboratoire et chirurgical. Consultez la définition Spécialisation pour une liste des spécialités et sur-spécialités correspondant aux spécialités élargies.

### **Fellows**

CAPER retient la définition suivante du terme « fellow » : un stagiaire post M.D. inscrit auprès du bureau d'enseignement supérieur de la faculté de médecine d'une université et qui, sans égard à la source de financement, poursuit une formation clinique ou en recherche qui ne sera **PAS** évaluée par la faculté responsable aux fins d'un permis d'exercice au Canada ou de la certification par le Collège des médecins de famille du Canada, le Collège des médecins du Québec ou le Collège royal des médecins et chirurgiens du Canada. (Les stagiaires ayant une formation préalable pertinente inscrits à « l'accréditation sans certification » du CRMCC sont considérés comme des résidents, pas comme des fellows.)

### **Région géographique de l'université ayant décerné le doctorat en médecine**

La région géographique de l'université ayant décerné le doctorat en médecine est un regroupant permettant de déterminer où les DIM ont obtenu leur première quali-

Composition of macro geographical (continental) regions groupings. For a listing of countries by macro geographical regions see Appendix A. The listing reflects the most current geographical information available.

### **International Medical Graduate (IMG)**

The term 'International Medical Graduate' or IMG, varies in definition and application. As noted in the Introduction section, for the purposes of this report, IMGs include physicians who obtained their initial medical degree (M.D.) outside of Canada. Thus, all International Medical Graduates including graduates of U.S. medical schools, are reported as IMGs in National IMG Database publications. Physicians are not classified based on the country in which their subsequent, post-MD certification is awarded.

### **Legal Status**

Three categories are used:

#### **Canadian Citizen / Permanent Resident**

Someone who is a citizen of Canada or has been accepted as a landed immigrant and has the right to live and work in Canada.

#### **Visa**

Someone holding a visa permitting employment in Canada temporarily as a post M.D. trainee.

#### **Rank**

All new M.D. graduates enter directly into either a Family Medicine or a specialty training program at the R 1 level.

Two years of training at the R 1 and R 2 levels are required for certification in Family Medicine. R 3 level training in Family Medicine is provided in the accredited Family Medicine training programs in Care of the Elderly and Emergency Medicine as well as in other additional training programs. To meet the training requirements of the RCPSC a minimum of four to six years of training is required, depending on the specific specialty in which certification is sought.

A trainee progresses through the rank levels in the following sequence:

fication professionnelle en médecine ou en M.D. Le modèle utilisé dans la présente publication est la composition de regroupements des régions macrogéographiques (continentales) des Nations Unies. Pour une liste des pays par régions macrogéographiques, consultez l'annexe A. L'inscription reflète les plus récents renseignements géographiques étant disponibles.

### **Diplômés internationaux en médecine (DIM)**

La définition et l'application de l'expression « diplômés internationaux en médecine ou DIM » varient. Comme il est mentionné dans la section Introduction et aux fins du présent rapport, les DIM comprennent les médecins qui ont obtenu leur premier diplôme en médecine (M.D.) à l'extérieur du Canada. Par conséquent, tous les diplômés internationaux en médecine, incluant ceux des écoles de médecine des États-Unis, sont signalés comme des DIM dans les publications associées à la base de données nationale sur les DIM. On ne classe pas les médecins selon le pays où ils ont reçu leur certification post-M.D. ultérieure.

### **Statut légal**

Trois catégories sont utilisées :

#### **Citoyen canadien ou résident permanent**

Une personne qui est citoyenne du Canada ou un immigrant admis ayant le droit de vivre et de travailler au Canada.

#### **Visa**

Une personne ayant obtenu un visa lui permettant de travailler temporairement au Canada à titre de stagiaire post-M.D.

#### **Rang**

Tous les nouveaux diplômés en médecine entreprennent un programme de formation en médecine familiale ou dans une spécialité au niveau R 1.

Deux années de formation aux niveaux R 1 et R 2 sont nécessaires pour obtenir une certification en médecine familiale. La formation au niveau R 3 en médecine familiale est offerte par les programmes de formation en médecine familiale en Soins aux personnes âgées et en Médecine d'urgence ainsi que par d'autres programmes de formation. Pour répondre aux exigences de formation du CRMCC, une formation d'une durée minimum de quatre à six années est requise, selon la spécialité particulière dans laquelle la certification est recherchée.

Le stagiaire progresse entre les niveaux selon la séquence suivante :

R 1 (Family Medicine or specialty training)  
R 2  
R 3  
R 4  
R 5  
R 6  
R 7

The following details concerning the ranking system in specific provinces are to be noted:

#### **Maritime Provinces**

(Physicians training at Dalhousie University)

Physicians in the first year of a program are ranked at the R 1 level. Physicians designated from R 2 to R 7 by CAPER are listed according to the PGY 2 to PGY 7 levels used at Dalhousie University. Any physicians beyond the PGY 7 level are ranked according to the appropriate RCPSC training level.

#### **Ontario**

The PGY 1 to PGY 7 or higher training levels in Ontario are reported as R 1 to R 7 by CAPER.

#### **Specialties**

In the Faculties of Medicine section this item refers to the type of non-specialized training, Family Medicine training, or the speciality field in which a trainee is enrolled on November 1<sup>st</sup> of the report year. Several subspecialties have multiple entry points. For example, anaesthesiology, emergency medicine, internal medicine, pediatrics and general surgery all have critical care subspecialties. As individuals move from primary to subspecialty training, CAPER counts them within the subspecialty field that is consistent with their prior training.

In sections other than the Faculties of Medicine section, the same logic applies except that the reference to an enrolment date is not applicable.

In all sections, the highest level of specialization or subspecialisation found in an IMG's record takes precedence. All data providers submit records using the following list of subspecialties:

Rotating Internship  
Non-Specialized Upgrading  
Palliative Medicine

R 1 (médecine familiale ou formation dans une spécialité)  
R 2  
R 3  
R 4  
R 5  
R 6  
R 7

Veuillez prendre note des renseignements suivants concernant le système de niveau de certaines provinces :

#### **Maritimes**

(Médecins en formation à l'Université Dalhousie)

Les médecins inscrits à la première année du programme sont classés au niveau R 1. Les médecins classés aux niveaux R 2 à R 7 par CAPER sont classés selon les niveaux PGY 2 à PGY 7 utilisés par l'Université Dalhousie. Tous les médecins au-delà du niveau PGY 7 sont classés selon le niveau de formation correspondant du CRMCC.

#### **Ontario**

Les niveaux PGY 1 à PGY 7 ou plus élevés en Ontario sont classés comme R 1 à R 7 par CAPER.

#### **Spécialités**

Ce terme réfère, dans la section sur les facultés de médecine, au type de formation non spécialisée, à la médecine familiale ou à la spécialité dans laquelle un stagiaire est inscrit au 1<sup>er</sup> novembre de l'année de la déclaration. Plusieurs sur-spécialités ont de nombreux points d'entrée. Par exemple, l'anesthésiologie, la médecine d'urgence, la médecine interne, la pédiatrie et la chirurgie générale ont des sur-spécialités en soins intensifs. À mesure que les personnes passent d'une formation primaire à une sur-spécialité, CAPER les place dans la sur-spécialité qui est cohérente avec leur formation antérieure.

Dans les sections autres que les facultés de médecine, la même logique est utilisée sauf que la référence à une date d'inscription ne s'applique pas.

Dans toutes les sections, le plus haut niveau de spécialisation ou de sur-spécialisation inscrit dans le dossier d'un DIM a préséance. Tous les fournisseurs de données soumettent les données en utilisant la liste suivante de spécialités et sur-spécialités :

Internat par rotation  
Perfectionnement non spécialisé  
Médecine palliative

### **Family Medicine Specialties**

#### Family Medicine

- Family Medicine (Rural Stream)
- Emergency Medicine (CFPC)
- Care of the Elderly (CFPC)
- Family Medicine: Anesthesia (CFPC)
- Enhanced Skills: Obstetrics
- Enhanced Skills: Psychiatry
- Enhanced Skills: Sports Medicine
- Enhanced Skills: Other Fam. Med. Training

### **Medical Specialties**

#### Anesthesiology

- Clinical Pharmacology and Toxicology (Anes.)
- Critical Care (Anes.)
- Transfusion Medicine (Anes.)

#### Dermatology

#### Diagnostic Radiology

- Neuroradiology
- Pediatric Radiology

#### Emergency Medicine (RCPSC)

- Critical Care (Emergency Med.)
- Pediatric Emergency Medicine

#### Internal Medicine

- Cardiology (Int. Med.)
- Clinical Immunology and Allergy (Int. Med.)
- Clinical Pharmacology and Toxicology (Int. Med.)
- Critical Care (Int. Med)
- Endocrinology and Metabolism (Int. Med.)
- Gastroenterology (Int. Med.)
- Geriatric Medicine (Int. Med.)
- Hematology (Int. Med.)
- Infectious Diseases (Int. Med.)
- Medical Oncology (Int. Med.)
- Nephrology (Int. Med.)
- Occupational Medicine (Int. Med.)
- Respirology (Int. Med.)
- Rheumatology (Int. Med.)
- Transfusion Medicine (Int. Med.)

#### Medical Genetics

#### Neurology

#### Neurology (Pediatrics)

#### Nuclear Medicine

#### Occupational Medicine

### **Spécialités en médecine familiale**

#### Médecine familiale

- Médecine familiale (collectivités rurales)
- Médecine d'urgence (CMFC)
- Soins des personnes âgées (CMFC)
- Médecine familiale : Anesthésie (CMFC)
- Compétences avancées : Obstétrique
- Compétences avancées : Psychiatrie
- Compétences avancées : Médecine sportive
- Compétences avancées : Autre formation en médecine familiale

### **Spécialités médicales**

#### Anesthésiologie

- Pharmacologie clinique et toxicologie (anes.)
- Soins intensifs (anes.)
- Médecine transfusionnelle (anes.)

#### Dermatologie

#### Radiologie diagnostique

- Neuroradiologie
- Radiologie pédiatrique

#### Médecine d'urgence (CRMCC)

- Soins intensifs (méd. d'urgence)
- Médecine d'urgence pédiatrique

#### Médecine interne

- Cardiologie (méd. interne)
- Immunologie clinique et allergie (méd. interne)
- Pharmacologie clinique et toxicologie (méd. interne)
- Soins intensifs (méd. interne)
- Endocrinologie et métabolisme (méd. interne)
- Gastroentérologie (méd. interne)
- Gériatrie (méd. interne)
- Hématologie (méd. interne)
- Maladies infectieuses (méd. interne)
- Oncologie médicale (méd. interne)
- Néphrologie (méd. interne)
- Médecine du travail (méd. interne)
- Pneumologie (méd. interne)
- Rhumatologie (méd. interne)
- Médecine transfusionnelle (méd. interne)

#### Médecine génétique

#### Neurologie

#### Neurologie (pédiatrie)

#### Médecine nucléaire

#### Médecine du travail

Pediatrics	Pédiatrie
Adolescent Medicine (Ped.)	Médecine des adolescents (pédi.)
Cardiology (Ped.)	Cardiologie (pédi.)

Nephrology (Ped.)	Néphrologie (pédi.)
Respirology (Ped.)	Pneumologie (pédi.)
Rheumatology (Ped.)	Rhumatologie (pédi.)
Physical Medicine and Rehabilitation	Physiatrie et réadaptation
Psychiatry	Psychiatrie
Clinical Pharmacology and Toxicology (Psych.)	Pharmacologie clinique et toxicologie (psychiatrie)
Public Health and Preventive Medicine	Santé publique et médecine préventive
Radiation Oncology	Oncoradiologie
<b>Laboratory Medicine Specialties</b>	<b>Spécialités en médecine de laboratoire</b>
Laboratory Medicine (Undifferentiated)	Médecine de laboratoire (sans distinction)
Anatomical Pathology	Anatomie pathologique
Forensic Pathology (Ana. Path.)	Médecine légale (ana. path.)
General Pathology	Pathologie générale
Forensic Pathology (Gen. Path.)	Médecine légale (path. gén.)
Hematological Pathology	Pathologie hématologique
Transfusion Medicine (Hem. Path.)	Médecine transfusionnelle (path. hém.)
Medical Biochemistry	Biochimie médicale
Medical Microbiology	Microbiologie médicale
Neuropathology	Neuropathologie
<b>Surgical Specialties</b>	<b>Spécialités en chirurgie</b>
Cardiac Surgery	Chirurgie cardiaque
Thoracic Surgery (Cardiac Surg.)	Chirurgie thoracique (ch. cardiaque)
Critical Care (Cardiac Surg.)	Soins intensifs (ch. cardiaque)
General Surgery	Chirurgie générale
Colorectal Surgery	Chirurgie colo-rectale
Critical Care (General Surgery)	Soins intensifs (ch. générale)
General Surgical Oncology	Oncologie chirurgicale générale
Pediatric General Surgery	Chirurgie pédiatrique générale
Thoracic Surgery	Chirurgie thoracique
Vascular Surgery	Chirurgie vasculaire

Neurosurgery	Neurochirurgie
Obstetrics/Gynecology	Obstétrique/gynécologie
Gynecologic Oncology	Oncologie gynécologique
Gynecologic Reproductive	Endocrinologie de la reproduction
Endocrinology/Infertility	gynécologique/infertilité
Maternal-Fetal Medicine	Médecine materno-foetale
Ophthalmology	Ophthalmologie
Otolaryngology-Head and Neck Surgery	Oto-rhino-laryngologie et chirurgie cervico-faciale
Orthopedic Surgery	Chirurgie orthopédique
Plastic Surgery	Chirurgie plastique
Urology	Urologie
<b>Other Field of Medicine</b>	<b>Autres domaines de la médecine</b>

**Note:**

*Clinical Pharmacology*

Effective November, 2010 the Specialty Committee in Clinical Pharmacology agreed to a change in nomenclature for the entire Specialty from “Clinical Pharmacology” to “Clinical Pharmacology and Toxicology”.

*Community Medicine*

Effective November, 2010 the Specialty Committee in Community Medicine agreed to a change in nomenclature for the entire Specialty from “Community Medicine” to “Public Health and Preventative Medicine”.

*Training Province*

Training provinces are broad categories pooling the records of IMGs completing postgraduate training with faculties of medicine whose primary address is located within the same province. For instance, if an IMG trainee is registered with the University of Sherbrooke but his/her training site is in New Brunswick, the IMG will be assigned to the province of Quebec.

*Years Since M.D. Earned*

Years Since M.D. Earned is calculated by subtracting the year the M.D. was granted from the year in which data on an IMG were reported.

Neurochirurgie  
Obstétrique/gynécologie  
    Oncologie gynécologique  
    Endocrinologie de la reproduction  
        gynécologique/infertilité  
    Médecine materno-foetale

Ophthalmologie  
Oto-rhino-laryngologie et chirurgie cervico-faciale  
Chirurgie orthopédique  
Chirurgie plastique  
Urologie

**Autres domaines de la médecine**

**Remarque :**

*Pharmacologie clinique*

Depuis novembre 2010, le Comité de spécialité de pharmacologie clinique a approuvé la demande de changement de nomenclature pour l'ensemble de la spécialité de « Pharmacologie clinique » à « Pharmacologie clinique et toxicologie ».

*Médecine communautaire*

Depuis novembre 2010, le Comité de spécialité de médecine communautaire a approuvé la demande de changement de nomenclature pour l'ensemble de la spécialité de « Médecine communautaire » à « Santé publique et médecine préventive».

*Province de formation*

Les provinces de formation sont des catégories élargies qui regroupent les dossiers des DIM poursuivant une formation supérieure au sein de facultés de médecine dont l'adresse principale est dans la même province. Ainsi, si un stagiaire DIM est inscrit à l'Université de Sherbrooke mais que l'endroit de sa formation est au Nouveau-Brunswick, le DIM sera classé dans la province de Québec.

*Années depuis l'obtention du doctorat en médecine*

Le nombre d'années depuis l'obtention du doctorat en médecine est calculé en soustrayant l'année où le doctorat a été obtenu de l'année au cours de laquelle les données d'un DIM sont déclarées.

# Faculties of Medicine of Canada

## A.1 Introduction

The Canadian Post-M.D. Education Registry (CAPER) compiles and publishes statistics on postgraduate trainees from the 17 Canadian Faculties of medicine. Records from the CAPER database were transferred to the National IMG Database to provide data on IMGs enrolled in postgraduate training in Canada.

### Datasets and report years submitted by this data provider:

Memorial University of Newfoundland	2005 - 2006 - 2007 - 2008 - 2009 - 2010
Dalhousie University	2005 - 2006 - 2007 - 2008 - 2009 - 2010
Université Laval	2005 - 2006 - 2007 - 2008 - 2009 - 2010
Université de Sherbrooke	2005 - 2006 - 2007 - 2008 - 2009 - 2010
Université de Montréal	2005 - 2006 - 2007 - 2008 - 2009 - 2010
McGill University	2005 - 2006 - 2007 - 2008 - 2009 - 2010
University of Ottawa	2005 - 2006 - 2007 - 2008 - 2009 - 2010
Queen's University	2005 - 2006 - 2007 - 2008 - 2009 - 2010
University of Toronto	2005 - 2006 - 2007 - 2008 - 2009 - 2010
McMaster University	2005 - 2006 - 2007 - 2008 - 2009 - 2010
University of Western Ontario	2005 - 2006 - 2007 - 2008 - 2009 - 2010
Northern Ontario School of Medicine	2007 - 2008 - 2009 - 2010
University of Manitoba	2005 - 2006 - 2007 - 2008 - 2009 - 2010
University of Saskatchewan	2005 - 2006 - 2007 - 2008 - 2009 - 2010
University of Alberta	2005 - 2006 - 2007 - 2008 - 2009 - 2010
University of Calgary	2005 - 2006 - 2007 - 2008 - 2009 - 2010
University of British Columbia	2005 - 2006 - 2007 - 2008 - 2009 - 2010

## A.2 Inclusion Criteria

CAPER submits individual level records on a calendar year basis on individuals matching all of the following criteria:

1. First completed professional qualification in medicine or M.D. outside of Canada
2. Enrolled in postgraduate training at any rank level

### **A.3 Data Elements Reported by the Faculties of Medicine of Canada**

In addition to the common data elements described in the introductory section of this report, CAPER submits information that allows reporting on the following themes:

1. Training faculty
2. Training province

### **A.4 Table Ordering and Logic of Contents**

For every variable reported, tables were assembled to display findings on three categories of IMGs: (1) Canadian citizens/permanent residents, (2) visa trainees and (3) fellows.

### **A.5 Notes Specific to the Faculties of Medicine of Canada**

Findings reported in this section result solely from data submitted by CAPER. The tables were not derived by cross-referencing data from CAPER with data from other data providers.

**TABLE 1**  
CANADIAN FACULTIES OF MEDICINE

BY REPORT YEAR  
2005 – 2010

IMGS IN POST-M.D. TRAINING BY LEGAL STATUS

	Cdn Citizen/PR	VISA Trainee	Total			
2005	1073	11.5%	2077	16.2%	3150	14.2%
2006	1247	13.4%	2118	16.5%	3365	15.2%
2007	1450	15.5%	2226	17.4%	3676	16.6%

# Assessment Centres

## B.1 Introduction

Assessment centres vary in responsibilities depending on the jurisdiction. Certain assessment centres focus on outcomes related to admission into postgraduate training, some conduct practice ready assessment leading to opportunities for licensure, while others assess for both categories of outcomes. Generally, assessment centres work closely with their provincial regulatory authority and/or with particular Canadian faculties of medicine to assess clinical competencies, review/report results and oversee remediation processes, when required.

### Datasets and report years presented in this section:

#### Newfoundland and Labrador:

Clinical Skills Assessment and Training (CSAT)

2005 - 2006 - 2007 - 2008 - 2009 - 2010

#### Nova Scotia:

Clinician Assessment Practice Program (CAPP)

2005 - 2006 - 2007 - 2008 - 2009 - 2010

#### Ontario:

The Centre for the Evaluation of Health Professionals Educated Abroad (CEHPEA)

2007 - 2008 - 2009 - 2010

#### Manitoba:

Medical Licensure Program for International Medical Graduates (MLPIMG)

2005 - 2006 - 2007 - 2008 - 2009 - 2010

International Medical Graduates Assessment for Conditional Licensure (IMGACL)

#### Saskatchewan:

2005 - 2006 - 2007 - 2008 - 2009 - 2010

Division of Continuing Professional Learning (CPL)

College of Medicine at the University of Saskatchewan

Extended Refresher Course Process for International Medical Graduates

#### Alberta:

2005 - 2006 - 2007 - 2008 - 2009 - 2010

Alberta International Medical Graduate Program (AIMGP)

#### British Columbia:

2005 - 2006 - 2007 - 2008 - 2009 - 2010

International Medical Graduates of British Columbia (IMG-BC)

## B.2 Inclusion Criteria

Assessment centres submit individual level records on a calendar year basis on IMGs matching all of the following criteria:

1. Completed first professional qualification in medicine or M.D. outside of Canada
2. Participated in an assessment program during the report year

Counts on IMGs who submitted a request for assessment and were rejected for failing to meet minimal admissibility requirement are not available. Due to variations in the assessment process, participation in an assessment program is slightly different for each assessment centre. A review process was conducted to ensure that representatives of every IMG assessment centre approved the findings and diagrams displayed in this report.

### **B.3 Data Elements Reported by Assessment Centres**

In addition to the common data elements described in the introductory section of this report, assessment centres submit information that allows reporting on the following themes:

1. Practice ready outcomes
2. Referrals for remediation training
3. Postgraduate training opportunities or referrals
4. Participation in specific assessment procedures; interviews, orientation sessions, mentorships, training opportunities

### **B.4 Table Ordering and Logic of Contents**

Results from participating assessment centres are presented using an east to west arrangement. Variation in the data reported between assessment centres is due to differences in assessment processes and limitations faced by data providers regarding the assembly and sharing of information. Data sharing agreements comply with specific jurisdictional constraints and limit the capacity of full standardization.

### **B.5 Notes Specific to Particular Assessment Centres**

IMGs who complete assessments in multiple centres and/or in multiple years are counted in each year and centre when and/or where they complete an assessment.

Every assessment centre has its own section of tables that is preceded by an introduction. These introductions contain a diagram and notes to be reviewed prior to the interpretation of results. Findings reported in this section result solely from data submitted by the assessment centres. The tables were not derived by cross-referencing data from the assessment centres with data from other data providers.

## **Summary Tables**

### **Assessment Centres**

This section presents summary statistics for International Medical Graduates (IMGs) who participated in assessment programs by province. Included in the results are IMGs who completed clinical and/or written exams where applicable.

- A. For the reporting jurisdictions during the past 6 years, approximately two thirds of the IMGs participating in assessment programs were in Ontario or Alberta. (Table 1)
- B. During the 6-year time period from 2005 to 2010, inclusive, Africa and Asia contributed the highest percentage of assessed IMGs to Newfoundland and Labrador, Nova Scotia, Ontario, Manitoba and Alberta compared to Saskatchewan where the vast majority were from Africa, and British Columbia where most were from Asia and Europe. Of all the provinces where assessments are conducted, Newfoundland and Labrador displayed the highest level of inter-year variation in GEOGRAPHIC REGION WHERE M.D. EARNED BY IMGs. Ontario had the most uniform GEOGRAPHIC REGION variation across time. Some but not all of Ontario's relative uniformity could be attributed to the fact that the number of IMGs was much higher than that for Newfoundland, so there was more statistical averaging taking place. (Table 2)
- C. All jurisdictions administered a clinical exam. For some jurisdictions, an accompanying written exam was mandatory. For example, in Newfoundland and Labrador, Nova Scotia, Manitoba, and Saskatchewan, IMGs completed an equal proportion of clinical to written exams. For other jurisdictions a written exam may or may not have been required. For example, in Ontario, Alberta and British Columbia, the completion of clinical exams was higher than the completion of written exams. (Table 3)
- D. For participation in assessment programs, female IMGs outnumbered male IMGs in Ontario, Alberta and British Columbia, whereas the reverse was true in Newfoundland and Labrador, Nova Scotia, Manitoba, Saskatchewan. (Table 4)
- E. In Newfoundland and Labrador, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia, at least 50% of the annual cohort of assessed IMGs earned their M.D. less than 15 years ago. In contrast in Nova Scotia, only 38% of the annual cohort of assessed IMGs earned their M.D. less than 15 years ago. (Table 5)

## Newfoundland and Labrador

### Clinical Skills Assessment and Training Program (CSAT)

The diagram below displays the major components of the CSAT program in Newfoundland and Labrador and the matching data points collected by the National IMG Database project. The assessment and training program begins with an application procedure and ends with IMGs being referred for a provisional license to practise medicine in Newfoundland and Labrador.

#### Notes

- 1) Every IMG who completed the training module successfully completed the assessment module.
- 2) Numbers beside each report year refer to the same cohort of IMGs. For instance, of the 9 IMGs who completed training in 2005, 8 were granted a provisional license between 2005 and 2007.
- 3) Numbers on IMGs who received a provisional license by the College of Physicians and Surgeons of Newfoundland & Labrador (CPSNL) were obtained by cross-referencing CSAT program records with CPSNL licensing records compiled by the National IMG Database Project. Some IMGs complete the training component of the CSAT program in December of a report year. Thus it is highly unlikely that these IMGs will be licensed by the CPSNL during that same report year.
- 4) Completion in tables 1 through 5 refers to completing the 4 to 6 month training module of the program.

Please note that the diagram showing provisional licenses on page 24 of the previous report has been moved to Table 2 in the current report.

# Nova Scotia

## Clinician Assessment for Practice Program (CAPP)

The diagram below displays the major components of the Nova Scotia CAPP program and the matching data points collected by the National IMG Database project. IMGs begin the assessment process by submitting their dossier/credentials for review of eligibility to practise medicine in Nova Scotia under a defined license.

### Notes

- 1) The numbers beside each report year refer to the same cohort of IMGs. For instance, of the 98 IMGs who completed the two-part assessment in 2005, 22 were recommended for a defined license.
- 2) In 2005, there were two rounds of the two-part assessment instead of one.
- 3) In 2005, 4 of the 22 IMGs referred for a defined license did not request the license and complete the 13-month Mentorship Program. In 2006, 2 of the 9 IMGs did not request the license and complete the 13 month Mentorship Program. In 2007, all 4 admissible IMGs requested the defined license and began the Mentorship Program. One of the 4 IMGs did not request the license and complete the 13 month Mentorship Program for both 2008 and 2009. All 5 admissible IMGs requested the defined license and completed the 13 month Mentorship Program in 2010.
- 4) IMGs who did not qualify for the initial two-part assessment are not included in the following tables. Completing Part A of the Nova Scotia CAPP equates to completing every step leading to a referral for a defined license to practise medicine in Nova Scotia.

**TABLE 1**  
**NOVA SCOTIA CLINICIAN ASSESSMENT FOR  
PRACTICE PROGRAM (CAPP)**

BY REPORT YEAR  
2005 – 2010

IMGs WHO COMPLETED PART A OF THE CAPP PROGRAM

CAPP Report Year	Count	Col %
2005	98	44.7%
2006	30	13.7%
2007	20	9.1%
2008	23	10.5%
2009	18	8.2%
2010	30	13.7%
<b>Total</b>	<b>219</b>	<b>100.0%</b>

\*Completing Part A of the Nova Scotia CAPP equates to completing every step leading to a referral for a defined license to practise medicine in Nova Scotia. IMGs who did not qualify for the initial two-part assessment are not included.

# Ontario

## The Centre for the Evaluation of Health Professionals Educated Abroad (CEHPEA)

The diagram below displays the major components of the assessment program at CEHPEA and the matching data points collected by the National IMG Database project. The process begins with an application procedure with assessments for IMGs for direct entry to residency training programs or practice ready positions in Ontario.

## **Notes**

- 1) IMGs are allowed to apply concurrently to multiple streams. Applicants can also switch their method of application from one year to the next. The methods of application are as follows:
  1. PGY1 (Post Graduate year 1)
  2. PGY1 and PGY2
  3. PGY1 and PGY2 and PRA
  4. PGY1 and PRA
  5. PGY2 (Post Graduate advanced standing)
  6. PGY2 and PRA
  7. PRA (Practice Ready Position)
- 2) The total counts in the box under Selected for Assessment do not reflect unique IMGs. These are the number of IMGs who applied in a given report year and completed at least 1 examination in any stream in that report year.
- 3) For the numbers beside the green boxes, IMGs were only counted in the report year that they completed the corresponding examination. If a new examination is written by the same applicant in a subsequent year, it is counted in that year as well.
- 4) Applicants are allowed to use the result of an examination from a previous year for the year in which they submit an application for assessment. These individuals are not counted again in the subsequent years under those examinations.

## Medical Licensure Program for International Medical Graduates (MLPIMG) International Medical Graduates Assessment for Conditional Licensure (IMGACL)

The diagram below displays the major components of the IMG Programs and matching data points collected by the National IMG Database project. The IMG Program manages the admission, evaluation and training of IMGs seeking a license to practise medicine as a primary care physician in Manitoba. This process includes completion of the Clinicians Assessment and Professional Enhancement (CAPE) program. The CAPE program also provides assessments for IMGs referred from provinces, primarily Saskatchewan. For the latter group, results from the 3-day CAPE assessment are reviewed by the College of Physicians and Surgeons of Saskatchewan. In Manitoba, IMGs apply to either of 2 programs:

1. IMGACL – a 3-month clinical field assessment which determines if candidates, approved for Conditional Licensure by the CPSM, are practice ready and eligible to be referred directly to the CPSM for licensure.
2. MLPIMG – a 1-year training program specifically for IMGs. All IMG applications are screened, selected for an interview, and then invited to complete the CAPE prior to being accepted into their respective programs.

## **Notes**

- 1) In 2005, CAPE assessed 6 IMGs from Nova Scotia. Between 2006 and 2010 there were no participants from this province.
- 2) Numbers in purple boxes were submitted in aggregate form by the assessment program.
- 3) IMGs who came into the IMGACL and didn't pass but were considered close, were invited to enter an enhanced training program (physician enhancement program – PEP). The PEP was discontinued in 2009. After 2009, there is no remediation or further training offered to people who were unsuccessful in the IMGACL (they can apply to any other program).
- 4) More IMGs participated in the CAPE than were accepted into programs.
- 5) PRCO/MH = Physician Resource Coordination Office/Manitoba Health.

## Division of Continuing Professional Learning (CPL)

### College Of Medicine

### Extended Refresher Course Process for International Medical Graduates

The diagram below displays the major components of Saskatchewan's CPL Program and matching data points collected by the National IMG Database project. In Saskatchewan, the College of Physicians and Surgeons of Saskatchewan (CPSS) refers IMGs to Manitoba's Clinician Assessment and Professional Enhancement (CAPE) program. The CAPE program assesses IMGs and reports its findings to the CPSS. CPSS may refer IMGs to the CPL for remediation that may be in the form of a home study and/or mentorship program and/or additional training. The extent of the remediation process depends on the needs of the individual IMG. The CPL database reports on those IMGs referred to it for remediation.

#### Notes

- 1) IMGs initially referred for remediation may choose not to participate in the CPL process (e.g. return to home country, decision to seek licensure in another jurisdiction).
- 2) The counts of IMGs associated with each report year refer to the same cohort of IMGs. For example, of the 4 IMGs referred to the CPL for remediation in 2005, 2 qualified for a provisional license as of March 1, 2010.
- 3) The counts of IMGs who received a provisional license by report year after completing remediation through CPL is current as of March 1, 2011.
- 4) The counts of IMGs associated with each report year for Home Study, Mentorship, and Training indicate that any IMG referred for remediation may participate in multiple activities. Various components of upgrading may occur in sequence or be completed during the same time period.
- 5) Home Study may include recommended reading on any topic, completion of a program in PHELO (Public Health Ethical, Legal and Organizational Aspects of Medicine) and/or a Pharmacy module. PHELO and the Pharmacy modules are manuals/workbooks with exercises marked by the CPL (for PHELO) or the Department of Pharmacology (Pharmacy module).

## Alberta International Medical Graduate Program (AIMGP)

The diagram below displays the major components of the Alberta IMG Program assessment and the matching data points collected by the National IMG Database project. The assessment program begins with an application procedure and ends with IMGs being selected for entry in a residency program in Alberta at the PGY-1 level.

### Notes

- 1) The count beside each report year refers to the same cohort of IMGs.
- 2) The yellow box beside the PGY-1 Residency Training hexagon is a count of IMGs who were offered and accepted a Post-M.D. training position in Alberta following the successful completion of the AIMGP assessment. These counts were obtained by cross-referencing the AIMGP program data with the CAPER Post-M.D. training database.
- 3) The 2008 Externship and Residency Training numbers have been revised to include 5 IMGs who entered via the CaRMS 2<sup>nd</sup> iteration and were not previously reported.

# British Columbia

## International Medical Graduate Program of British Columbia (IMG-BC)

SECTION  
B7

The diagram below displays the major components of the International Medical Graduate Program of British Columbia and the matching data points collected by the National IMG Database project. After completing an online application process, eligible IMGs take part in an Objective Structured Clinical Examination (OSCE). Results of the OSCE are used to select a cohort of IMGs to participate in a 13-week Clinical Assessment Program that begins with a 1-week orientation session. Results of the Clinical Assessment are forwarded to the Canadian Resident Matching Service (CaRMS) where IMGs compete for a postgraduate training position at one of Canada's faculties of medicine. Successful completion of the IMG-BC clinical assessment is a prerequisite for application in one of the 18 (12 family medicine; 6 specialty) residency training positions reserved for IMGs at the University of British Columbia.

### Notes:

- 1) Counts beside each report year refer to the same cohort of IMGs. For example, of the 41 IMGs who completed the OSCE in 2005, 25 completed the clinical assessment in 2005.

# College of Family Physicians of Canada (CFPC)

## C1.1 Introduction

The College of Family Physicians of Canada (CFPC) is a national certifying body whose role includes, among many other things, the evaluation and certification of physicians specialized in family medicine and its related special competence programs.

Datasets and report years submitted by data provider:

College of Family Physicians of Canada

2005 - 2006 - 2007 - 2008 - 2009 - 2010

## C1.2 Inclusion Criteria

The CFPC submits individual level records using a calendar year timeframe on the following criteria:

1. Completed first professional qualification in medicine or M.D. outside of Canada
2. Certified in Family Medicine

## C1.3 Data Elements Reported by the CFPC

In addition to the common data elements described in the introductory section of this report, the CFPC submits information that allows reporting on the following themes:

1. Certifications in Family Medicine
2. Completion of some Post-M.D. training in Canada and/or in the U.S.
3. Eligibility route taken by certificants

## C1.4 Table Ordering and Logic of Contents

Tables from the CFPC are ordered to match an arrangement common to all certifying bodies included in this report. Variation in the data reported between certifying bodies is due to differences in certification processes and limitations faced by each data provider regarding the assembly and sharing of information.

## C1.5 Notes Specific to the CFPC

Findings reported in this section result solely from data submitted by the CFPC. None of the tables were derived by cross-referencing data from the CFPC to data from other data providers. For instance, the table indicating if certificants completed some post-M.D. training in Canada was derived from data submitted by the CFPC; it does not result from a match with data submitted by the Canadian faculties of medicine.

# Royal College of Physicians and Surgeons of Canada (RCPSC)

## C2.1 Introduction

The Royal College of Physicians and Surgeons of Canada (RCPSC) is a national certifying body whose role includes, among many other things, the evaluation and certification of physicians in all medical specialties with the exception of family medicine and its related special competence programs. As of October 2010, it coordinated certification processes for 60 specialty disciplines of medical, surgical and laboratory medicine and two specialty programs.

**Dataset and report years submitted by this data provider:**

Royal College of Physicians and Surgeons of Canada

2006 - 2007 - 2008 - 2009 - 2010

## C2.2 Inclusion Criteria

The RCPSC submits individual level records using a calendar year timeframe on the following criteria:

1. Completion of first professional qualification in medicine or M.D. outside of Canada
2. Certified in a specialty or subspecialty recognized by the RCPSC

## C2.3 Data Elements Reported by the RCPSC

In addition to the common data elements described in the introductory section of this report, the RCPSC submits information that allows reporting on the following themes:

1. Certifications in a specialty or subspecialty
2. Completion of some post-M.D. training in Canada and/or in the U.S.
4. Assessment route taken by IMGs obtaining a certification
5. Assessment route taken by IMGs passing a certification exam

Within a report year, the number of IMGs passing a RCPSC exam may differ from the number of IMGs certifying with the RCPSC for multiple reasons: 1) IMGs can complete an exam during a report year and receive their official certification status in another report year; 2) IMGs taking the practice ready assessment often pass a RCPSC exam in one report year but complete the program in another.

## C2.4 Table Ordering and Logic of Contents

Tables from the RCPSC are ordered to match an arrangement common to all certifying bodies included in this report. Variation in the data reported between certifying bodies is due to differences in certification processes and limitations faced by each data provider regarding the assembly and sharing of information.

## C2.5 Notes Specific to the RCPSC

Findings reported in this section result solely from data submitted by the RCPSC. None of the tables were derived by cross-referencing data from the RCPSC to data from other data providers. For instance, the table indicating if certificants completed some post-M.D. training in Canada was derived from data submitted by the RCPSC; it does not result from a match with data submitted by the Canadian Faculties of medicine.

Individuals assessed through the practice ready process must complete a continuing professional development program after passing a specialty exam with the RCPSC, only after which can they become certified by the Royal College. This program usually lasts more than one year and can include the completion of a research project.

# Medical Council of Canada (MCC)

## C3.1 Introduction

The Medical Council of Canada (MCC) develops and administers examinations to evaluate the competency of physicians. These include the MCC Evaluating Examination (MCCEE) administered to graduates of medical schools not accredited by the Committee on Accreditation of Canadian Medical Schools (CACMS) or the Liaison Committee on Medical Education (LCME) in the United States. The MCCEE (or an exemption from the MCCEE on the basis of specialty certification in Canada or the U.S.) is a prerequisite for eligibility to challenge the MCC's Qualifying Examinations Part I (MCCQEI) and Part II (MCCQEII). Successful completion of MCC Qualifying Examinations leads to designation as a Licentiate of the Medical Council of Canada (LMCC), which is generally a precondition to medical licensure in many Canadian jurisdictions.

Datasets and report years presented in this section:

Medical Council of Canada

2005 - 2006 - 2007 - 2008 - 2009 - 2010

## C3.2 Inclusion Criteria

The Medical Council of Canada submits individual level records using a calendar year timeframe on the following criteria:

1. Completed (or will complete) first professional qualification in medicine or M.D. outside of Canada and
2. Passed the MCCEE, MCCQEI and/or MCCQEII

## C3.3 Data Elements Reported by the MCC

In addition to the common data elements described in the introductory section of this report, the Medical Council of Canada submits information that allows reporting on the following themes:

1. Examinations passed
2. Country of birth

## C3.4 Table Ordering and Logic of Contents

MCC tables are organized according to the order in which MCC examinations must be completed to obtain the LMCC.

## C3.5 Notes Specific to the MCC

Findings reported in this section result solely from data submitted by the Medical Council of Canada. None of the tables were derived by cross-referencing data from the Medical Council of Canada to data from other data provider types.

Graduates of U.S. allopathic medical schools that are accredited by CACMS and/or the LCME may proceed directly to the MCCQEI without completing the MCCEE. However, graduates from U.S. osteopathic medical schools must complete the MCCEE as a prerequisite for proceeding to the MCCQEI.

For the last table showing years since M.D. earned, the following rules were observed: When the M.D. year was provided it was taken as the year of graduation for calculating the years since M.D. earned. When the M.D. year was not provided and the M.D. year expected was provided, the latter was taken as the year of graduation to calculate the years since M.D. earned. When neither the M.D. year nor the M.D. year expected was provided, the entries were counted under 'Not available'.

# Collège des médecins du Québec (CMQ)

## C4.1 Introduction

The diagram on the following page displays the pathways to assessment, certification and licensing for International Medical Graduates (IMGs) in Quebec. Aggregate statistics are shown for the matching data points collected by the National IMG Database.

Prior to certification and full licensure, IMGs may be issued a restrictive permit or an educational license. Restrictive permits are issued to practice ready IMGs who work in academic or clinical settings. Those practising under a restrictive permit may have their license renewed over a 5-year period, prior to being issued a regular permit. A regular permit may be issued to IMGs who successfully challenge a certification exam while practising under a restrictive license.

An educational license is issued to IMGs while they undertake postgraduate medical training in Quebec. A regular permit may be issued to IMGs upon successful completion of postgraduate medical training and the certifying exam.

Datasets and report years submitted by data provider:

Collège des médecins du Québec (CMQ)

2005 - 2006 - 2007 - 2008 - 2009 - 2010

## C4.2 Inclusion Criteria

The CMQ submits individual level records using a calendar year timeframe on individuals matching all of the following criteria:

1. Completed first professional qualification in medicine or M.D. outside of Canada
2. Certified in Family Medicine or other medical, surgical or laboratory specialties recognized by the CMQ

## C4.3 Data Elements Reported by the CMQ

In addition to the common data elements described in the introductory section of this report, the CMQ submits information that allows reporting on the following themes:

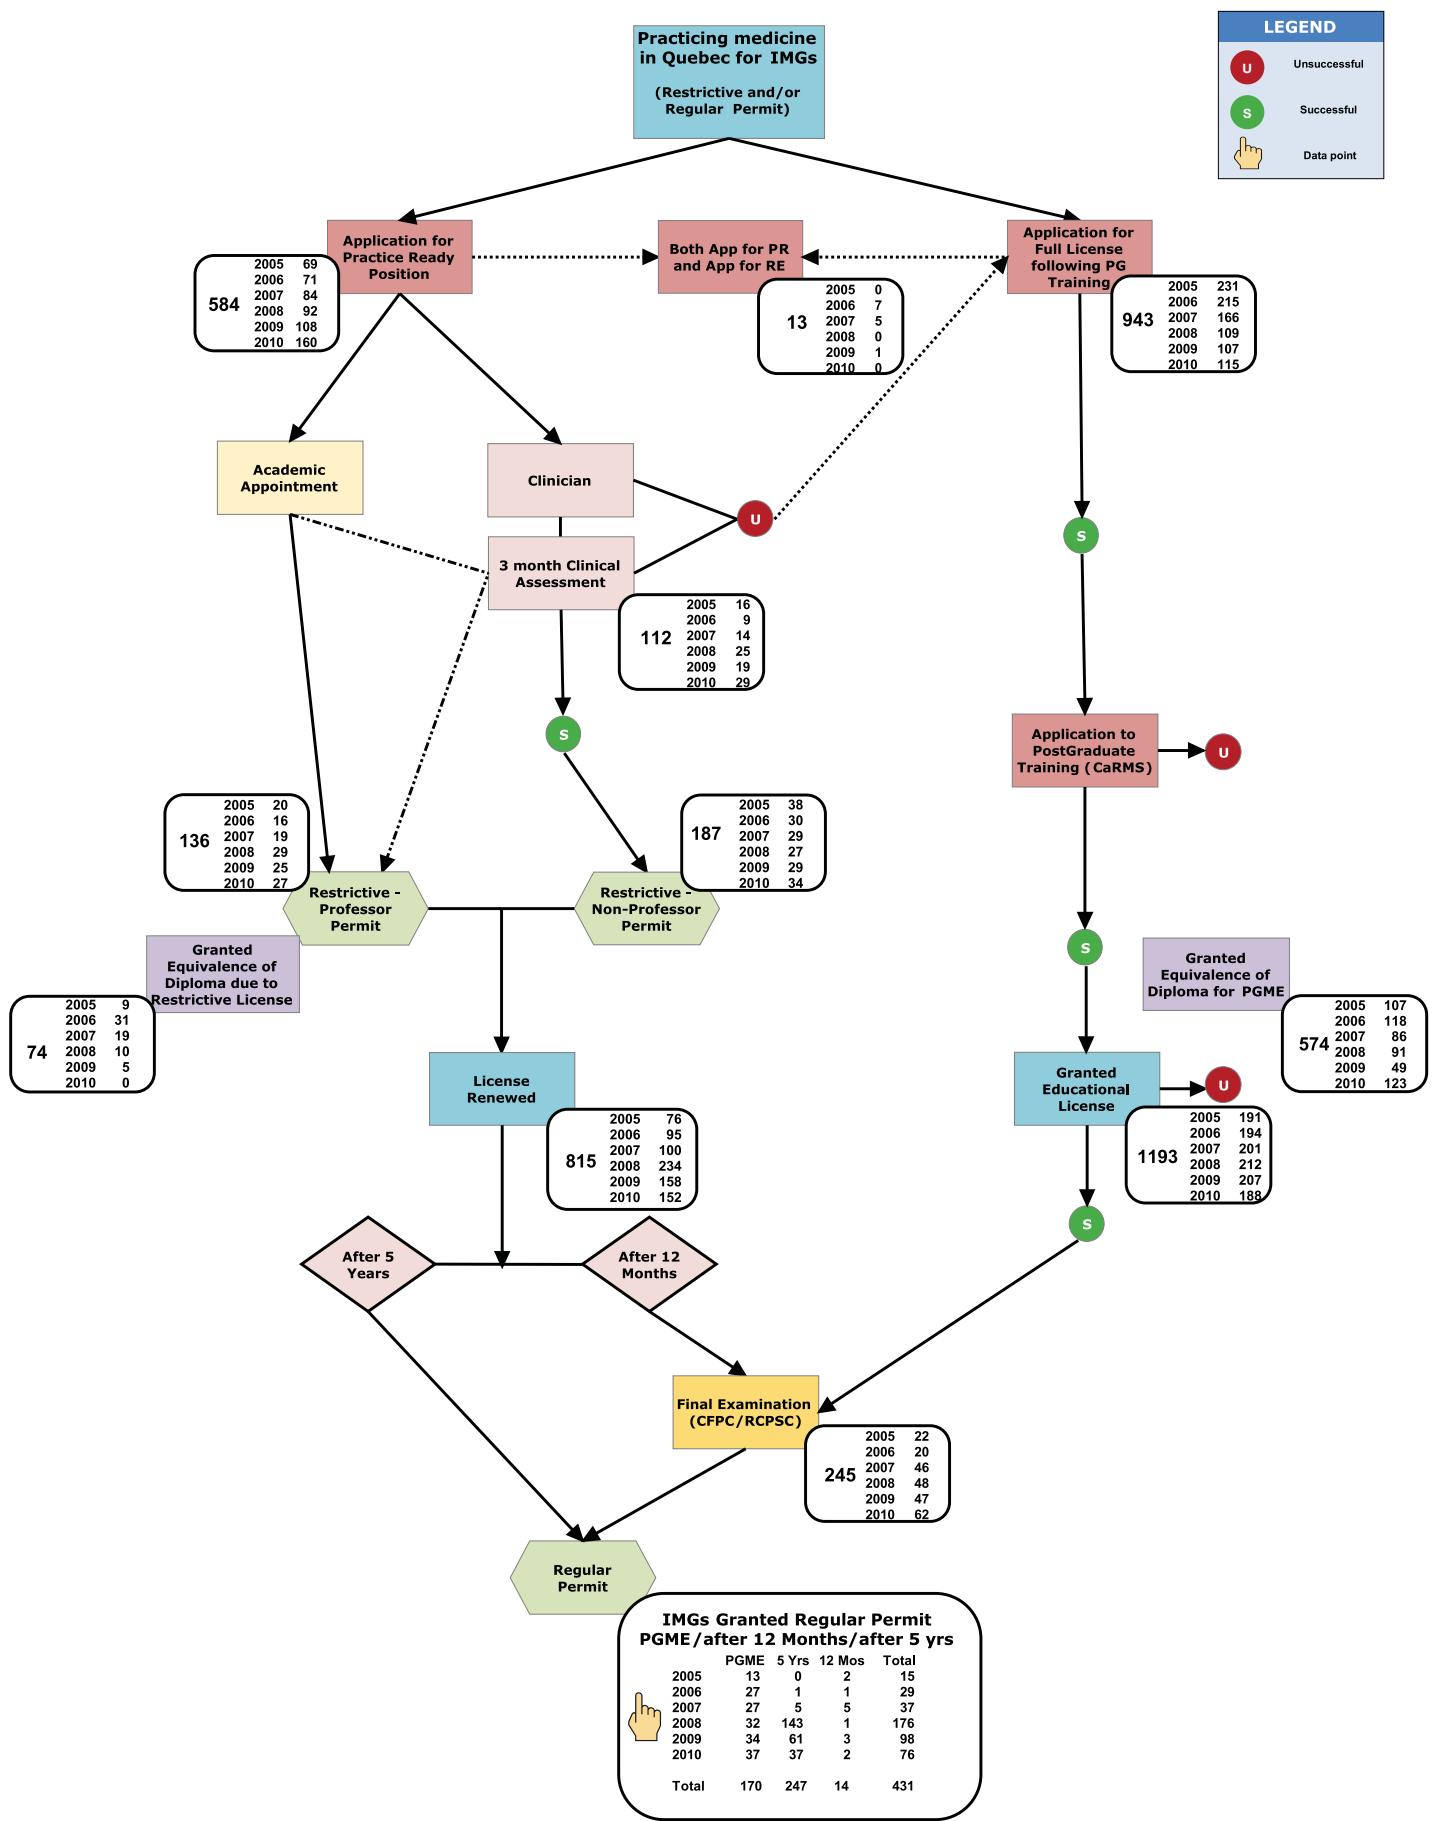

1. Application route (i.e., practice ready, postgraduate training)
2. Type of license (i.e., restrictive permit, educational license, regular permit)
3. Certifications in a medical specialty or sub-specialty

#### **C4.4 Table Ordering and Logic of Contents**

Tables from the CMQ are ordered to match an arrangement common to all certifying bodies included in this report. Variation in the data reported between certifying bodies is due to differences in certification processes and limitations faced by each data providers regarding the assembly and sharing of information. Data sharing agreements signed with data providers operating in contexts with specific jurisdictional constraints limits the capacity to reach full standardization.

#### **C4.5 Notes Specific to the CMQ**

1. Findings reported in this section result solely from data submitted by the CMQ. None of the tables were derived by cross-referencing data from the CMQ to data from other data provider types.
2. Data for previous years (2005-2009) were resubmitted by the CMQ.
3. Licensing information previously reported by the CMQ is now included in this section. In prior publications, this information was reported in the Regulatory Authorities section.

# Regulatory Authorities

## D.1 Introduction

Regulatory authorities are licensing bodies that determine qualifications for registration and licensure, set standards and investigate complaints about physicians. Their responsibilities and powers are defined by provincial and/or territorial legislation.

**Datasets and report years presented in this section;**

College of Physicians and Surgeons of:

Newfoundland & Labrador

2005 - 2006 - 2007 - 2008 - 2009 - 2010

Nova Scotia

2007 - 2008 - 2009 - 2010

New Brunswick

2005 - 2006 - 2007 - 2008 - 2009 - 2010

British Columbia

2005 - 2006 - 2007 - 2008 - 2009 - 2010

Yukon Medical Council

As of December 1, 2011

## D.2 Inclusion Criteria

Regulatory authorities submit individual level records using a calendar year timeframe on the following criteria:

1. Completed first professional qualification in medicine or M.D. outside of Canada
2. Obtained any type of license to practise medicine for the first time within jurisdiction

Counts provided in tables for regulatory authorities exclude IMGs whose license status was renewed, upgraded or reinstated. For example, counts do not include IMGs who were granted a full/independent license in 2007 after receiving a provisional/temporary license in 2006. Likewise, counts do not include IMGs who renewed their temporary license for an additional year of practice. Information on license updates are retained in the database, however only the earliest instance of licensure is published here. For this reason, counts on IMGs awarded a license to practise medicine presented in this report may not match findings from other studies.

## D.3 Exclusion Criteria

Tables for Regulatory Authorities exclude IMGs whose license status includes educational and residency licenses.

## **D.4 Data Elements Reported by Regulatory Authorities**

In addition to the common data elements described in the introductory section of this report, regulatory authorities may submit information that allows reporting on the following themes:

1. First time licensees, by license type
2. Certification status\*\*
3. Country where M.D. earned\*
4. Medical specialties
5. Years since M.D. earned

\*Since the last report, we have updated the country codes based on CAPER updates and corrected for all country name changes. United Kingdom in the tables now comprises of Scotland & Wales, Ireland and England.

\*\*For tables reporting the certification status of IMGs who were granted any type of license by a regulatory authority, certification is with any of the following bodies: RCPSC, CMQ or CFPC.

## **D.5 Table Ordering and Logic of Contents**

Results from participating regulatory authorities are presented using an east to west arrangement.

Variation in the data reported between individual regulatory authorities is due to differences in data submitted by data providers. Data sharing agreements comply with specific jurisdictional constraints and limit the capacity of full standardization.

## **D.6 Notes Specific to Particular Regulatory Authorities**

Findings reported in this section result solely from data submitted by regulatory authorities. The tables were not derived by cross-referencing data from regulatory authorities with data from other data providers. For example, tables identifying the certification status of IMGs who received a license for the first time were derived from data submitted by the specific regulatory authority. These tables did not result from a match with data submitted by certifying bodies.

### **College of Physicians and Surgeons of Newfoundland and Labrador (CPSNL)**

Additional information relating to data from previous years has been submitted for the 2010 publication. As a result, data in the tables may differ from previous publications.

### **College of Physicians and Surgeons of New Brunswick (CPSNB)**

A correction has been made in Table 2. Numbers may vary from previous publications.

### **Collège des médecins du Québec**

CMQ data have now been resubmitted for 2005-2009 and the new information is now published, along with 2010 data, in Section C4. Findings which were previously reported under the Regulatory Authorities section are now presented in the exclusive C4 section consisting of information on licensing and certification status.

**College of Physicians and Surgeons of Manitoba (CPSM)**

Data from previous years have been resubmitted for the 2010 publication. As a result, data in the tables may differ from previous publications.

**College of Physicians and Surgeons of Nova Scotia (CPSNS)**

Data on IMGs awarded licenses to practise medicine in Nova Scotia became available as of July 2007. Therefore the counts for 2007 reflect licensing between July and December 2007 only. Records submitted by the CPSNS are limited to IMGs who signed and returned a release of information consent form to the CPSNS. For this reason, counts provided in the CPSNS tables are lower than the actual number of IMGs licensed for the first time in Nova Scotia.

**Yukon Medical Council**

Record level data were not submitted by the Yukon Medical Council for this report. The tables were generated using the information from the Yukon Gazette, Volume 30, Number 12, December 15, 2011. Compared to other regulatory authorities which contain records for the initial license granted by that licensing authority, YMC contains all the licensed IMGs up to December 1, 2011.

## **Summary Tables**

### **Regulatory Authorities**

This section presents summary statistics for International Medical Graduates (IMGs) who were licensed for the first time by province. Forms of licensing vary across jurisdictions and fall under the following 2 general classes: full and provisional. The requirements for a full license necessitate the completion of specified Medical Council of Canada clinical assessment examinations while a provisional license nomenclature can vary across provincial/territorial licensing bodies (e.g. conditional, defined, locum, public service, restricted, temporary, etc.).

- A. The total number of IMGs licensed for the first time for all categories of licenses continued to increase, reaching 4938 in 2010. (Table 1)
- B. Over the 6-year time period combined, some jurisdictions showed a relatively higher proportion of IMGs being issued a full license when they received their first time license. For example, New Brunswick, Ontario, and Manitoba were above the 50% or higher range; whereas, in other jurisdictions, IMGs more commonly received a provisional/other license type as their first time license (e.g., Nova Scotia, Saskatchewan and Alberta). (Table 2)
- C. When comparing license type by Geographic origin, most geographic regions had a similar distribution across jurisdictions; however, in Saskatchewan close to 50% of IMGs who received a first time license had medical credentials from Africa (South Africa); whereas for most other jurisdictions, first-time licensees originated from a combination of Africa, Asia, United Kingdom and the Americas (e.g., South Africa, India, Egypt, Pakistan, Libya, United Kingdom, United States of America, Nigeria, Iraq and Iran, listed in descending order of the top 10 countries with the highest percentage). (Table 3)
- D. In jurisdictions where the licensed specialties type was known for most IMGs, there was some variation across broad specialties. For example, in Newfoundland and Labrador, Manitoba and Alberta more than 50% of IMGs were licensed in Family Medicine; whereas, in Nova Scotia and New Brunswick less than 40% were licensed in Family Medicine. (Table 4)
- E. Across all jurisdictions, at least 65% of IMGs achieved their medical degree 10 or more years prior to receiving a first-time license to practise in Canada. (Table 5)

2009	48	25.9%
2010	49	26.5%
<b>Full</b>	<b>9</b>	<b>4.9%</b>
2009	3	1.6%
2010	6	3.2%
<b>Temp-Dalhousie</b>	<b>44</b>	<b>23.8%</b>
2007	1	0.5%
2008	13	7.0%
2009	10	5.4%
2010	20	10.8%
<b>Total</b>	<b>185</b>	<b>100.0%</b>

Counts referring to IMGs licensed for the first time are limited to the initial practice license awarded to a particular IMG by the College. These counts do not include license upgrades, transfers or reinstatements. We started collecting information on Full Licenses in the latter part of 2009, so the total number is not a complete representation of the number of Full Licenses issued by the College.

Certification equates to having successfully completed any of the following certification processes: RCPSC, CMQ or CFPC. In Saskatchewan, family physicians are not required to certify with the CFPC in order to qualify for Full Licensure. For further details on alternative forms of licensure for IMGs in Saskatchewan, please see the College of Physician and Surgeons of Saskatchewan's Registration Requirements and Procedures document available at <http://www.quadrant.net/cpss/registration/register.html>.

Data submissions from CPSBC are derived from a dynamic database following the end of the report year, approximately on March 1st. While the annual files are restricted to IMG registrants who registered for the first time between January 1st and December 31st of the report year, the license type assigned to each registrant is accurate as of March 1st of the following report year.
